

## IMPORTANT NOTICE

THE NOTES HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE “SECURITIES ACT”) AND, SUBJECT TO CERTAIN EXCEPTIONS, MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES. THE NOTES WILL BE OFFERED AND SOLD: (A) IN THE UNITED STATES TO PERSONS WHO ARE “QUALIFIED INSTITUTIONAL BUYERS” (AS DEFINED IN RULE 144A (“RULE 144A”) UNDER THE SECURITIES ACT) (“QIBS”) AND (B) TO PERSONS LOCATED OUTSIDE THE UNITED STATES IN OFFSHORE TRANSACTIONS (AS DEFINED IN REGULATION S UNDER THE SECURITIES ACT (“REGULATION S”)).

**IMPORTANT: You must read the following disclaimer before continuing.** The following disclaimer applies to the prospectus following this page (the “Prospectus”) and you are therefore advised to read this disclaimer carefully before reading, accessing or making any other use of the attached Prospectus. In accessing the attached Prospectus, you agree to be bound by the following terms and conditions, including any modifications to them from time to time, each time you receive any information as a result of such access. You acknowledge that this electronic transmission and the delivery of the attached Prospectus is intended for only you as the addressee of the email sent by BNP Paribas, Citigroup Global Markets Limited or J.P. Morgan Securities plc, and you agree you will not forward this electronic transmission or the attached Prospectus to any other person.

**NOTHING IN THIS ELECTRONIC TRANSMISSION CONSTITUTES AN OFFER OF SECURITIES FOR SALE IN ANY JURISDICTION WHERE IT IS UNLAWFUL TO DO SO. THE SECURITIES HAVE NOT BEEN, AND WILL NOT BE, REGISTERED UNDER THE SECURITIES ACT OR THE SECURITIES LAWS OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES AND, MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED EXCEPT (1) IN ACCORDANCE WITH RULE 144A OR (2) OUTSIDE THE UNITED STATES IN RELIANCE ON REGULATION S, IN EACH CASE IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES.**

**THE COMMUNICATIONS CONTAINED IN THE ATTACHED PROSPECTUS ARE ONLY MADE TO OR ARE DIRECTED AT (I) PERSONS WHO ARE OUTSIDE THE UNITED KINGDOM OR (II) PERSONS WHO HAVE PROFESSIONAL EXPERIENCE IN MATTERS RELATING TO INVESTMENTS FALLING WITHIN ARTICLE 19(5) OF THE FINANCIAL SERVICES AND MARKETS ACT 2000 (FINANCIAL PROMOTION) ORDER 2005 OR (III) HIGH NET WORTH COMPANIES, AND OTHER PERSONS TO WHOM IT MAY LAWFULLY BE COMMUNICATED, FALLING WITHIN ARTICLE 49(2)(A) TO (D) OF SUCH ORDER (ALL SUCH PERSONS TOGETHER BEING REFERRED TO AS “RELEVANT PERSONS”). THE ATTACHED PROSPECTUS MUST NOT BE ACTED ON OR RELIED ON BY PERSONS WHO ARE NOT RELEVANT PERSONS. ANY INVESTMENT OR INVESTMENT ACTIVITY TO WHICH THE ATTACHED PROSPECTUS RELATES IS AVAILABLE ONLY TO RELEVANT PERSONS AND WILL BE ENGAGED IN ONLY WITH RELEVANT PERSONS.**

**THE ATTACHED PROSPECTUS IS PERSONAL TO YOU AND MAY NOT BE FORWARDED OR DISTRIBUTED TO ANY OTHER PERSON AND MAY NOT BE REPRODUCED IN ANY MANNER WHATSOEVER, AND IN PARTICULAR MAY NOT BE FORWARDED TO ANY U.S. ADDRESS. FAILURE TO COMPLY WITH THIS DIRECTIVE MAY RESULT IN A VIOLATION OF THE SECURITIES ACT OR THE APPLICABLE LAWS OF OTHER JURISDICTIONS.**

**Confirmation of Your Representation:** In order to be eligible to view the attached Prospectus or make an investment decision with respect to the Notes described in the attached Prospectus, you must be (i) outside the United States for the purposes of Regulation S or (ii) a QIB that is acquiring the Notes for its own account or for the account of another QIB.

The attached Prospectus is being sent at your request. By accepting the email and accessing, reading or making any other use of this Prospectus, you shall be deemed to have represented to BNP Paribas, Citigroup Global Markets Limited and J.P. Morgan Securities plc, that (1) you understand and agree to the terms set out herein, (2) you and any customers you represent are “Authorized Persons” because either (a) in respect of Notes being offered pursuant to Rule 144A, you are (or the person you represent is) a QIB, and the electronic mail address to which, pursuant to your request, the Prospectus has been delivered by electronic transmission is utilized by someone who is a QIB, or (b) in respect of Notes being offered outside the United States in an offshore transaction pursuant to Regulation S, you and the electronic mail address that you gave to BNP Paribas, Citigroup Global Markets Limited or J.P. Morgan Securities plc, and to which this email has been delivered is not located in the United States, its territories and possessions (including Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, Wake Island and the Northern Mariana Islands), any State of the United States or the District of Columbia, (3) you consent to delivery of the Prospectus by electronic transmission, (4) you will not transmit the Prospectus (or any copy of it or part thereof) or disclose, whether orally or in writing, any of its contents to any other person except with the consent of the Joint Lead Managers, described in the attached Prospectus and (5) you acknowledge that you will make your own assessment regarding any legal, taxation or other economic considerations with respect to your decision to subscribe for or purchase any of the Notes.

You are reminded that the attached Prospectus has been delivered to you on the basis that you are a person into whose possession such Prospectus may be lawfully delivered in accordance with the laws of the jurisdiction in which you are located and you may not, nor are you authorized to, deliver the attached Prospectus to any other person and in particular to any United States address.

The materials relating to the offering do not constitute, and may not be used in connection with, an offer or solicitation in any place where offers or solicitations are not permitted by law. If a jurisdiction requires that the offering be made by a licensed broker or dealer and the underwriters or any affiliate of the underwriters is a licensed broker or dealer in that jurisdiction, the offering shall be deemed to be made by the underwriters or such affiliate on behalf of the Issuer in such jurisdiction.

**Restrictions:** Nothing in this electronic transmission constitutes an offer of securities for sale to persons other than Authorized Persons to whom it is directed and access has been limited so that it shall not constitute a general solicitation. If you are not an Authorized Person and have gained access to this transmission, you will be unable to purchase any of the Notes described in the attached Prospectus.

Under no circumstances shall the Prospectus constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of Notes in any jurisdiction in which such offer, solicitation or sale would be unlawful.

## THE REPUBLIC OF CÔTE D'IVOIRE

**€50,000,000 5.875% Amortizing Notes due 2031**  
**Issue Price: 99.015%**

**€50,000,000 6.875% Amortizing Notes due 2040**  
**Issue Price: 100.00%**

The Republic of Côte d'Ivoire (the “**Issuer**”, the “**Republic**” or “**Côte d'Ivoire**”) is offering the €50,000,000 5.875% Amortizing Notes due 2031 (the “**2031 Notes**”) and the €50,000,000 6.875% Amortizing Notes due 2040 (the “**2040 Notes**” and, together with the 2031 Notes, the “**Notes**”, and each a “**Series**”).

The 2031 Notes will, unless previously redeemed or cancelled, be redeemed in three instalments on 17 October 2029, 17 October 2030 and 17 October 2031. The 2040 Notes will, unless previously redeemed or cancelled, be redeemed in three instalments on 17 October 2038, 17 October 2039 and 17 October 2040. The Amortization Amounts (as defined herein) are set out in “*Terms and Conditions of the 2031 Notes—7. Redemption and Purchase*” and “*Terms and Conditions of the 2040 Notes—7. Redemption and Purchase*”, respectively.

The 2031 Notes will bear interest on their outstanding principal amount from and including 17 October 2019 at the rate of 5.875% per annum payable annually in arrear on 17 October in each year. The 2040 Notes will bear interest on their outstanding principal amount from and including 17 October 2019 at the rate of 6.875% per annum payable annually in arrear on 17 October in each year. The first payment of interest on each Series of Notes will be made on 17 October 2020 for the period from and including 17 October 2019 to but excluding 17 October 2020. Payments on the Notes will be made in Euros, in each case without deduction for or on account of any Ivorian withholding taxes unless the withholding is required by law, in which case the Issuer will, subject to certain exceptions, pay additional amounts, if any, in respect of such taxes as described herein. See “*Terms and Conditions of the 2031 Notes—8. Taxation*” and “*Terms and Conditions of the 2040 Notes—8. Taxation*”, respectively.

This prospectus (the “**Prospectus**”) constitutes a prospectus for the purposes of Regulation (EU) 2017/1129 (the “**Prospectus Regulation**”). This Prospectus has been approved by the Central Bank of Ireland (the “**CBI**”), as competent authority under the Prospectus Regulation. The CBI only approves this Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of the issuer or the quality of the Notes that are the subject of this Prospectus and investors should make their own assessment as to the suitability of investing in the Notes. Any website referred to in this document does not form part of the Prospectus and has not been scrutinised or approved by the CBI. Application has been made to the Irish Stock Exchange plc trading as Euronext Dublin (“**Euronext Dublin**”) for the Notes to be admitted to its official list (the “**Official List**”) and trading on the regulated market of Euronext Dublin (the “**Regulated Market**”). References in this Prospectus to Notes being “**listed**” (and all related references) shall mean that the Notes have been admitted to the Official List and have been admitted to trading on the Regulated Market. The Regulated Market is a regulated market for the purposes of Directive 2014/65/EU of the European Parliament and of the Council on markets in financial instruments, as amended (“**MIIFID II**”).

The Notes are expected to be rated on issuance B+ by Fitch Ratings Ltd. (“**Fitch**”) and Ba3 by Moody's Investors Services Inc. (“**Moody's**”). All references to Moody's and Fitch included in this document are to the entities as defined in this paragraph. A rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning rating organization. Each of Moody's and Fitch is established in the European Union (the “**EU**”) and registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies (the “**CRA Regulation**”).

The Notes have not been, and will not be, registered under the US Securities Act of 1933, as amended (the “**Securities Act**”) or with any securities regulatory authority of any state or other jurisdiction of the United States and may not be offered, sold or delivered within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state securities laws. Accordingly, the Notes are being offered, sold or delivered: (a) in the United States only to qualified institutional buyers (“**qualified institutional buyers**”) (as defined in Rule 144A under the Securities Act (“**Rule 144A**”) in reliance on, and in compliance with, Rule 144A; and (b) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act (“**Regulation S**”). Each purchaser of the Notes will be deemed to have made the representations described in “*United States Transfer Restrictions*” and is hereby notified that the offer and sale of Notes to it is being made in reliance on the exemption from the registration requirements of the Securities Act provided by Rule 144A. In addition, until 40 days after the commencement of the offering, an offer or sale of any of the Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if the offer or sale is made otherwise than in accordance with Rule 144A.

Neither this Prospectus nor the Notes are required to be registered or cleared under the regulations of the West African Economic and Monetary Union (*Union Economique et Monétaire Ouest Africaine* or “**WAEMU**”) or Côte d'Ivoire financial regulations. Unless they are registered and authorized by the financial regulators of WAEMU and Côte d'Ivoire, the Notes cannot be issued, offered or sold in these jurisdictions.

Notes sold in offshore transactions in reliance on Regulation S will be issued initially in the form of registered global note certificates (the “**Unrestricted Global Note Certificates**”) and Notes sold to qualified institutional buyers in reliance on Rule 144A will be issued initially in the form of registered global note certificates (the “**Restricted Global Note Certificates**”) and together with the Unrestricted Global Note Certificates, the “**Global Note Certificates**”). Each Global Note Certificate will be deposited with a common depositary for Euroclear Bank SA/NV (“**Euroclear**”) and Clearstream Banking, S.A. (“**Clearstream**”), and registered in the name of a nominee for such common depositary. See “*Form of Notes*”.

BNP Paribas, Citigroup Global Markets Limited and J.P. Morgan Securities plc. (the “**Joint Lead Managers**”) expect to deliver the Notes to purchasers in registered book entry form through the facilities of Euroclear and Clearstream on or about 17 October 2019. See “*Subscription and Sale*”.

**An investment in the Notes involves certain risks. Prospective investors should consider the factors described in “Risk Factors” beginning on page 1.**

*Joint Lead Managers and Bookrunners*

**BNP Paribas**

**Citigroup**

**J.P. Morgan**

The date of this Prospectus is 15 October 2019.

## RESPONSIBILITY STATEMENT

The Issuer accepts responsibility for the information contained in this Prospectus. To the best of the knowledge and belief of the Issuer, the information contained in this Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information.

To the best of the knowledge and belief of the Issuer, the information contained in this Prospectus is true and accurate in every material respect and is not misleading in any material respect and this Prospectus, insofar as it concerns such matters, does not omit to state any material fact necessary to make such information not misleading. The opinions, assumptions, intentions, projections and forecasts expressed in this Prospectus with regard to the Issuer are honestly held by the Issuer, have been reached after considering all relevant circumstances and are based on reasonable assumptions.

Neither the Joint Lead Managers nor any of their respective affiliates have authorised the whole or any part of this Prospectus and none of them makes any representation or warranty or accepts (i) any responsibility or liability as to the accuracy or completeness of the information contained in this Prospectus or any other information provided by the Issuer in connection with the Notes or their distribution or (ii) any responsibility for any act or omission of the Issuer or any other person (other than the relevant Joint Lead Manager) in connection with the issue and offering of the Notes.

## IMPORTANT NOTICES

### Prospectus Regulation

This Prospectus constitutes a prospectus for the purposes of Article 6 of Regulation (EU) 2017/1129 (the “**Prospectus Regulation**”).

### Validity of Prospectus

This Prospectus will be valid until the admission of the Notes to trading on the Regulated Market of Euronext Dublin. The Issuer will, in the event of any significant new factor, material mistake or inaccuracy relating to information included in this Prospectus which is capable of affecting the assessment of the Notes, prepare a supplement to this Prospectus. The obligation to prepare a supplement to this Prospectus in the event of any significant new factor, material mistake or inaccuracy does not apply when the Notes have been admitted to trading on the Regulated Market of Euronext Dublin.

### Unauthorised Information

No person has been authorized to give any information or to make any representation other than those contained in or consistent with this Prospectus in connection with the offering of the Notes (the “**Offering**”) and, if given or made, such information or representations must not be relied upon as having been authorized by the Issuer or the Joint Lead Managers. Neither the delivery of this Prospectus nor any sale made hereunder shall, under any circumstances, constitute a representation or create any implication that there has been no change in the affairs of the Issuer since the date hereof. This document may not be used for the purpose of an offer to, or a solicitation by, anyone in any jurisdiction or in any circumstances in which such an offer or solicitation is not authorized or is unlawful, including to persons in Côte d’Ivoire. See “*Subscription and Sale*”.

### Investing in Emerging Markets

Generally, investment in emerging markets such as Côte d’Ivoire is only suitable for sophisticated investors who fully appreciate the significance of the risks involved in, and are familiar with, investing in emerging markets. Investors are urged to consult their own legal and financial advisers before making an investment in the Notes.

Such risks include, but are not limited to, higher volatility and more limited liquidity in respect of the Notes, a narrow export base, budget deficits, lack of adequate infrastructure necessary to accelerate economic growth and changes in the political and economic environment. Emerging markets can also experience more instances of

corruption by government officials and misuse of public funds than more mature markets, which could affect the ability of governments to meet their obligations under issued securities. See “*Risk Factors*”.

Investors should also note that emerging markets such as Côte d’Ivoire are subject to rapid change and that the information set out in this Prospectus may become outdated relatively quickly.

### **Suitability of Investment in the Notes**

Investors are urged to consult their own legal, tax and financial advisers before making an investment in the Notes. Each potential investor in the Notes must determine the suitability of such an investment in light of its own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in this Prospectus or any applicable supplement;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the resulting effect on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including any risk resulting from the currency of the Notes being different from the purchaser’s functional currency;
- understand thoroughly the terms of the Notes and be familiar with financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) changes in economic conditions, interest rates and other factors that may affect its investment and its ability to bear the associated risks.

Furthermore, the investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) the Notes are suitable legal investments for it, (ii) the Notes can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of the Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Notes under any applicable risk based capital or similar rules.

### **No Recommendations or Advice**

Neither the Issuer nor any of the Joint Lead Managers is making any representation to any investor in the Notes regarding the legality of an investment in the Notes by such investor under any investment or similar laws or regulations, including those of Côte d’Ivoire. The contents of this Prospectus are not to be construed as legal, business or tax advice. Each prospective investor should consult with its own legal, business or tax adviser regarding an investment in the Notes.

This Prospectus is not intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by the Issuer or the Joint Lead Managers that any recipient of this Prospectus should purchase any of the Notes. Each investor contemplating purchasing Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the Issuer. Neither this Prospectus nor any other information supplied in connection with the Offering constitutes an offer or invitation by or on behalf of the Issuer or any of the Joint Lead Managers to subscribe for or purchase any Notes.

Neither the delivery of this Prospectus nor the offering, sale or delivery of the Notes shall in any circumstances imply that the information contained herein concerning the Issuer is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Offering is correct as of any time subsequent to the date indicated in the document containing the same. The Joint Lead Managers expressly do not undertake to review the financial condition or affairs of the Issuer during the life of the Notes or to advise any investor in the Notes of any information coming to their attention.

### **Stabilisation**

IN CONNECTION WITH THE ISSUE OF EACH SERIES OF NOTES, CITIGROUP GLOBAL MARKETS LIMITED AS STABILIZATION MANAGER (THE “**STABILIZATION MANAGER**”) (OR PERSONS

ACTING ON BEHALF OF THE STABILIZING MANAGER) MAY OVERALLOT NOTES OF THE RELEVANT SERIES OR EFFECT TRANSACTIONS WITH A VIEW TO SUPPORTING THE MARKET PRICE OF THE NOTES OF THE RELEVANT SERIES AT A LEVEL HIGHER THAN THAT WHICH MIGHT OTHERWISE PREVAIL. HOWEVER, STABILIZATION MAY NOT NECESSARILY OCCUR. ANY STABILIZATION ACTION MAY BEGIN ON OR AFTER THE DATE ON WHICH ADEQUATE PUBLIC DISCLOSURE OF THE TERMS OF THE OFFER OF THE NOTES OF THE RELEVANT SERIES IS MADE AND, IF BEGUN, MAY CEASE AT ANY TIME, BUT IT MUST END NO LATER THAN THE EARLIER OF 30 DAYS AFTER THE ISSUE DATE OF THE NOTES OF SUCH SERIES AND 60 DAYS AFTER THE DATE OF THE ALLOTMENT OF THE NOTES OF SUCH SERIES. ANY STABILIZATION ACTION OR OVER ALLOTMENT SHALL BE CONDUCTED BY THE STABILIZATION MANAGER (OR PERSONS ACTING ON BEHALF OF THE STABILIZATION MANAGER) IN ACCORDANCE WITH ALL APPLICABLE LAWS AND RULES.

The Stabilization Manager has acknowledged that the Issuer has not authorized the issuance of more than €50,000,000 in aggregate principal amount of the 2031 Notes and €50,000,000 in aggregate principal amount of the 2040 Notes.

### **MIFID II product governance / Professional investors and ECPs only target market**

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

The Issuer is relying on an exemption from registration under the Securities Act. By purchasing the Notes, each purchaser will be deemed to have made the acknowledgements, representations, warranties and agreements described in "*United States Transfer Restrictions*" in this Prospectus. Each prospective investor should understand that it will be required to bear the financial risks of its investment.

### **Restriction on Distributions**

This Prospectus does not constitute an offer to sell or the solicitation of an offer to buy the Notes in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The distribution of this Prospectus and the offer or sale of Notes may be restricted by law in certain jurisdictions.

The Issuer and the Joint Lead Managers do not represent that this document may be lawfully distributed, or that any Notes may be lawfully offered, in any such jurisdiction or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer or the Joint Lead Managers (save for the approval of this document as a prospectus by the CBI) which is intended to permit a public offering of any Notes or distribution of this document in any jurisdiction (including Côte d'Ivoire) where action for that purpose is required. Accordingly, no Notes may be offered or sold, directly or indirectly, and neither this Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable securities laws and regulations. Persons into whose possession this Prospectus or any Notes come must inform themselves about and observe any such restrictions.

The Notes have not been registered with, recommended by or approved or disapproved by the US Securities and Exchange Commission (the "**SEC**") or any other federal or state securities commission in the United States nor has the SEC or any other federal or state securities commission in the United States confirmed the accuracy or determined the adequacy of this Prospectus. Any representation to the contrary is a criminal offence in the United States. The Notes are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted under applicable US federal and state securities laws pursuant to an exemption from registration. See "*United States Transfer Restrictions*".

The Notes have not been registered with, recommended by or approved or disapproved by WAEMU nor has WAEMU confirmed the accuracy or determined the adequacy of this Prospectus.

This Prospectus is not for public distribution in the United States and is only being provided to a limited number of qualified institutional buyers for informational use solely in connection with the consideration of the purchase of the Notes. It may not be copied or reproduced in whole or in part nor may it be distributed or any of its contents disclosed to anyone other than the prospective investors to whom it is originally submitted.

This communication is only being distributed to and is only directed at (i) persons who are outside the United Kingdom or (ii) investment professionals falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “**Order**”) or (iii) high net worth companies, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order (all such persons together being referred to as “**relevant persons**”). The Notes are only available to, and any invitation, offer or agreement to subscribe, purchase or otherwise acquire such Notes will be engaged in only with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

## **RISK FACTORS**

*Prospective investors should read the entire Prospectus. Investing in the Notes involves certain risks. The Issuer believes that the following factors may affect the Issuer's economy and its ability to fulfill its obligations under the Notes. In addition, factors which are material for the purpose of assessing the market risks associated with the Notes are also described below. These factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.*

*The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes, but the inability of the Issuer to pay principal, interest or other amounts on or in connection with any Notes may occur for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes comprise an exhaustive list of the risks inherent in investing in the Notes, and the Issuer may be unable to pay amounts due on the Notes for reasons not described below.*

*Prospective investors should also read the detailed information set out elsewhere in this Prospectus prior to making any investment decision.*

### **Risks Relating to the Republic**

***Investing in Notes of emerging market issuers such as Côte d'Ivoire involves a higher degree of risk than more developed markets.***

Investing in securities of emerging market issuers, such as Côte d'Ivoire, generally involves a higher degree of risk than investments in securities of corporate or sovereign issuers from more developed countries. These risks include the possibility of economic, political or social instability that may be caused by many different factors, including, in the case of Côte d'Ivoire, declines in the price of primary commodity exports such as cocoa, coffee and gold, failure of the Government to implement or maintain the pace of political, fiscal, economic and social reforms, changes in governmental economic, tax or other policies, inflation and financial crises in other emerging market countries that could have an adverse effect on investor appetite for emerging market debt securities generally. In addition, political, civil or financial instability in Côte d'Ivoire, its neighbours or elsewhere in West Africa may have an adverse impact on Côte d'Ivoire.

Emerging markets may also experience a greater degree of corruption of government officials, misuse of public funds and administrative errors or delays (in payment or otherwise) than more mature markets. This could affect the ability of the Government to meet its obligations under the Notes. Any of the factors above, as well as the volatility in the markets for debt securities similar to the Notes, may adversely affect the liquidity of, and the trading market for, the Notes.

***Côte d'Ivoire's emerging economy status objective is contingent on continued improvement of the country's social cohesion and political stability.***

While Côte d'Ivoire has emerged from its 2002-2011 political and military crisis, if it is to achieve the status of an emerging economy then continued improvements of the country's social cohesion and stability are required (see "*The Republic of Côte d'Ivoire –Political History*"). After the four years of implementation of the 2012-2015 NDP, peace has been restored, social cohesion has been strengthened and the economy has experienced strong growth since 2012 with an average real GDP growth rate of 9.2% from 2012 to 2015 according to the Government. The significant progress towards stabilizing the security and socio-political situation in the country led the United Nations Security Council in April 2014 to partially lift the arms embargo to Côte d'Ivoire and to finally terminate sanctions imposed in 2005 on diamond imports from Côte d'Ivoire. The United Nations Security Council fully lifted the arms embargo to Côte d'Ivoire in April 2016. On 30 June 2017, the ONUCI definitively completed its mandate and withdrew from Côte d'Ivoire. See "*The Republic of Côte d'Ivoire–Political History–Recent Political Developments*".

However, there remains an ongoing need for Côte d'Ivoire to pursue its efforts to strengthen political stability in order to fully eradicate the roots and the effects of the decade-long crisis that led to the partition of the country for close to five years, disrupted the strategic sectors of the economy and culminated in the post-election crisis of early 2011. After this decade-long crisis, the quality and effectiveness of the institutions of Côte d'Ivoire still need strengthening. For example, the opposition exercises insufficient oversight over government activity and various political parties have unequal access

to public funding and State media. Although the new Constitution was adopted with 93.42% of the vote on 30 October 2016, voter turnout was 42.42% and several opposition parties demonstrated against the new Constitution. In the view of the Government, the new Constitution was designed to strengthen the Ivorian political framework notably through the creation of the office of Vice President, a second chamber of the Parliament (the Senate), which has been fully operational since 5 April 2018, and the Court of Audit. However, despite improving national reconciliation, these important reforms did not appear to benefit from a wide support outside the coalition supporting the Government of President Ouattara. In addition, the acquittal of Laurent Gbagbo by the ICC in the Hague on 15 January 2019, which was appealed by the prosecutor of the ICC on 16 September 2019, may maintain a degree of tension among the Gbagbo supporters and the Government of President Ouattara, in particular along the Liberian border where pro-Gbagbo refugees are still located, and especially in the context of the forthcoming presidential elections. The next presidential elections in October 2020 and the expected succession to President Ouattara following the end of his second term will also need to be managed skilfully to avoid any negative impact on the current positive economic and political trajectory. Furthermore, the composition of and recent reforms to the Independent Electoral Commission (IEC), which is responsible for supervising elections in Côte d'Ivoire, has been the subject of disagreement between the Government and members of the opposition. There can be no assurance that there will not be a recurrence of social unrest surrounding any forthcoming elections in Côte d'Ivoire, including the 2020 presidential election.

If Côte d'Ivoire fails to effectively restore sustainable cohesion and reconciliation through more inclusive growth, poverty reduction and stronger institutions or fails to maintain political stability, this may undermine the country's ability to fully realize its economic potential, which may have an adverse effect on Côte d'Ivoire's ability to perform its obligations under the Notes, attract foreign and private sector investments and may in turn result in lower economic growth than expected under the 2016-2020 NDP.

***Côte d'Ivoire continues to face internal security challenges, including in relation to the demobilization and reintegration of ex-combatants.***

While the Government considers the process of disarmament, demobilization and reintegration of ex-combatants that took part in the military conflict to be substantially complete, continued security concerns were illustrated by violent incidents sparked by the protests of 8,400 mutinous soldiers over a wage dispute, between 12 and 16 May 2017. See "*The Republic of Côte d'Ivoire –Disarmament, Demobilization and Reintegration of Ex-Combatants*". These 8,400 soldiers are the former members of the anti-Gbagbo *Forces Nouvelles* combatants who were integrated into the army pursuant to the Ouagadougou Political Agreements of 2007 in an effort to unify the army of Côte d'Ivoire and reconcile the Ivorian society. These mutineers had organized a first series of protests in January 2017 to demand a CFAF 12 million bonus payment per reintegrated soldier, which they claimed had been promised to them during the civil war against former President Laurent Gbagbo's supporters. The Government agreed to pay the bonus requested following the January protests and scheduled the payment for May 2017. The 12-16 May 2017 protests were organized by mutinous soldiers fearing that the bonus payment would not be made as scheduled following the statements of certain members of the mutinous soldiers although the final payments were made at the end of June 2017. According to the Government, the 12-16 May 2017 protests resulted in four known deaths and nine other casualties. Furthermore, on 23 May 2017, other former *Forces Nouvelles* combatants who were demobilized following the 2011 post-election crisis organized protests reportedly to demand the payment of a CFAF 18 million per demobilized ex-combatant. According to the Interior Ministry, five demobilized ex-combatants were killed and 14 were injured as a result of a confrontation with policemen in Bouaké. Demobilized ex-combatants are estimated to be about 6,000 according to media reports, although the Government does not recognize this group or their claims and believes that the situation of demobilized combatants was adequately addressed through the DDR programme. See "*The Republic of Côte d'Ivoire –Defence and Security*". These events suggest that, despite the efforts of the Government, the situation of the ex-combatants, whether reintegrated into the army or demobilized, remains sensitive and a potential source of insecurity and additional strains on the budget. Despite the end of the DDR, there is therefore a continued need for the Government to further consolidate the unity of the army.

The Government believes that the agreement found with the representatives of the 8,400 mutinous soldiers and the final bonus payment made in June 2017 for a total of CFAF 100.8 billion was an important step contributing to the resolution of the claims of the mutinous *Forces Nouvelles* combatants. In addition, the Government has made the improvement of living standards, the professionalization of the armed forces and the enhanced training of the military a priority and is

committed to devoting appropriate budgetary resources to the modernization of its security and military forces. See “*The Republic of Côte d’Ivoire - Defense and Security*”.

Defence and security have been a priority for President Ouattara’s Government since he came to power in 2011. The 2019 budget allocated CFAF 620.4 billion for defence and security spending, compared to CFAF 584.8 billion in 2018, including CFAF 263.4 billion for the armed forces, CFAF 76.0 billion for the *gendarmerie* and CFAF 175.7 billion for the police, in connection with the implementation of the Military Planning Act and the Domestic Security Planning Act enacted on 13 January 2016.

However, if the Government’s reintegration efforts are not successful or do not result in the level of social cohesion and security required for the successful implementation of the 2016-2020 NDP, this will have a negative effect on the Government’s ability to retain or attract sufficient FDI flows and private sector contribution to the growth of the economy, which may in turn affect the Government’s ability to honour its financial commitments to its creditors, including its obligations under the Notes.

These security issues are compounded by other threats, including the crises in some neighbouring countries like Mali, recurrent domestic or regional terrorist attacks (including in Burkina Faso in March 2018 and September 2019), the proliferation of small arms and light weapons in the country, repatriating and reintegrating pro-Gbagbo refugees and preserving stability along the border with Liberia. According to the UNHCR, an estimated 250,000 Ivoirians fled to Liberia during the post-election crisis in 2011, where they took refuge in one of six refugee camps. By March 2014, all but approximately 46,000 had returned home and three of the camps had been closed down. In July 2014, nearly 38,000 Ivorian refugees living in Liberia were unable to return home after Côte d’Ivoire temporarily closed its borders with Liberia due to the Ebola outbreak. See “*–Côte d’Ivoire suffers from high levels of poverty and health risks.*” With repatriation from Liberia resuming in December 2015, approximately 19,000 additional Ivoirians had returned home by mid-September 2016. As of August 2019, 8,652 Ivoirians are still refugees in Liberia according to UNHCR’s estimates. In January 2018, the repatriation programme was improved with an increase in the allowances granted to Ivorian refugees returning to Côte d’Ivoire (from CFAF 75,000 to CFAF 150,000 per adult, and from CFAF 50,000 to CFAF 75,000 per child).

If security issues (both internal and external) are not adequately addressed or if the perception of security deteriorates, then this could affect social harmony and investor confidence in Côte d’Ivoire and have a material adverse effect on economic performance and the Government’s ability to service the Notes.

#### ***Côte d’Ivoire’s economy and security may be negatively affected by regional considerations***

Côte d’Ivoire has a number of regional trading partners upon which its economy relies heavily. Côte d’Ivoire is an active member of the West African regional organizations, such as WAEMU and ECOWAS, which foster more economic integration among their member countries. For example, an important part of the activity of the ports of Côte d’Ivoire in Abidjan and San Pedro relates to goods traded by Burkina Faso, Mali and Niger, and Côte d’Ivoire exports electricity to a number of its neighbouring countries. In 2018, ECOWAS countries represented an estimated 19.2% of Côte d’Ivoire’s exports and an estimated 16.2% of its imports, with an estimated 12.0% of such imports coming from Nigeria. Political instability, social unrest, epidemics and/or increased fragility are common in the West African region and, among other factors, could result in a reduction in Côte d’Ivoire’s exports to, and imports from, those countries or in regional contagion.

The West African region has also been subject to on-going political and security concerns. In particular, the ongoing conflict and political instability in Mali, a neighbour of Côte d’Ivoire and a significant trading partner, has been the subject of significant ECOWAS and international attention and intervention (including from Côte d’Ivoire), and its impact and resolution are difficult to predict. Any further escalation of this conflict or a more aggressive stance by parties to the conflict could be a further destabilizing factor for the region. The perception of regional instability and insecurity caused by the ongoing Mali political instability has been exacerbated by the presence of Boko Haram in northeast Nigeria and the terrorist attacks by Daesh and Boko Haram and groups claiming affiliation with them in Mali, Burkina Faso and Niger during 2015, 2016, 2018 and 2019. On 13 March 2016, heavily armed assailants attacked three hotels at a beach resort in Grand-Bassam, located approximately 40 km east of Abidjan resulting in 19 deaths. See “*The Republic of Côte d’Ivoire –Fight against Terrorism and Piracy*”. These regional threats and fragility among Côte d’Ivoire’s neighbours

and partner countries could have an adverse effect on Côte d'Ivoire's growth prospects, which could affect its ability to meet its financial obligations generally and the Government's ability to service the Notes.

In particular, the outbreak of new terrorist attacks or activities in the country and/or in the region could further strain both Government finances and political stability in the country and in the region. These events could have a material adverse impact on the Ivorian economy, including declines in FDI and tourism flows or disruptions on Côte d'Ivoire's exports and imports to and from the partner countries involved. Any of the foregoing could also lead to the diversion of Government resources towards increased military and security spending, which may reduce overall economic growth and increase Côte d'Ivoire's budget deficit.

***Côte d'Ivoire's NDP growth outlook for the medium-term is conditioned upon the successful implementation of an extensive reform agenda and the mobilization of sufficient fiscal resources, external funding and private sector investments.***

In order to consolidate its achievements under the 2012-2015 NDP, the Government adopted the 2016-2020 NDP on 9 December 2015 with the overall objective of making Côte d'Ivoire an emerging economy by 2020. See "*The Economy—National Development Plans*". The financial resources required for the implementation of the 2016-2020 NDP investment programme are estimated at CFAF 30,000 billion over the 2016-2020 period, with funding expected to come from both public and private sources, including a public investment budget of CFAF 11,284 billion and the mobilisation of CFAF 18,716 billion in external and private financing. To mobilise its share of this funding, the Government is pursuing a comprehensive set of structural reforms with the help of technical assistance from international partners, notably the IMF and the World Bank, to improve economic governance and encourage a greater contribution from the private sector. These reforms include fiscal measures to improve revenue collection and public spending and to better control external and domestic indebtedness, such as the overhaul of the budgetary process, reforms of the tax system and of the public procurement law, the restructuring of the electricity sector and of the public banking sector. Among the problems resulting from undisciplined budgetary processes and controls before May 2011 were expenditures incurred outside the budgetary process and late payments to private sector suppliers. In addition, the Government will also need to complete economic and financial system reforms in order to improve the business and regulatory environment, diversify the economy, extend banking sector penetration and facilitate access to credit so as to promote and encourage participation of the domestic and international private sector in the NDP investment program.

In spite of the Government's efforts, the economic and other assumptions underlying the objectives set forth in the 2016-2020 NDP may not be met due to a number of possible factors, including: uncertainties as to the pace of the structural reforms affecting the public sector; possible delays in the effective mobilisation of private sector and external financing, which could in turn negatively affect the implementation of investment projects and cause an increase and greater reliance on public debt; and the time needed to eliminate remaining bottlenecks and inefficiencies (in respect of public spending, public infrastructure, business climate and subsidies to the electricity sector) resulting from the decade-long crisis. Issues that may adversely affect the implementation of the 2016-2020 NDP also include project execution risks, such as financing gaps, delays or suspensions in scheduled fund disbursements from external sources related to donor oversight programs, changes in financial commitments, shortages in resources for management and project maintenance either during or after completion including of labour/or materials, and political or social resistance to policies required for project completion, which, if (and, as in certain cases, have) materialised, could slow development progress and lead to lower-than-expected growth. Furthermore, estimates presented in this Prospectus concerning the Government's progress in meeting its objectives under the 2016-2020 NDP may prove to be inaccurate and final results may not be known for some time after 2020 due to the time required to collect data and finalise results. See "*— Official Statistics published by Côte d'Ivoire may be more limited and less accurate than those produced by developed countries and, to the extent currently presented as estimates and forecasts, may be materially adjusted in the future once finalized.*". If Côte d'Ivoire fails to implement its fiscal reforms successfully or to secure appropriate external and private sector funding in a timely manner to meet its 2016-2020 NDP objectives, this could result in an adverse effect on Côte d'Ivoire's economic performance and ability to service its indebtedness, including the Notes.

***Côte d'Ivoire's economy is dependent on its agriculture sector and in particular the cocoa sector which is highly vulnerable to global price volatility and to weather-related shocks.***

Since the 1960s, Côte d'Ivoire's economic performance has been dominated by agriculture, in particular the cocoa sector. According to Government estimates, the weight of the primary sector in the nominal GDP, while decreasing in proportion, still represented 19.8% of the country's nominal GDP in 2018, with coffee and cocoa, together, representing more than 12.1% of the country's nominal GDP, 42.6% of the value of exports (excluding exceptional goods, estimated data) and 9.7% of its tax revenue. As of the date of this Prospectus, Côte d'Ivoire is the world's largest producer of cocoa and accounts for more than one third of the global cocoa production, according to the World Cocoa Foundation. As such, the Government considers cocoa production as a key element of the country's economic strategy. The primary sector is also the principal employer of a large part of the population. Côte d'Ivoire's economy is thus vulnerable to challenges affecting the performance of its agriculture, and the cocoa sector in particular including global demand, pricing levels and competition.

Côte d'Ivoire's agriculture suffered severely from the 2002-2011 political and military crisis. This crisis resulted in the disruption of production cycles, the interruption of a number of development programs and projects, notably in the northern, central and western regions, the destruction of plantations and production facilities and the cancellation of agricultural research programs. A further result of the crisis was the significant displacement of people, which has increased land ownership disputes, particularly in the coffee and cocoa producing areas, an issue that is being addressed by the Government through the implementation of the land reform adopted in 1998 to formalize customary land rights. In addition, for several years, the country's agriculture has suffered from inadequate management structures and inadequate funding and maintenance. These factors, individually or in aggregate, may continue to have a negative impact on Côte d'Ivoire's agricultural production and its economic performance. The Government, with the notable help of the World Bank, has engaged in a number of reforms designed to support the cocoa sector, by encouraging the domestic processing of cocoa, with approximately 27% of cocoa production being processed in Côte d'Ivoire in 2018 (aimed also at developing more value-added services and industry within the country), by enhancing transparency and efficiency through a more adequate taxation system and the creation of a single regulatory and stabilization structure in charge of all operations in the cocoa sector, and, as further discussed below, by ensuring higher remuneration levels for the farmers through the application since 2 November 2011 of a farm-gate price equivalent to 60% of the CIF price (up from the previous level of 30%). In addition, the Government is implementing measures designed to support diversification of the agriculture sector through the development of other agricultural products, such as rice, cotton, cashew nuts, bananas and palm oil. See "*The Economy – Principal Sectors of the Ivorian Economy – Agriculture*". If Côte d'Ivoire fails to successfully continue implementing its agenda on agricultural reforms outlined above, the Government may not be able to meet its medium-term strategic objectives by 2020, which could result in a loss of competitiveness and lower economic growth.

In addition, agricultural production is dependent on weather conditions. In particular, cocoa trees and coffee plants are sensitive to changing weather conditions, which might be exacerbated by climate change, and are also exposed to the spread of disease. For example, parts of Cote d'Ivoire have seen an increase in swollen shoot disease which affects cocoa trees and has resulted in lost crops. The Coffee Cocoa Council (*Conseil Café-Cacao*) has indicated that up to 100,000 hectares of infected cocoa trees will need to be destroyed by 2022 to stem the spread of the disease. A period of low agricultural production, whether due to poor weather conditions such as drought or flood, or disease or other causes, may result in lower economic growth for the country than anticipated.

The economic performance of the agricultural sector is also dependent on international demand and commodity prices. For instance, cocoa and coffee prices have fluctuated significantly in the past and may fluctuate in the future. According to the International Cocoa Organization (ICCO), the ICCO daily price first closed above US\$3,000 per metric ton on 12 February 2014 as a result of an increased demand of cocoa products in emerging markets (in particular, Asia). According to the ICCO Monthly Cocoa Market Review of December 2018, the ICCO daily price reached its highest level of US\$2,799 per ton for the year on 1 May 2018 (compared to a peak of US\$2,262 per ton for 2017), and increased by 25% between 29 December 2017 and 31 December 2018 (after a decrease by 24% between 29 December 2016 and 29 December 2017). As of 26 September 2019, the ICCO daily price was US\$2,430.22 per ton. This volatility affects both the overall performance of the cocoa sector, with an 13.8% reduction in the country's export earnings for 2018 (processed cocoa), and the earnings of the farmers. Volatility in the commodity prices for cocoa also impact cocoa production by affecting the purchase price paid to producers and there is no assurance that the fluctuations in commodity prices will continue to allow the high remuneration levels required to incentivize cocoa producers. As a result, the Coffee Cocoa Council (*Conseil Café-Cacao*) has taken several measures to support sector participants, including pre-financing

arrangements for certain exporters and tax reductions designed to safeguard the price paid to producers. The Government has also set up a stabilization fund and a technical reserve fund to cover the risks arising from the price guarantee system for the producers in order to manage the volatility of cocoa prices, which in turn may put a strain on Côte d'Ivoire's public finances if cocoa prices were to drop sharply and for a prolonged period. In July 2019, Côte d'Ivoire and Ghana announced their common intention to implement a mechanism providing that any buyer under an export contract shall have to pay, in addition to the market price, USD 400 per ton of cocoa, for the 2020-2021 campaign that will open in October 2020. This aims at selling at a price no less than USD 2,600 per ton of cocoa, in order to ensure a minimal guaranteed farm gate price for domestic producers. Despite these measures, there can be no assurance that cocoa prices will return to their February 2014 highs or will not further decrease from their current levels or that such efforts to protect the Ivorian economy and domestic producers against cocoa price volatility will be successful. Any decrease in the production, demand for or price in cocoa could have a material adverse effect on Côte d'Ivoire's level of export earnings and, therefore, its ability to service the Notes.

***Failure to continue growing the non-agricultural sectors of its economy may constrain Côte d'Ivoire's economic growth.***

Over the last few years, in order to reduce its dependence on the agricultural sector, Côte d'Ivoire has continued to develop the non-agricultural sectors of its economy by encouraging trade, construction, telecommunications, financial services, mining, oil and gas and manufacturing activities. Together, the secondary and tertiary sectors are estimated to have grown in real terms by an estimated 16.3% in 2018, 9.6% in 2017, 15.5% in 2016, 16.5% in 2015, and 21% in 2014. The secondary and tertiary sectors represented 56.7% of nominal GDP in 2016, and are estimated to have represented 56.5% of nominal GDP in 2017 and 57.8% of nominal GDP in 2018. However, a slowdown in the efforts to address the remaining bottlenecks regarding infrastructure (including inadequate power and water supplies, transportation systems and transformation capabilities), reduced credit availability and consumer demand, local shortages of skilled managers and workers or inconsistent government policies may constrain development in these sectors and the current rate of growth may not be sustained in future periods.

If Côte d'Ivoire fails to continue to implement its reforms successfully and to grow the non-agricultural sectors of its economy, it may constrain Côte d'Ivoire's economic growth and thereby affect Côte d'Ivoire's ability to service the Notes.

***Unsustainable levels of indebtedness could have a material adverse effect on Côte d'Ivoire's economy, its sovereign credit ratings and its ability to service its debt, including the Notes.***

At the end of December 2018, Côte d'Ivoire's total outstanding external debt was estimated at approximately CFAF 7,613.4 billion, representing 31.9% of estimated nominal GDP. As a result of reaching the completion point under the IMF and World Bank enhanced initiative for the Heavily Indebted Poor Countries (“HIPC”) in June 2012, Côte d'Ivoire's external indebtedness was reduced to what the IMF and the World Bank viewed at the time as a sustainable level (45.1% of forecast nominal GDP) and the Government resumed regular debt service payments to all of its external creditors which had been suspended partially since 2009. See “*Public Debt – Multilateral Debt – Relationship with Creditors – Heavily Indebted Poor Countries Initiative*”. Côte d'Ivoire is current and has met in a timely manner all payment obligations to all external creditors, including all holders of outstanding bonds.

The level of domestic indebtedness of Côte d'Ivoire represents a constraint for the management of public finances. At the end of December 2018, total outstanding domestic debt amounted to around CFAF 3,994.4 billion (16.7% of nominal GDP). In parallel with the implementation of the HIPC initiative for its external debt, the Government undertook to negotiate arrears settlement plans with various holders of domestic debt and has now substantially completed this process. Côte d'Ivoire is up-to-date with its payment obligations to its domestic creditors. See “*Public Debt – Public Debt – Domestic Public Debt*”.

Each year, the Government updates its SDMT covering the next five years based on an updated debt sustainability analysis in order to better control its indebtedness risk in light of the gradual increase of public debt related to the significant financing mobilized for the implementation of the NDP. See “*Public Debt – The SDMT and the DSA*”.

However, the IMF considers that Côte d'Ivoire remains vulnerable to economic shocks and stresses the need for continued control of the level of indebtedness, strong fiscal management and structural reforms. The IMF's DSA qualifies the Côte d'Ivoire debt distress risk as moderate. While the IMF's end of mission press release no. 19/96 published in March 2019 concludes that all performance criteria and all but one indicative targets for the end of December 2018 were met by Côte d'Ivoire, failure to continue to meet the conditions of the economic and sectorial programs agreed with the IMF and the World Bank may adversely affect Côte d'Ivoire's ability to make further drawings under the various facilities offered by these institutions and ultimately affect the Government's ability to service the Notes. Furthermore, the SDMT 2017-2021 shows that Côte d'Ivoire's public debt remains exposed to a risk of refinancing due to a short weighted average maturity of the debt. The weighted average maturity of the total debt portfolio at the end of 2018 was eight years and two months; that of external debt was ten years and one month and that of the domestic debt four years and six month. The Government has identified recourse to Eurobond instruments with longer-term maturities as an efficient way to improve the weighted average maturity of the debt portfolio, but borrowings on the international financial markets may increase the exchange risk exposure. If the Government fails to successfully implement its debt strategy, debt levels could once again rise to an unsustainable level, which may negatively impact Côte d'Ivoire's sovereign credit ratings and its ability to service the Notes.

***Failure to continue to adequately address Côte d'Ivoire's infrastructure deficiencies could adversely affect Côte d'Ivoire's economy and growth prospects.***

A long period of underinvestment (largely caused by the crisis and political and military turmoil between 2002 and 2011) resulted in significant deterioration of Côte d'Ivoire's public infrastructure, and the absence of basic infrastructure to support and sustain growth and economic development. Problems with power generation, transmission and distribution infrastructure, drinking and irrigation water infrastructures, health and educational systems, deteriorated tourist infrastructures, lack of roads and bridges, especially in rural areas, and a deteriorating road network, congested ports and airports and obsolete rail infrastructure have severely constrained socio-economic development in Côte d'Ivoire. Although significant progress has been made in many of these sectors and the telecommunications and internet facilities in recent years, the state of development in those sectors cannot be considered on a par with that in more developed economies. The Government has identified Côte d'Ivoire's infrastructure weaknesses as an impediment to economic growth and the 2016-2020 NDP includes ambitious targets for infrastructure improvements which would require significant investments, including through FDI inflows and local private sector investments. For instance, the Government completed the construction of and inaugurated the third Abidjan bridge in December 2014 (built in 27 months), increased the production capacity of the Azito thermal power plant in April 2015 (+140 MW), and commissioned the Soubré dam in May 2017. See "*The Economy – Principal Sectors of the Ivorian Economy – Energy and Mining – Electricity*". On 28 February 2018, the Government adopted four decrees on projects declared as being in the public interest, three of which are related to highway modifications and the other is related to the construction of the fourth bridge in Abidjan between the municipality of Yopougon and Plateau. See "*The Economy – Principal Sectors of the Ivorian Economy – Building and Public Works Sector*". In 2019, the Government also launched reforms in order to enhance maritime transportation and trade, with the construction of a multipurpose industrial terminal in the Autonomous Port of San Pedro. See "*The Economy – Principal Sectors of the Ivorian Economy – Economic Infrastructure – River, lagoon and Maritime Transport*". Failure to continue to significantly improve Côte d'Ivoire's infrastructure or to attract investment and funds required for such improvements could adversely impact Côte d'Ivoire's economy, competitive ranking and growth prospects, including its ability to meet GDP growth targets and, accordingly, its ability to service the Notes.

***A significant portion of Côte d'Ivoire's economy is not recorded and the Government may not be able to realize the full extent of its potential tax revenues.***

A significant portion of Côte d'Ivoire's economy, estimated at more than one third of total nominal GDP, is comprised of the informal, or shadow, economy. In particular, informal economic activity is significant in agriculture, a key sector of Côte d'Ivoire's economy, as well as in the crafts industries. The informal economy is by definition not recorded and is not or only partially taxed, resulting in a loss of potential revenue for the Government, ineffective regulation, unreliability of statistical information (including the understatement of GDP and the contribution to GDP of various sectors) and inability to monitor or otherwise regulate a large portion of the economy. Lack of effective regulation and enforcement in this respect also gives rise to other issues, including health and safety and employment issues. The

Government is attempting to address the challenges posed by the informal economy by streamlining certain laws and regulations, particularly in the area of taxation where it is working to facilitate compliance with tax payment obligations through the implementation of online reporting and payment means, and by improving its statistical apparatus with technical assistance from the IMF. However, there can be no assurance that such reforms will adequately address the issues and bring the informal economy into the formal sector in the short term.

***Failure to adequately address actual and perceived risks of corruption may adversely affect Côte d'Ivoire's economy and ability to attract foreign direct investment.***

Although Côte d'Ivoire has implemented, and continues to pursue, initiatives to prevent and fight corruption and unlawful enrichment, there have been allegations and incidents of corruption and misuse of public funds in Côte d'Ivoire as is the case in other emerging markets. Côte d'Ivoire is ranked 105 out of 180 in Transparency International's 2018 Corruption Perceptions Index report published on 29 January 2019, 122 out of 190 in the World Bank's "Doing Business 2019" report published on 31 October 2018 (compared to 139 out of 190 the previous year), 78 out of 186 in the 2019 Economic Freedom Index and 22 out of 54 on the 2018 Ibrahim Index of African Governance (compared to 41 in 2008).

Since 2012, the Government has implemented various measures to fight corruption. In April 2012, Côte d'Ivoire adhered to the EITI to foster good governance and environmental sustainability in the extractive industry. In October 2012, it ratified the UNCAC and the UNTOC. In November 2012, Côte d'Ivoire ratified the African Convention on Preventing and Combating Corruption, which it had signed in 2004. Furthermore, the Government adopted two ordinances regarding the issue of corruption in September 2013. The first ordinance aims at improving the legal framework to prevent and fight corruption and the second ordinance established an independent High Authority for Good Governance, which is in charge of developing and implementing a national strategy to fight corruption. Also, on 5 June 2014, a new law on transparency in the management of public finances was passed in accordance with WAEMU rules and regulations. As of the date of this Prospectus, the public procurement system is operational and the Government is committed to continuing to improve it by, in particular, implementing the CPMP throughout different ministries and putting the Integrated System for Public Procurement Management (*Système Intégré de Gestion des Marchés Publics*) online, to make transactions more accessible and accelerate their processing. See "*Public Finance - Transparency, Fight against Corruption and Public Procurement Framework*". The IMF Report 19/197 dated July 2019 further notes that the authorities are determined to improve governance and fight corruption, although efforts are required to align the framework with best practices, including by publishing the asset declarations that elected and government officials are required to file. However, as pointed out by the IMF Report 16/383 of December 2016, corruption still remains a challenge to be addressed by the Government and key areas of reforms include enforcing the recently-adopted legal framework to prevent and fight corruption and improving the relations between the tax/customs services and taxpayers. The absence of an independent prosecutor under the authority of the President of the Republic can limit the efficiency of this fight against corruption. Failure to continue to step up efforts to prevent or fight corruption in the public sector or perceived risks of corruption in Côte d'Ivoire could have an adverse effect on Côte d'Ivoire's economy and may have an adverse effect on Côte d'Ivoire's ability to attract and/or maintain foreign investment.

***Côte d'Ivoire may face a lack of continued access to foreign direct investment.***

Achieving the NDP's growth objective is conditional upon the levels and pace of foreign direct investment. Côte d'Ivoire's total FDI, which comprises equity capital and other capital inflows, increased from CFAF 208.9 billion in 2014 to CFAF 283.8 billion in 2015 and CFAF 325.5 billion in 2016, before decreasing to CFAF 173.6 billion in 2017, and are estimated to have represented CFAF 332.7 billion in 2018. According to the UNCTAD World Investment Report 2019, after decreasing in 2015-2016 and 2016-2017, FDI inflows to Africa finally increased (+11%) between 2017 and 2018, reaching US\$46 billion in 2018. For comparison purposes, according to the 2017 UNCTAD World Investment Report, FDI inflows in 2014 were US\$71 billion. The 2019 Report shows that inflows to Africa are expected to rise to US\$52 billion (+15%) in 2019. According to this report, FDI inflows to Côte d'Ivoire were US\$973 million in 2017 and US\$913 million in 2018, compared to FDI inflows for countries like Ghana (almost US\$3 billion), Nigeria (almost US\$2 billion), Ethiopia (US\$3.3 billion) and Mozambique (US\$2.7 billion) in 2018. In the absence of a decrease in the perceived risks associated with investing in Côte d'Ivoire, including those described in this Prospectus, FDI may continue to remain weak, which could adversely affect Côte d'Ivoire's economy and limit sources of funding for infrastructure and other projects which are dependent on significant investment from the private sector. This could, in particular, have

an adverse effect on the implementation of the NDP objectives. If existing levels of FDI continue to decrease, this would significantly impede the progress of sectors important to Côte d'Ivoire's economic growth such as the infrastructure, natural resources, financial and energy sectors.

***Côte d'Ivoire's growth prospects are vulnerable to the performance of the power sector.***

Despite important energy resources and being an exporter of energy to neighbouring countries, the lack of sufficient, affordable and reliable energy supply remains a serious impediment to Côte d'Ivoire's economic growth and development. Insufficient power generation, aging or insufficient infrastructure, inadequate funding, weak distribution networks and overloaded transformers result in high cost of electricity, frequent power outages, high transmission and distribution losses and poor voltage output. In addition, the power sector has experienced in the past, especially during the 2011 post-election crisis, a high level of illicit connections and other fraud which has resulted in losses for the sector. While the Government has adopted several measures to deal with these fraud issues, such as the development of electronic electricity meters or toughening of legal penalties, there is no assurance that the sector will not continue to experience fraud issues.

In the 2016-2020 NDP, the Government has identified the improvement of electricity generation, transmission and distribution infrastructure as a critical element in meeting economic growth and development objectives, and launched in 2013 a wide-ranging investment program of CFAF 5,300 billion to build new hydraulic and thermal power plants, and to improve the transmission network to reduce wastage. See "*The Economy – Principal Sectors of the Ivorian Economy – Energy and Mining – Electricity*". The Government adopted a new electricity code in February 2014 allowing various segments of the electricity sector to open up to the private sector. The Government expects transmission and distribution lines to be operated by different private companies after calls for tender and the new code establishes a framework for the development of new and renewable energies, and includes provisions to combat electric power thefts and fraudulent connections to the grid. In 2012, actions related to the identification, securing and surveillance of customer counting and a better monitoring of streetlight meters were taken by the concessionaire, the CIE, to combat fraud in the country. These actions resulted in surplus earnings that reduced financial losses in the electricity sub-sector. However, despite the implementation of a number of measures since 2012, including the decision to invoice electricity exports to a number of neighbouring countries at a price close to marginal costs, the financial position of the energy sector is still under strain. Peaceful protests in April 2016 over increased electricity bills were followed by further demonstrations in July that turned violent, necessitating security forces' intervention. A Decree of January 2019 reduced the low voltage domestic social rate by 20%. Further protests related to cost-recovery efforts in the energy sector could put additional pressure on the budget. The difficulties have been compounded by the fluctuations in international refining margins for petrol powered plants as well as changes in rainfall which negatively affect low cost hydropower generation.

Failure to adequately address the deficiencies in Côte d'Ivoire's power generation, transmission and distribution infrastructure and adopt and apply a sustainable pricing policy could lead to lower GDP growth and affect Côte d'Ivoire's ability to obtain funding and to attract and maintain FDI, thereby hampering the development of its economy and its ability to service the Notes.

***Côte d'Ivoire suffers from high levels of poverty and health risks.***

The combined effect of low economic growth during the past decade and the political and military crisis between 2002 and 2011 resulted in a long period of economic stagnation which had a severe social impact. Real income per capita in 2011 was only about 57% of its peak 1978 level. Côte d'Ivoire's ranking in the 2018 UNDP HDI, a composite measure of life expectancy, education, and income, was 170 out of 189. In the view of the IMF, while the socio-political situation has improved substantially since the end of the post-electoral crisis, serious challenges remain, including meeting expectations of improved living standards, including in the education and health sectors. For instance, the Ivorian educational system faces social problems that hinder the schooling of vulnerable students, particularly the incidence of early pregnancy among young women, child labour and inequalities in access to educational facilities.

According to the IMF Report 18/182, overall unemployment in Côte d'Ivoire was approximately 5.6%, with underemployment impacting 27% of the population in 2017. However, the quality of information with respect to unemployment rates is limited by the lack of tools for the collection of statistical data in Côte d'Ivoire. In addition, the

public sector, in particular the health and education sector, having suffered from wage restraints and payment arrears for several years, already experienced work stoppages. While the Government has increased salaries in the civil service in 2014, which resulted in a decrease in work stoppages, the country may experience further significant work stoppages in the future, as in 2018 in the education sector, which may have adverse effects on the Ivorian economy. Côte d'Ivoire also faces health risks that are compounded by the high level of poverty among the more vulnerable groups. For instance, according to the WHO's World Malaria Report 2018, Côte d'Ivoire is still very exposed to malaria, with 3,222 reported deaths in 2017 caused by malaria (compared to 1,023 in 2010). The Ivorian public health situation is also characterized by a high HIV/AIDS related mortality rate. AIDS is the leading cause of mortality among adult men (16,000 AIDS-related death in 2018 according to UNAIDS' estimates; representing a 34% decrease as compared to 2010) and the second among women (5,300 AIDS-related death in 2018 according to UNAIDS' estimates), after pregnancy-related problems and child birth. No assurance can be given that the high incidence rate of malaria, HIV/AIDS or other diseases in Côte d'Ivoire, will not affect Côte d'Ivoire's economic performance.

In March 2014, an Ebola virus epidemic was confirmed close to the border between Guinea and Liberia. After an alert launched by the WHO asking to reinforce the monitoring of illnesses akin to a viral haemorrhagic fever, the neighbouring countries of Guinea and Liberia, including Côte d'Ivoire, implemented safety measures along their land borders and inside their territories in order to protect people at risk and to prevent virus propagation. The end of the epidemic outbreak was declared on 29 March 2016 by the WHO and Côte d'Ivoire reopened its borders with Guinea and Liberia in September 2016. While there has been no reported case of Ebola infection in Côte d'Ivoire to date, the country remains at risk given its borders with countries with potentially lower public health standards and may have to dedicate significant resources to preserving itself from epidemics. For example, according to a WHO report, one case of dengue fever was identified in Abidjan in April 2017 and the Government has been taking strong measures to prevent the spreading of the virus. In February 2018, the Government adopted preventive measures against an outbreak of Lassa fever, a haemorrhagic fever like Ebola, that killed more than 30 people in northern Nigeria in the first quarter of 2018.

The Government of Côte d'Ivoire has implemented a number of measures attempting to reduce poverty and unemployment which it expects to pursue. Consistent with the objective of the NDP to reduce the level of poverty in Côte d'Ivoire, the Government decided to increase "pro-poor" spending from approximately 9.0% of nominal GDP in 2015, to approximately 9.3% in 2016 (including multilateral financing in particular by the World Bank and the BOAD). Such spending is expected to reach CFAF 2,109.6 billion (8.9% of GDP) in 2017 compared to CFAF 2,014.8 billion in 2016, an increase of 4.7%, and covers various areas of social life. The level of pro-poor spending is expected to reach CFAF 2,290.8 billion in 2018, an increase of 8.6% compared to 2017. However, if the Government fails to successfully implement its reforms and to significantly reduce poverty and unemployment in the short- to medium-term, this may create a risk of political and social instability and have adverse effects on the Ivorian economy and on Côte d'Ivoire's ability to service the Notes.

***Côte d'Ivoire's membership in the BCEAO may affect its ability to react to stresses on its economy and may subject it to economic policies that are not in its best interests.***

As a member of a monetary union, Côte d'Ivoire has no independent monetary and exchange rate policies. The country must rely on its own budgetary policy (including wage policy) and structural policies to make its economy more competitive and more resilient to external shocks. The BCEAO sets interest rates and monetary and banking policies for all of the member states of the WAEMU to protect the union from fluctuations in the global market and pegs the CFAF to the Euro. As a result, the BCEAO makes interest rate policy decisions on the basis of union-wide considerations and the best interests of the WAEMU as a whole, and is unable to make jurisdiction-specific decisions other than the amendment to national reserve requirements, although domestic economic situations might differ. While the weight of the Ivorian economy, estimated to account for about 40% of the GDP of the WAEMU, remains a fact relevant to the BCEAO's decision-making, BCEAO membership nevertheless means that Côte d'Ivoire is unable to unilaterally carry out monetary policy initiatives such as amending its exchange rate, interest rate or the reserve requirement rate, currently set at 50%, and requires the BCEAO to do so across the union. See "*Monetary System – The Franc Zone and the BCEAO*". In the event that it is in the interests of Côte d'Ivoire to amend the interest rates upwards or downwards in order to stabilize its economy, for example to combat inflation, then it may be unable to do so in a timely manner, or at all. This situation may have an adverse effect on Côte d'Ivoire's economy and on its ability to service the Notes. Côte d'Ivoire's

membership of the BCEAO also means that it may be adversely affected by events in other member states, more severely than would otherwise be the case. This exposure to circumstances in other member states that are out of its control may adversely affect the position of Côte d'Ivoire's economy and Côte d'Ivoire's ability to service the Notes.

***Any adjustment to, or ending of, the CFAF's currency peg could negatively affect Côte d'Ivoire***

Côte d'Ivoire shares a common currency with the other WAEMU member States, the CFAF (or XOF), within the scope of a longstanding monetary cooperation between France and the WAEMU member States. This cooperation provides, among other things, for a guarantee by the French Treasury of unlimited convertibility of the CFAF and a fixed peg. In exchange for this convertibility guarantee, the BCEAO has the obligation to deposit at least 50% of its currency reserves on an operational account with the French Treasury. The peg of the XOF to the French franc was replaced by a peg to the Euro as from 1 January 1999 at a fixed exchange rate of: 1 Euro = XOF 655.957. Although there is no current evidence of any plan to change this situation or of any difficulties affecting the monetary cooperation between France and the WAEMU member States, there is no assurance that the French Treasury and the WAEMU member States will be able or willing to continue to maintain the peg in the future. For example, the French Treasury's support of the CFAF peg arrangement could be altered or abandoned due to changing political developments in France. A change or abandonment of France's commitment to the convertibility of the CFAF or an abandonment of the Euro by France or possibly a very significant appreciation of the Euro would create uncertainty for the future of the exchange rate arrangement, its ability to support macroeconomic stability, and its status as a credit support. If a stable exchange rate or the peg to the Euro cannot be maintained, this could reduce confidence in Côte d'Ivoire's economy, reduce foreign direct investment and adversely affect Côte d'Ivoire's finances and economy.

In addition, because of the peg to the Euro, Côte d'Ivoire does not have any flexibility to devalue the CFAF to stimulate Côte d'Ivoire's exports, and the BCEAO's ability to independently manage interest rates is constrained. Furthermore, Côte d'Ivoire does not control the BCEAO, which is a common institution that has regard to the interests of the WAEMU as a whole and not those of any particular member state. See "*-Côte d'Ivoire's membership in the BCEAO may affect its ability to react to stresses in its economy and may subject it to economic policies that are not in its best interests*". This lack of flexibility could have an adverse effect on Côte d'Ivoire's foreign trade and, in turn, on its economy.

The CFAF peg to the Euro could be subject to devaluation risk under certain macroeconomic conditions. A structural propensity towards a positive inflation differential between the CFAF zone and the euro area could lead to real exchange rate appreciation for the CFAF. If WAEMU member countries collectively agree that devaluation would be an appropriate measure to address real effective exchange appreciation in order to enhance competitiveness, boost exports, and support growth for the region (similar to the 50% devaluation in 1994), then the potential effect could put pressure on Côte d'Ivoire's ability to make repayments on foreign-currency denominated debt. Côte d'Ivoire has a significant amount of debt denominated in foreign currency, including the US Dollar and the Euro. Any negative variation of the peg would increase the burden of servicing and repaying this debt, which could also increase Côte d'Ivoire's risk of debt distress. See "*—Unsustainable levels of indebtedness could have a material adverse effect on Côte d'Ivoire's economy, its sovereign credit ratings and its ability to service its debt, including the Notes*" above.

***Changes to the fixed exchange rate could affect the Notes.***

Côte d'Ivoire, along with other countries that currently participate in the BCEAO, maintains a fixed exchange rate of CFAF 655.957/€1. If domestic or international circumstances were to force Côte d'Ivoire to abandon its fixed exchange rate policy in the future, the cost of servicing Côte d'Ivoire's external debt (including the Notes) could escalate sharply, which could have an adverse effect on Côte d'Ivoire's economy and its ability to service the Notes. In addition, while it may increase the competitiveness of Côte d'Ivoire's exports, a depreciation of the Euro relative to the US dollar may increase the cost of Côte d'Ivoire's imports, which may have an adverse effect on Côte d'Ivoire's economy.

***Failure to continue to restructure and enhance the banking and financial sector may constrain Côte d'Ivoire's economic growth.***

As of 31 December 2018, five credit institutions are under close supervision by the WAEMU Banking Commission, due to failure to comply with banking and/or prudential regulations. Of these five banks, three are State-controlled, one was

majority-owned by the State and has now been privatized and one is a private bank. In October 2018, the BCEAO withdrew the license of a bank that had previously been under close supervision for noncompliance with prudential norms. A restructuring process is underway for the three State-controlled banks under close supervision, the CNCE, the BNI and the Versus Bank. The privatization process of the BHCI, previously majority owned by the State, was successfully carried out in 2018. As part of the implementation of the PDESFI, the Government has defined a strategy to build an attractive and reliable financial sector capable of responding to the growing financing needs of the economy. See “*Monetary System — Banking System – Compliance with Prudential Regulations*”. If the Government of Côte d’Ivoire fails to effectively carry out this action plan in a timely manner, it may have a material adverse effect on Côte d’Ivoire’s economy and its ability to service the Notes.

The review of the performance of the Ivorian banking sector has revealed a number of violations of prudential regulations in recent years. In 2017, the ratio of non-performing loans to total loans issued by the banking sector rose to 9.8%, compared to 9.0% for 2016, which was the first significant increase in several years. However, according to provisional data, this rate decreased to 9.16% in 2018. See “*Monetary System – Banking System – Compliance with Prudential Regulations*”. Although the risk of noncompliance with prudential regulations may be enhanced by the implementation of the Basel II and Basel III standards in the WAEMU region, which has been effective since January 1, 2018, the amount of violations of the prudential regulations decreased (36 as of 31 December 2018, compared to 37 and 44 at the same date in 2017 and 2016, respectively). However, these revised standards provide for increased ratio requirements, which may have a negative effect on the banking sector’s lending capacity and result in a reduction of the supply credit available to the private sector businesses, thus undermining the Government’s objective to strengthen the private sector’s contribution to the financing of the 2016-2020 NDP.

In addition, according to the IMF, Côte d’Ivoire’s banking sector is shallow, dominated by foreign banks and requires substantial reforms to provide the level of credit and access to financial services needed for achieving the country’s growth and poverty reduction objectives. While the ratio of loans to private sector/GDP increased from 19.74% in December 2014 to 29.4% in December 2018, according to BCEAO estimates, an analysis of the structure of loans reported to the BCEAO’s risk department revealed that the tertiary sector remains the principal beneficiary of bank financing and the primary sector remains the least financed, benefitting from only 9.6% of bank loans. See “*Monetary System – Banking System – Financing of the Economy*”. Access to long-term credit is also very limited. If the Government of Côte d’Ivoire fails to implement its strategy vis-à-vis the financial sector, this may have a material adverse effect on the contribution of the local private sector to Côte d’Ivoire’s economy and Côte d’Ivoire’s ability to service the Notes.

***Côte d’Ivoire’s natural resources are increasingly under pressure and Côte d’Ivoire faces challenges to sustainable environmental policy.***

Côte d’Ivoire has a significant agriculture sector and its large rural population depends on natural resources as a basis for farming, energy production and housing. These natural resources are being put under increasing pressure due to deforestation and soil exhaustion resulting from intensive farming and non-sustainable farming practices, as well as erosion and natural hazards. The effects of climate change on the cocoa and coffee plants could impact the quality and volume of the production as well as its seasonality. The forest area of the country decreased by around 70% over the past 50 years. Environmental degradation in Côte d’Ivoire has been exacerbated by the long military conflict and population displacement. According to the World Bank, Côte d’Ivoire’s population is expected to grow at an annual rate of around 2.4% from 2014 onwards (rate of 2.5% in 2018), putting further pressure on its available natural resources. The expected growth of the mining sector in the coming years may also increase pressure on acquiring and/or developing agricultural land as well as the risk of environmental hazards as a result of processes and chemicals used in the extraction and production methods. This risk can also emanate from mining operations in neighbouring countries, as illustrated by the chemical pollution affecting the Bia river as a result of clandestine gold washing activities, which is the subject of talks between the Ivorian and the Ghanaian authorities aimed at finding a solution to this issue. In addition, the environment in Ivorian cities, including the Abidjan lagoons, has deteriorated as a result of industrial and domestic effluent wastes without prior treatment. It is further affected by the lack of an adequate wastewater system, with the poor areas in the cities hardly benefitting from any wastewater equipment. These issues are compounded by the rapid growth of the urban population, which now represents more than half of the total population of Côte d’Ivoire, which is expected to continue as the country transforms its economy. See “*The Economy – Principal Sectors of the Ivorian Economy – Environment*”.

The Government has made a strong commitment towards “greening the economy” by creating legal frameworks, bolstering institutional support for the conservation of the environment and participating in international initiatives, but there can be no guarantee that these policies will be effective and severe environmental pressure will not continue. In addition, addressing the effects of environmental degradation may entail significant costs for Côte d’Ivoire’s public finances. If natural resources deteriorate, or if any of the environmental policies are not properly implemented or fail to meet the population growth rate, this could have an adverse effect on the agricultural sector (including rice production as a staple diet), food security, public health and the general performance of the economy.

***Official statistics published by Côte d’Ivoire may be more limited and less accurate than those produced by developed countries and, to the extent currently presented as estimates and forecasts, may be materially adjusted in the future once finalized.***

Statistical data appearing in this Prospectus has, unless otherwise stated, been obtained from Government sources and documents. Different departments of the Government of Côte d’Ivoire prepare statistics relating to various aspects of the Ivorian economy. Côte d’Ivoire adheres to the IMF’s General Data Dissemination Standards and publishes key official data and statistics and ultimately intends to adopt the IMF’s Special Data Dissemination Standards. However, Côte d’Ivoire has not yet completed the infrastructure for generating all the relevant data and the recent civil conflict has meant that such data are not available for certain parts of the economy. Accordingly, Côte d’Ivoire’s official data and statistics are not as accurate and are more limited in scope and published less frequently than is the case for more advanced countries such that adequate monitoring of key fiscal and economic indicators may be difficult. As it is the case for many emerging economies, the relative size of the informal sector combined with the rapid growth of the economy and the continuous improvement of the statistical tools of the Government of Côte d’Ivoire may result in figures cited in this Prospectus becoming outdated relatively quickly. In addition, the statistics prepared by some governmental departments may not be fully consistent with similar statistics prepared by other departments and the presentation of statistical data may vary from period to period due to the application of different methodologies and processes for validating and finalizing such data. See “*Presentation of Economic and Other Information.*” For example, certain estimated and forecast figures for the years 2015 to 2017, which were previously published by the Government and included in the prospectus relating to the 2030 and the 2048 Eurobonds, have since been materially adjusted following application of the relevant processes for validating and finalizing them. Since some of the figures included in that prospectus for the years 2016, 2017, 2018 and beyond remain in estimated or forecast form, no assurance can be given that, upon being validated and finalized in accordance with the relevant methodologies, such figures will not be subjected to material adjustments.

### **Risk Factors Relating to the Notes and the Trading Market for the Notes**

***The Notes may be negatively affected by events in other emerging markets, including those in sub-Saharan Africa.***

Economic distress in any emerging market country may adversely affect prices of securities and the level of investment in other emerging market issuers as investors move their money to more stable, developed markets. Financial problems or an increase in the perceived risks associated with investing in emerging market economies could dampen foreign investment in Côte d’Ivoire, adversely affect Côte d’Ivoire’s economy or adversely affect the trading price of the Notes. Even if Côte d’Ivoire’s economy remains relatively stable, economic distress in other emerging market countries could adversely affect the trading price of the Notes and the availability of foreign funding sources for the Government. Adverse developments in other countries in sub-Saharan Africa, in particular, may have a negative impact on Côte d’Ivoire if investors perceive risk that such developments will adversely affect Côte d’Ivoire or that similar adverse developments may occur in Côte d’Ivoire. Risks associated with sub-Saharan Africa include political uncertainty, civil unrest and conflict, corruption, the outbreak of diseases and poor infrastructure. Investors’ perceptions of certain risks may be compounded by incomplete, unreliable or unavailable economic and statistical data on Côte d’Ivoire, including elements of the information provided in this Prospectus. See “*Official statistics published by Côte d’Ivoire may be more limited and less accurate than those produced by developed countries and, to the extent currently presented as estimates and forecasts, may be materially adjusted in the future once finalized.*”

***An active trading market for the Notes may not develop and any trading market that does develop may be volatile.***

The trading market for the Notes will be influenced by economic and market conditions in Côte d’Ivoire and, to varying degrees, interest rates, currency exchange rates and inflation rates in other countries, such as the United States, the European Union Member States and elsewhere. There can be no assurance that an active trading market for the Notes of either Series will develop. If a market does develop, it may not be liquid. In addition, liquidity may be limited if the Issuer makes large allocations of one or both Series of Notes to a limited number of investors. Investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. If the Notes of either Series are traded after their initial issuance, they may trade at a discount to their offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the economic and political condition of Côte d’Ivoire.

***Change in market value of the Notes which are fixed rate securities.***

The Notes pay a fixed rate of interest to Noteholders (see Condition 5 (*Interest*)). Investors in the Notes are therefore exposed to the risk that changes in interest rates in the capital markets may adversely affect the market value of the Notes. Generally, prices of fixed interest rate securities tend to fall when market interest rates rise and accordingly are subject to volatility. Therefore, the price of the Notes at any particular time may be lower than the purchase price for the Notes paid by the Noteholder. As a consequence, part of the capital invested by the Noteholder may be lost upon any transfer of the Notes, so that the Noteholder in such case would not receive the total amount of the capital invested.

***The terms and conditions of the Notes contain provisions which may permit their modification without the consent of all investors.***

The terms and conditions of each Series of Notes contain provisions for calling meetings of Noteholders of the relevant Series to consider matters affecting their interests generally. Such provisions are commonly referred to as “collective action clauses”. These provisions permit defined majorities to bind all Noteholders of the relevant Series including Noteholders of the relevant Series who did not attend and vote at the relevant meeting and Noteholders of the relevant Series who voted in a manner contrary to the majority.

In addition, the terms and conditions of each Series of Notes permit “cross-series modifications” to be made to more than one series of debt securities, provided that each affected series of debt securities also contains a cross-series modification provision. Under certain circumstances, including the satisfaction of the Uniformly Applicable condition (as more particularly described in the terms and conditions of each Series of Notes), such cross-series modification may be made to more than one series of debt securities with the approval of the applicable percentage of the aggregate principal amount of the outstanding debt securities of all affected series and without requiring the approval of a particular percentage of the holders of any individual affected series of debt securities.

There is therefore a risk that the terms and conditions of each Series of Notes may be modified in circumstances where the holders of debt securities approving the modification may be holders of different series of debt securities and the majority of Noteholders of the relevant Series would not necessarily have approved such modification. In addition, there is a risk that the provisions allowing for aggregation across multiple series of debt securities may make the Notes less attractive to purchasers in the secondary market and adversely affect the market value of the Notes in circumstances where such modification or a proposal for such modification is expected to be made by the Issuer.

***The Notes have amortizing redemption features.***

The Notes of each Series are amortizing obligations and principal on the Notes is scheduled to be repaid in three instalments on 17 October 2029, 17 October 2030 and 17 October 2031, in the case of the 2031 Notes, and on 17 October 2038, 17 October 2039 and 17 October 2040, in the case of the 2040 Notes. The Amortization Amounts (as defined in the terms and conditions of the relevant Series Notes) are set out in Condition 7 (*Redemption and Purchase*) of the terms and conditions of each Series of Notes. Holders of Notes may only be able to reinvest monies they receive upon such amortization in lower-yielding securities than the Notes.

***Change of law governing the Notes.***

The Terms and Conditions of the Notes of each Series are governed by English law in effect as of the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change in English law, or the official application or interpretation of English law, after the date of this Prospectus. Any such decision or change could be unfavourable to creditors' rights, including those of the Noteholders. If any change in law turns out to be unfavourable to the Issuer and/or the Noteholders, it could have a negative impact on the market value of the Notes.

***Fluctuations in exchange rates and interest rates may adversely affect the value of the Notes.***

The Issuer will pay principal and interest on the Notes in Euro. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than Euro. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Euro or a revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to Euro would decrease the Investor's Currency-equivalent yield on the Notes, the Investor's Currency equivalent value of the principal payable on the Notes and the Investor's Currency equivalent market value of the Notes.

***The Issuer's credit ratings are subject to revision or withdrawal, either of which could adversely affect the trading price of the Notes.***

The Notes are expected to be rated on issuance B+ by Fitch and Ba3 by Moody's. Each of Fitch and Moody's is established in the European Union and registered under the CRA Regulation. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed herein, and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning rating organization. Other than pursuant to Article 23 of the Prospectus Regulation, the Issuer has no obligation to inform Noteholders of either Series of Notes of any revision, downgrade or withdrawal of its current or future sovereign credit ratings. A suspension, downgrade or withdrawal at any time of a credit rating assigned to the Issuer may adversely affect the market price of the Notes.

***An investment in the Notes may not be suitable for all investors***

Generally, investment in emerging markets such as Côte d'Ivoire is only suitable for sophisticated investors who fully appreciate the significance of the risks involved in, and are familiar with, investing in emerging markets. Investors are urged to consult their own legal, tax and financial advisers before making an investment. Each potential investor in the Notes must determine the suitability of that investment in own circumstances. In particular, each potential investor should:

- have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in this Prospectus or, any applicable supplement;
- have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact which the Notes will have on its overall investment portfolio;
- have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Furthermore, the investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to

what extent (i) the Notes are suitable legal investments for it, (ii) the Notes can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of the Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Notes under any applicable risk based capital or similar rules.

***Côte d'Ivoire is a sovereign State. Consequently, it may be difficult for investors to obtain or realize upon judgments against Côte d'Ivoire.***

Côte d'Ivoire is a sovereign State. In the absence of a treaty between Côte d'Ivoire and a specific country relating to the enforcement of foreign court judgments and reciprocity arrangements, the courts of Côte d'Ivoire are unlikely to enforce a judgment of a court established in such specific country. This is the case with the United Kingdom which does not have any execution of judgment reciprocity arrangements with Côte d'Ivoire. As a result, it may be difficult for investors to enforce foreign judgments, including judgments predicated upon civil liabilities under the securities laws of the United States or any state or territory within the United States against Côte d'Ivoire. Although Côte d'Ivoire will consent in the terms and conditions of each Series of Notes to the giving of any relief or the issue of any process in connection with proceedings in England arising out of any dispute arising from or connected with the relevant Series of Notes and will agree to waive any immunity it may have in a suit, execution, attachment or other legal process in respect of any such proceedings, that waiver of immunity does not extend to any other proceedings and excludes from its scope certain diplomatic, military and other government properties. The waiver of immunity also does not extend to any actions brought against Côte d'Ivoire in the United States under any US securities law. Moreover, the enforcement of foreign judgments is subject to the conditions and limitations described under "*Enforcement of Civil Liabilities*" and such limitations and conditions may make it difficult for investors to obtain or realize upon judgments of courts outside Côte d'Ivoire. Furthermore, arbitration is recognized in Côte d'Ivoire as a method of dispute resolution and is governed by statute under Côte d'Ivoire Law No. 93-671 of August 9, 1993 on Arbitration and Ordonnance No. 2012-158 determining the intervention of national jurisdictions in the arbitration procedure of 9 February 2012, together with the Treaty on the Harmonization in Africa of Business Law, signed on 17 October 1993, as revised on 17 October 2008, the *Acte Uniforme d'OHADA sur l'Arbitrage* of 11 March 1999 and the rules of arbitration of the *Cour Commune de Justice et d'Arbitrage* (CCJA) (together, "**Arbitration Law**"). Among other things, the Arbitration Law allows for the recognition and enforcement of an arbitral award upon application in writing to the competent court in the jurisdiction of Côte d'Ivoire, irrespective of the country in which the award was made. Foreign arbitral awards are therefore recognized and can be enforced upon being registered following a procedure known as *exequatur* in Côte d'Ivoire.

## FORWARD-LOOKING STATEMENTS

This Prospectus contains forward-looking statements. These forward-looking statements can be identified by the use of forward-looking terminology, including the terms “believes”, “estimates”, “projects”, “expects”, “intends”, “may”, “will”, “seeks” or “should” or, in each case, their negative or other variations or comparable terminology, or by discussions of strategy, plans, objectives, goals, future events or intentions. Forward-looking statements are statements that are not historical facts and include statements about the Issuer’s beliefs and expectations. These statements are based on current plans, estimates and projections and, therefore, undue reliance should not be placed on them. Forward-looking statements speak only as of the date they are made. Although the Issuer believes that the beliefs and expectations reflected in such forward- looking statements are reasonable, no assurance can be given that such beliefs and expectations will be realized.

Forward-looking statements involve inherent risks and uncertainties. A number of important factors could cause actual results to differ materially from those expressed in any forward-looking statement. The information contained in this Prospectus identifies important factors that could cause such differences, including, but not limited to, the following adverse external factors, such as:

- changes in international commodity prices, particularly cocoa, foreign exchange rates or prevailing interest rates, which could adversely affect Côte d’Ivoire’s balance of payments and external reserves;
- changes in the monetary policy applicable in WAEMU countries which could affect inflation and/or growth rates;
- recession, political unrest or low economic growth in Côte d’Ivoire’s trading partners or, in the event that Côte d’Ivoire increases its reliance on external borrowings, changes in the terms on which international financial institutions provide financial assistance to Côte d’Ivoire or fund new or existing projects, which could decrease exports, adversely affect Côte d’Ivoire’s economy and, indirectly, reduce tax and other public sector revenues, thereby adversely affecting Côte d’Ivoire’s budget; or
- adverse events in other emerging market countries, which could dampen foreign investment or adversely affect the trading price of the Notes;

and the following adverse domestic factors, such as:

- political factors in Côte d’Ivoire and trade and political disputes between Côte d’Ivoire and its trading partners and other political factors in Côte d’Ivoire, which could affect the timing, structure and continued pace of economic reforms, the climate for foreign direct investment and the pace, scale and timing of privatizations; or
- a decline in, or slowdown in the pace of, foreign direct investment, high domestic interest rates, exchange rate volatility or an increase in the level of domestic and external debt, which could lead to lower economic growth or a decrease in Côte d’Ivoire’s international reserves.

The sections of this Prospectus entitled “*Risk Factors*”, “*The Republic of Côte d’Ivoire*” and “*The Economy*” contain a more complete discussion of the factors that could adversely affect the Issuer. In light of these risks, uncertainties and assumptions, the forward-looking events described in this Prospectus may not occur.

The Issuer does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as may be required by law or applicable regulations. All subsequent written and oral forward-looking statements attributable to the Issuer or to persons acting on its behalf are expressly qualified in their entirety by the cautionary statements referred to above and contained elsewhere in this Prospectus.

## PRESENTATION OF ECONOMIC AND OTHER INFORMATION

Annual information presented in this Prospectus is based upon 1 January to 31 December periods (which is the fiscal year for the Issuer), unless otherwise indicated. Certain figures included in this Prospectus have been subject to rounding adjustments; accordingly, figures shown for the same category presented in different tables may vary slightly and figures shown as totals in certain tables may not be the sum of the figures which precede them.

### Statistical Information

Statistical information reported herein has been derived from official publications of, and information supplied by, a number of agencies and ministries of the Issuer and by the Central Bank of West African States (*Banque Centrale des Etats de l'Afrique de l'Ouest*, "BCEAO"). Some statistical information has also been derived from information publicly made available by the IMF, the World Bank, the WAEMU, and other third parties. Where information has been so sourced, the source is stated where it appears in this Prospectus. The Issuer confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by such third parties, no facts have been omitted which would render the reproduced information inaccurate or misleading. Similar statistics may be obtainable from other sources, but the date of publication, underlying assumptions, methodology and, consequently, the resulting data may vary from source to source. In addition, statistics and data published by one ministry or agency of the Issuer may differ from similar statistics and data produced by other agencies or ministries due to differing underlying assumptions or methodology. Certain historical statistical information contained herein is provisional or otherwise based on estimates that the Issuer and/or its agencies believe to be based on reasonable assumptions. As described in respect of certain data below, the Issuer's official financial and economic statistics are subject to internal review as part of a regular validation process. Accordingly, financial and economic information may be subsequently adjusted or revised. While the Issuer does not expect revisions to be material, no assurance can be given that material changes will not be made.

The paragraphs below outline the methodologies and processes for preparing, validating and finalizing data with respect to macroeconomic, balance of payments, public debt and public finance figures.

### Macroeconomic Data

#### *Preparation of Estimates*

Estimates of macroeconomic data for year N are prepared by the Ministry of Economy and Finance, acting through the General Directorate of the Economy, based on reference indicators (including the Harmonized Index of Industrial Production, the Harmonized Index of Consumer Prices and the Revenue Index of Retail Trade) and agricultural and mining production data (including coffee, cocoa, gold, crude oil) made available by the relevant sectors during January and February of year N+1. Estimates for year N normally become available in March of year N+1 on the basis of data at the end of year N. These estimates are provided to the IMF and to the National Institute of Statistics (*Institut National de la Statistique* ("INS")) of Côte d'Ivoire. Until March of year N+1, all figures for year N represent forecasts made by the Ministry of Economy and Finance.

#### *Preparation of Final National Accounts*

The final national accounts are prepared by the INS based on the estimates prepared by the Ministry of Economy and Finance (as described above) and corporate financial data filed with the tax authorities. The INS data review process may take place in two stages, with an intermediary provisional accounts stage preceding the final accounts determination. The final accounts for year N are normally completed by the end of year N+2.

The process for preparing the final national accounts is as follows:

- the estimates for year N completed by the Ministry of Economy and Finance in March of year N+1 are provided to the INS;

- following the filing with the tax authorities of corporate financial data for year N, the tax authorities provide a copy of this information to the INS (from June to December of year N+1 for data concerning year N);
- the corporate financial data allows the INS to start the process of preparing the final national accounts, which will result in the determination of the final figures normally by the end of year N+2 for data concerning year N; and
- the final macroeconomic data is communicated by the INS to the Ministry of Economy and Finance and the IMF and supersedes and replaces previous estimates or provisional data.

### Balance of Payments

With respect to balance of payments figures, initial forecasts for year N are normally made by the BCEAO in October and November of year N-1 and then revised in May and June of year N and again in October and November of year N. Estimates are prepared in May and June of year N+1 and then revised in October and November of year N+1. The Balance of Payments Committee (*Comité Balance des Paiements*) of Côte d'Ivoire then normally reviews and validates the final balance of payments data for year N in December of year N+1 at the latest.

### Public Debt

With respect to public debt figures, estimates for year N are normally published by the Ministry of Economy and Finance, acting through the Treasury and Public Accounting Department (*Direction Générale du Trésor et de la Comptabilité Publique*), during the first 45 days of year N. These estimates are normally finalized in June of year N+1 at the latest. Estimated figures for the year 2019 are expected to be finalized at the end of June 2020.

### Public Finance

With respect to public finance figures, estimates for year N are normally published by the Ministry of Economy and Finance and the Ministry of Budget during the first quarter of N+1. These estimates are normally finalized by the Ministry of Economy and Finance in June of year N+1 at the latest. Data for year N+1 corresponds to budgetary allocations. Estimated figures for the year 2019 are expected to be finalized at the end of June 2020.

### **IMF's General Data Dissemination Standards**

The Issuer adheres to the IMF's General Data Dissemination Standards which guide members in the dissemination of economic and financial data to the public. Côte d'Ivoire participates in the IMF's General Data Dissemination System ("GDDS"), which is designed to guide all member countries in the provision of their economic and financial data to the public. Data covered includes the fiscal, financial and the external sectors as well as socio-demographic data.

By participating in the GDDS, Côte d'Ivoire has undertaken to:

- use the GDDS as a framework for statistical development;
- designate a country coordinator; and
- provide metadata to the IMF describing the current practices and plans for short- and long-term improvements in these practices.

A summary of the methodology under which Côte d'Ivoire prepares its metadata is found on the internet under the IMF's Dissemination Standards Bulletin Board. Côte d'Ivoire's metadata may be found on the IMF's website at <http://dsbb.imf.org/Pages/GDDS/CtyCtgList.aspx?ctycode=CIV>.

The BCEAO Website ([www.bceao.int](http://www.bceao.int)) contains information, relevant legislation, press releases, publications, including statistics, research papers, guidelines and regulations and speeches. Information contained in the above-mentioned websites is not incorporated by reference in this Prospectus and, therefore, does not form part of this Prospectus.

All references in this Prospectus to “**CFAF**” are to the currency of the member states of WAEMU (of which Côte d’Ivoire is one), all references in this Prospectus to “**US\$**”, “**U.S. dollars**” and “**USD**” are to the currency of the United States of America and all references in this Prospectus to “**EUR**”, “**euro**”, “**Euro**” and “**€**” are to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty establishing the European Community, as amended.

The language of this Prospectus is English. Certain legislative references and technical terms have been cited in their original language in order that the correct technical meaning may be ascribed to them under applicable law.

## CERTAIN DEFINITIONS AND TERMINOLOGY

“**2012-2015 NDP**” means the 2012-2015 National Development Plan;

“**2015 Prospectus**” means the prospectus related to the Eurobonds due 2028 dated 2 March 2015;

“**2024 Eurobonds**” means the US\$750,000,000 5.375% bonds due 2024 issued by the Issuer on 23 July 2014;

“**2025 Eurobonds**” means the EUR 625,000,000 5.125% bonds due 2025 issued by the Issuer on 13 June 2017;

“**2028 Eurobonds**” means the US\$1,000,000,000 6.375% amortizing bonds due 2028 issued by the Issuer on 2 March 2015;

“**2032 Eurobonds**” means the US Dollar denominated step-up bonds due 2032 issued by the Issuer (i) in the amount of US\$2,332,149,000 on 16 April 2010 as part of the restructuring of the London Club-held Brady securities and (ii) in the amount of US\$186,755,000 on 12 November 2012 as part of the restructuring of claims held by the Sphynx creditors and Standard Bank London;

“**2033 Eurobonds**” means the US\$1,250,000,000 6.125% amortizing bonds due 2023 issued by the Issuer on 13 June 2017;

“**ACP**” means the African Caribbean and Pacific Group of States;

“**ADDR**” means the *Autorité Nationale pour le Désarmement, la Démobilisation et la Réintégration*;

“**ADF**” means the African Development Fund;

“**AFD**” means the *Agence Française de Développement*;

“**AfDB**” means the African Development Bank;

“**AGOA**” means the African Growth and Opportunity Act;

“**APR**” means the Annual Performance Report;

“**APUs**” means public administrations;

“**AU**” means the African Union;

“**Arbitration Law**” means the Côte d’Ivoire Law No. 93-671 of 9 August 1993 on Arbitration, the *Acte Uniforme d’OHADA sur l’Arbitrage* of 11 March 1999 and the Ordonnance No. 2012-158 determining the intervention of national jurisdictions in the arbitration procedure of 9 February 2012;

“**ASA-CI**” means the *Association des Sociétés d’Assurances de Côte d’Ivoire*;

“**BADEA**” means the *Banque Arabe pour le Développement Economique en Afrique*;

“**BCEAO**” means the *Banque Centrale des Etats de l’Afrique de l’Ouest*;

“**BEAC**” means the *Banque des Etats d’Afrique Centrale*;

“**BFA**” means the *Banque pour le Financement Agricole*;

“**BNI**” means the *Banque Nationale d’Investissement*;

“**BOAD**” means the *Banque Ouest Africaine de Développement*;

“**BPW**” means building and public works;

“**BRVM**” means the *Bourse Régionale des Valeurs Mobilières*;

“**C2D**” means the *Contrats de Désendettement et de Développement*;

“**WAEMU**” means the West African Economic and Monetary Union (*Union économique et monétaire ouest-africaine*);

“**WB**” means the World Bank; and

“**WHO**” means the World Health Organization.

## EXCHANGE RATE

Côte d'Ivoire's currency is the CFAF franc. The CFAF franc zone operates under a number of key operating principles:

- a fixed parity against the Euro, adjustable if required for economic reasons after consultation with the French government and unanimous decision of all member countries within each monetary area, namely the CEMAC zone (XAF), of which the member countries are Cameroon, the Central African Republic, Chad, Republic of Congo, Equatorial Guinea and Gabon, and the WAEMU zone (XOF), which consists of Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo. The CFAF of the CEMAC zone (XAF) benefits from the same conversion rate in euros but is governed by separate agreements;
- convertibility of the CFAF franc to Euros without any fluctuation margins, at a rate of CFAF 655.957 = €1.00 as of 1 January 1999, which is equivalent to the rate of CFAF 100 = 1 French franc prevailing before that;
- guarantee of convertibility by France through the establishment by each regional central bank of an operations account with the French treasury with market-related yields or charges (these accounts can have a positive or negative balance thus providing an, in principle, unlimited overdraft facility to each central bank);
- free movements of capital between the WAEMU and France and the CEMAC and France; and
- the pooling of the foreign exchange reserves of each regional monetary area.

Solely for convenience, this Prospectus contains historical conversions of certain Euro amounts into U.S. dollars at specified rates. These conversions are solely illustrative, and should not be taken as a representation that a Euro amount actually represents a stated U.S. dollar amount or that it could be converted into U.S. dollars at the rate suggested, or any other rate. The following table shows the historical period-end, average, high and low noon buying rates in New York City for cable transfers in foreign currencies as certified by the Federal Reserve Bank of New York for the Euro, expressed in U.S. dollars per one Euro, for the periods and dates indicated.

U.S. dollar/Euro				
Year	Period end	Average rate <sup>(1)</sup>	High	Low
2013.....	1.3779	1.3281	1.3816	1.2774
2014.....	1.2101	1.3297	1.3927	1.2101
2015.....	1.0859	1.1096	1.2015	1.0524
2016.....	1.0552	1.1072	1.1516	1.0375
2017.....	1.2022	1.1301	1.2041	1.0416
2018.....	1.1456	1.1817	1.2488	1.1281
2019 (through 27 September 2019).....	1.0942	1.1236	1.1524	1.0938

U.S. dollar/Euro				
Month	Period end	Average rate <sup>(1)</sup>	High	Low
January 2019.....	1.1454	1.1418	1.1524	1.1322
February 2019.....	1.1379	1.1349	1.1474	1.1268
March 2019.....	1.1228	1.1296	1.1376	1.1214
April 2019.....	1.1201	1.1234	1.1304	1.1140
May 2019.....	1.1149	1.1187	1.1246	1.1136
June 2019.....	1.1374	1.1295	1.1393	1.1196
July 2019.....	1.1130	1.1211	1.1307	1.1121
August 2019.....	1.0989	1.1129	1.1236	1.0989
September 2019 (through 27 September 2019).....	1.0942	1.1017	1.1074	1.0938

(1) The average of the Noon Buying Rates on the last business day of each month (or portion thereof) during the relevant period for annual averages; on each business day of the month (or portion thereof) for monthly averages.

## OVERVIEW

*The following is an overview of certain information contained elsewhere in this Prospectus. It does not purport to be complete and is qualified in its entirety by the more detailed information appearing elsewhere in this Prospectus. Prospective investors should also carefully consider the information set forth in “Risk Factors” below prior to making an investment decision. Capitalized terms not otherwise defined in this overview have the same meaning as elsewhere in this Prospectus. See “The Republic of Côte d’Ivoire”, “The Economy”, “Foreign Trade and Balance of Payments”, “Public Finance”, “Public Debt” and “Monetary System”, amongst others, for a more detailed description of the Issuer.*

### Overview of the Republic

#### *General*

Côte d’Ivoire is located in the western part of Africa, in the intertropical zone between the Tropic of Cancer and the Equator. It spans 322,462 km<sup>2</sup> and has over 500 km of coastline. It borders the Atlantic Ocean in the south, Burkina Faso and Mali in the north, Ghana in the east, and Guinea in the west. While Yamoussoukro was officially designated as the political and administrative capital of the country in 1983, Abidjan has effectively remained the economic, political and administrative centre.

Côte d’Ivoire achieved independence from France on 7 August 1960. Pursuant to the Constitution in force, which was adopted on 30 October 2016, Côte d’Ivoire is a democratic republic based on the separation and balance of the three powers: executive, legislative and judicial.

Côte d’Ivoire has emerged from the political and military crisis that began in 2002 and culminated in the serious post-election crisis that followed the announcement of the results of the second round of the presidential election on 28 November 2010. Following this post-election crisis which significantly affected the economy and social cohesion, Alassane Ouattara was sworn in as President of the Republic in May 2011 and the normal course of the electoral cycle allowed for legislative elections in December 2011 and regional and municipal elections in April 2013. On 25 October 2015, Alassane Ouattara was re-elected President of the Republic with 83.66% of the vote in the first round for another five-year term. Following his election, Alassane Ouattara submitted a new draft constitution to a referendum, which was adopted with 93.42% of the vote on 30 October 2016, marking the start of the Third Republic. Legislative elections were then organized on 18 December 2016 with the aim of consolidating the country’s democratic institutions.

President Alassane Ouattara has put national reconciliation, security and pro-growth reform at the top of his agenda. Political stability and the security situation have markedly improved, since May 2011. This is evidenced by the UNESCO returning to Abidjan in September 2013, the AfDB completing the relocation of its headquarters to Abidjan in late 2014 from Tunis, Tunisia, after a 10-year absence, the International Cocoa Organization moving its headquarters to Abidjan in April 2017 after 44 years in London, and the end of the ONUCI peacekeeping mission in June 2017. National reconciliation and political dialogue, particularly through the CDVR and the Permanent Framework for Dialogue, have made significant progress with the continued return of refugees and political exiles to the country. In March 2015, the CDVR was replaced by the CONARIV. In April 2016, the CONARIV submitted its final report and the consolidated single list of victims to President Ouattara. The end of the Commission’s work paved the way for financial compensation of victims. The implementation of the Commission’s final report has been delegated to the Minister in charge of solidarity and social cohesion. In August 2013 and November 2018, Côte d’Ivoire adopted laws on civil status, nationality and rural property to clarify the conditions and procedures for the declaration of births and establishment of birth certificates, the granting of Ivorian nationality and property rights with the aim of reducing sources of tension among population groups.

#### *Economy*

Côte d’Ivoire is the leading economy in the WAEMU in terms of GDP, according to the BCEAO, and according to the WAEMU demographic statistics, the country with the largest population of the WAEMU, with an estimated population of 25.1 million inhabitants in 2018 (INS). Real GDP estimates published by the IMF (*Regional Economic Outlook: Sub-Saharan Africa, April 2019, the “2019 IMF Outlook”*) positioned Côte d’Ivoire as the third most dynamic economy of the Sub-Saharan Africa countries (after Rwanda and Ethiopia) in 2018.

The IMF estimates that Côte d'Ivoire is expected to continue to show solid growth momentum, with real GDP growth expected by the IMF to stay above 7.0% for the 2018-2020 period (*2019 IMF Outlook*), showcasing the resilience the country built in recent years. The results in recent years have been promising, with an increase in public and private investment leading to an average annual rate of real GDP growth of nearly 9.0% over the 2012-2016 period, renewed access to international financial markets, some improvements in health and education indicators, and gains in terms of state legitimacy and governance. In 2017, Côte d'Ivoire was the world's leading producer and exporter of cocoa, accounting for more than one-third of the world's cocoa production, and the fourth cashew nut exporter in the world, according to the statistics of Côte d'Ivoire's Ministry of Agriculture and the FAO. In 2018, Côte d'Ivoire consolidated its position as leading producer and exporter of cocoa, and became the first cashew nut producer in the world according to the statistics of Côte d'Ivoire's Ministry of Agriculture.

In March 2012, the Government adopted the NDP for the 2012-2015 period. The implementation of this plan was a success in many respects, as demonstrated by Côte d'Ivoire's entry and stable position within the group of countries with the highest growth rates in the world, with an average annual real GDP growth rate of 9% over the 2012-2015 period.

Following a thorough assessment of the 2012-2015 NDP's implementation and results, a new NDP for the 2016-2020 period was adopted in December 2015, maintaining the objective of turning Côte d'Ivoire into an emerging economy by 2020 and reducing poverty by half. This plan establishes industry as one of the major pillars of the economy's structural transformation and focuses on the following strategies:

- strengthening the quality of the country's institutions and proper governance;
- accelerating the development of human capital and social well-being;
- accelerating the structural transformation of the economy through industrialization;
- developing infrastructure that is equitably spread throughout the country while at the same time protecting the environment; and
- strengthening both regional integration and international cooperation.

The implementation of the 2016-2020 NDP is designed to achieve the following results:

- an average real GDP growth rate of 8.7% between 2016 and 2020. This performance is expected to be driven by the primary, secondary and tertiary sectors, which are expected to record respective average annual growth rates of approximately 5.8%, 11.5% and 9.2% during this period;
- a rise of the investment rate from 19.5% of GDP in 2015 to 24.5% in 2020. The private investment rate should progress from 12.8% in 2015 to 15.2% in 2020. This significant contribution expected from private investments reflects the Government's reliance on the private sector as an important pillar of emerging economies;
- an inflation rate maintained under the convergence threshold of +3.0% for WAEMU countries;
- an increase of total revenues and donations from CFAF 3,916.8 billion in 2015 to CFAF 6,492.3 billion in 2020, representing an average growth rate of 10.6%. These resources will remain dominated by fiscal revenues, which are expected to rise from CFAF 2,954.9 billion in 2015 to CFAF 5,317.4 billion in 2020. Fiscal pressure should grow from 15.1% in 2015 to 16.9% in 2020; and
- an improvement of the budget deficit, as a percentage of the GDP, from 2.8% of GDP in 2015 to 1.9% of GDP in 2020.

After the third year of implementation of the 2016-2020 NDP, Côte d'Ivoire has recorded strong economic performance, despite less favourable international conditions, low rainfall and a fall in international cocoa prices, which mitigated initial forecasts to a certain extent. Economic growth remained strong and sustained at 8% in 2016, compared to the 9.8% initially expected, in particular due to the dynamism of the primary (+7.5%) and tertiary (+8.9%) sectors. According to the Government's and the IMF's estimates, real GDP growth in 2017 is expected to be 7.7% (based on data available at the end of June 2019). This growth rate is expected to result from the continued rebound of the primary sector (+11.2%) and the dynamism of the tertiary sector (+6.6%). In 2018, the growth rate is estimated at 7.4%, driven mainly by the

secondary sector (+7.1%) and the tertiary sector (+9.2%). Initially expected to be 4.0% of the nominal GDP, the budget deficit stood at 3.9% in 2016 due to lower than budgeted expenses. Côte d'Ivoire's public financial management efforts continued in 2017 and 2018, despite domestic (social movements) and external disruptions (drop in cocoa prices and rise in oil prices) that adversely affected the mobilization of income and placed significant pressure on expenses. Measures taken by the Government have contained the deficit to 4.5% in 2017, and it is expected to reduce to 4% in 2018. Inflation remained stable at 0.7% in 2016 and 2017, and is estimated at 0.4% in 2018, well under the WAEMU community threshold of 3.0% applicable until 2019.

In an effort to strengthen its economy's resilience, Côte d'Ivoire has engaged further in a series of reforms to transform agricultural products, improve the business climate, boost its competitiveness and strengthen governance. These far-reaching structural measures have been designed with the help of its international partners, in particular the IMF and the World Bank. Côte d'Ivoire has thus been ranked one of the best performing countries in Africa in the World Bank's "Doing Business" reports for the past few years. From 139<sup>th</sup> in 2018, the country's ranking improved by 45 places and reached the 122<sup>nd</sup> place out of 190 countries as per the 2019 edition of the "Doing Business" report, and Côte d'Ivoire is once more one of the ten most reforming countries in the world. It intends to pursue this dynamic with the aim of being ranked among the top 50 in the world by 2020.

The country's competitiveness is strengthened by the improved governance standards. Indeed, the 2018 Mo Ibrahim Index of African Governance Report showed that Côte d'Ivoire's ranking improved from 41<sup>st</sup> in 2008 to 22<sup>nd</sup> in 2017, being the only country to progress in each of the four categories and fourteen subcategories of the Index. Furthermore, Côte d'Ivoire was granted in February 2019 the African Union Award for Fighting against Corruption.

In the last quarter of 2015, Moody's and Fitch rating agencies raised Côte d'Ivoire's rating from B1 to Ba3 (Moody's) with a stable outlook and from B to B+ (Fitch) with a stable outlook, due to the country's enhanced stability after the smooth presidential elections, sound management of public finances and improvements in institutional governance and stability. These ratings were confirmed in 2016 and 2017 in the most recent sovereign rating reviews by Fitch and Moody's. The ninth sovereign rating review of Côte d'Ivoire completed in April 2019 by Fitch confirmed these same results (B+ with a stable outlook).

As part of the 2016-2019 EFF-ECF Programme entered into with the IMF on 12 December 2016, Côte d'Ivoire committed to implement additional reforms in all of the sectors of its economy, in order to promote productivity and competitiveness.

### Statistical Data

The following selected economic and financial information is qualified in its entirety by, and should be read in conjunction with, the detailed information appearing elsewhere in this Prospectus. Data shown for 2016, and 2017 are estimates.

	2014	2015	2016	2017 (Est.)	2018 (Est.)
<b>Domestic Economy</b>					
Nominal GDP (CFAF billion) .....	17,461.0	19,595.4	20,931.4	22,150.8	23,899.8

## Overview of the Terms and Conditions of the Notes

The following is an overview of certain information contained elsewhere in this Prospectus. It does not purport to be complete and is qualified in its entirety by the more detailed information appearing elsewhere in this Prospectus. Prospective investors should also carefully consider the information set forth in “Risk Factors” below prior to making an investment decision. Capitalized terms not otherwise defined in this overview have the same meaning as in the terms and conditions (for the purposes of this section, the “**Conditions**”) of the 2031 Notes and/or the 2040 Notes, as the case may be. See “Terms and Conditions of the 2031 Notes” and “Terms and Conditions of the 2040 Notes” for a more detailed description of the 2031 Notes and 2040 Notes, respectively.

<b>Issuer</b>	The Republic of Côte d’Ivoire.
<b>Notes Offered</b>	€50,000,000 5.875% Amortizing Notes due 2031 (the “ <b>2031 Notes</b> ”).  €50,000,000 6.875% Amortizing Notes due 2040 (the “ <b>2040 Notes</b> ” and, together with the 2031 Notes, the “ <b>Notes</b> ”).
<b>Currency</b>	Euro.
<b>Issue Date</b>	17 October 2019.
<b>Maturity Date</b>	In respect of the 2031 Notes, 17 October 2031. In respect of the 2040 Notes, 17 October 2040.
<b>Interest</b>	In respect of the 2031 Notes, 5.875% per annum. In respect of the 2040 Notes, 6.875% per annum.  See “ <i>Terms and Conditions of the 2031 Notes—5. Interest</i> ” and “ <i>Terms and Conditions of the 2040 Notes—5. Interest</i> ”
<b>Interest Payment Dates</b>	The Issuer will pay interest annually in arrear on each Series of Notes on 17 October of each year. The first payment of interest will be made on 17 October 2020 for the period from and including the Issue Date to but excluding such first interest payment date.  See “ <i>Terms and Conditions of the 2031 Notes—5. Interest</i> ” and “ <i>Terms and Conditions of the 2040 Notes—5. Interest</i> ”
<b>Issue Price</b>	99.015% of the principal amount of the 2031 Notes. 100.00% of the principal amount of the 2040 Notes.
<b>Yield to Maturity</b>	Based on their issue price, the yield to maturity of the 2031 Notes is 6.000%.  Based on their issue price, the yield to maturity of the 2040 Notes is 6.875%.
<b>Redemption</b>	The Issuer will redeem the 2031 Notes in three instalments on 17 October 2029, 17 October 2030 and 17 October 2031.  The Issuer will redeem the 2040 Notes in three instalments on 17 October 2038, 17 October 2039 and 17 October 2040.

The Amortization Amounts (as defined therein) are set out in “*Terms and Conditions of the 2031 Notes—7. Redemption and Purchase*” and “*Terms and Conditions of the 2040 Notes—7. Redemption and Purchase*”.

## **Denominations**

The Notes will be offered and sold, and may only be transferred, in minimum principal amounts of €100,000 and integral multiples of €1,000 in excess thereof.

See “*Terms and Conditions of the 2031 Notes—1.1 Form and Denomination*” and “*Terms and Conditions of the 2040 Notes—1.1 Form and Denomination*”.

## **Status**

The Notes of each Series (as the case may be) constitute direct, unconditional and (subject to the provisions of the negative pledge covenant described below) unsecured obligations of the Issuer and (subject as provided above) rank and will rank *pari passu*, without any preference among themselves, and with all other unsecured and unsubordinated External Indebtedness of the Issuer outstanding from time to time, save only for such obligations as may be preferred by mandatory provisions of applicable law, *provided, however, that* the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any other External Indebtedness and, in particular, shall have no obligation to pay other External Indebtedness at the same time or as a condition of paying sums due on the Notes and *vice versa*. The full faith and credit of the Issuer is pledged to the due and punctual payment of the Notes.

See “*Terms and Conditions of the 2031 Notes—3. Status*” and “*Terms and Conditions of the 2040 Notes—3. Status*”.

## **Negative Pledge**

So long as any Note of the relevant Series (as the case may be) remains outstanding the Issuer will not, save for the exceptions set forth herein, create, incur, assume or permit to subsist any Security upon the whole or any part of its present or future assets, undertakings or revenues to secure (i) any of its Public External Indebtedness; (ii) any Guarantees in respect of Public External Indebtedness; or (iii) the Public External Indebtedness of any other person; without at the same time or prior thereto securing the Notes of the relevant Series equally and rateably therewith or providing such other arrangement (whether or not comprising Security) as shall be approved by an Extraordinary Resolution of Noteholders of the relevant Series or by a Written Resolution (each as defined in the Conditions). For the avoidance of doubt, any such approval shall not constitute a Reserved Matter (for the purposes of and as defined in the Conditions).

See “*Terms and Conditions of the 2031 Notes—4. Negative Pledge*” and “*Terms and Conditions of the 2040 Notes—4. Negative Pledge*”.

## **Events of Default**

The terms and conditions of each Series of Notes will permit the acceleration of the relevant Series of Notes following the occurrence of certain events of default.

See “*Terms and Conditions of the 2031 Notes—10. Events of Default*” and “*Terms and Conditions of the 2040 Notes—10. Events of Default*”.

### **Form of Notes**

The Notes will be issued in registered form only, without coupons.

The Notes of each Series sold in offshore transactions in reliance on Regulation S will be represented on issue by the Unrestricted Global Note Certificate and the Notes of each Series sold to qualified institutional buyers in reliance on Rule 144A will be represented on issue by the Restricted Global Note Certificate. Each Global Note Certificate will be deposited with a common depository for Euroclear and Clearstream and registered in the name of a nominee for such common depository.

### **Taxation and Additional Amounts**

All payments in respect of each Series of Notes by or on behalf of the Issuer shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by or on behalf of the Relevant Jurisdiction (as defined in the Conditions), unless the withholding or deduction is required by law. In that event, the Issuer will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholders of the relevant Series of Notes after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the relevant Series of Notes in the absence of the withholding or deduction, subject to certain exceptions set forth under “*Terms and Conditions of the 2031 Notes—8. Taxation*”, “*Terms and Conditions of the 2040 Notes—8. Taxation*” and “*Taxation*”.

### **Meetings of Noteholders and Amendments**

The terms and conditions of each Series of Notes contain a “collective action” clause, which permits defined majorities to bind all Noteholders of the relevant Series of Notes. Either Series of Notes would be capable of aggregation for voting purposes with any other debt securities issued by the Issuer that contain collective action clauses in substantially the same form as the collective action clause in the terms and conditions of each Series of Notes, thereby allowing “cross-series” modifications to the terms and conditions of the relevant Series of Notes (even, in some circumstances, where majorities in respect of the relevant Series of Notes did not vote in favour of the modifications being voted on). A summary of the provisions for convening meetings of Noteholders of the relevant Series of Notes and making amendments to the relevant Series of Notes is set forth under “*Terms and Conditions of the 2031 Notes—13. Meetings of Noteholders, Modifications and Waivers*” and “*Terms and Conditions of the 2040 Notes—13. Meetings of Noteholders, Modifications and Waivers*”.

### **Concurrent Tender Offers**

On 3 October 2019, Cote d’Ivoire launched tender offers (the “**Tender Offers**”) for up to US\$1.5 billion in aggregate principal amount of its outstanding 2024 Eurobonds, 2025 Eurobonds, 2032 Eurobonds and, subject to the sub cap specified in the tender offer memorandum referred to below, the 2028 Eurobonds (which maximum amounts and/or sub cap may be increased or decreased in each offer in the absolute discretion of the Issuer). The Tender Offers are scheduled to

expire at 5:00 p.m. New York City time on 9 October 2019 (the “**Expiration Date**”) and are expected to settle two business days after the settlement of the Notes, in each case unless extended, reopened, amended or terminated by Côte d’Ivoire. The Tender Offers are subject to the terms and conditions set forth in the tender offer memorandum dated 3 October 2019 prepared by Côte d’Ivoire. Whether Cote d’Ivoire will accept and settle the purchase of the 2024 Eurobonds, 2025 Eurobonds, 2032 Eurobonds and 2028 Eurobonds pursuant to the Tender Offers is subject (unless such condition is waived by Cote d’Ivoire in its sole discretion) without limitation, to the successful closing (in the sole determination of Cote d’Ivoire) of the offering of the Notes pursuant to this Prospectus. Cote d’Ivoire expects to announce the results of the Tender Offers and the aggregate principal amount of each series of Eurobonds finally accepted for purchase promptly following the Expiration Date. See “*Use of Proceeds*”.

### **Use of Proceeds**

The net proceeds of the issue of the Notes are expected to amount to approximately €841,000,000 in respect of the 2031 Notes and approximately €849,000,000 in respect of the 2040 Notes, in each case after deduction of certain fees and expenses payable by the Issuer in connection with the offer and sale of the Notes.

The net proceeds of the issue will be used (i) to finance the purchase by Côte d’Ivoire of a portion of the final aggregate principal amount of the 2024 Eurobonds, 2025 Eurobonds, 2032 Eurobonds and 2028 Eurobonds agreed to be purchased pursuant to the Tender Offers and (ii) to finance investments under the State’s budget, including the NDP’s priority structural projects with respect to an increase in agricultural output, promotion of the manufacturing sector, and improvement in the standard of living, particularly through investments in the sectors of education, health, infrastructures, trade and culture.

### **Ratings**

The Notes are expected to be rated on issuance B+ by Fitch and Ba3 by Moody’s. Credit ratings assigned to the Notes do not necessarily mean that they are a suitable investment. A rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning rating organization.

Each of Fitch and Moody’s is established in the European Union and registered under the CRA Regulation.

### **Listing and Admission to Trading**

Application has been made to Euronext Dublin for the Notes to be admitted to its Official List and trading on its Regulated Market.

### **Further Issues**

The Issuer may from time to time without the consent of the Noteholders of the relevant Series issue additional Notes of the relevant Series that will form a single series with the Notes subject to certain conditions set out under “*Terms and Conditions of the 2031 Notes—15. Further Issues*” and “*Terms and Conditions of the 2040 Notes—15. Further Issues*”.

<b>Governing Law</b>	English law.
<b>Transfer Restrictions</b>	<p>Neither Series of Notes will be registered under the Securities Act or any US state securities law. Consequently, no Notes of either Series may be offered or sold in the United States except pursuant to an exemption from or in a transaction not subject to the registration requirements of the Securities Act and applicable state securities laws.</p> <p>See “<i>United States Transfer Restrictions</i>”.</p> <p>Neither this Prospectus nor the Notes will be registered or cleared under the regulations of the WAEMU. Consequently, the Notes may not be offered or sold in the WAEMU, including in Côte d’Ivoire.</p>
<b>Fiscal Agent, Paying Agent and Transfer Agent</b>	Citibank, N.A., London Branch
<b>Registrar</b>	Citigroup Global Markets Europe AG
<b>2031 Notes sold pursuant to Regulation S</b>	<p>ISIN: XS2064786754</p> <p>Common Code: 206478675</p>
<b>2031 Notes sold pursuant to Rule 144A</b>	<p>ISIN: XS2064786838</p> <p>Common 206478683</p>
<b>2040 Notes sold pursuant to Regulation S</b>	<p>ISIN: XS2064786911</p> <p>Common Code: 206478691</p>
<b>2040 Notes sold pursuant to Rule 144A</b>	<p>ISIN: XS2064787489</p> <p>Common Code: 206478748</p>

## **ENFORCEMENT OF CIVIL LIABILITIES**

The Issuer is a sovereign state. Consequently, it may be difficult for investors to obtain or realize upon judgments of courts in jurisdictions outside Côte d'Ivoire (including judgments predicated upon civil liability provisions of the securities laws of the United States or any state or territory within the United States) against the Issuer without compliance with the enforcement procedure for foreign judgments in Côte d'Ivoire. The Issuer has agreed that unless a Noteholder elects by notice in writing to resolve a dispute in the courts of England any claims or disputes arising in respect of the Notes shall be referred to and finally settled by arbitration in accordance with the rules of the International Chamber of Commerce. Côte d'Ivoire is a party to the United Nations (New York) Convention on the Recognition and Enforcement of Foreign Arbitral Awards (the "**New York Convention**").

To the extent that the Issuer may in any jurisdiction, claim or acquire for itself or its assets immunity from suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process and to the extent that such immunity (whether or not claimed) may be attributed in any such jurisdiction to the Issuer or its assets or revenues, the Issuer irrevocably agrees for the benefit of the holders of Notes not to claim, and irrevocably waives, such immunity, to the fullest extent permitted by the laws of such jurisdiction. The waiver of immunity will have the fullest scope permitted under the State Immunity Act 1978 of the United Kingdom and is intended to be irrevocable for purposes of such acts, but shall otherwise constitute a limited and specific waiver for the purpose of the Agency Agreement (as defined herein) of each Series of Notes and the Notes. The Issuer does not hereby waive such immunity from execution or attachment in respect of (a) property, including any bank account, used by a diplomatic or consular mission of the Issuer or its special missions or delegations to international organizations, (b) property of a military character and under the control of a military authority or defence agency of the Issuer, or (c) property located in Côte d'Ivoire and dedicated to a public or governmental use by the Issuer (as distinct from property which is for the time being in use or intended for use for commercial purposes within the meaning of the State Immunity Act 1978). The Issuer reserves the right to plead sovereign immunity under the US Foreign Sovereign Immunities Act of 1976 with respect to any actions brought against it in any court or in the United States of America under any United States federal or state securities law.

Subject to international conventions, enforcement of foreign court judgments in Côte d'Ivoire is subject to the following conditions:

- the foreign courts rendering the relevant judgment must offer reciprocal treatment to judgments obtained in the courts of Côte d'Ivoire; if such reciprocal treatment is not offered by the foreign court where the judgment is obtained, Côte d'Ivoire's courts will re-examine the merits of the case;
- Côte d'Ivoire's courts are not exclusively competent to hear the dispute, and the foreign courts are shown to have been competent to hear the dispute in accordance with their own respective laws;
- the foreign procedures were fully respected and the parties to the dispute were duly notified and properly represented in the proceedings;
- the dispute was properly resolved according to proper facts which were raised in the dispute;
- the foreign judgment is final, non-appealable and conclusive in accordance with relevant law; and
- the foreign judgment does not conflict with a prior Côte d'Ivoire judgment on the same subject matter and is not contrary to public order in and public law principles in Côte d'Ivoire.

There is no treaty between Côte d'Ivoire and the United Kingdom relating to the enforcement of foreign court judgments that would satisfy the first criterion above. However, Côte d'Ivoire is a contracting State (since February 1991) to the New York Convention, under which the Republic is bound to recognize arbitral awards as binding and enforce them in accordance with the rules and procedures of the territory in which the award is relied upon, under the conditions set out in the New York Convention.

## **USE OF PROCEEDS**

The net proceeds of the issue of the Notes are expected to amount to approximately €841,000,000 in respect of the 2031 Notes and approximately €849,000,000 in respect of the 2040 Notes, in each case after deduction of certain fees and expenses payable by the Issuer in connection with the offer and sale of the Notes.

The net proceeds of the issue will be used (i) to finance the purchase by Côte d'Ivoire of a portion of the final aggregate principal amount of the 2024 Eurobonds, 2025 Eurobonds, 2032 Eurobonds and 2028 Eurobonds agreed to be purchased pursuant to the Tender Offers and (ii) to finance investments under the State's budget, including the NDP's priority structural projects with respect to an increase in agricultural output, promotion of the manufacturing sector, and improvement in the standard of living, particularly through investments in the sectors of education, health, infrastructures, trade and culture.

## THE REPUBLIC OF CÔTE D'IVOIRE

### Geography

Ivory Coast, or the Republic of Côte d'Ivoire, is located in the western part of Africa, in the intertropical zone between the Tropic of Cancer and the Equator. It spans 322,462 km<sup>2</sup> and has over 500 km of coastline. It borders the Gulf of Guinea (Atlantic Ocean) in the south, Ghana in the east, Burkina Faso and Mali in the north, Guinea and Liberia in the west. While Yamoussoukro was officially designated as the political and administrative capital of the country in 1983, Abidjan has effectively remained the economic, political and administrative centre.

The country's climate is generally warm and humid and the territory has three main climatic zones characterized by rainfall volumes: the south (2 meters of rain per year), the west (1.5 meters of rain per year), and the north (1.2 meters of rain per year). The country is irrigated in the north and south by four rivers, namely the Bandama, the Comoé, the Sassandra and the Cavally.

The vegetation of the country is varied. The original landscape, consisting of dense forest, once occupied a third of the territory to the south and west. Open forests and wooded savannah also covered the rest of the country's territory from the centre to the north, with the exception of several dense and dry forest zones. However, since the colonial period, the areas of dense forest have been significantly diminished. According to the Government, the forest cover has decreased from 12 million ha in 1960 to 3.4 million ha in 2016 (representing 10.6% of the national area in 2019), representing a 71.4% loss over the past 50 years. This plant cover shelters several animal species, including mammals, such as the elephant, the most well-known animal, given that their tusks are at the origin of the country's name. Once abundant in the forest and savannah, elephants have been extensively hunted and poached and remain only in reserves and parks, as well as certain forest areas.

The country's topography consists mainly of coastal plains, bordered by lagoons which transition into plateaux and mountain ranges in the north west of the country. The country's highest summit, Mount Nimba, reaches 1,752 meters and is located in the western part of the country close to the Guinea and Liberia borders.

## Political History

Portuguese explorers were the first Europeans to reach the coast of the country in the 15<sup>th</sup> century. At the end of the 16<sup>th</sup> century, the Portuguese were joined by the Dutch, followed by the French and the English in the 17<sup>th</sup> century. These Europeans maintained commercial relations with the populations on the coast. The abundance of ivory gave this part of the African territory its name, Côte d'Ivoire. Trade involved various tropical products, but was dominated by the slave trade.

The abolition of slavery in 1815 at the Congress of Vienna, reaffirmed in 1885 at the Congress of Berlin, opened the door to new commercial relations between the populations of Côte d'Ivoire and new European actors. Despite fierce competition from the English and hostility from the local population, the French established several trading posts in the country and founded the colony of Côte d'Ivoire in 1893. From 1904 to 1958, the colony was part of French West Africa (*Afrique Occidentale Française*).

### *Independence and the “Economic Miracle”*

In 1945, the population began to fight for political emancipation from French colonization, as was the case in many other countries in Africa at the time. In December 1958, Côte d'Ivoire became an autonomous republic within the French Community (*Communauté française*) instituted between France and its former colonies. Félix Houphouët-Boigny, who was appointed Prime Minister in 1959, led Côte d'Ivoire to international sovereignty on 7 August 1960 and became the first President of the Republic of Côte d'Ivoire. Côte d'Ivoire has, nevertheless, since remained closely tied to the French currency due to its integration into the Franc Zone monetary system and the numerous French investments in the country.

Upon independence, the State's institutions were defined by a Constitution, which organized the country as a republic and stipulated the separation of executive, legislative and judicial powers. President Félix Houphouët-Boigny ruled the country, backed by the *Parti Démocratique de Côte d'Ivoire* (“**PDCI**”) through a single-party system.

Between 1960 and 1980, the political stability of the country, built in large part upon the single-party regime, led to strong economic growth. The country's economic transformation was spectacular in all areas: agriculture, industry, commerce and finance, to such a point that it became known as the “Ivorian economic miracle”. This was the result of policies which favoured a strong role for the State, private investment and foreign capital. Côte d'Ivoire experienced profound social changes during the first 20 years of its independence, which resulted in an increased standard of living and improved sanitary, educational and social facilities. The population increased from 3.7 million in 1960 to 12.2 million in 1988, representing an average annual growth rate of 3.8%, drawing both from the natural birth rate and immigration from other francophone West African countries. The population now numbers approximately 25.1 million as of 2018 according to INS estimates. See “– *Population, Education and Health – Population*”. According to the *2018 World Population Data Sheet* published by the Population Reference Bureau, the population of Côte d'Ivoire is projected to grow to around 33.3 million by the mid-2030s and 51.4 million by the mid-2050s.

However, from the mid-1980s, the economy began to stagnate as a result of a sharp deterioration in the terms of trade, high levels of sovereign debt and governance problems, including exorbitant expenses in relation to a series of large-scale projects. This led to discontent among the population which contributed to the establishment of a multiparty system. The first multiparty elections took place in 1990, with the main opposition party being Laurent Gbagbo's *Front Populaire Ivoirien* (“**FPI**”). In that year, President Houphouët-Boigny appointed Alassane Ouattara as Prime Minister with the mission of coordinating the stabilization and economic recovery program of Côte d'Ivoire under the Structural Adjustment Program implemented with the IMF.

When President Félix Houphouët-Boigny died on 7 December 1993, Henri Konan Bédié, then President of the National Assembly, became President of the Republic. In October 1995, he won the presidential elections but these elections were marked by a boycott on the part of most of the opposition (including the FPI). The new administration in power rapidly obtained an improvement of economic perspectives, a decrease of inflation and undertook actions in order to obtain external debt relief, in the context of the CFAF devaluation of 1994. See “*Public Debt–Relationship with Creditors–Multilateral Debt*”.

### ***Military and Political Crisis***

The intensification of political and social tensions and the imprisonment of several opposition leaders led to a *coup d'Etat* in December 1999 and President Henri Konan Bédié was overthrown by the armed forces. The army placed General Robert Guéï at the head of the State in December 1999.

The military power invited political parties and civil society to draft a new constitution, which was adopted on 1<sup>st</sup> August 2000. Presidential elections took place in October 2000. General Robert Guéï claimed to be the winner of this election but was met with street protests. The Supreme Court announced the results and declared Laurent Gbagbo the winner. Laurent Gbagbo initiated a national reconciliation forum, and then appointed a government of national unity.

However, the debate on the question of nationality and citizenship, known as the crisis of *ivoirité*, and the crises it caused, including a crisis over land ownership, led to an attempted coup on 19 September 2002. The attempted coup failed but rebel forces called *Forces Nouvelles* emerged in the north of the country and occupied 60% of the territory.

The ECOWAS intervened to secure a cease-fire between the Government and the rebels in 2003, as did later, France, through a military operation called “*Opération Licorne*,” to help stabilize the situation and allow a peace process. Several peace agreements were signed to end the conflict between the *Forces Nouvelles* and the Government of President Laurent Gbagbo, and resolutions were adopted by the United Nations Security Council, authorizing the deployment between the belligerents of 10,000 peacekeepers of the United Nations Operation in Côte d'Ivoire (“**UNOCI**”), including 4,600 French soldiers of the *Force Licorne*. However, these agreements and resolutions did not end the crisis and the presidential elections were postponed several times.

### ***Slow Exit from Crisis***

The peace talks between the Government of President Laurent Gbagbo and the *Forces Nouvelles* led to the Ouagadougou Political Agreement signed on 4 March 2007 and to a further postponement of the presidential elections to February 2008. This agreement was subsequently ratified by all of the political forces of Côte d'Ivoire, which represented a decisive turn to the exit of the crisis. A government of national reconciliation was put in place in March 2007, with Guillaume Soro, leader of the *Forces Nouvelles*, as Prime Minister. This Government began the reunification of the country and the redeployment of the administration over the whole territory. With the support of UNOCI forces, the Government also launched a disarmament, demobilization and reintegration program to unify the army, ensure security and enable the political process to resume with a view to organizing free, democratic and transparent presidential and legislative elections as soon as possible.

With the gradual return of confidence, Côte d'Ivoire's relations with the development partners were restored, with the signing of a Post-Conflict Assistance Project with the World Bank in July 2007 and an Emergency Post-Conflict Assistance Program with the IMF in August 2007. In addition, Côte d'Ivoire signed with the AfDB a Post-Crisis Multisector Institutional Support Project in February 2008 in addition to a Development Assistance Framework with the United Nations in July 2008.

In parallel, the structural reforms undertaken by the authorities made Côte d'Ivoire eligible for the reinforced initiative of the IMF and of the World Bank in favour of Heavily Indebted Poor Countries (“**HIPC**”). Côte d'Ivoire reached the “decision point” of the HIPC program in March 2009 and obtained interim debt relief on the part of certain creditors such as the Paris Club. The country entered into an additional reform program to reach the “completion point”, intended to secure final debt relief and debt sustainability. This required the Government to establish a credible track record in the implementation of key structural and social reforms, notably in the management of public funds, debt and governance.

### ***2010 Presidential Election and the Post-Election Crisis***

In the first round of the presidential election on 31 October 2010, President Laurent Gbagbo, the FPI candidate, obtained 38% of the votes, former Prime Minister Alassane Ouattara, the *Rassemblement des Républicains* (“**RDR**”) candidate, obtained 31% of the votes and former President Henri Konan Bédié, the PDCI candidate, obtained 25% of the votes. In the second round on 28 November 2010, Alassane Ouattara won the presidential election with 54% of the votes according to the Independent Electoral Commission (“**IEC**”) and the United Nations observers. However, following accusations of

electoral fraud in the pro-Ouattara northern regions, and notwithstanding that international observers had indicated no serious problem in the electoral process in this area, the Constitutional Court invalidated the results of the election in the northern regions and awarded victory to President Laurent Gbagbo, leading to an open conflict between supporters of the two sides. President Laurent Gbagbo clung to power until the pro-Ouattara military forces took control of the country and defeated the pro-Gbagbo forces in Abidjan in early April 2011, with the support of United Nations forces and French forces acting under resolution 1975 of the United Nations Security Council. Alassane Ouattara was then officially accorded the presidency of Côte d'Ivoire in April 2011. He appointed a cabinet composed of 12 members with Guillaume Soro, the former leader of the *Forces Nouvelles*, as Prime Minister and Minister of Defence.

Following his capture by the pro-Ouattara military forces in April 2011, the ICC formally issued an arrest warrant for former President Laurent Gbagbo. Former President Laurent Gbagbo was charged with crimes against humanity and incarcerated in The Hague in November 2011. On 12 June 2014, the ICC Pre-Trial Chamber I confirmed the charges against him of crimes against humanity committed between December 2010 and April 2011.

On 22 March 2014, the Government transferred Charles Blé Goudé, former leader of the Young Patriots (*Jeunes Patriotes*) and supporter of former President Laurent Gbagbo, to the ICC. Hearings for the confirmation of charges against him were held between 29 September and 2 October 2014. Mr. Blé Goudé faced four counts of crimes against humanity allegedly committed during the 2011 post-elections crisis. On November 2014, the ICC rejected a request from his defence that victim testimonies be excluded from the case record, as well as a challenge to the admissibility of the case.

The cases against Laurent Gbagbo and Charles Blé Goudé were joined on 11 March 2015. Their trial opened in January 2016. They both pleaded not guilty. The first stage of this proceeding was completed on 19 January 2018 with the last witness for the prosecution. In January 2018, following a trial in absentia, Laurent Gbagbo was sentenced to a 20-year sentence by the criminal court of Abidjan for embezzlement. On 15 January 2019, the ICC pronounced the acquittal of Laurent Gbagbo and Charles Blé Goudé. However, they remain on parole under the supervision of the ICC and are not allowed to enter Côte d'Ivoire. On 16 September 2019, the prosecutor of the ICC filed an appeal against the acquittal of Laurent Gbagbo and Charles Blé Goudé.

With respect to the former first lady, former President Laurent Gbagbo's wife, Mrs. Simone Gbagbo, in 2012 the ICC requested that she be transferred to The Hague to stand trial. On 11 December 2014, the ICC Pre-Trial Chamber I rejected the Government's challenge to the admissibility of the case and requested her immediate extradition to The Hague. On 17 December 2014, the Government submitted an appeal against the ICC decision and requested that its appeal have suspensive effect. On 20 January 2015, the ICC rejected the Government's request for suspensive effect. ICC proceedings concerning the government's appeal and the ICC's extradition request are pending. Mrs. Simone Gbagbo's trial in Côte d'Ivoire was held before the criminal court in Abidjan on 26 December 2014, resulting in her sentencing in 2015 to 20 years imprisonment for undermining the State's security. Following another trial before the criminal court of Abidjan which started on May 2016, Simone Gbagbo was acquitted of the other charges of "crime against humanity" and "war crimes" against her on 28 March 2017. Mrs. Simone Gbagbo was later pardoned by President Alassane Ouattara by Presidential Order No. 2018-669 of 6 August 2018, which granted amnesty to 800 prisoners of the post-election crisis. The release of Mrs. Simone Gbagbo has been effective since 8 August 2018 and was welcomed by all political stakeholders.

The economy of the country suffered severely from the post-election political and military conflict in the first half of 2011. The effects of the conflict were notably aggravated by the impact of the sanctions imposed by the European Union against former President Laurent Gbagbo's disputed post-election Government, the suspension of all activities in the ports of the country starting in January 2011, the closing of the agencies of the BCEAO and the closing of the private banking system in February 2011. Since April 2011, the Government formed by President Alassane Ouattara has achieved significant and internationally recognized progress in reconstructing the country and in reviving economic activity.

The UNOCI's mandate was formally completed on 30 June 2017 after 13 years, illustrating the progress made by Côte d'Ivoire on the path of long-term peace, stability and economic prosperity. On 26 June 2017, the Special Representative of the UN's Secretary-General to Côte d'Ivoire, the Head of the UNOCI, Ms. Aïchatou Mindaoudou, congratulated the

Ivorian authorities and people on their unwavering commitment and determination, which helped to commence the process of national reconciliation and social cohesion.

### **From the end of the post-electoral crisis to the 2015 elections**

Since coming to power, President Alassane Ouattara and his Government have continued to take measures to defuse political tensions, combat insecurity and accelerate economic recovery.

The year 2013 was marked by a constructive impetus in political dialogue, particularly in the context of the permanent framework for dialogue. The political dialogue took place between the Government and the FPI and between the opposition political parties. These efforts have focused on the implementation of new mechanisms to promote dialogue and negotiations with the Government.

Following direct talks with the Government on 15 January 2014, the FPI was asked to encourage its partisans living in exile to return to the country and to submit a list of its members still in prison or whose assets were frozen during the post-electoral crisis. The Government had previously announced its intention to proceed with unfreezing bank accounts of persons associated with the former regime who had been provisionally released and re-integrating them, where relevant, into public service. Between 27 January and 7 February 2014, 124 partisans of former President Laurent Gbagbo, who had been charged with undermining the State's security, were released on bail. Between 22 May and 21 July 2014, 275 other individuals, who had been arrested in the context of the post-electoral crisis, were released on bail. According to the 35<sup>th</sup> report on the UNOCI, at least 191 bank accounts belonging to such individuals have been unfrozen since July 2014.

President Alassane Ouattara continues to invite Ivoirians living in exile to return to Côte d'Ivoire. In January 2014, the former Managing Director of the Abidjan Port Authority returned to the country, as well as the former Minister of Defence and the former Minister of Mining and Energy of the former Government under Laurent Gbagbo. In the same month, the then Minister of Defence reintegrated 1,443 members of the former Ivorian defence and security forces, who had fled the country during the post-election crisis.

In February 2014, President Alassane Ouattara renewed the mandate of the Dialogue, Truth, and Reconciliation Commission (*Commission Dialogue Vérité et Réconciliation* ("CDVR")), whose initial two-year term had expired in September 2013, until September 2014. The CDVR's mission was: (i) uncover the truth, (ii) hold public hearings for victims, perpetrators and witnesses, and (iii) make recommendations to the Government concerning reparations and other means of reconciliation. Between 27 February and 12 March 2014, the CDVR led a truth-seeking process in eight cities, recording the testimony of 2,106 victims concerning massacres, kidnappings, disappearances, severe injuries, acts of torture, rape, as well as looting and destruction of property. The CDVR then decided to extend this process to the entire country. Between April and August 2014, more than 64,000 victims of the Ivorian crisis testified during victims' hearings before local commissions. In September 2014, 80 cases emblematic of the Ivorian crisis that occurred between 1990 and 2011 were heard during public hearings before the CDVR. The CDVR's final report, including its recommendations for reparations and other political, judicial and non-judicial measures, was submitted to the Government in December 2014. In February 2015, approximately 3,000 individuals were granted a presidential pardon as a statement of the reconciliation process. In March 2015, the CDVR was replaced by the National Commission for the Reconciliation and Indemnification of Victims (*Commission Nationale de Réconciliation et d'Indemnisation des Victimes* - CONARIV). CONARIV is responsible for preparing a consolidated single file of victims and proposing financial compensation for victims. In April 2016, the CONARIV submitted its final report and the consolidated single list of victims to President Ouattara. The end of the Commission's work paved the way for financial compensation of victims. The implementation of the Commission's final report was delegated to the Minister in charge of solidarity and social cohesion and is still being implemented.

On 26 March 2014, 12 opposition parties including the FPI announced the creation of a new coalition, the *Alliance des Forces Démocratiques de Côte d'Ivoire*. On 3 April 2014, the *Alliance des Forces Démocratiques de Côte d'Ivoire* recommended establishing a new discussion framework with the Government, by proposing the nomination of a neutral mediator, the establishment of a detailed timetable and the implementation of a monitoring mechanism. The FPI also

announced that talks would not resume until a mediator was named to ensure the monitoring of agreements concluded by the two parties.

Nevertheless, progress was made with respect to reforms in view of the 2015 presidential elections. On 8 January 2014, the President of the IEC announced that all political parties and other willing parties would be consulted on reforming the IEC and revising the electoral list. On 18 June 2014, President Alassane Ouattara signed into law a bill on the composition, organization and powers of the IEC. The governing body of the IEC is composed of 17 commissioners, including one representing the President of the Republic, and four for each of the ruling party, the opposition, civil society and the administration. The President of the IEC is elected from among the commissioners.

Political actors continued to prepare for the October 2015 presidential elections and several opposition leaders announced their candidacy. On 17 September 2014, Henri Konan Bédié, the President of the PDCI, announced he would support President Alassane Ouattara's presidential candidacy under the *Rassemblement des Houphouëtistes pour la Démocratie et la Paix* ("RHDP"), a coalition of five Ivorian political parties (RDR, PDCI, MFA, UPDCI and UPCI), primarily representing right-wing Ivorian Houphouëtists, founded on 18 May 2005, which allowed Alassane Ouattara to win the 2010 presidential elections. The update of the electoral list, which was expected to take place over one month, began on 1 June 2015. The IEC extended the deadline to 15 July 2015 due to low levels of participation and to allow latecomers to register. On 28 July 2015, the IEC delivered the Provisional Electoral List (*Liste Electorale Provisoire* ("LEP")) to political parties and groups. Each among them received a memory card from the President of the IEC that contained the 6,300,504 voters registered on the LEP. Out of 33 individuals who filed with the IEC for the presidential elections to be held on 25 October 2015, 23 candidates were rejected on 9 September 2015 by the Constitutional Council for not satisfying applicable requirements (e.g., the delivery of evidence of being up-to-date on their income tax payments).

Candidates whose applications were accepted included the outgoing President, Alassane Ouattara, leading the RHDP, Pascal Affi N'Guessan, President and candidate of the FPI, and certain dissidents of the PDCI, namely Charles Konan Banny and Amara Essy, which applied as independent candidates.

The Government granted CFAF 100 million to each candidate to cover electoral expenses. However, three candidates (Amara Essy, Mamadou Koulibaly and Charles Konan Banny) withdrew their application due to an alleged lack of transparency in the electoral process.

## **Recent Political Developments**

The last presidential elections took place on 25 October 2015. In the opinion of international observers such as the International Organization of the Francophonie (IOF), ECOWAS and the US Observation Mission, these elections were peaceful and transparent and no major incidents were noted that could taint the results. The results announced by the IEC and confirmed by the Constitutional Council were that President Alassane Ouattara won the first round with 83.66% of the vote, followed by Pascal Affi N'Guessan, candidate of the main opposition party, with 9.29%. The participation rate stood at 52.86%. President Alassane Ouattara was thus re-elected for another five-year term ending in 2020.

In order to strengthen the nation-building process and reinforce the social contract, President Ouattara submitted a new draft constitution to a vote by referendum, which was adopted by a 93.42% majority vote. The law instituting the constitution was promulgated on 8 November 2016, marking the Third Republic's entry into force. This new constitution included the creation of the office of Vice-President of the Republic, a second chamber of Parliament (the Senate) and the Court of Audit.

Since 10 January 2017, the Vice-President is Daniel Kablan Duncan, a member of the PDCI which forms a coalition with the RDR, the party of President Ouattara.

The Senate has been fully operational since 5 April 2018 with 99 members. Two-thirds of senators (66 senators) were elected by indirect universal suffrage during senatorial elections held on 24 March 2018 and one-third (33 senators) were appointed by the President of the Republic on 3 April 2019. The Senate sits in Yamoussoukro, the country's political and administrative capital. The president of the Senate is Jeannot Ahoussou-Kouadio, a member of the PDCI

The last legislative elections took place in December 2016. They saw the victory of the alliance between the RDR and the PDCI. On the opposition side, the FPI, led by Pascal Affi N'Guessan, won three seats in the National Assembly. Mr. Amadou Soumahoro was elected as the new president of the National Assembly on 7 March 2019, following the resignation of Mr. Guillaume Soro. In addition, the National Assembly has seen the birth of two new parliamentary groups: the RHDP and Rassemblement. The RHDP parliamentary group is the result of the merger between various political groups, namely RDR, UDPCI, part of the PDCI-RDA, and other independent members of parliament. The Rassemblement parliamentary group is formed by officials close to the former president of the National Assembly, Mr. Guillaume Soro.

The Ivoirian political landscape is going through a reorganisation phase induced by the prospect of the forthcoming presidential elections of October 2020. However, the RHDP, the PDCI and the FPI ultimately remain the dominant players of the political arena and are still structured around their historical leaders. The RHDP coalition whose hegemonic position allowed the re-election of President Alassane Ouattara in 2015 has faced internal challenges in 2018 due to disagreements upon the interpretation of the mode of alternation between the PDCI and the RDR on the one hand, and upon the creation of a unified RHDP party on the other hand. Thus, after notifying its withdrawal from the unified party, the PDCI officially announced its withdrawal from the RHDP coalition. This situation has created a split within the PDCI between proponents of a break from the RHDP and other members who support the alliance.

On 30 July 2019, the National Assembly adopted a reform of the IEC, reducing the number of commissioners to 15, and changing the composition, including three representatives for each of the Presidential party and of the opposition, six for the civil society, and one for each of the Supreme Council of Magistracy, the President of the Republic and the Ministry of Interior. The new members of the IEC were announced on 25 September 2019.

The acquittal of former President Laurent Gbagbo and Mr. Charles Blé Goudé by the ICC on 15 January 2019, less than two years before the next presidential elections of 2020, has accelerated the reorganisation of the Ivoirian political landscape. Former President Bédié called for the establishment of a new political coalition with former President Laurent Gbagbo and their parties are reported to be working towards this objective.

## **Governance**

The Ibrahim Index of African Governance (“**IIAG**”) examines the governance status in each of the 54 African countries. According to the 2018 IIAG published on 29 October 2018, Côte d’Ivoire is the most improved country between 2008 and 2017 in terms of *Overall Governance*, climbing from the 41<sup>st</sup> to 22<sup>nd</sup> spot, an improvement of +12.7 points. The 2018 IIAG report ranks Côte d’Ivoire 22<sup>nd</sup> out of 54 with a score of 54.5 out of 100. The African average is 49.9. Côte d’Ivoire thus becomes the only African country to have increased its score in all four categories and fourteen subcategories of the IIAG.

Côte d’Ivoire registered significant progress between 2008 and 2017 in category *Safety & Rule of Law* (+15.4) (its highest score at 59.4) and in sub-category *Transparency & Accountability* (+23.2) to become the one of the most improved country on the continent in these two measures over the last decade. In this same period, it has improved across various categories, registering the largest gains in category *Participation & Human Rights* (+15.9, the country having improved the second-most over the past decade with a score of 55.8) and *Human Development* (+11.4) with significant progress in sub-categories *Welfare* (+13.6) and *Education* (+11.3), and in category *Sustainable Economic Opportunity* (+8.0), Côte d’Ivoire shows positive trends registering strong progress in sub-categories *Infrastructure* (+4.5), and in *Business Environment* (+5.7).

In February 2019, in recognition of the Government’s fight against corruption, Côte d’Ivoire was the recipient of the African Union Anti-Corruption Award at the 32<sup>nd</sup> Ordinary Session of the Assembly of Heads of State and Government.

## **National and International Justice**

The efforts to bring to justice the alleged perpetrators of the crimes committed during the post-election crisis are ongoing. The mandate of the special investigative unit created in 2011 to investigate crimes perpetrated during that period was

extended by Presidential decree on 30 December 2013, and this unit has been restructured to become a permanent Special Investigative and Analytical Unit (*Cellule Spéciale d'Enquête et d'Investigation*) with enhanced resources and means.

The proceedings against former President Laurent Gbagbo, Mr. Charles Blé Goudé and former president Laurent Gbagbo's wife, Simone Gbagbo, are described above in "*2010 Presidential Election and the Post-Election Crisis*".

On 3 February 2014, the military prosecutor exonerated 10 high-ranking police officers who had been accused of insubordination during the post-election crisis. On 12 February 2014, the military tribunal declared that the former head of the National Police School (*Ecole Nationale de Police*) was guilty of misappropriating funds and sentenced her, as well as four of the six other police officers charged with the same offence, to two years' imprisonment.

A trial, known as the "Novotel captives" was held before the Ivorian Courts between February 2017 and April 2017. The accused, including General Dogbo Blé, former commander of the Republican Guard, were under prosecution before the Criminal Court for allegations of kidnapping, confining, torturing and murdering four individuals, including one manager and three guests staying at the Novotel hotel on 4 April 2011. At the end of the proceedings, the jury sentenced General Dogbo Blé to a prison sentence of 18 years and the others accused to varying prison sentences ranging from 10 to 20 years.

### **Disarmament, Demobilization and Reintegration of Ex-Combatants**

The Disarmament, Demobilization and Reintegration of ex-combatants ("**DDR**") was the process by which ex-combatants were required to lay down their arms and return to civilian life or rejoin the country's restructured armed forces.

With the UNOCI's support, the implementation of the DDR process in Côte d'Ivoire was the responsibility of the Government through the National Authority for Disarmament, Demobilization and Reintegration (*Autorité Nationale pour le Désarmement, la Démobilisation et la Réintégration* ("**ADDR**")), an institution created by Decree No. 2012-787 of 8 August 2012 under the auspices of the National Security Council ("**NSC**"). The ADDR established a program framework which was presented to international partners in February 2014. It also established partnerships with national institutions within the fields of finance, training and employment as well as with international donors. The European Union and the AfDB provided €14 million and US\$30 million, respectively, to finance the ADDR's activities.

According to the UNOCI, the DDR process was divided into three phases: (i) disarmament, (ii) demobilization and (iii) reintegration. Disarmament consisted of the collection of weapons, ammunition and other military equipment in the possession of ex-combatants. During this operation, the ex-combatants handed in their weapons to the ADDR in presence of the UNOCI experts. These were then sorted, stored and secured with the help of the United Nations. Malfunctioning weapons were destroyed by the United Nations, the others marked using the ECOWAS Convention on Small Arms and Small Caliber Ammunition, were aimed at ensuring proper registration and identification.

Demobilization represented the passage of the ex-combatant into civilian life. It consisted in profiling the ex-combatants, conducting a medical examination and providing a civilian package such as clothes and shoes. The ex-combatants then attended sessions on reintegration opportunities. At the end of the demobilization process, a demobilization card was given to the ex-combatant to allow him to start his rehabilitation. In Côte d'Ivoire, the ADDR introduced an innovative "resocialization" approach to facilitate the social reintegration of the ex-combatants, reconciliation and social cohesion.

"Reinsertion" was a transitional phase between the demobilization of ex-combatants and their final reintegration into social and economic life. The ex-combatant began his rehabilitation by receiving financial assistance upon presentation of his demobilization card. It also involved facilitating the reintegration of ex-combatants through economic opportunities offered as a social safety net. Reintegration opportunities for ex-combatants included income-generating activities, micro-projects, professional training and scholarships.

On 4-6 November 2014, the ADDR held an international knowledge-sharing workshop to discuss the achievements and challenges in the national program. Experts from several partner countries were impressed with achievements of the DDR process in Côte d'Ivoire, and commended Côte d'Ivoire's initiatives for the implementation of the re-socialization program, a unique tool to ensure adequate socio-economic reintegration of the ex-combatants.

On 31 December 2014, the ADDR announced that some 46,000 ex-combatants, including 3,538 women, had been disarmed and reintegrated representing 62% of the 74,000 ex-combatants registered in the database. Around 25,000 weapons were collected over the same period. The number of ex-combatants affiliated with the former regime and entering the DDR process increased over time to reach 25%, reflecting the improvement in the socio-political environment, social cohesion and reconciliation in the country. A thorough review of the database suggested that more than 10,000 ex-combatants were either dead, no longer interested in participating in the process or had permanently relocated abroad. The UNOCI assisted the Government with its reinsertion efforts through the implementation of 79 community-based, countrywide reinsertion projects aimed at the enhancement of community safety and social cohesion, the reinforcement of the weapons collection program and the payment of transitional safety allowances to approximately 24,000 former combatants.

With regard to civilian disarmament, the National Commission on Small Arms and Light Weapons (the “NCSALW”), with the support of the United Nations Mine Action Service (the “UNMAS”), conducted 27 weapons collection operations, collecting 376 weapons, 149 ammunition and 5,918 small arms ammunition. On 10 October 2014, the UNOCI, the ADDR and the NCSALW launched a tripartite community disarmament plan. The UNMAS supported nine operations in Bloléquin, Dieuzon, Duékoué, Guiglo, Toulepleu and Zagné. A total of 176 weapons, 851 small arms ammunition and 66 items of explosive devices were collected.

According to the UNOCI’s final report of 30 January 2017, a total of 43,510 armaments, including 14,121 weapons, were collected throughout the disarmament, demobilization and reintegration period from 2012 to 2015. The low number of weapons and explosive ordnance that was collected was due to the significant number of weapons still hidden within local communities. The national commission for the fight against the proliferation and illegal distribution of light weapons and small arms continued community weapons collections, offering benefits to civilians in exchange for weapons and ammunition, and involving local and traditional authorities in raising the awareness of target groups.

On 24 June 2015, the Council of Ministers adopted two decrees: (i) a decree ending the activities of the ADDR and (ii) a decree creating the Coordination, Monitoring and Reintegration Cell (*Cellule de Coordination, de Suivi et de Réinsertion* (“CCSR”). These decrees aim to consolidate the ADDR’s success and, as a transitional measure, transfer the activities of reinserting ex-combatants demobilized by the ADDR to the CCSR, created specifically for this purpose and placed under the authority of the NSC. The CCSR is responsible for organizing and coordinating the resocialization activities carried out by the Ministry of Solidarity, Family, Women and Children, the *Gendarmerie Nationale*, the National Institute of Public Health, the Blue Cross or any other national or international organization. It also manages the database and referencing of specialized structures for the implementation of activities to reinsert ex-combatants, as well as the implementation of agreements concluded by the ADDR.

The ADDR’s reinsertion and reintegration records as of 1 September 2015 show that out of the 69,506 ex-combatants that were identified, 63,639 cases have been treated, a success rate of 92%. This high achievement rate enabled the Government to terminate the ADDR’s operations without creating undue high security risk.

The table below shows the record of the ADDR’s activities as of 1 September 2015:

<b>Category</b>	<b>Number</b>
Individuals being resocialized .....	1,974
Individuals undergoing professional training .....	2,723
Individuals in training .....	1,448
Individuals reintegrated .....	57,514

## Defence and Security

Since the end of the 2011 post-election crisis, the Government has made peace and security key priorities and, to this effect, has endeavoured to eliminate the roots of violence in Ivorian society by promoting national reconciliation, combating poverty among the population and putting inclusive economic growth at the top of its agenda. Political stability and security have thus markedly improved. The safety index (a measure tracked by the Interior and Security Ministry) improved continuously, decreasing from 3.2 in 2011 to 1.1 in September 2017. The Government considers that the State's authority is effective throughout the national territory and the security forces carry out their task of protecting people, property and the territory effectively. The UNOCI mission ended on 30 June 2017. This mission had been authorized by the UN's Security Council in February 2004 and had succeeded the ECOWAS force.

This has led several international organizations to move their headquarters to Abidjan. For example, the UNESCO returned to Abidjan in September 2013, the AfDB completed the relocation of its headquarters to Abidjan in late 2014 after a 10-year absence and the International Cocoa Organization moved its headquarters to Abidjan in April 2017 after 44 years in London. In addition, several elections were organized in the country in 2015 and 2016 without giving rise to any major political incident.

Some occasional instances of violence in the country have recently highlighted the necessity for the Government to continue its efforts of consolidating a climate of peace and social cohesion. On 6 January 2017, armed soldiers started a protest in Bouaké, the second city in the country, which spread to several big cities in the country the next day. The soldiers involved in these armed protests were the so-called "8,400", former members of the *Forces Nouvelles*, who were integrated into the regular Ivorian army after the 2007 Ouagadougou agreements. According to the Government, the army mutineers were demanding the payment of a bonus, salary increases and faster promotion.

Following negotiations between the Government and the leaders of the mutinous soldiers, President Ouattara announced an agreement on the settlement of their demands. This agreement, which was signed in Bouaké on 13 January 2017, provided for the payment of CFAF 12 million to each of the mutinous soldiers, of which CFAF 5 million was paid in January 2017, with the balance to be paid through monthly payments of CFAF 1 million as from and including May 2017. Thus, the total amount of CFAF 100.8 billion agreed to be paid in connection with the settlement agreement was paid. The final payments were made at the end of June 2017.

On 11 May 2017, a representative of the mutinous soldiers announced in a public statement before President Ouattara and the military hierarchy that all mutinous soldiers had consented to renounce all remaining payments under the January 2017 settlement agreement. However, on the morning of 12 May 2017, armed protests broke out again among other mutinous soldiers in all military barracks in the country to denounce the statement purportedly made on their behalf the previous day before President Ouattara and to reaffirm their demand for full payment of the amounts agreed in the January 2017 settlement agreement. The protests continued until 15 May 2017 with soldiers blocking roads and sporadic gun fire being heard in Abidjan and Bouaké, sparking security concerns. The Government later reported four dead and nine injured as a result of the protests. In the evening of 15 May 2017, the Government reached an agreement with the mutinous soldiers as a result of which the armed protests ended and the Government paid CFAF 5 million to each mutinous soldier on 16 May 2017. The outstanding amount of CFAF 2 million per person was paid in June 2017. Some of the soldiers, who were entitled to promotion in view of their seniority and experience, and whose promotion had been unduly delayed, were promoted.

Furthermore, on 23 May 2017, former *Forces Nouvelles* combatants who were demobilized following the 2011 post-election crisis organized protests reportedly to demand the payment of a CFAF 18 million bonus per demobilized ex-combatant. According to the Interior Ministry, five demobilized ex-combatants were killed and 14 others were injured as a result of a confrontation with policemen in Bouaké. The spokesman for the protesters, who was arrested following the incidents, was released on 26 May 2017. Demobilized ex-combatants are estimated to number about 6,000, according to media reports. The Government does not recognize this group or their claims, and believes that the situation of demobilized combatants was adequately addressed through the DDR programme.

As part of the implementation of the army's voluntary retirement plan, and out of a total of 1,067 retirement requests, 991 requests were granted by the review commission as of 31 October 2017, the deadline for applications. These include

three officers, 634 non-commissioned officers and 354 of enlisted rank. The soldiers concerned were subject to an early retirement plan as of 31 December 2017. The Ivorian army comprises approximately 23,000 soldiers. The 2016 military plan law provides for the institution's modernization through an increased focus on professionalism and a reduction of staff. Investments are also regularly made in order to improve soldiers' quality of life (which includes housing and clothing).

## **Population, Education and Health**

### ***Population***

Côte d'Ivoire's total population in 2014 stood at 22.7 million, according to the last GPHC (2014), and is estimated at 25.1 million in 2018 (INS). According to the 2014 GPHC, Côte d'Ivoire's population is composed of 11.7 million men (51.6%) and 10.9 million women (48.4%). Children (ages 0-14) represented 41.8% of the total population and young people (ages 15-34) represented 35.5% of the total population. As a result, Côte d'Ivoire's population is relatively young, with 77.3% of the population being under 35. Côte d'Ivoire is a country of immigration at the regional level for the surrounding countries of West Africa.

According to the INS, the average annual population growth rate was 2.6% between 1998 and 2017 and 3.3% between 1988 and 1998.

With 17.1 million of the country's inhabitants (75.5%) occupying 48% of the country's territory, population density stands at 70.3 inhabitants per km<sup>2</sup>. The 2014 GPHC shows that half of the population (11,370,347 inhabitants, or 50.2%) is urban, primarily concentrated in Abidjan which, with a population of 4,395,243 inhabitants, accounts for nearly four out of ten urban residents (38.7%).

The population remains unevenly distributed across the country's territory. The district of Abidjan (Abidjan, Bingerville, Anyama and Songon), with a population of 4,707,404 inhabitants, accounts for one-fifth of the total population (20.8% according to available estimates). The least-populated regions are located in the district of Denguélé (Kabadougou and Folon), which has a population of 288,779 (0.4%), of which a population of 96,415 is in the Folon region.

Twelve cities have more than 100,000 residents. Following the 2014 GPHC, the cities of Divo, Soubré, Abengourou and Anyama reached this milestone. Each of these cities is a provincial capital, with the exception of Anyama.

Côte d'Ivoire's population consists predominantly of five main ethnic groups: the Mandé group (the Dan, the Yacouba, the Toura, the Gouro, the Malinké and the Dioula) in the north-west and the west, the Voltaic group (Sénoufo, Koulango and Lobi) in the north, the Krou group (Wê, Bété, Bakwé, Godié and Dida) in the south-west and mid-west, and the Akan group, which is divided into the "*Lagunaires*," in the south, and the Agni-Baoulé in the center, the south-east and the east.

French is the official language of the country. About 60 vernacular languages are also spoken, *baoulé* and *dioula* being the most widely spoken.

Côte d'Ivoire is a secular country where a variety of religions are practiced, namely Islam (39% of the population), Christianity (about 30% of the population) and Animism (about 12% of the population).

Côte d'Ivoire's ranking in the 2018 United Nations Development Programme ("UNDP") Human Development Index ("HDI") was 169 out of 189 with an HDI of 0.492, compared to 169 in 2016 with an IDH of 0.486. Between 2010 and 2017, Côte d'Ivoire's HDI value increased from 0.442 to 0.492, an increase of approximately 11.31% or an average annual increase of about 0.83%. The HDI is developed by the UNDP and provides a summary measure for assessing long-term progress in three basic dimensions of human development: a long and healthy life, access to education and a decent standard of living.

The table below sets out selected comparative macro-economic statistics regarding certain socio-economic indicators for 2018 (unless otherwise indicated) for Côte d'Ivoire and for certain other African countries:

	<b>Côte d'Ivoire</b>	<b>Ghana</b>	<b>Zambia</b>	<b>Nigeria</b>	<b>South Africa</b>	<b>Kenya</b>

<sup>(2)</sup> Figures for 2017.

### ***New Nationality Law***

Nationality was one of the issues from which the Ivorian crisis originated. In this respect, a nationality law, whose effects were limited to a two-year period ending in April 2016, was adopted by the National Assembly in August 2013. This law instituted a special regime with regard to the acquisition of Ivorian nationality by declaration for persons in the following categories:

- persons born in Côte d'Ivoire of foreign parents and under 21 as at 20 December 1961;
- persons whose usual and uninterrupted residence was in Côte d'Ivoire before 7 August 1960 and whose children were born in Côte d'Ivoire;
- persons of foreign parents born in Côte d'Ivoire between 20 December 1961 and 25 January 1973.

In addition, the implementing decree of this law stipulated that children born in Côte d'Ivoire of persons that fall within the three categories above also benefitted from the law.

These beneficiaries could claim Ivorian nationality by following a declaration procedure with one of the nine Public Prosecutors, or one of (i) the 27 resident substitute prosecutors, (ii) the 19 departmental *préfets* or (iii) the 436 sub-*préfets* located throughout the country. In the event a request was deemed acceptable, a certificate attesting to the acquisition of Ivorian nationality through the declaration procedure, signed by the Ministry of Justice, would be delivered to the applicant.

As of 31 December 2018, 16,043 certificates of nationality have been delivered out of 123,810 requests. The difference between the number of requests filed and that of certificates of nationality delivered is mainly the result of the large number of applications rejected due to forged birth certificates. The Government believes that it is imperative to find solutions to regularise the civil status of holders of forged or stolen administrative documents.

Also, upon a proposal from the Ministry of Justice and Human Rights and the Ministry of Interior and Security, the Government enacted Law No. 2018-863 of 19 November 2018 establishing a special procedure for the declaration of birth, restoration of identity and transcription of birth certificates. The law aims to reduce (i) the large number of undeclared persons to the civil registrar; (ii) the large number of destroyed, deteriorated or lost civil registries; (iii) the high rate of irregular registration of births; and (iv) the large number of people using forged civil status certificates. This law also provides for the granting of amnesty to persons born in Côte d'Ivoire who either use forged birth certificates or birth certificates belonging to others.

On 19 November 2018, the Government enacted Law No. 2018-862 relating to civil status. This law contains various provisions aimed at raising the declaration rate for events relating to civil status, improving the reliability of civil status certificates and allowing for the production of reliable statistics.

### ***Education***

The educational system is made up of two types of education: general education and technical education and vocational training. General education comprises three levels: (i) pre-school and primary education, (ii) secondary general education, and (iii) higher education. Technical education and vocational training begin in secondary school.

In 1997, Côte d’Ivoire prepared a 1998-2010 National Plan for the Development of Education/Vocational Training (*Plan National de Développement du Secteur Éducation/Formation* (“**PNDEF**”)). However, the results obtained were insufficient and fell short of the objectives of the PNDEF according to the State Report on the National Educational System (*Rapport d’Etat sur le Système Éducatif National* issued in 2007. This report revealed that the educational system continued to face difficulties of different magnitude, particularly related to (i) limited accessibility and supervision, (ii) mismanagement of resources, (iii) budgetary constraints, (iv) inadequacy of teaching materials and infrastructures, and (v) obsolescence of equipment. The Ivorian educational system is also faced with social problems that hinder the schooling of vulnerable students, particularly young women, early pregnancy, the HIV/AIDS pandemic, school violence, politicisation of schools and lack of birth certificates.

Subsequently, the institutional capacities of Ministries in charge of the education and vocational training sector were improved with support from the World Bank through the Education–Vocational Training Sector Assistance Program (*Programme d’Appui au Secteur Éducation–Formation* (“**PASEF**”)). This program has allowed the implementation of a series of measures, including starting the implementation of the Education-Vocational Training Information and Management System (*Système d’Informations et de Gestion de l’Éducation-Formation*), defining sectorial policy with the adoption of the Letter on Education Policy, drafting a medium-term action plan (*Plan d’Actions à Moyen Terme*) to make the Educational Policy operational, and drafting the Medium-Term Expenditure Frameworks (*Cadres de Dépenses à Moyen Terme* (“**CDMT**”)) for the sector and the equipment of the central and deconcentrated structures.

Outside of the traditional educational system, there is an alternative education system put in place by state institutions and civil society organizations. These alternative options include notably community educational centres and confessional denominational schools. Approximately 500,000 students attend these schools. In the interest of moving this alternative educational system closer to current norms, a framework for coordination and support was implemented in order to offer alternative education options to children not attending school. Following an appraisal organized by the Ministry of National Education and Vocational Training in 2019, 343 Koranic schools, which enrolled a total of 101,890 students, of which 46,600 are girls, were integrated into the official Ivorian educational system.

Between February and May 2019, a number of teachers in the primary and secondary education sectors supported by their unions went on strike demanding, among other things, a revaluation of their wages, an increase in their housing allowances, and that Wednesday be a day off in primary schools. None of these claims were accepted in the Government. However, the Government reassured the unions that their demands were duly taken into account and further discussions will be held with all stakeholders. No date has yet been confirmed for such discussions. The impact of the strikes was felt by a fall in the success rates of the end-of-year examinations in primary education (57.3% in 2019, compared to 60.1% in 2018) and secondary education (41.2% in 2019, compared to 46.1% in 2018).

The Government has recognized in the NDP the urgent need to strengthen the quality of the education system to meet its economic growth targets, in particular in the area of vocational training, and has developed an ambitious agenda aimed at achieving better outcomes in the education sector by committing to an education program for all 6 to 16 year olds. The development targets in the primary and secondary education system seek to improve the gender parity index, enrolment rate, achievement rate, transition rate from primary to secondary, and literacy rate, in relation with the Government’s Education for All agenda, including by providing free access to books for pupils.

The following table shows the Government’s expenses in the education sector from 2013 to 2018:

	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018<sup>(*)</sup></b>
Education (CFAF billions) .....	685.6	788.2	926.8	1,179.3	1,085.5	1,246.7
Education (% of nominal GDP) .....	4.4	4.5	4.9	5.4	4.6	4.8

Source: SEPMBPE/DGBF

*(\*) forecasts*

## Pre-school and Primary Education

Primary education is free and mandatory in Côte d'Ivoire. However, in pre-school (children between 3 and 5 years old) and primary school, participation and accessibility rates remain low. The Gross Education Rate (*Taux Brut de Scolarisation* ("TBS")) for pre-school, which corresponds to the number of students enrolled as compared to the school-age population, expressed as a percentage, is 9.0%, according to data from the 2018-2019 statistical analysis report on the educational system carried out by the Strategies, Planning and Statistics Department (*Direction des Stratégies, de la Planification et des Statistiques* ("DSPS")). For pre-school, the low rate is primarily due to the ignorance of certain sections of the population regarding the importance of pre-school education and the weak pre-school infrastructure coverage across the national territory.

In primary schools, this rate is 100.5% in 2018-2019, with a rate of 100.5% for boys and 100.4% for girls. Although this rate is high, it conceals certain regional disparities. Furthermore, it reflects the necessity of continued efforts to attain universal education. To reach this goal, the number of children enrolled in school before or after the normal schooling age must be reduced and the Net Education Rate (*Taux Net de Scolarisation* ("TNS")) (which corresponds to the quotient of the population enrolled at the official school-age as compared to the school-age population, expressed as a percentage) must reach 100%. The TNS, which currently stands at 91.3%, shows that 8.7% of children aged 6 to 11 are not enrolled in primary school. For girls, the TBS recorded a strong increase, from 77.5% in 2010-2011 to 100.4% in 2018-2019. The continuing increase in the education rate for girls is due to awareness campaigns promoting their schooling and efforts made in recent years to stimulate demand for education, in particular via the creation and expansion of school canteens, the construction of new classrooms and the distribution of free school kits.

In terms of capacity, the number of primary school classes increased from 64,315 in 2010-2011 for 2,730,305 students, to 95,866 in 2018-2019 (of which 16.66% were private) for 4,003,884 students. The number of students per class decreased from 43 to 42 on average for the same period, with unequal distribution across the country. The number of primary school teachers increased from 58,121 in 2010-2011, 32% of which were women, to 96,255 in 2018-2019, 32.10% of which are women.

## Secondary Education

Secondary education capacity increased from 1,084 schools, of which 786 were private, in 2010-2011, to 2,019 of which 1,495 are private, in 2018-2019. The number of students in secondary schools increased from 999,707, of which 39% were girls, in 2010-2011, to 2,110,499, of which 43.99% are girls, in 2018-2019, or a total increase of 111.11%. Over the same period, infrastructure increased by an average of 11.81% per year. Furthermore, public infrastructure recorded an average growth of 9.4% per year. This is due to the construction of local middle schools carried out by the State with the support of various development partners, which also resulted in significant increases in the number of classrooms (an average of 23.8% per year). At the end of the secondary education, students can sit the *baccalauréat* examination.

The number of teachers in secondary schools has also increased, from 21,793 in 2010-2011, of which 16% were women, to 61,338 in 2018-2019, of which 14.0% are women. These numbers remain inadequate to face expansion needs, especially in the sciences and French. During the 2013-2014 school year, 1,783 teaching positions remained vacant. In addition, spatial distribution of teachers, especially in primary schools, shows much disparity, with a strong concentration in urban centres.

## Higher Education

Higher education in Côte d'Ivoire comprises 176,504 students and is provided through 217 institutions, including 6 public universities, 27 private universities, 32 selective public institutes (*grandes écoles publiques*), and 153 selective private institutes (*grandes écoles privées*). With regard to the scientific research component, the statistical yearbook lists 73 institutions, 208 researchers and 3,482 faculty members.

Four-fifths of the higher education institutions are concentrated in the Abidjan district. In addition, three universities and schools (UFHB, INP-HB and ENSEA) were identified as part of a program to create regional centres of excellence and the INP-HB has been identified as the regional centre for the training of pilots for civil aviation.

In an effort to respond to the strong demand for access to higher education, the State pays for a number of students to enrol at private universities where tuition fees are based on students' financial capabilities.

### Technical Education and Vocational Training

In 2018-2019, secondary technical education comprises 288 institutions, three of which are public, with 46,153 students for 6,475 teachers. The number of teachers grew annually at an average rate of 33% from 2011 to 2014. The rate of students repeating a year is 8.57% in 2018, of which 7.08% were girls and 9.97% were boys.

The Government initiated a program to build eight technical high schools and rehabilitate and equip existing technical high schools.

In 2018-2019, vocational training comprises 60 public institutions and 245 private institutions and State-certified private training centres. The personnel of these institutions grew annually at an average rate of 29% from 2011 to 2014. At the beginning of the 2018-2019 school year, there were 54,617 students in vocation training institutions.

For the purpose of modernizing and improving technical and vocational training programs to more adequately respond to the job market and the innovation challenges, the Government adopted a strategic reform plan for the technical and vocational training system (*plan stratégique de réforme du système d'enseignement technique et de formation professionnelle*) over the 2016-2020 period. The plan's main purpose is to (i) align the education-training system; (ii) enhance access to the technical teaching and vocational training system; (iii) improve the quality of training programs; (iv) strengthen the partnership between schools and businesses; and (v), as a result, develop students' employability. Accordingly, the plan aims to offer the same educational options to all young Ivorians under the same conditions. It is designed to offer students quality education and professional training programs capable of providing them with the required skills and expertise to improve their employability, and to workers an opportunity to strengthen their skills and improve their productivity. The strategic plan includes the construction of eight technical and vocational high schools, ten regional divisions of the *Agence nationale de la formation professionnelle*, six application and production workshops; four sectoral centres (mines, agriculture, transportation, automobiles), the recruitment of more than 153 teachers and the improvement of technical and teaching tools in training centres. A total budget of CFAF 565 billion is devoted to the plan, financed through the State budget with the support of bilateral and multilateral financial partners. As for the strengthening of the technical and vocational training system, several initiatives were carried out, including short-term qualifying training for 7,400 young people, including 400 young people with special needs (people with disabilities, vulnerable young people, apprentices, etc.). With regard to the establishment of a national certification framework, the process is being initiated through various professional branches. Moreover, an agricultural training department was created at the National Professional Institute for Technical and Vocational Education (*Institut Professionnel National de l'Enseignement Professionnel Technique* ("IPNEPT")), seven technical and vocational schools (*établissements d'enseignement technique et professionnel*) were built in Bouaflé, Boundiali, Gbon, Issia, Yamoussoukro and the Mohammed VI Multisectorial Vocational Training Center (*Centre Multisectoriel de formation professionnelle Mohammed VI*) was built in Abidjan-Yopougon. In addition, four vocational training structures are currently under construction, five structures were fully rehabilitated and equipped, and nine mobile vocational training units were rehabilitated since 2016.

### Quality of Education

According to latest data available, Côte d'Ivoire's illiteracy rate was 45.0% in 2015 (2015 survey of living standards). The then Minister of National Education, Mrs. Kandia Camara, declared on the 48<sup>th</sup> international literacy day in 2013 that the Government intended to decrease the illiteracy rate to 35% by 2020.

Primary and secondary educational performance is limited by difficult practical conditions, lack of teaching materials, lack of infrastructure, as well as insufficient educational staff. The output of the educational system is still low, with increased levels of school dropouts. The education system is also characterized by substantial inequalities in access and educational performance. The chance of attending school is not equal for all children based on sex and geographic location. Over the past two decades, the Government has initiated a program for school cafeterias in public schools, free distribution of school kits including a book bag and school supplies (books and notebooks), as well as an intensive

awareness program seeking to eliminate discriminatory behaviour towards young women. The implementation of these projects has helped improve school access, increase primary school completion rate and decrease disparities.

The high rate of students repeating a year (11.5% in primary and 13% in general secondary school in 2016-2017) creates further pressure on already limited educational infrastructure. It negatively affects the internal efficiency and the performance of the educational system, and increases the costs of education for the State and for families.

## **Health**

Côte d'Ivoire has a dual healthcare system, with the private sector and the public health sector practicing modern medicine on the one hand, and a traditional healthcare system practicing traditional medicine on the other.

The public sector is divided into three levels and comprised in 2017: (i) a primary or peripheral level including 2,252 First-Contact Health Facilities (*Etablissements Sanitaires de Premiers Contacts - ESPC*) of which 1,528 are located in rural areas, (ii) a secondary level comprising healthcare establishments supporting the first level, composed of 82 General Hospitals, 17 Regional Hospital Centers and two Specialized Hospital Centers (Psychiatric Hospitals in Bingerville and Bouaké) and (iii) a tertiary level including healthcare establishments supporting the second level, essentially composed of National Public Establishments with five University Hospitals (*Centres Hospitaliers Universitaires - CHU*), five Specialized National Institutes: the National Institute of Public Health (*Institut National de Santé Publique*), the National Institute of Public Hygiene (*Institut National d'Hygiène Publique*), the Raoul Follereau Institute (*Institut Raoul Follereau*), the Pierre Richet Institute (*Institut Pierre Richet*) and the Heart Institute of Abidjan (*Institut de Cardiologie d'Abidjan*). There are also four other supporting National Public Institutions: (a) the National Center for Blood Transfusion (*Centre National de Transfusion Sanguine*), (b) the National Laboratory of Public Health (*Laboratoire National de Santé Publique*), (c) the New Pharmacy for Public Health (*Nouvelle Pharmacie de la Santé Publique*) and (d) the Urgent Medical Care Service (*Service d'Aide Médicale d'Urgence*). Other Ministries, including the Ministry of Defence, Ministry of Economy and Finance, Ministry of Public Service, Ministry of Interior and ministries in charge of administrative reform, solidarity, family, women and children and national education also participate in providing healthcare through their health facilities.

The private healthcare sector has evolved in recent years with the emergence of private healthcare facilities of all classes and categories such as polyclinics, clinics, medical centres and practices, pharmacies and private infirmaries, which have been well integrated into the various levels of the healthcare pyramid. Private healthcare is found primarily in large cities and economic centres.

Faith-based private sector, community associations and organizations (ABC/OBC) also participate in providing healthcare, particularly at the primary level, with 49 healthcare facilities.

Despite this large healthcare system, there are still some zones with limited access to healthcare. According to the 2017 Annual Report on the Sanitary System (*Rapport Annuel sur le Système Sanitaire 2017 ("RASS")*), approximately 66.9% of the population was living more than 5 km away from a healthcare facility and approximately 9.6% more than 15 km away.

In 2017, the pharmaceutical sector comprised one purchasing centre, the New Pharmacy for Public Health, 4 wholesalers-distributors, 850 private pharmacy operators, and 542 warehouses. The local production segment of the pharmaceutical market represented 6% of total drug production and the rest, 94%, was imported. The main production units were Cipharm, Lpci, Lic Pharma, and Pharmivoire Nouvelle.

With regard to traditional medicine, the Ministry of Health and Public Hygiene has implemented the recommendations of the WHO, integrating traditional medicine as an alternative option to serve the healthcare needs of the population, in order to improve healthcare coverage and reduce inequality and disparities in the population's access to quality healthcare.

The practice and organization of traditional medicine and pharmacopoeia are regulated by law no. 2015-536 of 20 July 2015 and Decree no. 2016-24 of 27 January 2016 establishing the Ethics and Deontology Code for practitioners of

traditional medicine and pharmacopoeia. This sector comprises more than 8,500 Traditional Medicine Practitioners, organized into national associations and federations, who have received additional training, in particular in anatomy, conventional hygiene, techniques for the collection and sustainable conservation of medicinal plants, disease and programs. Several research and development activities have been carried out and have resulted, for example, in the authorization to market Improved Traditional Medicines (Dartran®, Dimitana® and ALAFIA® Balm). In addition, a Traditional Medicine Unit was opened in September 2014 at the University Hospital (CHU) of Treichville, as part of a pilot project.

As part of the implementation of its Social Program (“PSGouv” 2019-2020), the Government has allocated CFAF 833 billion for the rehabilitation, construction and equipment of health centers in order to improve access to healthcare. This includes the construction of a University Hospital in Abobo, six Regional Hospital Centres, three military hospitals in Bouaké, Daloa and Korhogo, nine General Hospitals, and 200 First-Contact Health Facilities. With the regular recruitment of health workers and the improvement in health personnel salaries, available human resources indicators at the national level have improved in recent years. In 2017, these indicators were as follows: one doctor for 7,390 inhabitants, one nurse for 2,335 inhabitants and one midwife for 1,333 women of childbearing age. These national statistics, although satisfactory with respect to WHO international recommendations (one doctor for 10,000 inhabitants, one nurse for 5,000 inhabitants, one midwife for 3,000 women of childbearing age), call for further improvements. Indeed, significant disparities persist, particularly in the ratio of doctors to the population in the various health regions, with, for example, only one doctor for 10,000 inhabitants in Cavally-Guemon, compared to one doctor for 5,266 inhabitants in Abidjan 2.

In addition, over the 2015-2017 period, 10,000 health workers were recruited in the public healthcare sector. By 2015, exceptional recruitment initiatives had already increased the total number of health workers to 23,999, compared to 19,993 in 2012. To incentivize them, the Government undertook salary increases of 400 points for managers and 150 points for other categories. According to the Government, this policy has helped improve the health personnel/population ratio: the nurse/population ratio has thus improved from one per 3,069 inhabitants in 2011 to one per 1,932 in 2016. As for the midwives/women of childbearing age ratio, it has improved from one midwife for 2,270 to one midwife for 995 women of childbearing age, over the same period.

In 2017, life expectancy in Côte d’Ivoire reached 56.4 years, according to the INS, compared to 54.3 years in 2015 (50 in 2012). Life expectancy at birth, taking into account the impact of HIV/AIDS on the mortality rate, was estimated by SPECTRUM (analytic tool for decision-making developed by the NGO Avenir Health) to be 54.3 years in 2015 for Côte d’Ivoire, 53.4 years for men and 55.2 years for women.

According to the Government’s official data, the child mortality rate has significantly decreased in recent years, decreasing from 68 deaths per 1,000 live births in 2012 to 27 deaths per 1,000 live births in 2016 (2016 MICS). The neonatal mortality rate was 33 deaths per 1,000 live births in 2016 compared to 38 deaths per 1,000 live births in 2012.

Malaria remains a major public health concern and caused 43% of morbidity in Côte d’Ivoire in 2014. The Government’s objective is to reduce the occurrence of malaria by 40% by 2020. The average rate of new cases of malaria in the general population was 164.1 per 1,000 inhabitants in 2017 compared to 155 cases per 1,000 inhabitants in 2015. Malaria rates are influenced by a variety of factors, including education levels, geography and the availability of protective measures such as insecticide-treated mosquito nets. In addition, malaria is the primary cause of infant mortality. For pregnant women and children under five, malaria represented nearly 42% of reasons for medical consultation as well as 36.1% and 62.4% of causes for hospitalization, respectively. Faced with this severe problem, the Government’s response is based on therapeutic programs and prevention strategies under the National Fight Against Malaria Program (*Programme National de Lutte contre le Paludisme*).

Malaria remains the primary reason for medical consultation in the country, although the results of situational analysis surveys show a decrease from 50% in 2010 to 43% in 2012, and then to 33% in 2014. For children under 5 years of age, the number of malaria cases dropped from 389 per 1,000 in 2011 to 281.8 per 1,000 in 2017:

Indicators	2012	2013	2014	2015	2016	2017
Malaria cases in children under 5 years of age (out of 1,000), <i>i.e.</i> , the number of new malaria cases in children under 5 years of age compared to the population of children under 5 years of age.....	352	302.61	445.89	291.79	286.87	281.8
Malaria cases in the general population (out of 1,000), <i>i.e.</i> , the number of new malaria cases compared to the general population over 12 months .....	120	106	164	155.49	154.58	164.11

*Source: Ministry of Health and Public Hygiene*

The Ivorian public health situation is also characterized by a high HIV/AIDS-related mortality rate. AIDS is the leading cause of mortality among adult men and the second among women, after pregnancy-related problems and child birth. In 2016, the prevalence rate for HIV was 2.8% compared to 3.4% in 2015. This rate has been in constant decline since 2010 when the rate was 3.96%. According to the 2017-2018 CIPHIA (Côte d’Ivoire Population-based HIV Impact Assessment) of the Ministry of Health and Public Hygiene, the HIV infection rate is more concentrated among adults aged between 15 and 64 years and stands at 2.9%. The HIV infection rate is 4.1% for women, compared to 1.7% for men. This represents approximately 390,000 people living with HIV aged between 15 and 64 in Côte d’Ivoire. The Government believes that HIV disproportionately affects women and adolescent girls because of their unequal cultural, social and economic status in society. Mountain (3.2%) and lake (3.3%) regions, and the city of Abidjan (6.1%) continue to be the most affected areas. Urban areas like Abidjan are particularly affected because of the large size of the populations at risk due to significant migratory flows. The mountain regions are affected as a result of population inflows from neighbouring countries due to socio-political crises in the affected regions.

To address this threat, the Ivorian authorities have placed the fight against HIV infection and sexually-transmitted diseases at the centre of their concerns. Following a 2011-2015 strategic plan, the Government has been pursuing a 2016-2020 strategic plan to continue the fight against the HIV pandemic and aiming to reverse the HIV propagation trend and alleviate the impact of AIDS on the Ivorian population, in particular for highly vulnerable groups. With the implementation of these reforms, the HIV prevalence rate decreased to 2.7% in 2018. The Government has taken several measures to accelerate the fight against AIDS with a view to eliminating the AIDS epidemic by 2030. These measures include the increase of the financing for the purchase of drugs, the strengthening of the capacity of key players involved and the training of healthcare personnel. Since 2007, HIV treatment has been free to all in Côte d’Ivoire. Such treatment includes free medical and biological consultations, free screenings and free antiretroviral drugs. This gratuity of HIV treatment was reaffirmed by the Government through a ministerial circular in March 2019. According to the Government, the cost of this programme was CFAF 5.2 billion in each of 2017 and 2018. The cost is expected to remain at the same level in 2019.

Malnutrition is a public health issue. Chronic malnutrition is estimated at 28% (SMART 2016) and acute malnutrition is estimated at 11.4% (RASS, 2017). Malnutrition is most present in the north, north-east, north-west, west, south-west and north-central regions of Côte d’Ivoire.

On 22 March 2014, an Ebola virus epidemic was confirmed in the region of Forest Guinea, close to the border between Guinea and Liberia, and subsequently in Conakry. After an alert launched by the WHO asking to reinforce the monitoring of illnesses akin to a viral haemorrhagic fever, the neighbouring countries of Guinea, including Côte d’Ivoire, implemented safety measures along their terrestrial borders and inside their territories in order to protect people at risk and to prevent virus propagation. On 10 August 2014, the Government of Côte d’Ivoire raised the risk of Ebola to “extremely high” and announced a series of prevention measures, including the suspension of all flights from affected areas and additional screening at entry points. On 22 August 2014, the Government closed the country’s borders with Guinea and Liberia.

On 1 September 2014, the NSC announced the opening of humanitarian corridors for relief purposes, the operationalization of which remains a challenge. The Ivorian national carrier resumed flights to the affected countries on 20 October 2014. In 2014, the Government initially funded a CFAF 3 billion plan focused on general prevention measures. The Government subsequently put in place a CFAF 13.5 billion plan, fully financed by commitments from the EU, the World Bank, and AfDB, focused on prevention measures in the districts close to Liberia and Guinea. This plan,

which was partially implemented in 2015 by continuing initiatives that had already been carried out, is part of a broader plan of a sub-regional fight against the epidemic via a synergy of efforts of the countries concerned. In this respect, Côte d'Ivoire participated in high-level African summits, namely the summit on strengthening sanitation systems and financing the fight against Ebola, which was held in Malabo, Equatorial Guinea from 20 to 21 July 2015. On 8 September 2016, the country re-opened its border with Guinea and Liberia following the end of the Ebola crisis.

In addition, a third CFAF 50 billion plan, financed through the IMF extended credit facility, will extend similar prevention measures to the whole territory. The United Nations Children's Fund and UNOCI helped to increase temporary treatment facilities, while the UNDP supported the mobilization of funds to equip and train up to 300 national and international health agents, as well as Ivorian border police, customs officers and other law enforcement officials in border areas. The UN also supported the development of a communications strategy and an outreach program, as well as the mapping of illegal border crossing points, while the Office for the Coordination of Humanitarian Affairs supported the Government's efforts to streamline clearance procedures and facilitate the operationalization of humanitarian corridors. To date, there has been no reported case of Ebola infection in Côte d'Ivoire. Furthermore, to show its support for affected countries and help them control the epidemic, Côte d'Ivoire provided a financial contribution of CFAF 500 million and sent a support team of eight doctors, four nurses and three hygienists to these countries.

According to the National Institute of Public Hygiene (*Institut National de l'Hygiène Publique* ("INHP")), in the first five months of 2019, 78 cases of dengue fever were confirmed. In order to prevent the spreading of the virus, the Government has organized public awareness campaigns for the destruction of breeding sites and carried out several mosquito control operations.

Moreover, the Government took preventative measures to prevent the arrival of the Lassa fever epidemic into the country, which was recently declared in certain West African countries, namely Nigeria, Benin and Guinea. To date, the country has not recorded any cases of Lassa fever.

In an effort to allow access to healthcare for the entire population, and in particular for more vulnerable people as well as the poorest Ivorian residents, the Parliament passed law no. 2014-131 of 24 March 2014 establishing Universal Health Coverage (*Couverture Maladie Universelle* ("CMU")). This law provides for collective coverage of health care costs as well as a contribution of CFAF 1,000 per person. On 27 May 2019, the 11 implementing decrees of this law were adopted in the Council of Ministers. These decrees relate to: (i) the creation of the Social Welfare Institution - National Sickness Insurance Fund (*Institution de Prévoyance Sociale – Caisse Nationale d'Assurance Maladie* ("IPS-CNAM")), (ii) protection of personal data, (iii) covering population groups under the CMU, (iv) the conditions for accessing healthcare, (v) collecting contributions, (vi) agreements for healthcare service providers, (vii) procedures for medical examinations, (viii) the list of diseases covered as well as medical and biological acts, (ix) the list of covered medicines and (x) the implementation of an additional regime to the CMU managed by the General Mutual of Civil Servants (*Mutuelle Générale des Fonctionnaires* ("MUGEFCI")), and (xi) the affiliation of low-income and indigent individuals to the CMU medical assistance regime.

The Government covered the launching costs of the CMU, which amounted to CFAF 10.5 billion in 2015, CFAF 11.6 billion in 2016, and CFAF 11.7 billion in 2017. The Government estimates the costs of the CMU at around CFAF 8.5 billion in 2018, and CFAF 4.5 billion in 2019. In the medium-term, the CMU is expected to be self-financing from contributions, except for the cost of insuring the poorest households which will be publicly financed and covered by the budget.

The enrolment process for future insureds is underway, and the database of National Sickness Insurance Fund (*Caisse Nationale d'Assurance Maladie* ("CNAM")) insureds includes 2,054,916 people as of 8 February 2018, for a starting target population of 3,169,382. The mechanisms in place for the collection of contributions from the formal sector are defined and are provided for in the decree on contributions that was adopted by the Government in June 2014.

For the informal sector (outside the agricultural sector), a study to determine the terms of coverage for contributions on a case-by-case basis is carried out and financed by the State budget. For the same category of population, a complementary study is being carried out by the INS to cover the national territory. This study is financed by the World Bank and the JICA (Japanese cooperation). A study will begin in 2020 for the agricultural sector. In addition, the CNAM

and DGI are collaborating in an effort to identify potential sources of additional financing, such as by hosting a workshop on indigence criteria that was held at the end of March 2017 with all stakeholders. Coverage of 30,000 low-income individuals is planned in 2019 as part of the CMU's experimental phase, with joint financing from the State and the World Bank. Their enrolment began at the end of 2017 and is continuing.

The pilot phase of the implementation of the CMU, which is targeted at the university student population of 150,000, was launched on 25 April 2017 by the Prime Minister and began with the Nagui Abrogoua University. With a duration of six months, this phase was intended to test the system in order to identify obstacles. In total, 62,972 cards have been distributed as of the date of this Prospectus, allowing students to access services in the eight university healthcare centres involved in the experimental phase.

The general implementation phase is planned to start in October 2019. The collection of contributions started on 1 July 2019 for workers in the private sector, and for active and retired civil servants and state agents. Contributions are withheld directly at source by the CNPS for the private sector and by the civil and military payrolls for civil servants and state agents, and the military. Moreover, to facilitate people's access to healthcare, the Government decided to set the contribution to the different regimes managed by the IPS-CNAM at CFAF 1,000 per person and per month. Any individual affiliated with the general basic regime of CMU must contribute to such regime, with the exception of low-income and economically disadvantaged individuals who are affiliated with the medical assistance regime of CMU, and whose contributions will be borne by the State.

### **Social Security**

In addition to the CNAM, there are two social security and retirement pension funds in Côte d'Ivoire:

- the Government Employees' General Pension Fund (*Caisse Générale de Retraite des Agents de l'Etat* ("CGRAE")), which is in charge of (i) collecting premiums and subsidies for financing retirement pensions and other services as well as ensuring financial management of excess contributions and (ii) providing various services to designated beneficiaries in the public sector; and
- the National Social Security Fund (*Caisse Nationale de Prévoyance Sociale* ("CNPS")), which manages the compulsory social security scheme of the private sector and, which covers work accidents and work-related diseases, as well as maternity, retirement, disability, death and family benefits. It also plays a role in the social welfare sector.

### **Poverty Reduction**

The 2002-2011 political and military crisis impeded Côte d'Ivoire's efforts with regard to achieving the Millennium Development Goals ("MDGs"). The MDGs are development goals based on the Millennium Declaration made during the Millennium Summit of the United Nations in 2000. They are made up of eight interdependent objectives designed to reduce poverty and improve quality of life, particularly in rural areas. With the return to growth and the re-establishment of relations with development partners such as the IMF, the World Bank and the European Union, the Government has reaffirmed its commitment to work towards the realization of the MDGs, in the framework of the implementation of the NDP. Progress is being made in the fight against poverty as well as in primary education, gender parity in education, empowerment of women and maternal and infant health. The most significant progress has been made in combating HIV/AIDS and providing access to drinking water.

In September 2015, 17 Sustainable Development Goals ("SDGs") were adopted replacing the MDGs of 2000. In the next 15 years, all UN member countries are expected to facilitate reaching the various target numbers for the 17 SDGs.

To achieve this, the Government, which participated in the process of defining these sustainable development goals and has adopted them, is encouraging the involvement of all stakeholders in the interest of ensuring their successful implementation.

To facilitate the coordination of actions, a national workshop to promote the implementation of the SDGs in Côte d'Ivoire was held on 12 and 13 May 2016 in Grand-Bassam; the agenda addressed awareness initiatives, mobilization and support

for parliamentary stakeholders, the Economic and Social Council, local and regional authorities and the Civil Society Organization in their contributions to fulfilling the SDGs.

With regard to the first of the SDGs, which is “to eliminate extreme poverty in all its forms and all over the world” by 2030, Côte d'Ivoire has made the fight against poverty a priority. This has resulted in a significant increase in budget allocations towards “pro-poor” expenses. From 2012 to 2018, these expenditures (aimed at improving living conditions of low-income populations) more than doubled from CFAF 1,080.3 billion in 2012 to CFAF 2,070.1 billion in 2017, and to CFAF 2,361.4 billion (9.8% of GDP) in 2018.

The table below presents the “pro-poor” expenses as a percentage of nominal GDP from 2013 to 2018:

(% of Nominal GDP)	2013	2014	2015	2016	2017	2018
Agriculture and rural development .....	0.53	0.80	0.57	0.58	0.36	0.33
Fishing resources and animal production .....	0.05	0.05	0.05	0.04	0.04	0.05
Education .....	4.90	4.69	5.11	5.50	4.60	5.00
Health .....	1.28	1.31	1.44	1.54	1.44	1.28
Water and sanitation .....	0.77	0.84	0.39	0.27	0.20	0.22
Energy .....	0.17	0.29	0.28	0.21	0.48	0.79
Roads and engineering structures .....	0.52	0.79	0.80	0.72	1.40	1.79
Social affairs .....	0.16	0.14	0.15	0.18	0.12	0.10
Decentralization (excluding education, health and agriculture) .....	0.22	0.31	0.25	0.26	0.23	0.25
Reconstructions, rehabilitations and other pro-poor expenses .....	0.02	0.01	0.07	0.05	0.07	0.05
<b>Total</b> .....	<b>8.66</b>	<b>9.29</b>	<b>9.03</b>	<b>9.34</b>	<b>8.94</b>	<b>9.86</b>
Including multilateral financing in particular by the World Bank and the BOAD	0.83%	1.46%	0.84%	0.68%	1.64%	2.12%

Source: MBPE/DGBF

In terms of achievements, the Government’s various actions and policies have led to a reduction in the poverty rate. From 48.9% in 2008, it decreased to 46.3% in 2015. Such decrease constituted the first inflection of the increasing trend of the rate observed since 1998. The HDI, which measures the general wellbeing of the population, thus increased from 0.452 in 2013 to 0.492 in 2017. The Gini index, which mainly measures inequalities and wealth distribution among a nation’s residents, shows that inequalities among the Ivoirian population are globally declining. From 43.2 in 2008, the GINI index (based on World Bank estimates) reached 41.5 in 2015. According to the Government, the trends observed from 2008 to 2015 continued in 2018 due to the overall economic momentum.

Moreover, the Government continues its efforts to improve the living conditions of the population in a sustainable manner. In 2019, the Government initiated a major program called the Government’s Social Program, or “**PSGouv**”, to support the actions of the current NDP. With regard to the fight against poverty, the actions of PSGouv over the 2019-2020 period are focused mainly on the following: (i) access to drinking water for all at affordable prices; (ii) electrification of all villages with more than 500 inhabitants; (iii) education for all and better access to information through the program “one citizen, one computer, an internet connection” (“*un citoyen, un ordinateur, une connexion Internet*”); (iv) the strengthening of the healthcare system through effective implementation of primary healthcare and effective extension of Universal Health Coverage; (v) the provision of socio-economic housing to vulnerable populations and middle classes; (vi) the promotion of greater representation of women in decision-making bodies; and (vii) the empowerment of women. As a result of the PSGouv, in the first quarter of 2019, (i) 50,000 rural households have benefited from cash transfers of CFAF 36,000 per household under the social safety net program, compared to 35,000 households at the end of 2018, (ii) 12,806 youth benefited from entrepreneurship training, skills development and internship opportunities under the Employment and Empowerment Support Program, (iii) and 92,557 households benefited from a connection/subscription to the national electricity grid under the Electricity for All Program (*Programme Electricité Pour Tous* (“**PEPT**”)), with an annual target of 200,382 households.

## Political System

The law no. 2016-886 of 8 November 2016, instituting the Constitution of the Republic of Côte d'Ivoire, proclaims (i) a commitment to constitutional legality and democratic institutions, (ii) the organization of democratic elections permitting

the people to freely choose its governors, (iii) the separation and balance of powers and (iv) the promotion of proper governance and transparency in conducting public affairs.

With regard to public authorities, the new fundamental law introduces new institutions and strengthens the organization and functioning of existing institutions. The President of the Republic alone is vested with executive power and is assisted by a Vice President, a newly-created office. Legislative power is now exercised by a bicameral structure: the National Assembly and the Senate. Judicial power is represented by two judicial institutions, the Supreme Court and the Court of Audit.

### ***Executive Power***

The executive power in Côte d'Ivoire is composed of the President of the Republic, the Vice President of the Republic and the Government.

The President of the Republic embodies national unity and ensures compliance with the Constitution. Elected for a five-year term by direct universal suffrage, the President may be re-elected once. The President of the Republic determines and directs the policy of the nation. He is the head of the Administration and Commander-in-Chief of the armed forces and appoints civil and military officials. He presides over the Defence and Security Councils and Committees. The President of the Republic appoints the Prime Minister as head of the Government. He may delegate certain of his powers to the Vice President, the Prime Minister or members of the Government, by decree. In the case of vacancy of the Presidency of the Republic as a consequence of death, resignation or absolute impediment, the Vice President of the Republic automatically becomes the President of the Republic until the end of the term of office of the President being replaced. The President of the Republic is Mr. Alassane Ouattara, re-elected for a second five-year term after the presidential election held on 25 October 2015.

The Vice-President acts under the authority of the President of the Republic. The first and current Vice-President is Daniel Kablan Duncan appointed on 10 January 2017. He is a member of the *Parti démocratique de Côte d'Ivoire* (PDCI) which formed a coalition with the *Rassemblement des républicains* (RDR), the party of Mr. Alassane Ouattara. As from the next presidential elections scheduled in 2020, the Vice-President of the Republic will also be elected on the same ballot as the President of the Republic for a five-year term by direct universal suffrage.

The Government comprises the Prime Minister, who is the head of the Government, and the Ministers. The Prime Minister leads and coordinates government actions. The Prime Minister presides over the Government Council, a preparatory meeting for the Council of Ministers. The current Prime Minister, also appointed on 10 January 2017, is Mr. Amadou Gon Coulibaly. He is a member of the *Rassemblement des républicains* (RDR), the party of Mr. Alassane Ouattara, which merged with several other political parties to change the RHDP (*Rassemblement des Houphouëtistes pour la Démocratie et la Paix*) into a new unified party.

### ***Legislative Power***

Legislative power is exercised by the Parliament, which is composed of the National Assembly and the Senate. The Parliament votes on laws and determines taxes. It controls actions of the Government and evaluates public policy. Each year, the Parliament meets automatically for an ordinary session beginning on the first business day of the month of April and ending on the last business day of the month of December.

Members of the National Assembly are elected by direct universal suffrage for five years.

The Senate, created in 2016, and for which the first elections took place on 24 March 2018, ensures the representation of local communities and Ivoirians living outside of Côte d'Ivoire. Two-thirds of senators are elected by indirect universal suffrage and one-third are appointed by the President of the Republic for a term of five years. As the second chamber of Parliament, the Senate has the same prerogatives as the National Assembly. Draft and proposed laws are submitted to the office of the National Assembly and the Senate, for review by commissions of the two chambers. Any draft or proposed law must be reviewed in succession by the two chambers of Parliament and is passed when approved by a majority vote

in each chamber. The draft finance law is submitted first to the National Assembly and draft or proposed laws relating to territorial communities are submitted first to the Senate.

The Constitution and its Title V govern relations between the legislative and executive powers. With specific regard to its control of government actions, members of the Government have access to parliamentary commissions and may be heard by these commissions. The Parliament may be informed of Government actions by means of oral questions, written questions, an inquiry commission or an evaluation initiative. The Court of Audit assists the Parliament and the Government in monitoring the execution of finance laws and in the areas under its authority.

The first elections of the Third Republic reflected a changing political landscape. The current configuration of the National Assembly is dominated by the RHDP following its transformation into a unified political party, which holds 159 seats. Other opposition parties hold a total of 94 seats distributed among the following parliamentary groups: PDCI-RDA (68) and Rassemblement and Vox Populi (26).

### ***The Judiciary***

The judiciary is independent, and the President of the Republic guarantees this independence. He is assisted by the Supreme Council of Magistracy.

The Supreme Council of Magistracy examines matters relating to the independence and ethics of judges. The Council also proposes candidates for appointment as judges of the Supreme Court or the Court of Audit, the First Presiding Judges of the Appeals Courts and the Presiding Judges of the first instance courts. The Supreme Council of Magistracy is presided over by an official appointed by the President of the Republic from among active or retired senior judges.

The Supreme Court and the Court of Audit are the two institutions that represent the judicial power. Justice is served by the Supreme Court, the Court of Audit, the Appeals Court, the First Instance Courts, the administrative courts and the regional audit chambers.

The Supreme Court ensures the application of the law by judicial and administrative courts. It comprises: the Court of Cassation and the Council of State.

The Presiding Judge of the Supreme Court is appointed by the President of the Republic for a five-year term. The respective Presiding Judges of the Court of Cassation and the Council of State are the Vice-Presiding Judges of the Supreme Court.

The Court of Audit is the supreme controlling institution of public finances. It is vested with jurisdictional, control and consultation capacities. The Court of Audit controls the management of the financial statements of the State's Departments, national public institutions, territorial communities, independent administrative authorities and any organization benefitting from financial support from public companies and their subsidiaries. In this respect, it (i) ensures the proper use of loans, funds and assets managed by the State's departments and by other public entities; (ii) oversees the execution of finance laws (the State's budget); and (iii) expresses its opinion on the regularity and accuracy of the financial statements as well as the general management of public companies, semi-public companies and companies with public financial support. The Court of Audit is also responsible for helping the Parliament and the Government. Furthermore, the Court may be consulted by the Government, National Assembly and Economic and Labor Board (*Conseil Economique et Social*) concerning economic and financial topics or the management of State and public entity departments.

The President of the Court of Audit is appointed by the President of the Republic for a five-year term that may be renewed once. The current President of the Court of Audit was sworn into office during a formal ceremony in the presence of the President of the Republic on 8 January 2018.

### ***Other Courts***

The Ivoirian constitutional system includes two special courts: (i) a High Court of Justice (*Haute Cour de Justice*) and (ii) a Constitutional Council (*Conseil Constitutionnel*).

The High Court of Justice handles exceptional cases. It has sole jurisdiction to try the President of the Republic, the Vice President of the Republic and the members of the Government, including over alleged acts of high treason committed by the President of the Republic and crimes or offences committed by the Vice President of the Republic and members of the Government in the course of the performance of their official duties. It is presided over by the Presiding Judge of the Supreme Court. The High Court is composed of an equal number of members elected by the National Assembly and the Senate upon the first session of the legislature.

The Constitutional Council is impartial and independent. It is the regulatory body that supervises the functioning of the public authorities. The Constitutional Council has jurisdiction over the constitutionality of the law. It also has jurisdiction over the monitoring of the presidential and parliamentary elections. It comprises the president, the former Presidents of the Republic (except in case of express waiver on their part) and six members appointed for a non-renewable six-year term, three of whom are appointed by the President of the Republic, two by the President of the National Assembly and one by the President of the Senate. One half of the members is renewed once every three years. The President of the Constitutional Council is appointed by the President of the Republic for a non-renewable six-year term.

### ***Political Parties***

The multi-party system has been authorized in Côte d'Ivoire since 1990. The main political parties of Côte d'Ivoire are: (i) the RHDP, a coalition of political parties (including the RDR, the party of President Alassane Ouattara and the UDPCI) founded on 18 May 2005 and transformed into a unified political party on 26 January 2019; (ii) the PDCI, founded by former President Félix Houphouët Boigny, currently headed by former President Henri Konan Bédié; and (iii) the FPI, the political party of former President Laurent Gbagbo, currently headed by former prime minister Mr. Pascal Affi N'Guessan.

### **Local Communities**

In addition to the two autonomous districts (Abidjan and Yamoussoukro), Côte d'Ivoire is divided into 12 districts, which are subdivided into 31 regions. The country is composed of administrative constituencies of 108 departments (*départements*). The village or neighbourhood constitutes the first level of administrative authority and they are respectively administered by a village or neighbourhood chief. Each region is administered by a Governor or a President of the Regional Council and each town by a mayor. The departments are administered by *préfets*.

The difficulties of the State to meet the equipment and human resources requirements of the decentralized communities remain a major constraint to the efficient implementation of the decentralization policy. In addition, the local development dynamic suffers from the absence of the decrees required to implement certain powers transferred to territorial communities, the low level of legal monitoring, and the lack of precision in the nature of the relations between the State and territorial communities.

The Government grants subsidies to the decentralized communities and pays the salaries of the civil servants working for these entities. Furthermore, it returns a portion of certain taxes to these decentralized communities, such as taxes on real estate, patents and licences. In addition, some decentralized communities can also levy taxes. For instance, municipalities levy a tax on local trade.

### **Legal System**

As a former French colony, Côte d'Ivoire derives many of its fundamental legal texts and customs from the French civil law system. The primary sources of law in Côte d'Ivoire are the Constitution, international treaties, legislation voted by Parliament and governmental decrees.

The legal texts and regulations are published in an official gazette known as the *Journal Officiel de la République de Côte d'Ivoire*.

As in most former French colonies, the French Civil Code of 1804 is the reference document for non-criminal aspects of the legal system. The civil code was introduced in French colonies in 1833. It comprises the basic family, inheritance, trust, tort and contract law and the basic rules regarding the status of persons and is dealt with in a variety of different

codes today in Côte d'Ivoire including the Family Code, the Nationality Code and the Code of Civil and Commercial Obligations.

Business law in Côte d'Ivoire is governed by regulations of the OHADA treaty, of which Côte d'Ivoire is a member. It was created on 17 October 1993 and now comprises 17 African member countries. The primary purpose of the OHADA is to harmonize laws in the area of business and commercial law. Under the OHADA, laws adopted by the group apply directly and immediately to each member country, without need for internal ratification. In addition, the OHADA treaty has created a supranational court, which is vested with judicial powers, and has authority to rule on substantive matters. Its decisions are binding on national courts. It also has advisory powers to ensure uniformity and consistent legal interpretation across the member countries.

In 2014, Côte d'Ivoire adopted law 2014-389 of 20 June 2014 relating to judicial and conventional mediation. In addition, the law 2016-1110 of 8 December 2016 relating to the establishment, organization and functioning of commercial courts requires any litigant to resort to mediation prior to taking their case to a commercial court. By adopting these laws, Côte d'Ivoire demonstrates its interest in mediation.

Further, other mediation and arbitration institutions exist in Côte d'Ivoire and render decisions. They are: (i) the Arbitration Court of Côte d'Ivoire (*Cour d'Arbitrage de Côte d'Ivoire*), and (ii) the Arbitration Centre of the Common Court of Justice and Arbitration (*Centre d'Arbitrage de la Cour Commune de Justice et d'Arbitrage*).

### **Judicial and Arbitral Proceedings**

To the knowledge of the Republic, there are no current, pending or threatened judicial or arbitral procedures that could have, or recently have had, a significant impact on the economic and financial situation of the country.

### **Fight against Terrorism and Piracy**

The Government has taken the following measures as part of the fight against terrorism:

- creation of an anti-terrorist cell within the Territorial Surveillance Department (*Direction de la Surveillance du Territoire* (“DST”));
- signing of cooperation agreements with Ghana and Liberia;
- strengthening cooperation with specialized organizations such as the Central Intelligence Agency in the United States and the Directorate-General for External Security (*Direction Générale de la Sécurité Extérieure* (“DGSE”)) in France; and
- drafting of a law on terrorism, under the auspices of the Ministry of Justice, with the aim of strengthening legislation in this domain in collaboration with institutions responsible for Côte d'Ivoire's intelligence-gathering.

Despite these security measures, on 13 March 2016, heavily armed assailants attacked three hotels at a beach resort in Grand-Bassam, located approximately 40 km East of Abidjan and a popular weekend location for Ivorian families and western expatriates. Al-Qaeda in the Islamic Maghreb (AQIM) claimed responsibility for the attack, in which 19 people were killed, including 11 Ivoirians, one Nigerian, one German, four French, one Macedonian and one Lebanese citizen.

The Ivorian authorities took action immediately after the attack, deploying promptly special forces and commando operations against the assailants. An inter-ministerial committee lead by then Interior Minister Hamed Bakayoko and Defence Minister Alain-Richard Donwahi was immediately put in place to direct these operations.

In addition, Côte d'Ivoire called on the Sahel G5 (Burkina Faso, Mali, Mauritania, Niger and Chad) for support and cooperation, as well as the other countries of the sub-region, who are also at risk of terrorism. Côte d'Ivoire has also been supported by several western countries to contain this threat. With the support of all parties, including France, Germany and the United States, the assailants in the 2016 attack, none of whom is of Ivorian nationality, were finally overcome and placed under arrest. Thanks to the regional cooperation among intelligence services, suspected accomplices of the assailants were arrested in Mali, Burkina Faso and Senegal.

As part of its commitment to fight against terrorism, Côte d'Ivoire relies on its law on the suppression of terrorism enacted in 2015 and, following the Grand-Bassam attacks, has enhanced its operational response capacity by putting in place a management protocol for addressing terrorist attacks. Côte d'Ivoire also actively participates in regional cooperation efforts against terrorism in order to better manage terrorist threats through the sharing of intelligence, regular meetings among ministries in charge of security, the harmonization of standards for the surveillance of national boundaries and the harmonization of national legislations. Moreover, with the support of France, Côte d'Ivoire is developing an International Counter-Terrorism Academy (*Académie Internationale de Lutte Contre le Terrorisme* (“**AILCT**”)). It is a regional center that aims to meet the needs of many African countries in respect of the development and sharing of their counter-terrorism capabilities. The AILCT will be built around three complementary pillars:

- A staff college for high-level counter-terrorism stakeholders from various ministries, including those of justice, interior and armed forces. The goal is to address all aspects of counter-terrorism, from intelligence to the work of special forces to legal proceedings. Training programmes, which are for staff from various backgrounds, will encourage exchanges of best practices, mutual understanding among stakeholders and the development of local and regional synergies, which are conducive to interoperable modes of action.
- A training camp with specific facilities (firing infrastructures, a range of urban, maritime, lagoon and 3D environments, etc.) approved by French elite units (Special Operations Command (*Recherche Assistance Intervention Dissuasion* – RAID and the National Gendarmerie Intervention Group – GIGN).
- A strategic research institute to share doctrines and analyses of terrorist threats, and to allow partners to share lessons learned.

The AILCT project was launched on 18 October 2018 in Jacqueville. The cost of the project is estimated at CFAF 13 billion.

With respect to piracy, the Government has also taken the following measures as part of the fight against maritime piracy in the Gulf of Guinea:

- strengthening the national navy's abilities via the acquisition of a patrol boat on 23 June 2014, as well as the acquisition of a second one christened “the Shield”, commissioned on 30 July 2015 from RAIDCO Marine;
- the adoption of Decree No. 2014-30 on 3 February 2014 concerning the organization and coordination of the actions by the State at sea;
- the creation of the Regional Marine Surveillance Centre of West Africa;
- as part of the cooperation with Canada, two Canadian vessels participated in an exercise with the naval forces of the countries of the Gulf of Guinea;
- China has offered two patrol boats to Côte d'Ivoire; and
- Côte d'Ivoire has acquired two navy patrol boats from France.

## **External Relations**

### ***France***

Since its independence, Côte d'Ivoire has (like many former French colonies) maintained privileged relations with France, its former colonial power. Until 1999, Côte d'Ivoire represented a model of political stability and success for French cooperation in sub-Saharan Africa. French companies enjoy a leading position in Côte d'Ivoire's economic activity and France is still an important trading partner. Defence and cooperation agreements were signed in 1961 between France and Côte d'Ivoire and recently renewed through the Defence and cooperation treaty signed in January 2012.

French-Ivorian relations went through a period of crisis with the military and diplomatic engagement of France in the conflict between the Government of President Laurent Gbagbo and the *Forces Nouvelles* in 2002-2003. France's initiatives were met with hostile nationalist reactions among the supporters of President Laurent Gbagbo, reflecting a

feeling of dispossession of Côte d'Ivoire by foreign interests. After the victory of Alassane Ouattara in the presidential election of 2010, France has continued to play an important role alongside the United Nations Security Council in the supervision of the post-crisis process and the normalization of Côte d'Ivoire's relations with the international community. In 2014, France decided to transform its Licorne military presence in Abidjan into an advanced operational military base, the French Forces in Côte d'Ivoire (*Forces Françaises en Côte d'Ivoire*) ("**FFCI**"), which took effect on 1 January 2015.

This Ivorian-French cooperation is also marked by the signing of several economic agreements between the two countries, including the agreement for the financing of the ongoing construction of the urban train of Abidjan for an amount of €1.4 billion.

In 2018, France was the second largest supplier and the fourth largest customer of Côte d'Ivoire. There are about 800 French companies currently operating in Côte d'Ivoire, of which 160 are affiliated with large French groups such as Bouygues, Bolloré, Sade, BNP Paribas, Société Générale de Banques in Côte d'Ivoire, Orange, Total, CFAO, etc.

Moreover, according to the Centre for Promotion of Investments in Côte d'Ivoire (*Centre de Promotion des Investissements en Côte d'Ivoire*) ("**CEPICI**"), in 2017, France was the first source of foreign direct investments inflows into Côte d'Ivoire, followed by Canada and Morocco.

### ***United States of America***

Diplomatic and economic relations with the United States of America have gradually improved since the end of the crisis. In May 2014, the US Government restored eligibility of Côte d'Ivoire for the AGOA, legislation approved by the U.S. Congress in May 2000 with the purpose of assisting the economies of sub-Saharan Africa and improving economic relations between the United States and the region. Furthermore, in December 2014, Côte d'Ivoire became eligible for the US Government sponsored Millennium Challenge Corporation ("**MCC**") program. The MCC, a program designed for developing countries that engage in good governance, economic liberalization, and investment in human resources, provides financing for infrastructure, human development, governance, and market access improvement projects by way of grants.

Moreover, alongside the implementation of reforms and vigorous efforts in terms of proper governance, liberalization of the economy and improvement of the quality of human resources, Côte d'Ivoire was declared eligible for the "Compact" aid program of the MCC aiming to contribute to the reduction of poverty through inclusive and sustainable economic growth in developing countries. This eligibility was followed by a grant agreement from the Compact Program to Côte d'Ivoire of CFAF 315 billion, which was approved on 7 November 2017 in Washington, DC in the presence of the Ivorian President Alassane Ouattara and a MCC delegation.

As a result of different governance-related corporate reforms, Côte d'Ivoire was declared eligible for the Open Government Partnership ("**OGP**") on 28 July 2015. OGP was launched in 2011 to provide an international platform for domestic reformers committed to making their governments more open, accountable, and responsive to citizens.

The resumption of bilateral relations between Côte d'Ivoire and the United States also resulted in the certification of Félix Houphouët Boigny International Airport for flights to the United States in 2015. Following the launch of the first direct air route between Abidjan and New York in May 2018, Ethiopian Airlines opened a new direct route between Abidjan and Washington on 17 June 2019.

### ***European Union***

Cooperation between Côte d'Ivoire and the European Union is facilitated by the Cotonou agreement signed in 2000. The main sectors of this cooperation for the period 2014-2020 are the strengthening of the State and consolidation of peace, agriculture, food security and energy.

### ***Other Bilateral Relations***

In the context of the diversification of its external partners, Côte d'Ivoire has since 2011 increased its cooperation with a number of partners, notably China, the Republic of Korea, Turkey, India and Japan. It has put an emphasis on South-South cooperation notably with Morocco, Tunisia and South Africa, and on deepening regional integration. These relations aim to increase the volume of Côte d'Ivoire's trade with the rest of the world and to take advantage of the experience of these countries while accessing additional external resources required for its development. Furthermore, Côte d'Ivoire is developing relations with new political allies in the Arab world in order to attract financing originating from these countries.

Aside from the countries listed above, Côte d'Ivoire maintains diplomatic relations with most of the world's countries, either bilaterally or regionally and multilaterally. Côte d'Ivoire's diplomatic coverage rate was 71.5 per cent in 2018 with a diplomatic presence in 138 of the 193 member states of the United Nations. Côte d'Ivoire is currently analysing whether and how to share diplomatic representation among one or more countries in order to control costs in this domain. Côte d'Ivoire is currently contemplating opening an embassy in Qatar and plans to close the one in Chad.

### **Membership in International and Regional Organizations**

Côte d'Ivoire is an active member of the international community, and its policy is to foster good relations with foreign countries. Côte d'Ivoire is a member of international organizations and signed several international treaties on the global, African and regional level.

#### ***Global Organizations***

On the global level, Côte d'Ivoire has been a member of the United Nations since 20 September 1960 and began a term as a non-permanent member of the UN Security Council in January 2018. Côte d'Ivoire is a member of a majority of multilateral organizations such as the IMF and the World Bank, in each case since 11 March 1963, and the WTO since 1 January 1995.

#### ***African Union***

Côte d'Ivoire is a member of the AU, the successor to the Organization of African Unity. The AU is modelled on the European Union and has had a common parliament since March 2004 when the Pan African Parliament was created. In addition, the AU aims to have a central bank in the long term, a court of justice, common defence and a single currency. Its day-to-day affairs are run by the AU Commission. All member States are required to pledge 0.5% of their GDP to fund the AU. At the Kigali summit in 2016, member States agreed to each levy a 0.2% tax on imports of certain "eligible" products in order to finance their contribution to the various budgets of the organization. To date, only 23 (out of 55) member States, including Côte d'Ivoire, have established such a tax and the AU is reliant on donor support. Complete implementation of this mechanism would allow the AU to double its staff and reach its objectives for the NEPAD. NEPAD is a vision and strategic framework for Africa, designed to address issues such as escalating poverty levels and underdevelopment in Africa. Côte d'Ivoire complies with this funding requirement since the ordinance dated 27 June 2017, effective as from 1 July 2017. In addition, many members are reluctant to make the necessary concessions regarding their sovereignty. The AU is however prepared to sanction military interventions through its Peace and Security Council, such as its intervention in Mali.

On 21 March 2018 in Kigali (Rwanda), the AU member States signed an agreement establishing the African Continental Free Trade Area ("**AfCFTA**"). As of July 2019, Côte d'Ivoire and 27 other countries have ratified the agreement out of 54 signatory countries. After reaching the number of 22 ratifications required by the AU Commission, the AfCFTA agreement entered into force on 30 May 2019.

#### ***ECOWAS***

Côte d'Ivoire is an active member of the ECOWAS, established on 28 May 1975 with the signing of the Treaty of Lagos. The ECOWAS is headquartered in Abuja, Nigeria and has 15 West African members (Benin, Burkina Faso, Cape Verde,

Côte d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone and Togo). The organization's mission is to promote economic integration in all fields of economic activity, particularly industry, transport, telecommunications, energy, agriculture, natural resources, commerce, monetary and financial matters, and social and cultural matters. In 1993, the ECOWAS treaty was revised to accelerate the process of integration and establish an economic and monetary union to stimulate economic growth and development in West Africa with the following objectives: (i) the removal of customs duties for intra-ECOWAS trade and taxes having equivalent effect, (ii) the establishment of a common external tariff, the harmonization of economic and financial policies and (iii) the creation of a single monetary zone. However, regional trade within the ECOWAS as a share of total trade remains limited due to the lack of harmonization of member States' economies.

In addition, Côte d'Ivoire began its four-year term presidency of the ECOWAS Commission since 1 March 2018.

### ***WAEMU and BCEAO***

The WAEMU is an organization of eight West African countries established to promote economic integration among countries that share a common currency, the CFAF. The WAEMU was created by a Treaty signed at Dakar, Senegal, on 10 January 1994 by the Heads of State and Governments of Benin, Burkina Faso, Côte d'Ivoire, Mali, Niger, Senegal and Togo. On 2 May 1997, Guinea-Bissau, a former Portuguese colony, became its eighth (and only non-Francophone) member State.

The BCEAO is the common central bank of the eight member states that form the WAEMU. See "*Monetary System—The Franc Zone and the BCEAO—The BCEAO*".

The WAEMU is also a customs union and monetary union. Its objectives are greater economic competitiveness, through open and competitive markets, along with the rationalization and harmonization of the legal environment, the convergence of macroeconomic policies and indicators, the creation of a common market, the coordination of sectorial policies and the harmonization of fiscal policies.

Côte d'Ivoire currently holds the presidency of the supreme body of the WAEMU, the Conference of State and of Government, a position it has held since January 2016. The President of the Republic of Côte d'Ivoire has initiated a reform of the institution and a reflection on the future the CFAF.

### ***Council of the Entente***

The Council of the Entente (*Conseil de l'Entente*) is a West African regional cooperation organization created in May 1959, whose purpose is primarily economic. The founding countries were Dahomey (now Benin), Upper Volta (now Burkina Faso), Côte d'Ivoire and Niger. They were joined in 1966 by Togo. In 1966, the Council established permanent administrative headquarters in Abidjan, in Côte d'Ivoire. A mutual aid and loan guarantee fund provides support for the most disadvantaged members.

### ***African Development Bank***

Côte d'Ivoire is a member of the AfDB, the main objective of which is to reduce poverty in its regional member countries by contributing to their sustainable economic development and social progress. The AfDB, which temporarily (2003-2014) moved its headquarters to Tunis after the military-civil crisis in 2003, transferred its operations back to Abidjan. The full transfer of its staff was completed in late 2014. The bank even held its annual meeting of May 2015 at Abidjan.

### ***African, Caribbean and Pacific Group of States***

Côte d'Ivoire is also a member of the African, Caribbean, and Pacific Group of States ("ACP"), an organization created in 1975. It is composed of 79 African, Caribbean and Pacific countries, with all of them, except for Cuba, signatories to the Cotonou Agreement, also known as the "ACP-EC Partnership Agreement" which links them to the European Union. The ACP includes 48 countries from sub-Saharan Africa, 16 countries from the Caribbean and 15 countries from the Pacific. The ACP was originally created with the aim of fostering cooperation between its members and the European

Community. The ACP has evolved to also cover agreements with the European Union in the areas of trade, economics, politics and culture.

### ***World Health Organization***

The WHO is a key technical partner for Côte d'Ivoire. Although the financial cooperation of bilateral and multilateral institutions has decreased due to the socio-political crisis that affected the country, the WHO's assistance has remained uninterrupted and has in fact increased, mitigating the effects of the crisis. It has continued its assistance in social fields such as health and education.

The mission of the WHO's Country Office in Côte d'Ivoire is to promote the attainment of the highest possible level of health for the country's entire population, by collaborating with the Government and other partners in health development and by supplying technical and logistical support for the country's programs.

Alongside Côte d'Ivoire, the WHO has developed several cooperation strategies to encourage decisive qualitative guidelines for methods of intervention, coordination and advocacy by the WHO in Côte d'Ivoire. The first generation WHO cooperation strategy with Côte d'Ivoire was established covering 2004 to 2005 via a participative process that mobilized, in addition to national health entities, other technical and financial partners of Côte d'Ivoire. The second generation WHO cooperation strategy with Côte d'Ivoire was developed under a framework of priority interventions for the period covering 2009-2013.

This strategy is based on several programs, such as the 2013-2015 PNDS and the CDMT. It is based upon the mission, guidelines and priorities of the WHO, the UNDAF, the MDGs and the Paris Declaration.

The strategic initiatives for intervention were established as follows:

- accelerating the fight against disease;
- improving maternal, neonatal and child health, as well as the health of teenagers and other vulnerable groups;
- fostering an environment conducive to health;
- strengthening the health system; and
- preparedness for and response to emergencies and catastrophes.

Following and based on the evaluation of this second cooperation strategy, which took place in November 2015, the Government developed a strategy for the 2016-2020 period as part of the 2016-2020 NDP, with the support of the WHO. In connection with this strategy, Côte d'Ivoire is launching mass vaccination campaigns, mainly targeting children up to 5 years of age, in partnership with the WHO

## THE ECONOMY

### General Presentation

Côte d'Ivoire is the leading economy in the West African Economic and Monetary Union ("WAEMU") in terms of GDP, according to the BCEAO and, according to WAEMU demographic statistics, the country with the largest population in the WAEMU. The population of Côte d'Ivoire is estimated at 25.1 million inhabitants in 2018 according to the National Institute of Statistics (*Institut National de la Statistique* ("INS")). Real GDP estimates published by the IMF (*Regional Economic Outlook for Sub-Saharan Africa, April 2019*) ranked Côte d'Ivoire third among the most dynamic economies of Sub-Saharan Africa in terms of real GDP growth (after Rwanda and Ethiopia) in 2018. In addition, the IMF estimates that Côte d'Ivoire is expected to continue to show solid growth momentum, with real GDP average growth expected to be 7.5% for the 2019-2020 period. The increase in public and private investment led to an average annual rate of real GDP growth of 9.0% over the 2012-2016 period. This dynamism, coupled with good governance, has contributed to improvements in health and education indicators, and facilitated access to international financial markets. In 2018, Côte d'Ivoire reinforced its position as the world's leading producer and exporter of cocoa, accounting for more than one-third of the world's cocoa production, and the leading cashew nut producer in the world (according to the statistics of Côte d'Ivoire's Ministry of Agriculture).

In March 2012, following the end of the 2011 post-election crisis, the Government adopted the first NDP, which sought to create an environment conducive to development, in order to boost economic growth and employment. This plan was implemented successfully over the 2012-2015 period and allowed for a dynamic revival of the economy and the stabilisation of the country. Real GDP growth was 9.2% on average over the 2012-2015 period. A second 2016-2020 NDP, supported by the IMF is operational and intended to lay the foundations for economic emergence of Côte d'Ivoire by 2020 with a reinforced industrial base. In this regard, the implementation of this second NDP made it possible to consolidate the achievements of the 2012-2015 NDP by maintaining the investment dynamic and ensuring an effective implementation of structural reforms.

In 2017 and 2018, the real GDP growth rate is estimated at 7.7% and 7.4%, respectively, by both the IMF and the Government.

Côte d'Ivoire's economy is undergoing rapid change given the dynamism of the secondary and tertiary sectors. However, the economy remains dependent on its agriculture, and in particular the coffee-cocoa sector. The Government's recent estimates show that, in 2018, coffee and cocoa together represented 39.8% of the value of exports (excluding exceptional goods) and 9.7% of the country's tax revenues.

This dependence on agriculture makes Côte d'Ivoire's economy vulnerable to fluctuations in global agricultural product prices and to weather conditions, both of which affected this sector and the cocoa industry particularly in 2016. In order to reduce the dependency of its economy on agriculture, Côte d'Ivoire has engaged in a series of reforms aiming to strengthen the resilience of its economy. See "*Risk factors – Côte d'Ivoire's economy is dependent on its agriculture sector and in particular the cocoa sector which is highly vulnerable to global price volatility and to weather-related shocks.*"

On the basis of an assessment of the industrial sector in 2012, the Government formulated a strategy with the objective of increasing the secondary sector's share of GDP from 24% in 2012 to approximately 40% in 2020. To achieve this goal, the Government has undertaken a series of measures including: (i) the adoption of an Investment Code in 2012, (ii) the creation of an Industrial Infrastructure Management and Development Agency (*Agence de Gestion et de Développement des Infrastructures Industrielles*) in 2013, responsible for designing, implementing and ensuring the management of industrial development planning, (iii) the implementation of a program for the revival of the textile industry, (iv) the creation of a new industrial zone on the PK 24 site located approximately 24 km outside Abidjan, (v) the renovation of the Yopougon industrial zone, (vi) the implementation of a National Restructuring and Upgrading Program for industrial companies, (vii) the promotion of agricultural raw material processing, (viii) the adoption of a new Investment Code in 2018 to promote investment in the priority sectors of agriculture, agro-industry, health and hotels and (ix) the creation in January 2018 of the National Economic Policy Council (*Conseil national de politique*

*économique*), whose role is to identify the main national and international economic challenges facing the State and to ensure overall medium- and long-term consistency between economic policies and governmental programmes.

Côte d'Ivoire is aiming to reach a rate of at least 50% by 2020 for the domestic processing of its agricultural production. In 2018, such rate was 15% for coffee, an estimated 9% for cashew nuts and 100% for palm oil. With respect to cocoa, the processing rate in 2018 was 27%.

The table below presents Côte d'Ivoire's nominal GDP from 2012 to 2018:

	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b> <b>(Estimates)</b>	<b>2018</b> <b>(Estimates)</b>

<sup>(1)</sup> Based on data available at the end of June 2018.

Côte d'Ivoire continues its efforts to modernize and diversify its economy by strengthening its competitiveness and making it more resilient to external shocks, in particular by strengthening the business climate, governance and the fight against corruption. In this respect, it is committed to implementing its comprehensive agenda of far-reaching structural measures designed with the help of its international development partners, in particular the IMF and the World Bank.

These Government-led reforms, which aim, in particular, to move towards paperless procedures and acts, have allowed Côte d'Ivoire to move from 139<sup>th</sup> place in 2012 to 122<sup>nd</sup> place in 2019 in the World Bank's general "Doing Business" ranking, representing a 45-place improvement from 2012. Thus, Côte d'Ivoire is once again among the top 10 reformers worldwide. In terms of good governance, according to the 2018 Mo Ibrahim index report, Côte d'Ivoire progressed in each of the four categories and the 14 subcategories of the index (the only country to do so), rising from 41<sup>st</sup> place to 22<sup>nd</sup> place from 2008 to 2017. In addition, Côte d'Ivoire received the Anti-Corruption Award from the African Union during its 32<sup>nd</sup> ordinary session in February 2019.

## National Development Plans

### 2012-2015 NDP

Economic activity in Côte d'Ivoire significantly shrank by 4.2% in 2011 as a consequence of the post-election crisis, which led to a slowdown in economic activity and a rise in overall prices, in connection with the following factors:

- the suspension of cocoa exports by the Government from February to April 2011;
- the embargo on imports from two ports of Côte d'Ivoire (the Abidjan Port Authority (*Port Autonome d'Abidjan*) and the San Pedro Port Authority (*Port Autonome de San Pedro*)) and the sanctions adopted by the European Union against certain public companies in Côte d'Ivoire;
- the closing of nearly all commercial banks with the exception of the national banks (*Banque Nationale d'Investissement* (BNI), *Banque de l'Habitat* (BHCI), Versus Bank, *Caisse Nationale des Caisses d'Epargne* (CNE)) by mid-February 2011; and
- the intensification of the post-election crisis from the end of March to mid-April 2011.

In March 2012, the Government adopted the NDP for the period covering 2012-2015 and made it operational through the Public Investment Program (*Programme d'Investissements Publics* ("PIP")), a three-year rolling annual program, which aimed at implementing the NDP through concrete projects supporting the Government's economic and development strategy for this period. The purpose of the NDP was to reduce poverty and increase growth through investments with the general objective of making Côte d'Ivoire an emerging country by 2020. Through the creation of the 2012-2015 NDP, Côte d'Ivoire committed to giving a new impetus to its development policy. The 2012-2015 NDP also provided for the implementation of structural reforms (in the spheres of the business climate and competitiveness of the economy, democratic, administrative, economic and judicial governance, debt, public finance, institutional management capacities and national statistical apparatus). This affected key sectors with growth potential such as agriculture, agrifood, building and public works, mining, petrol, gas and electricity, transportation and commerce, telecommunications and the research and development sector. This new strategy relied on a recovery and development plan based on private and public investment. It identified the main sources of growth, taking into account the comparative advantages of the country. In addition, the 2012-2015 NDP contained precise sectoral objectives and strategies to be implemented by the Ministries, with points of reference which allowed for a regular follow up on the progress achieved.

The strategic objectives of the 2012-2015 NDP included the following:

- build the basis to make Côte d'Ivoire an emerging economy by 2020;
- ensure and sustain macroeconomic stability, including a viable public debt;
- achieve a sustainable high GDP growth rate: according to Government figures, Côte d'Ivoire exceeded by approximately 1.5 percentage points its growth target of 8.6% in 2012 with real GDP growth of 10.1% in 2012, and by approximately 0.3% its growth target of 9.0% in 2013; the Government reached a real GDP growth of 8.8% in 2014, 8.8% in 2015 and 8% in 2016;
- reduce the poverty rate by half and re-join the group of African countries with the highest rankings in terms of the HDI of the UNDP;
- achieve, or make significant progress towards, the MDGs;
- create one of the best business environments in Africa, and strengthen the competitiveness of the economy;
- re-join the group of leading African countries in terms of good governance and fighting corruption; and
- strengthen Côte d'Ivoire's position at the regional and international level.

The 2012-2015 NDP aimed to significantly increase public investment and create an environment conducive to the development of the private sector, with a view to boosting economic growth and employment. In the preceding decade, public investment had contracted due to the political and military crisis, so that infrastructure could not be maintained or

developed, due to the lack of financing. The PIP sought to bring the public component of the investments (in sectors such as safety, health, education, roads and bridges, agriculture, telecommunications, energy, industry and SMEs) in 2012 to 5.3% of GDP from a maximum of 3.3% on average over the preceding twelve years. Thus, public investments have increased over the 2012-2015 period reaching 5.5%, 6.3%, 6.9% and 6.7% of GDP in 2012, 2013, 2014 and 2015, respectively.

Similarly, the Government was able to attract private investments and to maintain dynamic, sustained and inclusive growth through (i) the restoration of safety over the whole territory of Côte d’Ivoire, (ii) the consolidation of national reconciliation through the actions of the CDVR on 11 September 2011, (iii) the efforts made by the Government to repatriate those in exile under the auspices of the tripartite agreements among Côte d’Ivoire, the host countries and the United Nations High Commissioner for Refugees, (iv) political dialogue with the opposition undertaken by the Government, (v) the unfreezing of bank accounts and assistance provided to former soldiers, (vi) the improvement of the business environment with a view to strengthening consumer confidence, as well as business and investor confidence and (vii) the promotion of good governance.

### **Financing Strategy for the 2012-2015 NDP**

The total cost of the 2012-2015 NDP’s investments (public and private) was CFAF 11,076 billion, including a public sector contribution of CFAF 4,579.6 billion.

According to the Government’s estimates, the annual average cost stood at CFAF 2,769.0 billion, with an annual financing mobilisation capacity by the State of CFAF 519.6 billion. The remaining overall financing need of CFAF 2,501.1 billion, was primarily financed through the WAEMU and international capital markets through a strategy designed to avoid jeopardizing debt sustainability, in accordance with the 2013-2016 Medium-Term Debt Strategy (*Stratégie de la Dette à Moyen Terme* (“**SDMT**”)) adopted by the Government on 19 December 2013. See “*Public Debt—Public Debt Management Policy—Institutional Measures: The CNDP and the SDMT*”.

The table below presents the financing outline of the NDP for the 2012-2015 period, as contemplated by the NDP:

	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>Total</b>	<b>Average</b>
	<i>(CFAF billions)</i>					
Total Cost of the Plan .....	1,520.9	2,263.3	3,129.5	4,162.3	11,076.0	2,769.0
Current Revenues .....	2,342.6	2,873.1	3,386.3	3,985.9	12,587.8	3,147.0
Current Expenditures .....	2,005.5	2,130.8	2,333.5	2,552.6	9,022.5	2,256.0
Public Investment (A) .....	676.4	1,000.0	1,291.2	1,612.0	4,579.6	1,145.0
Financing Received for Public Investment (B) .....	675.9	110.1	518.0	774.5	2,078.5	519.6
Public Investment Coverage Rate (%)....	99.9	11.0	40.1	48.0	45.4	45.4
Public Financing Needs (C=B-A) .....	(0.5)	(889.9)	(773.2)	(837.5)	(2,501.1)	(625.4)
Private Financing .....	844.5	1,263.3	1,838.3	2,550.3	6,496.4	1,624.1

Source: DGPE

### **Results of the 2012-2015 NDP**

According to the 2012-2015 NDP Consulting Group, which was composed of Government representatives, bilateral and multilateral partners and private sector representatives, the development partners’ commitments from 2012 to 2015 amounted to US\$9.9 billion (CFAF 4,950 billion), *i.e.*, a commitment rate of 146% in comparison to the amount announced. In terms of the absorption of resources, disbursements stood at US\$9 billion (CFAF 4,500 billion) for the same period, representing a disbursement rate of 91% compared to the commitments made.

The implementation of the 2012-2015 NDP was considered a success in several respects, in particular with regard to:

- the resumption of strong, lasting growth for the Ivorian economy with the support of its development partners;
- Côte d’Ivoire’s inclusion and sustained presence among the countries with the highest economic growth in the world, with an annual average real GDP growth rate of 9% over the 2012-2015 period;

- an increase in investments, which rose from 9% of the nominal GDP in 2011 to 20% in 2015;
- the recovery of real income per inhabitant by nearly 25% between 2012 and 2015;
- a decrease in the poverty rate from 49% in 2008 to 46% in 2015;
- control over the budget deficit and indebtedness;
- control over the external deficit; and
- the improvement of diplomatic relations and reinforcement of so-called economic diplomacy.

As regards road infrastructure and transportation services, a high point in the implementation of the 2012-2015 NDP was the completion of the first engineering projects contemplated as part of the “emergence-by-2020” plan. They included the northern (Singrobo-Yamoussoukro) highway, the Riviera II highway interchange, and the Henri Konan Bédié, Bouaflé and Jacquville bridges. In terms of roadwork, 140 km of the Gesco–Singrobo highway were reinforced and paving was completed for 86 km of the Singrobo–Yamoussoukro section and for 120 km of the Boundiali–Tengrela section. In addition, more than 5,000 km of rural roads were upgraded.

Significant improvements were made in the social sectors. The number of jobs in the formal sector increased from 722,567 in 2012 to 868,209 in 2015. This progress was achieved in the context of efforts to address youth unemployment.

Marked improvements were made in terms of access to education; 9,291 primary school classrooms were built, in addition to 3,500 secondary school classrooms and 45 middle schools. These achievements, in addition to a significant recruitment of staff, contributed to an increase in access to education. In that context, the gross primary school admission rate increased from 73.4% in 2008 to 97.8% in 2014. The gross school enrolment rate increased from 76.2% in 2008 to 94.7% in 2014 according to the Ministry of Education.

Efforts undertaken to rehabilitate and re-equip hospitals and health centres contributed to an improvement in access to health services, as did the implementation of the initiative to provide mothers and children with free healthcare, caesarean sections, and medicines. In addition, efforts to equip and bring technical platforms of health facilities in line with standards contributed to an improvement in the quality of health services.

In terms of access to drinking water, the construction of 794 pumps and 76 water towers, as well as maintenance work performed on 11,446 human-powered pumps, contributed to a significant increase in access to drinking water infrastructure. Moreover, Abidjan’s water treatment station now operates with a ground storage capacity of 10,000 m<sup>3</sup>. All of these developments are contributing to positive changes in the population’s health and quality of life.

The commencement of 71 social housing construction projects throughout the country and allocation of 3,060 hectares of land for the low-cost social housing program is expanding the access of low-income populations to property.

The connection of roughly 800 rural towns to the electrical power grid and to ease service subscription costs for households has increased rates of access and coverage.

The private sector contributed significantly to the implementation of the 2012-2015 NDP, particularly through sizeable investments in the energy and mining sectors, especially the Tongon mine, oil and gas exploration, and the establishment of several processing units in the coffee, cocoa, and cashew sectors. Over the period 2012-2014, private sector investment amounted to CFAF 4,699 billion, compared with the predicted level of CFAF 3,946 billion, a 119.1% implementation rate. This performance attests to the role of the private sector as a driver of economic growth.

### ***2016-2020 NDP***

In order to continue its reform agenda, the Government adopted a new NDP for the 2016-2020 period on 9 December 2015. This 2016-2020 NDP, prepared following a thorough assessment of the 2012-2015 NDP’s implementation and results, maintains the general objective of making Côte d’Ivoire an emerging economy by 2020. In the vision of the Government, emerging economy status will result in a significant reduction in poverty and a corresponding rise of the middle class, establishing a dynamic, development-oriented and liberal economy that is open to the outside world. This

is expected to allow Côte d'Ivoire to successfully integrate into the global economy and further cooperate with its neighbours to strengthen regional integration.

As part of the NDP, the Government expects growth to continue to be strong, sustained and inclusive so as to allow GDP per capita to double by 2020 from its 2012 level and to maintain Côte d'Ivoire's status as a pre-emerging country. A particular focus has been placed on the following: mandatory schooling, food self-sufficiency, access to drinking water, access to electricity in every village with more than 500 residents, improved social security coverage and local, effective health systems. Côte d'Ivoire also aims to rank within the top 50 countries in the world in terms of business environment ("Doing Business" ranking), within the leading group of African countries in terms of good governance and transparency in the management of public resources (World Bank index) and within the highest ranked African countries in the UNDP's HDI.

This plan establishes industry as one of the major pillars of the economy's structural transformation and focuses on the following strategies:

- strengthening the quality of the country's institutions and proper governance;
- accelerating the development of human capital and social well-being;
- accelerating the structural transformation of the economy through industrialization;
- developing infrastructure that is equitably spread throughout the country while at the same time protecting the environment; and
- strengthening both regional integration and international cooperation.

The implementation of the 2016-2020 NDP was designed at the time to achieve the following targeted results:

- an average real GDP growth rate of 8.7% between 2016 and 2020. This performance is expected to be driven by the primary, secondary and tertiary sectors, which are expected to record respective average annual growth rates of approximately 5.8%, 11.5% and 9.2% during this period;
- a rise of the investment rate from 19.5% of GDP in 2015 to 24.5% in 2020. with the private investment rate progressing from 12.8% in 2015 to 15.2% in 2020. This significant contribution expected from private investments reflects the Government's reliance on the private sector as an important pillar of emerging economies;
- an inflation rate maintained under the convergence threshold of +3.0% for WAEMU countries;
- an increase of total revenues and donations from CFAF 3,916.8 billion in 2015 to CFAF 6,492.3 billion in 2020, representing an average growth rate of 10.6%. These resources will remain dominated by fiscal revenues, which are expected to rise from CFAF 2,954.9 billion in 2015 to CFAF 5,317.4 billion in 2020. Fiscal pressure should grow from 15.1% in 2015 to 16.9% in 2020; and
- an improvement of the budget deficit, as a percentage of the GDP, from 2.8% of GDP in 2015 to 1.9% of GDP in 2020.

As part of the Ivorian economy's structural transformation, the 2016-2020 NDP is supported by several significant reforms intended to amplify the effects of the investments to be made during the period of the plan's implementation. These reforms relate primarily to:

- the creation of a single population record;
- the creation of a unique identifier for companies;
- geo-referencing of the country's capital assets and natural resources;
- the creation of credit bureaux and a credit information centre; and

- the implementation of a system to prevent and manage natural risks and catastrophes.

The Government expects the macroeconomic framework to continue to be solid and sustainable, characterized by a low annual inflation rate (maintained at less than 2%), a continued control over the level of the budget deficit (lower than 3% by 2019) and a consolidation of net foreign assets. Its baseline scenario is strong growth driven by structural investments in the main growth sectors and continued large-scale structural reforms. The real GDP growth rate, which reached 8.8% in 2015 and 8.0% in 2016, is estimated at 7.7% in 2017 and 7.4% in 2018 and is expected to reach 7.5% in 2019 and 7.3% in 2020.

### ***Financing Strategy for the 2016-2020 NDP***

To achieve these growth objectives, the 2016-2020 NDP as adopted in December 2015 provides for an overall investment of approximately CFAF 30,000 billion of which 60% is expected to come from the private sector, including through PPPs. The investment rate is expected to reach 24.5% of GDP in 2020 (public investment being expected to stand at 9% in 2020 and private investment at 15.5% in 2020). Inflation is expected to be controlled at an average of 2% per year over the period, below the WAEMU convergence criteria ceiling of 3%.

The table below sets forth the financing outline of the 2016-2020 NDP, as contemplated by the Government (forecasts):

<i>(CFAF Billion)</i>	<u>2016</u>	<u>2017</u>	<u>2018</u>	<u>2019</u>	<u>2020</u>	<u>Total</u>
Revenue Excluding Grants	4,078.7	4,352.4	4,855.2	5,415.9	5,996.8	24,699.2
Total expenses and Net lending excluding Investment	3,510.2	3,613.4	3,753.5	3,901.1	4,136.7	18,915
Total Investment	4,277.2	5,148.5	6,000.3	6,847.3	7,726.7	30,000
Public (A)	1,643.7	1,950.7	2,286.3	2,560.4	2,843.4	11,284.4
Private	2,633.5	3,197.9	3,714	4,286.9	4,883.2	18,715.6
Public Savings (B)	568.54	739	1,101.7	1,514.8	1,860.2	5,784.2
Public Funding Requirements (C=B-A)	(1,075.2)	(1, 211.7)	(1,184.6)	(1,045.6)	(983.3)	(5,500.4)

### ***Implementation of the 2016-2020 NDP***

The implementation of the 2016-2020 NDP began in an international context characterised by a global growth slowdown, a fall in the prices of major raw materials and low rainfall. This unfavourable context has not made it possible to achieve the macroeconomic growth and balance objectives envisaged in the 2016-2020 NDP.

However, the dynamism of domestic economic activity that begun in 2012 continued in 2016 with growth of 8% compared to forecasted growth of 9.8%. This growth was primarily driven by the secondary and tertiary sectors, which recorded respective growth rates of 6.6% and 8.9%. Initially expected at 4% of the GDP in the 2016 finance law, the budget deficit stood at 3.9% for 2016, due to lower than budgeted expenses, despite shortfalls in revenue. Inflation in 2016 remained stable at 0.7%, well under the WAEMU convergence criteria of 3.0%.

The total level of investments made in 2016 stood at CFAF 4,453.8 billion compared to an initial NDP forecast of CFAF 4,277.1 billion, a completion rate of 104%. This amount includes CFAF 2,979.9 billion in private investments and CFAF 1,473.8 billion in public investments. Disbursements made in 2016 by the Development Partners to finance the NDP stood at CFAF 965.1 billion, compared to forecasts of CFAF 1,178.8 billion from the Consulting Group's commitments.

In 2017, despite a drop in the price of cocoa and strikes in the first quarter of 2017, real GDP growth remained among the highest in the world, at 7.7%. Budget adjustments implemented by the Government contributed to controlling the budget deficit, which stood at 4.5% of the GDP. Inflation remained moderate, at 0.7%.

In 2018, the Ivorian economy continued its growth trend, demonstrating its resilience through economic diversification and despite relatively low export commodity prices, due primarily to the implementation of structural reforms, structuring public investments, and efforts to strengthen economic diversification and attract more foreign investment.

Total investments carried out in 2018 stood at CFAF 4,827.70 billion, compared to the NDP's initial forecast of CFAF 6,000.28 billion, representing a completion rate of 80.5%. This amount includes CFAF 3,300.40 billion in private investments and CFAF 1,547.30 billion in public investments. Disbursements carried out in 2018 by the Development Partners (which include the World Bank, AfDB, AFD, IDB, UE, ADF, China and Spain) to finance the NDP stood at CFAF 1,044.6 billion, compared to the forecasted CFAF 1,099.8 billion.

Major achievements in the implementation of the 2016-2020 NDP so far include the following:

- In the transportation infrastructure and services sector:
  - Improvements in road infrastructure, notably the extension of paved and maintained roads from 3,500 km in 2015 to 10,000 km in 2016 and then to 15,279 km in 2017. With regard to the development of new roads, the amount of completed paved road increased from 6,700 km in 2015 to 6,743 km in 2017. With regard to access-improving infrastructure, the main achievements are the construction of the Bettié bridge over the Comoé and Tiemba rivers. These new constructions bring the total number of access-improving infrastructure built over the 2012-2017 period to 93, including 16 major structures and 77 smaller structures.
  - With regard to transport services, the road and lagoon public transport sub-sector saw: (i) the increase of the SOTRA fleet with 500 new Tata buses acquired in 2017 compared to 51 new buses in 2015 and 71 in 2016 and (ii) the delivery of more than 200 new-generation taxis to operators as a result of support from the Road Transport Development Fund (FDTR) from 2016 to 2017. In the ship transport sub-sector, following the installation and effective start of activities of the two licensed operators in 2016 (CITRANS and STL), 17 ships entered into service in 2017 (7 from CITRANS and 10 from STL). In the air transport sub-sector, the national airline "Air Côte d'Ivoire" expanded its fleet with the acquisition of three aircraft in 2017 and increased the number of routes in the sub-region and in Central Africa, which led to an increase in the number of commercial passengers from 1,572,753 in 2015 to 1,829,049 in 2016 and then to two million in 2017 at Félix Houphouët-Boigny Airport in Abidjan.
- In the social services and healthcare sector:
  - With regard to grade-school education, at the end of 2016: (i) the construction of 5,068 primary school classrooms, 17 high schools and middle schools, (ii) the distribution of 2,439,594 manuals and 2,017,224 school kits and (iii) the hiring of 7,559 primary school teachers. At the end of 2017: (i) the construction of 4,070 classrooms in public schools, including 630 in preschools and 3,440 in primary schools, the opening of 67 public middle schools, and the distribution of 26,859 desk benches, (ii) the distribution of 3,494,924 school supply kits and (iii) the hiring of 5,000 assistant teachers trained at special educational training centers (*Centre d'Animation et de Formation Pédagogique*), 683 middle school teachers and 213 high school teachers trained at the *Ecole Normale Supérieure* (ENS).
  - As regards higher education: (i) the construction of the Man University, (ii) the rehabilitation and equipment of the Cocody university campuses, (iii) the rehabilitation of athletic facilities and cultural centres on the university campuses of Abidjan (CROU A1) and (iv) the rehabilitation and equipment of administrative offices, university residences and the CROU medical centre of Daloa.

- In terms of employment, the number of employees rose with job creation, increasing from 86,195 jobs in 2016 to 95,710 in 2017 (including 83,764 for the private sector and 11,946 for the public sector), reaching 100,795 in 2018 (including 89,186 in the private sector and 11,609 in the public sector) representing a 16.9% increase compared to 2016. Furthermore, 222,213 youths were able to benefit from the youth employment and integration programs in 2018.
  - As part of improving the supply of healthcare, the Government achieved over the 2016-2017 period: (i) the opening of the CHU of Angré, of the training centre for emergency practitioners at the CHU of Yopougon, of a unit for the care of drug users at the National Institute of Public Health and of the first national radiotherapy centre in the Mother Child Hospital of Bingerville, (ii) the construction of 18 first-contact health facilities (*Etablissements Sanitaires de Premier Contact* (ESPC)); (iii) the acquisition of 11 new mobile units and four functional mobile emergency and intensive care services (SMUR), (iv) the creation of the national centre for early detection of breast cancer and cervical cancer, (v) the re-equipment of seven general hospitals, two regional hospitals (CHR) and the CHU of Bouaké, (vi) the rehabilitation of the infectious diseases department of the CHU of Treichville and of 53 ESPC and four blood transfusion centres and (vii) the distribution of more than 734,700 mosquito nets treated with long-term insecticide to pregnant women and children under the age of one.
  - Concerning drinking water coverage, the proportion of the population with access to a source of drinking water rose from 78.4% in 2015 to 80.7% in 2016 and then to 82% in 2017, reaching 84% in 2018, according to the National Office of Drinking Water (*Office Nationale de l'Eau Potable* (ONEP)). This improvement is due to the implementation of actions such as (i) the completion of work aimed at reinforcing the piezometric network for the monitoring of water tables in Abidjan, Dabou and Bonoua, (ii) the completion of the reinforcement of the drinking water supply in Bouna, Bondoukou, Aboisso, Adzopé and surrounding communities, (iii) the construction of 300 new wells equipped with manually-operated pumps and of more than 100 improved hydraulic pumps, (iv) the rehabilitation of 100 obsolete manually-operated pumps and (v) the establishment of more than 500 women's committees for water source management.
- In the energy sector:
    - The national electricity coverage rate reached 58% at 31 December 2018, compared to 54% in 2017 and 53% in 2016. The rate of access to electricity increased from 78% in 2016 to 80% at the end of December 2017. These changes are explained by an increase in energy capacity from 1,805 MW in 2015 to 2,199 MW at the end of 2017 with the inauguration of the Soubré hydroelectric dam of a capacity of 275 MW. In addition, in view of promoting access of households to electricity at lower cost, 175,000 connections and subscriptions were carried out under the Electricity for All Program (*Programme Electricité pour Tous*) over the 2014-2016 period, including 141,000 connections in 2016. The implementation of the Rural Electrification Program (PRONER) increased the number of electrified localities from 4,537 in 2016 to 4,639 in 2017 and 4,940 in 2018, out of a total of 8,513 localities to be electrified.

## Structure of the Economy

The contribution of the primary sector, which comprises food crops (live-stock breeding included), agriculture for export and forestry and fishing, to nominal GDP was 22.2% in 2012, 21.0% in 2013, 21.1% in 2014, 22.7% in 2015 and 22.4% in 2016. Its estimated contribution was 21.6% in 2017 and 19.8% in 2018. Agricultural production is very diversified and comprises food crops (in particular rice, cassava and corn) and export crops such as coffee, cocoa, cotton, rubber tree, palm oil and cashew nuts.

The primary sector real GDP growth rate was 0.3% in 2012, 3.8% in 2013, 16.2% in 2014, 2.9% in 2015 and 7.5% in 2016. Primary sector real GDP growth rate experienced successive increases estimated at 11.2% in 2017 and 4.2% in 2018. The 2017 and 2018 estimates reflect favourable climatic conditions, the recovery of coffee trees that had suffered from water stress during the severe drought that occurred from December 2015 to April 2016 and the implementation of reforms in the cashew nut sector.

The growth of the agricultural sector over the last several years is primarily due to the implementation of the National Agricultural Investment Program (*Programme National d'Investissement Agricole* (“NAIP”)) over the 2010-2015 period, for example the 2012-2020 National Rice Development Strategy (*Stratégie Nationale du Développement du Riz* (SNDR)), the objective of which is to cover all consumption needs through local production. Growth of the agricultural sector also resulted from the continuation of the coffee-cocoa sector reform and the implementation of reforms for the cashew nut and cotton sectors, which is expected to help better structure these sectors and improve their productivity rate. See “—Principal Sectors of the Ivorian Economy—Agricultural”.

The secondary sector, which comprises the extractive industry, agro-food industries, oil products and other sub-sectors, represented an estimated 25.2% of nominal GDP in 2018, 24.7% of nominal GDP in 2017, 25.2% of nominal GDP in 2016, 25.8% of nominal GDP in 2015, 27.4% of nominal GDP in 2014, 26.0% of nominal GDP in 2013 and 24.0% of nominal GDP in 2012. The secondary sector real GDP growth rate was 6.1% in 2012, 24.2% in 2013, 4.5% in 2014, 8.3% in 2015, 6.6% in 2016, 3.0% in 2017 and 7.1% in 2018. This positive trend is primarily due to the development of the manufacturing and building and public works industries. The Government expects this to continue in 2019 at a level of 10.1%, due to the strength of most of its components.

The tertiary sector, which comprises transportation, telecommunications, trade and other sub-sectors, was estimated to represent 32.6% of nominal GDP in 2018, 31.8% of nominal GDP in 2017, 31.5% of nominal GDP in 2016, 31.3% of nominal GDP in 2015, 31.5% of nominal GDP in 2014 and 30.2% in 2013. The contribution of the tertiary sector to GDP is limited by the difficulties of certain market factors such as (i) infrastructure deficiencies, (ii) disruption of the supply for markets and supermarkets due to the degradation and insufficiency of railroad infrastructures, (iii) poor access of population to banking services, and (iv) a poorly developed tourism sector. The tertiary sector real GDP growth rate was 6.8% in 2012, 7.2% in 2013, 16.5% in 2014 and 8.2% in 2015, 8.9% in 2016, and was estimated at 6.6% in 2017 and 9.2% in 2018. This trend is explained by the revival of activities of all sub-sectors of this sector since the 2011 post-election crisis and by the benefits tied to the growth of the primary and secondary sectors. Furthermore, the Government estimates that the implementation of its SME/SMI development strategy, adopted in February 2014, the reactivation of the SOTRA and the commencement of operations of the lagoon water plan to other companies, namely the STL, as well as the return of the AfDB to Abidjan which was fully completed in late 2014, contributed to a significant increase in activity in the tertiary sector in 2016. The tertiary sector’s growth was 8.9% in 2016. Real GDP growth (+6.6%) experienced a slight decrease in 2017 compared to 2016 but is expected to improve in 2018 and 2019 due to (i) investments in the telecommunications sector for national fibre optic coverage; (ii) investments in various ports and airports; (iii) the commissioning of new hotels, (iv) the economic benefits of the 2017 *Jeux de la Francophonie*; (v) the revival of maritime traffic, in particular in connection with cocoa and oil product exports; and (vi) the expected increase in the volume of margins for cocoa and oil product export businesses.

## Gross Domestic Product (GDP)

The GDP is an economic indicator used to measure the level of economic production of a country. It is defined as the total monetary value of all the final goods and services produced over a given period in the territory of a State by the companies in the country, regardless of their nationality. To determine real GDP, its nominal value must be adjusted to take into account inflation. The growth of GDP is calculated on the basis of real GDP and used as an indicator for the economic growth of a country.

### Real GDP in 2014

The primary sector recorded a 16.2% growth rate in 2014, attributable in particular to food agriculture and livestock farming (22% as compared to 1.2% in 2013) and to export-oriented agriculture (9.5% as compared to 5.7% in 2013).

The performance of food agriculture was due to the implementation of the NAIP and above all the continuation of agricultural policies, whose management was ensured by the National Office for Rice Development (*Office National de Développement du Riz*).

The slow-down of export-oriented agriculture as compared to 2013 was attributable to the decline in the production of pineapple (56.4 thousand tons in 2014, as compared to 67.5 thousand tons in 2013), of banana (362.4 thousand tons in 2014, as compared to 394.1 thousand tons in 2013) and to the stagnation of cocoa production (+0.5%). The decline in the pineapple production resulted from the substitution of pineapple by food crops (manioc in particular) and new speculations with more regular revenues such as rubber tree in the region of Bonoua and the decline of investments. The decline in the banana production was explained by the floods that caused the destruction of close to 22% of planted areas.

The secondary sector benefited from improvements in the business environment, the promotion of investment and the strengthening of PPPs. Its share increased by 4.5% in 2014 after having increased by 24.2% in 2013. This increase is mainly due to (i) the rise of the construction industry (32.2%) subsequent to the continuation of public works initiated in 2012 and 2013 and the start-up of new projects, (ii) the increase of agro-food industries (+3.4%) and other manufacturing industries (+4.8%) and (iii) the downturn in the extractive industry (-3.3%) in connection with the decrease of the production of crude oil (-24.4%) production. The poor performance of crude oil is mostly due to the recurrent closure and stoppage of several wells for construction works as well as the postponement of investments for the CI-27 and CI-40 wells.

The tertiary sector experienced growth of 16.5% in 2014, thanks to the dynamism of all segments: trade (+12.3%), telecommunications (+3%), transportation (+9.1%) and other services (+27.7%). These significant developments are primarily due to the strength of the secondary sector through services rendered to companies, the good health of the financial services and insurance sectors and the upturn in tourism and real estate services. In addition, the tertiary sector was positively impacted by the consolidation of economic activity, which increased by 8.8%.

### ***Real GDP in 2015***

In 2015, real GDP growth was 8.8%, as a result of positive performance in all sectors.

The primary sector recorded a growth rate of 2.9% in 2015, compared to 16.2% in 2014, due to the combined effect of increased agricultural exports (+7.5% compared to +9.5% in 2014) and a decrease in food crop agriculture (-1.0% in 2015 compared to +22% in 2014). Food crop agriculture continued to benefit from the implementation of the NAIP, but results in 2015 were negatively affected by inconsistent and unevenly distributed rainfall. Export agriculture benefitted from improved plant health measures in plantations and orchards, better service roads and more profitable prices.

The secondary sector grew by 8.3%, boosted by good performance in all areas, particularly the extractive industry (+20.4% compared to -3.3% in 2014), energy (+5.2% compared to +1.5% in 2014), and building and public works (18.3% compared to 32.2% in 2014). The progression of the mining industry is linked to investments in the exploration, development and maintenance of existing wells and mines. The building and public works industry benefitted from ongoing public and private investment projects initiated in 2014 and new public projects launched in 2015.

The tertiary sector rose by 8.2% as a result of dynamic activity in all areas, in association with the dynamism of the primary and secondary sectors. The transportation industry experienced growth at 19.6%, due to the positive effects of the rehabilitation and improvement of road infrastructure, increased commercial trade with inland regions and the gradual renewal of the automobile fleet. Commercial activity increased by 6.5% due to resumed consumption and renewed economic activity. Other services, such as telecommunications, banking and finance, hotels and tourism also progressed.

### ***Real GDP in 2016***

In 2016, real GDP growth was 8.0% due to the performance of all sectors of activity. Sectoral changes were as follows.

The primary sector recorded a growth rate of 7.5% in 2016 as compared to 2.9% in 2015, due to the increase in food agriculture (+14.2%) and to the slight increase in agricultural exports (+0.2%). This increase in food agriculture was due in particular to the performance of cassava (+3.6%) and plantain (+4.0%) for tubers and corn (+6.8%) for grains. The near stagnation of export production was due to difficult weather conditions and certain agricultural diseases.

The secondary sector grew by 6.6%, driven by the significant growth in the extractive industry (+13.9%), sustained energy production (+21.3%) and the maintenance of building and public works (+4.0%) in connection with constructions related to the 2017 *Jeux de la Francophonie*, the continuation of building construction and public projects (the Tiébissou-Didiévi road, Ferké-Nassian-Kong road, Adzopé-Pont Comoé road, Tiemba bridge, Bettié bridge, the road of the PSAC Project, Korhogo-Korhogo Airport, etc.). However, the agrifood (-2.1%) and oil products (-7.9%) sectors experienced poor performance. The decrease of oil products is connected to financial difficulties faced by the SIR.

The tertiary sector recorded growth of 8.9% due to the dynamism of all of its sub-components, namely transportation (+18.6%), telecommunications (+4.3%), other services (+10.0%) and trade (+6.0%) in connection with the strength of the secondary sector, better supply of markets, an increase in demand for road transportation services for merchandise and an improvement in revenue.

The non-market sector increased by 6.6% in connection with the implementation of a recruitment program in the social and security sectors, which helped increase the production of services to households.

Duties and taxes increased by 9.4% in volume due to the strong performance of household consumption, which significantly affected VAT.

### ***Real GDP in 2017***

According to the Government's estimates based on the provisional national accounts, real GDP growth in 2017 was 7.7%. This growth rate resulted from the rebound of the primary sector and the dynamism of the secondary and tertiary sectors.

The primary sector recorded a growth of 11.2% as compared to 7.5% in 2016 due to the recovery of agricultural exports (+18.7%) and the consolidation of food crops (+6.6%). The growth of agricultural exports was supported by an increase

in the production of cocoa (+24.4%), pineapple (+25.7%), rubber plant (+28.0%), cotton seed (+6.1%), cashew nuts (+9.5%) due to good rainfall observed over the year and better crop protection treatments at plantations. Food crops benefitted from the implementation of the Food Crop Production Emergency Support Plan (*Plan d'Urgence d'Appui à la Production Vivrière*).

The secondary sector increased with 3.0% growth compared to 6.6% in 2016, in particular due to agrifood industries (+6.5%), to building and public works (+4.5%), to other manufacturing industries (+6.2%) and to energy (+3.2%). However, the slowdown in the sector was mainly due to declines recorded in oil products (-9.1%) and the extractive industry (-4.2%, compared to its performance in 2016 (+13.9%)), the slowing of building and public works (+4.5%), compared to an average 29.2% annual increase over the 2012-2016 period, and of the energy sector (+3.2% compared to +21.3% in 2016). The decline in construction and public works is due to delays in several projects, including the development of the Solibra interchange, the development and paving of the Bloléquin-Toulepleu-Liberia Border road. With regard to energy, although it benefitted from the commissioning of the Soubré dam in 2017 (+275 MW), its slowdown is connected with the decline in thermal energy production (-8.3%), which represents in 2017 79.9% of total thermal and hydraulic energy production, despite the increase in hydropower production (+32.8%)

The tertiary sector benefitted from the strong performances of the primary and secondary sectors in connection in particular with the organization of the 2017 *Jeux de la Francophonie* and the EU-AU Summit. It increased by 6.6% due to transportation (+9.2%), with the resumption of the maritime branch, the other services (+8.2%) and trade (+8.0%), benefitting from the increase in the volume of foreign trade margins. With regard to the telecommunications sector, it experienced a decrease (-4.9%) due to the decline in the turnover of communication companies.

The non-merchant sector increased by 15.8% in connection with the civil servants and State agents recruitment policy.

Duties and taxes also continued their upward trend to reach +8.7%, supported by the increase in exports of cocoa as well as household consumption.

### ***Real GDP in 2018***

The economic growth rate is estimated at 7.4% for 2018, according to both the Government and the IMF.

The primary sector recorded estimated growth of 4.2%, compared to 11.2% in 2017 as a result of strong performances in agricultural exports (+7.0%) and food crop production (+2.1%). The various increases in production observed were associated, in particular with (i) favourable weather conditions, (ii) the recovery of coffee plants that had suffered from a lack of water due to the severe drought that occurred from December 2015 to April 2016 and (iii) the implementation of the cashew nut sector reform. Food crop agriculture also benefitted from the continued implementation of the Urgent Support Program for Food Crop Production (*Programme d'Urgence d'Appui à la Production Vivrière*), which aims to (i) allow farmers to produce in all seasons in order to improve and ensure food security in the whole country, (ii) modernize food crop production and (iii) increase producers' income.

Growth in the secondary sector is estimated at 7.1%, driven by building and public works (+16.5%), energy (+4.0%), oil products (+7.2%), other manufacturing industries (+5.8%) and agrifood industries (+15.4%), despite a decrease in the extractive industry (-3.2%). The growth recorded in the building and public works sector can be explained by the dynamic of public investments stemming from the continuation of work initiated in 2017. This includes, in particular, the rehabilitation of the Felix Houphouët Boigny bridge, the olympic stadium of Ebimpé, the construction of the Akwaba interchange and the construction of the fourth bridge linking the Plateau to Yopougon, through Attécoubé and Adjamé. Stable growth in the agrifood industries was due to an improvement in processing rates, particularly of coffee, palm oil and sugar. In addition, the manufacture of fat substances (olein), grain milling and the manufacture of wheat flour, animal feed and various food products are the principal factors behind the agrifood industry's performance.

The tertiary sector benefitted from the positive performances recorded in the primary and secondary sectors. Its growth is estimated at 9.2%, as a result of all of its components, which include transportation (+9.0%), telecommunications (+12.4%), trade (+8.4%) and other services (+8.6%).

The non-merchant sector increased by an estimated 7.9% due to the combined effects of limited growth in public administration recruitment, and the pursuit of mandatory education and universal healthcare policies. In addition, in an effort to create productive, decent and long-term jobs, several major initiatives have been taken, such as (i) promoting jobs for vulnerable individuals, especially women and handicapped persons and (ii) strengthening programs improving employability and fostering entrepreneurship.

Duties and taxes, net of subsidies, also continued to increase at an estimated rate of +7.5%, driven by various reforms underway within the Tax Administration and the dynamic of household consumption, which has spurred increased collection of VAT.

### **Real GDP in 2019**

The Government and the IMF project economic growth at 7.5% in 2019, compared to a 7.4% estimated growth rate in 2018.

The primary sector is expected to increase by 1.7%, compared to 4.2% in 2018, driven by food crop agriculture (+3.9%), which is expected to benefit from continued investments in the agricultural sector (NAIP 2) and the revitalization of professional organizations in the food crop sector. In addition, forecasts in the agricultural sector predict better plant health measures on plantations and improved service roads and prices.

The secondary sector is expected to progress by 10.1%, compared to 7.1% in 2018, driven by oil products (+24.9%), building and public works (+18.0%), other manufacturing industries (+6.0%), agrifood industries (+16.0%) and energy (+7.0%). In addition, industrial activity, supported by public investments, is expected to benefit from an increase in production capacity, new facilities and dynamic private domestic demand.

The tertiary sector is expected to increase by 9.2%, as it did in 2018, as a result of all of its components, particularly transportation and telecommunications, which are expected to increase by 9.4% and 12.2%, respectively, trade, which is expected to increase by 8.6%. and other services, which are expected to increase by 8.5%. This dynamic is expected as a result of performances in the primary and secondary sectors.

The non-merchant sector is expected to increase by 3.4%, compared to 7.9% in 2018, taking into account the combined effects of the payroll control strategy and the pursuit of mandatory education and universal healthcare policies.

Duties and taxes, net of subsidies, are expected to increase by 9.8%, compared to 7.5% in 2018, as a result of the various reforms underway within the Tax Administration and dynamic economic activity.

The table below presents changes in Côte d'Ivoire's main economic indicators between 2012 and 2019:

<b>Indicators</b>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017 (Est.)</b>	<b>2018 (Est.)</b>	<b>2019 (For.)</b>

## Principal Sectors of the Ivorian Economy

### *Agriculture*

Until reforms were introduced by the Government in the early 1990s, the developments in agriculture were driven by the actions of the State, which intervened at all levels of the agricultural sector. On the basis of the 1992 Agricultural Development Management Plan (*Plan Directeur de Développement Agricole (ADMP)*), Côte d'Ivoire introduced in the early 1990s restructuring efforts aimed at expanding capacity and making the professionals in the agricultural sector more responsible for their activity, managing their development, including through widespread education, research and training, and refocusing the Government on its orientation, incentivisation, regulatory and control functions. For instance, as part of a plan to develop rural areas, the Government built 48,000 km of country roads to integrate villages and encampments, as well as 361 agricultural dams for the irrigation of arable land, fishing and raising livestock in rural areas. These initiatives allowed the agricultural sector to maintain a prime position in the Ivorian economy. In 2018, the primary sector contribution to nominal GDP was estimated to be 19.8%. It also represented 59.1% of the country's overall exports in 2016 and, according to the last census to date (2014), employed 46% of the country's active population and was the main source of income for two-thirds of a population that is 50.3% rural.

While Côte d'Ivoire's agriculture is still dominated by the coffee-cocoa sector, which played a major role in the Ivorian economic boom of the 1970s, Ivorian agriculture has diversified to include other crops such as palm oil, bananas, cotton, rubber trees, cashew nuts and rice. In 2018, Côte d'Ivoire reinforced its position as the world's leading producer and exporter of cocoa, accounting for more than one-third of the world's cocoa production, and the world's leading cashew

nut producer (according to the statistics of Côte d'Ivoire's Ministry of Agriculture). In 2017, the value of processed cocoa exports declined due to falling prices, even though the volume exported increased in comparison with 2016. According to the Cotton and Cashew Nut Council (*Conseil du Coton et de l'Anacarde*), Côte d'Ivoire has been, since 2015, the world's top producer of cashew nuts, of which 93% is exported raw. The cocoa, coffee, cashew nut, cotton and rubber tree sectors, which constitute the country's primary exports, provide a living for more than half of the country's active population.

The table below sets out the change in the output of major agricultural crops in Côte d'Ivoire between 2012 and 2018:

<b>Production</b>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017 (Est.)</b>	<b>2018 (Est.)</b>

### Agricultural Policy

Despite a significant contribution to nominal GDP (22.4% in 2016 and an estimated 21.6% in 2017 and 19.8 in 2018), productivity of Côte d'Ivoire's primary sector remains weak. This is partly due to unplanned and unanticipated Government disengagement, in particular during the political and military crisis from 2002 to 2011, as well as poor governance in the sector. These factors led to (i) unfair distribution of rebates generated by the different sub-sectors given that the producers are paid the lowest share, (ii) low prices for agricultural products paid to farmers and (iii) poor financing of the industry in general.

In November 2011, the Government adopted a proposal to reform the agricultural industry in the context of the 2012-2015 NAIP. This plan was based on six priority programs: (i) improving the productivity and competitiveness of agricultural products; (ii) developing sectors; (iii) improving the governance of the agricultural sector; (iv) strengthening the capacity of stakeholders in agricultural development; (v) sustainable management of fishing resources; and (vi) renewing forest resources and reviving the wood sector. This program, with an estimated total cost of CFAF 2,040 billion, recorded a level of financial resources of CFAF 1,309 billion available for its performance (or a 64.2% mobilization rate).

The 2012-2015 NAIP sought to restore the agricultural growth rate to 9% per year, reduce the poverty rate to 16%, create 2.4 million jobs, reduce food insecurity and process at least 50% of Côte d'Ivoire's agricultural products in the country by 2020. The implementation of this program began in the cocoa/coffee sub-sector and then spread to the cotton-cashew nut sector. A specific fund was created with an allocation of US\$150 million for cashew nuts and US\$150 million for cocoa. New legislation is being developed focusing on fertilizers and plant-treatment products. An important component of the NAIP was the SNDR, whose objective was to reach self-sufficiency in terms of rice production by 2016. For the implementation of the SNDR, the National Office for the Development of Rice Farming, an administrative public body, was created pursuant to Decree No. 2010-202 of 15 July 2010, to replace the National Rice Program (PNR) which was attached to the office of the Minister of Agriculture. The implementation of the SNDR made it possible to achieve the following results at the end of December 2018:

- 14 transformation units with a five ton per hour capacity installed, eight of which are functional;
- 19 transformation units with a two ton per hour capacity installed, four of which are functional;
- personnel at 100 mini rice plants were trained in technical and administrative management;
- 744 tons of seeds were produced;
- four mobile treatment units have been acquired under the agricultural productivity programme in West Africa (*Programme de Productivité Agricole en Afrique de l'Ouest*);
- 3,800 ha received hydro-agricultural area improvements;
- 30 storage devices (cocoons) were acquired; and
- 30 unions of operators for operationalizing the rice agricultural inter-branch organization (*Organisation Interprofessionnelle Agricole*) were established.

Moreover, the value chain approach which constitutes the basis of the SNDR made it possible to take into account not only the environment of each of the players of the sector but also to respond to their needs. After four years of implementation, the strategy resulted in (i) improved yields, (ii) increased rice-growing areas, (iii) improved farming techniques of rice farmers and (iv) improved quality of the industrial process of small processors.

To speed up the implementation of this strategy, an emergency programme involving the Agency for the Development of the Rice Sector (ADERIZ) has been implemented by Decree No. 2018-10 of 10 January 2018.

The first phase of the NAIP helped the country achieve record results in terms of agricultural production and an improvement in producers' revenue. Revenues distributed to producers increased from CFAF 3,368 billion in 2012 to CFAF 5,652 billion in 2015 due to increased prices of cocoa, coffee, cashew nuts and, recently, rubber. Initiatives were also taken for agricultural processing. As a result, Côte d'Ivoire also became the world's top cocoa grinder in 2014, which was still the case in 2018. The NAIP financially supported food crops production in order to improve production methods to substantially increase production levels. In order to consolidate the achievements of the 2012-2015 NAIP, the Government has prepared the second generation NAIP (NAIP 2), with the objective of a sustainable and competitive Ivorian agriculture creating equitably shared wealth.

The implementation of the 1998 land reform law remains a priority for the Ministry of Agriculture, which has benefitted from the assistance of the World Bank and the European Union for this purpose. A new law reforming land legislation was adopted on 23 August 2013 to guarantee legal certainty for holders of land titles and to contribute to reducing poverty. Such legislation should increase the legal certainty relating to land purchases and land rentals. It should put an end to operators' hesitation in the face of uncertainty concerning real estate, thus opening up opportunities to develop business and contributing to the reduction of poverty.

### The Coffee and Cocoa Industries

The coffee-cocoa sector has benefitted from numerous reforms with the implementation of the NAIP in order to improve the productivity and revenues of producers. Côte d'Ivoire intends to maintain its position as the world's top cocoa

producer. Export revenue from these two products increased from 33.2% of the total export revenue in 2012 to 46.7% in 2015, 44.4% in 2016, 41.7% in 2017, and such increase is estimated at 42.6% in 2018%.

### Cocoa Production

At the end of 2016, total cocoa production was 1,634,424 tons, a decrease of 10.5% as compared to 2015, for which it amounted to 1,825,594 tons. This change was primarily due to dryness and an invasion of caterpillars that affected approximately 20,368 hectares of plantations before being completely contained by the Coffee Cocoa Council's (*Conseil Café-Cacao*) actions via a plant protection treatment. At the end of the 2015-2016 season (October 2015 – September 2016), cocoa production was 1,580,611 tons, compared to 1,795,852 tons at the end of the 2014-2015 season, a decrease of 12%. The decrease in production marked a departure from the upward trend observed since 2013, due to good rainfall conditions and the use of new, more productive varieties, namely the “Mercédès Cocoa”. Cocoa production increased by 11.5% in 2013 and by 0.5% in 2014, with amounts of 1,669,651 tons and 1,678,718 tons, respectively. In 2015, production was 1,825,594 tons, or an increase of 8.8%.

In 2017, cocoa production was 2,033,525 tons, a 24.4% increase compared to 2016. This improved production, in a context characterized by decreasing prices in international markets, helped offset the impact of lower producer prices (the price at which the producer sells the product) on the revenue of farmers.

In 2018, cocoa production stood at 2,113,100 tons, an increase of 3.9% compared to 2017. The sector has benefitted from the execution of the “Quantity, Quality, Growth (2QG)” program (*Quantité, Qualité, Croissance - 2QC*) and initiatives taken by the Coffee-Cocoa Council (*Conseil Café-Cacao*) to support orchard production and productivity, such as grubbing up orchards to combat “swollen shoot” disease which affects cocoa trees, training producers in good farming practices, distributing improved seeds and distributing plant health products and burlap bags.

In 2019, cocoa production is expected to experience a slight decrease of 3.0% to reach 2,050,000 tons, due to efforts made to combat “swollen shoot” and dormant periods within plantations.

Since the end of the 2011 post-election crisis, the cocoa processing rate has steadily improved. It grew from 27% in 2011 to 33% in 2014, then fell back to 27% in 2017 and remained stable at 27% in 2018. However, this drop in the processing rate, associated with a significant increase in production, has been accompanied by a rise in quantities processed (468,570 tons in 2013, compared to 569,799 tons in 2018). To date, 12 cocoa-grinding companies with an estimated total capacity of over 700,000 tons are operational and extensions are underway. Furthermore, in December 2017 the Ivorian government signed an agreement with Hershey, the leading US cocoa processing company, that is expected to enhance cocoa processing and allow Côte d'Ivoire to increase its revenues and reduce the financial gap related to the export of raw products over the coming years.

The Government is maintaining its goal of increasing the local cocoa processing rate to at least 50% by 2020.

In order to manage the volatility of cocoa prices, the Government has set up a stabilization fund and a technical reserve fund to cover the risks arising from the price guarantee system for producers.

### Coffee Production

Coffee production has declined significantly since 2008, and has not exceeded 150,000 tons per year for more than eight years (126,587 tons in 2015, 105,867 tons in 2014, 103,742.8 tons in 2013 and 121,400 tons in 2012). This has been mainly due to the difficulty of this work, coffee's high sensitivity to changes in weather conditions, aging fields and low prices compared to those of cocoa. Dissatisfied farmers are attracted to more lucrative crops such as cocoa and rubber trees. Coffee production saw a rebound of 19.6% in 2015 compared to 2014, as a result of a better maintenance of plantations made possible by the good level of purchase prices paid to producers. At the end of 2016, total production was 105,601 tons, a decrease of 16.6% compared to 2015. In 2017, coffee production fell significantly to 33,590 tons, a decrease of 68.2%. The decline was a result of poor rainfall at the time of the coffee trees' blossoming. Production recovered in 2018, reaching 123,948 tons, an increase of 269% compared to 2017. This increase is mainly linked to

favourable weather conditions after the difficulties encountered in 2017, when heavy rainfall during the flowering period in orchards affected the harvest. The coffee industry continued to benefit from the coffee recovery program, launched in 2013. During the 2018 season, approximately 39,223.30 ha of coffee seedlings were distributed to producers. In addition, with regard to the valuation of coffee from Côte d'Ivoire, efforts to promote "Local" coffee continue. Concerning initiatives to diversify sources of income for producers, 80 producers have been trained and established to produce coffee-based honey in the Daloa region. In addition, two large-scale coffee processing companies with a total estimated capacity of over 20,000 tons and more than 15 small coffee roasting facilities have been established and are operational.

#### Cocoa/Coffee sector reform

The Government approved a cocoa sector reform on 2 November 2011 and the Decree establishing the sector's new regulatory structure was signed in December 2011. The main elements of this reform involved the implementation of the following schemes, which the Government uses to regulate the sector:

- a central body, the Coffee-Cocoa Council, which was created in January 2012 and includes representatives of the various actors of the coffee-cocoa sector; this body is responsible for the management, regulation, development, and stabilization of prices in the cocoa sector;
- a marketing mechanism which includes forward contracts, forward sales of export licenses and price guarantees to exporters;
- the creation of two stabilization funds: (i) a fund housed at the BCEAO with a total amount of CFAF 170 billion at the end of December 2018; and (ii) a technical reserve fund to cover the risks resulting from the price guarantee system intended for producers implemented by the Government. The fund housed at the BCEAO is financed through a special tax included in the price of cocoa, whereas the technical reserve fund is financed by contributions from the exporters directly paid to the representatives of the Coffee-Cocoa Council and is managed by this Council. The technical reserve fund was initially approved by the Government with a capital of CFAF 40 billion and was increased to CFAF 70 billion in June 2015, then to CFAF 120 billion in January 2016 and CFAF 170 billion in December 2016 and remained at this level in 2017. This fund was partly used in the first quarter 2017 to support the producer prices following the decline of cocoa prices on the international market. For the intermediary 2016-2017 season launched in April 2017, producer prices have been adjusted downwards in accordance with the legislation governing this sector.
- quarterly communications in the Council of Ministers regarding the financial flows and production levels in the sector.

The main objectives of this reform are to:

- maintain Côte d'Ivoire's position as the world's largest cocoa producer;
- produce 200,000 tons of coffee per year as from 2020;
- improve the quality of coffee and cocoa;
- guarantee at least 60% of the CIF price (inclusive of cost, insurance and freight) to coffee and cocoa producers;
- improving the living conditions of producers;
- process 50% of cocoa production by 2020;
- process 35% of coffee production by 2020.

Furthermore, a monitoring committee for reform implementation was created in January 2012. It is responsible for ensuring the application of the core reform legislation through effective implementation of all related legislation and compliance with the rules and undertakings made in the context of the reform.

In line with these reforms, the Government took several measures in 2013 to increase production. These involved the implementation of the “Quantity-Quality-Growth” (*Quantité-Qualité-Croissance*) program aiming to improve the quality and productivity of fields by regenerating plantations, combatting the “swollen shoot” disease affecting cocoa trees, training producers with proper agricultural practices and supporting commercialization. Similarly, support was provided under the coffee recovery program and job placements were provided for young people in coffee and cocoa culture and processing. Furthermore, with the support of the Inter-professional Agricultural Research and Advisory Fund (*Fonds Interprofessionnel pour la Recherche et le Conseil Agricole*), the National Centre for Agricultural Research (*Centre National de Recherche Agronomique*) and the National Agency for Rural Support and Development (*Agence Nationale d’Appui et de Développement Rural*), the Coffee-Cocoa Council has been providing direct support since early 2012 to producers through the free distribution of improved seeds and phytosanitary products. In addition, the Government intends to promote coffee originating from Côte d’Ivoire. Besides support for the sector’s productivity, reforms also seek to improve producers’ living conditions by strengthening their security and health via the construction of infrastructure in rural regions.

On an operational level, on 31 January 2012, the Coffee-Cocoa Council launched a new sales system, the Anticipated Forward Sales Program (*Programme de Ventes Anticipées à la Moyenne*) with regard to the marketing of the cocoa and coffee harvests. Since February 2012, all exporters use this new sales system which ensures that farmers receive at least 60% of the CIF export price. The mechanism is based on selling 80% of the forecasted harvest for the coming crop year, while the remaining 20% is sold during the crop year. The reference price corresponds to the average weighted price of sales realized by anticipation (forward sales) and sales realized during the crop year (spot sales). It is split up between the price for producers, taxes and other levies as well as intermediary costs. The sales take place via regular auctions organized by an automatic system with an electronic messenger interface for participants. A supervisory procedure has been implemented for producers, buyers and cooperatives, in order to ensure strict compliance with the guaranteed price and with quality standards.

The implementation of this mechanism gave a minimum guaranteed price of CFAF 750 per kilogram of cocoa for the main 2018-2019 season, as compared to CFAF 700 for the main 2017-2018 season, CFAF 1,100 for the main 2016-2017 season, CFAF 1,000 for the 2015-2016 season and CFAF 850 for the 2014-2015 season. On this basis, cocoa producers’ gross income is estimated at CFAF 1,651 billion and CFAF 1,526 billion, respectively, for the principal 2015-2016 and 2014-2015 seasons. However, given the continued decrease in international cocoa prices, the minimum guaranteed price of the intermediary 2016-2017 season was set at CFAF 700, a decrease of 36.4% compared to the principal 2016-2017 season. This price represents at least 60% of the CIF price, in accordance with the legislation governing the sector. The total taxation was temporarily reduced from 22% to 16.285% in order to guarantee the minimum price set for the intermediary 2016-2017 season.

In 2018, SAF CACAO, an important agrifood company specialised in cocoa trade and processing, was wound up by the lower court of Daloa due to contract breaches during the 2015-2016 season which impaired its financial situation, costing the State CFAF 25 billion, and requiring all its tending banks to set up a provision for the loss recorded. Notwithstanding this, such liquidation did not impact the level of cocoa production and all of SAF CACAO’s export contracts were reallocated to other exporters.

In June 2019, Côte d’Ivoire and Ghana, the two world leading cocoa producers, announced that they would both refuse to sell cocoa for the 2020-2021 season (opening in October 2020) at a price below USD 2,600 (around CFAF 1.5 million) per ton, in order to ensure their producers a minimum revenue. In July 2019, they further agreed that both countries would implement a similar mechanism (and return to the market for the 2020-2021 season), called in Côte d’Ivoire the decent income differential (*différentiel de revenu décent*, or “**DRD**”): this mechanism provides that, for the 2020-2021 season, any buyer in an export contract will pay, in any case, and in addition to the market price, an amount of USD 400 per ton (around FCFA 232 per kilogram), in order to guarantee a price of at least USD 2,600 per ton (the market price was USD 2,458 per ton on 1 October 2019, according to the ICCO). While this is still to be finalised, as of September 2019, (i) this DRD is expected to be used by Côte d’Ivoire to guarantee the producers at least 70% of the target price of USD 2,600 per ton and (ii) it is contemplated that, in the event that the cocoa market price rises above USD 2,900 per ton, the DRD would be transferred to a stabilization fund to be used if the prices were to drop in the future.

On 1 October 2019, the Coffee-Cocoa Council announced that the Government had decided to set a minimum price for the producers of CFAF 825 per kilogram of qualifying cacao for the 2019-2020 season.

## Other Sectors

### *Rubber*

In 2016, rubber production was 453,040 tons, an increase of 25.8% compared to 2015 (360,000 tons), in connection with the gradual increase of international prices, following decreases in 2014 and 2015. Côte d'Ivoire consolidated its position as the African leader. The rubber sector continued to benefit from massive investments made in new plantations due to the strong level of international prices from 2005 to 2013.

In 2012, a new tax was introduced by the Finance Law for 2012 on production of crumb rubber. The Government also introduced an income tax on revenues of rubber tree producers, following a continuing increase in global prices for the 2008 to 2011 period. This tax amounts to 5% of the turnover of production companies and is applicable whenever the monthly average international price per kilogram exceeds CFAF 1,000.

In 2016, the Government adopted strategic guidelines for the reform of the rubber tree and palm oil sectors. This reform is primarily based on technical assistance to planters to improve their production systems and strengthen their capacities. Furthermore, a new law establishing rules relating to the regulation, control and monitoring of the rubber tree and palm oil sectors' activities was adopted as part of the implementation of this reform. This law aims to improve the governance, productivity and competitiveness of these sectors, in order to allow all the sectors' participants, and particularly producers, to derive greater profits from their activities. It takes into account the similar problems and the agricultural complementarity of these two sectors to govern, under a single legal framework, subjects related to village plantations, marketing, processing and promoting rubber tree and palm oil products. In this respect, it establishes a single body responsible for regulating, controlling and monitoring the activities of the two sectors, in the interest of all the value chain participants.

In 2017, production was 606,420 tons, an increase of 33.9% compared to 2016, due to an increase in the area of cultivated land and improved prices.

In 2018, rubber production increased by 2.9% according to estimates, reaching 624,136 tons. The industry has benefitted from the progressive entry into production of numerous plantations created since 2012. However, as a function of the steady increase in production, the industry was faced with a lack of processing capacities in 2018 for the transformation of latex into rubber (dry). In addition, the industry continued to suffer from the drop in international prices. This resulted in disruptions in the sale of latex. A portion of the production had to be exported in the form of cup films. Marine freight and transit companies were reticent to export rubber with high levels of humidity. This situation caused a temporary accumulation of stocks during the year. The processing rate of raw material was an estimated 80.2% in 2018, compared to 79.6% in 2017.

In 2019, production is estimated at 521,800 tons, representing a decrease of 16.4% compared to 2018, in connection with the decline in international prices.

### *Palm Oil*

Côte d'Ivoire is, after Nigeria, the second largest producer of palm oil in Africa. Production amounted to 451,012 tons in 2016 compared to 424,100 tons in 2015, representing an increase of 6.3% in 2016 following 1.0% growth in 2015.

In 2017, production was 433,790 tons compared to 451,012 tons in 2016, representing a decrease of 3.8%.

In 2018, palm oil production increased by 18.5%, according to estimates, reaching 513,875 tons, due to the entry into production of new plantations. In addition, the industry benefitted from (i) higher quality plants provided to producers, (ii) strengthened capacity of cooperative companies in optimizing collection activities, (iii) management advice and (iv) a supply of farming inputs and equipment.

Palm oil plantations cover approximately 240,000 hectares with more than 60% of village plantations and less than 40% of industrial plantations. All locally grown oil palm fruit is processed in Côte d'Ivoire by agro-industrial companies, such as the Singaporean OLAM group and independent processors. The palm oil sector is the only sector producing 100% of finished products. Furthermore, there are ongoing plans to use the biomass from production as an input for electrical energy production.

The Ivorian market consumes approximately two-thirds of national production. The balance is exported throughout the ECOWAS region, whose demand is not sufficiently met. To satisfy sub-regional demand, Côte d'Ivoire intends to increase its production and exceed 600,000 tons of raw palm oil by 2020. In order to do so, the Government has adopted a law aiming to improve the sector's competitiveness, productivity and governance.

In addition, the Council for the Regulation, Control and Monitoring of Activities in the Rubber/Oil Palm Industry (*Conseil de régulation, de contrôle et de suivi des activités de la filière hévéa-palmier à huile*), the rubber-palm council, became operational with the official appointment of the members of the Board of Directors in October 2018. The rubber-palm council will only take into account the regulatory aspects of these industries. It is also responsible for ensuring that all participants in this sector receive equal pay and that processing plants are competitive at the national and international level.

The sector is also expected to benefit from the effects of the implementation of the palm tree plan, which seeks to increase the area of cultivated land and improve productivity, despite global price fluctuations and governance problems in the sector. The sector's target is to triple the current annual production of palm bunches to produce one million tons of crude palm oil by 2025.

#### *Cashew Nuts*

Côte d'Ivoire has been the world's top producer of cashew nuts since 2015 (according to the Cotton and Cashew Nut Council) with approximately 22% of global production, and the leading exporter of raw nuts with 40% of global supply. Today, Côte d'Ivoire is pursuing a policy of continuous improvement in its local processing capacity. 93% of cashew nuts are exported in raw form, mostly to Vietnam and India, which in 2016 accounted for approximately 62.8% and 34.3%, respectively, of all cashew nuts exports from Côte d'Ivoire. The sector benefits from the implementation of reforms targeted at increasing producer prices during recent years. There are around 250,000 producers in Côte d'Ivoire and approximately 1.5 million people in the country derive their livelihood directly from this agricultural product.

In 2016, cashew nut production decreased by 7.5% to reach 649,587 tons due to unfavourable weather conditions.

In 2017, cashew nut production stood at 711,236 tons, representing an increase of 9.5%. In 2018, production rose by 7.0%, reaching 761,317 tons. However, a drop in prices led to a 20% decrease in income distributed to producers, which was estimated at CFAF 404 billion in 2018, compared to CFAF 509 billion in 2017.

In an effort to accelerate the development of processing capacity and optimize producers' income, the World Bank granted a CFAF 107 billion loan to the cashew nut industry in 2018 as part of the Project for the Promotion of Competitiveness in the Value Chain (*Projet de Promotion de la Compétitivité de la Chaîne de Valeur*). This project consists in investing in the various compartments of the value chain, particularly in varietal research, management of producers, development of rural roads in production zones, storage and local processing infrastructure.

This project comes in addition to the measures that have already been taken by the Government to increase local processing capacity. These measures relate, in particular, to the obligation for exporters to make 15% of production available for local processing and a CFAF 400 subsidy granted for every kilogram of cashew nuts produced locally and sold for such local processing.

These initiatives should help fulfil the potential for job creation in production zones, estimated at 440,000 jobs, including at least 60% for women.

Reforms undertaken in the sector to boost the processing rate led to an increase in the number of cashew nut processing companies to 22 in 2016 from only 10 in 2012 and consequently to achieve an overall installed capacity of 100,900 tons

in 2016. Côte d'Ivoire has the goal, under the 2016-2020 NDP, of reaching a processing rate of 50% by 2020, this rate stood at 6.6% in 2017 and 9.0% in 2018. For 2018, this rate corresponds to a volume of 68,515 tonnes of cashew nuts delivered to 25 operating processing units with a total capacity of 116,350 tonnes. In addition, in order to improve the quality of nuts and productivity, high-quality cashew nut seeds and inputs are distributed to producers.

For the 2019 season, which begins in February, the farm gate price has been set at 375 CFA/Kg of cashew nuts, well dried, well sorted and containing no foreign matter, down 25% compared to the price in the previous season (500 CFA/Kg).

### *Cotton*

Cotton production is one of the main sources of income and livelihood for communities living in the north of the country.

After enduring the political and military crisis that started in 2002, the country's cotton production since 2011 has been growing as a result of state subsidies granted to farmers over the 2011-2013 period. This growth is also due to the support of the European Union through the "New Seeds" (*Nouvelles Semences*) project which improved seed quality for many farmers. The assistance provided by the European Union allowed the restoration of seed production stations that began producing high-quality seeds, leading to a positive effect on production. In addition, efforts were made to preserve cooperative movements and secure funding for cotton production, primarily by private operators.

In 2015, cotton production increased by 7.3% compared to 2014 to reach 434,914 tons, following an increase of 13.3% in 2014 thanks to improvements in productivity due to supplying agricultural products and quality seeds to producers. This sector benefitted from reforms, in particular with respect to the minimum purchase price that is guaranteed to producers by the Cotton-Cashew Council, an entity which was created on the basis of the model of the Coffee-Cocoa Council in 2013.

In 2016, significantly unfavourable weather conditions characterized by late rains during the sowing period (late May and late July) and heavy rain after boll opening (late September to October) reduced yield. Furthermore, the number of cotton producers decreased whereas the number of cashew nut producers increased. As a result, cotton production declined by 23.6% compared to 2015 to reach 332,422 tons. However, the quality of cotton produced has significantly improved due to the distribution of higher-quality inputs. The rate of superior fibre increased to 48%, compared to 13% in 2015.

In 2017, cotton production was an estimated 352,712 tons, a 6.1% increase compared to 2016, due to various measures taken to stem the effects of the poor weather conditions, namely improvements in the supply of input to producers (quality, quantity and price), the rise in the purchase price from the producer, the reinforcement of the current cottonseed production system, processing and conditioning of seed for the benefit of the chain as a whole.

The Government adopted Decree No. 2016-1153 of 28 December 2016 instituting agro-industrial zones in the cotton sector which resulted in the creation and allocation of exclusive business zones for each cotton company operating in Côte d'Ivoire, which aims to significantly reduce dysfunctions occurring following the liberalization of the sector and revive cotton production in a sustainable manner.

In 2018, cotton seed production stood at 386,989 tons, representing an increase of 9.7% compared to 2017. The industry has benefitted from a series of reforms, in particular:

- improvements in the supply of input to producers (quality, quantity and price);
- reinforcement of the seed production, multiplication and distribution system through the implementation of the seed plan, adopted by the industry in February 2017, for which a levy of CFAF 3/kg of cotton seed was authorized by the Government;
- monitoring of the implementation of zoning in the cotton basin, particularly compliance with the commitments contained in the concession agreement and the specifications.

The 2018-2019 season began in December 2018 with prices for purchase from producers that were identical to those of the previous year, i.e. CFAF 265/kg for top-grade cotton seed and CFAF 245/kg for second-rate cotton seed. Prospects for the new season are promising. The measures targeted are expected to lead to an increase in financing, number of producers, farmed area and yield to achieve annual growth of 15% of the cotton production forecasted for the 2018-2019 and 2019-2020 seasons.

### *Bananas*

With the support of the European Union for the implementation of the 2014 sector's recovery plan, sweet banana production increased by 18.6% in 2016 to reach 426,975 tons. This recovery follows the 0.7% and 6.8% declines recorded in 2015 and 2014, respectively, due to the flooding of several hectares of plantations in 2014. Production reached 359,947 tons in 2015 compared to 362,363 tons in 2014.

In 2017, sweet banana production was an estimated 438,107 tons, representing an increase of 2.6% compared to 2016 that was primarily a result of the effects of the sector's recovery plan, which seeks to increase production to 500,000 tons by 2020. However, heightened competition from producers in Latin American countries has threatened the export of sweet banana to European markets.

In 2018, sweet banana production stood at 449,094 tons, representing an increase of 2.5% compared to 2017. This change is due to the effects of the "Banana Support Measures" (*Mesures d'Appui à la Banane*), funded by the EU. As a result of this performance, Côte d'Ivoire is the leading banana producer in Africa. In addition, the Ivorian Government has adopted a 10-year strategy for the banana sector, which is structured around the following four areas of development:

- continued reduction of production costs for plantations that export to Europe;
- relaunch of production among small-scale farmers;
- development of local and sub-regional markets;
- continued improvements in the living conditions of workers and efforts to protect the environment.

However, pressure from European distributors to reduce prices and growing competition from Latin American banana producers present a threat to sales in 2019.

### ***Energy and Mining***

#### Electricity

Côte d'Ivoire generates its electricity from thermal and hydroelectric plants. With the commissioning of the Soubré dam in May 2017, the country now has seven hydroelectric dams and four thermal power stations fuelled by natural gas sourced primarily from Côte d'Ivoire, with a gross installed overall capacity of 2,199 MW. Electricity production was 8,624.0 GWh in 2015, an increase of 5.0% compared to 2014. In 2016, net electricity production was 10,072.1 GWh, an increase of 16.8% compared to 2015. This trend is due to the production of thermal power, which increased by 17.86% to 8,537.33 GWh, as compared to 7,243.47 GWh in 2015, due to an increase in production capacity of the Azito site in April 2015 (+140 MW) and CIPREL in December 2015 (+111 MW) to meet increased demand. In addition, hydraulic production increased by 13.02% due to the increase of hydraulic stocks. In 2017, net electricity production is 9,802.87 GWh, a decrease of 2.7%, due to lower domestic consumption and export sales. This decrease was driven by a reduction in thermal production of -9.0% which more than offset an increase in hydraulic production of +32.8%. In 2018, net electricity production stood at 9,835.3 GWh and is expected to reach 10,544.0 GWh in 2019, an increase of 7.2%, as a result of dynamic domestic and foreign demand. The share of hydraulic electricity, which represents 29.7% of total production, has significantly increased (44.69%), due to the commissioning of the Soubré dam in May 2017. The share of thermal power decreased by 10.96%, as a result of the reallocation in favour of hydraulic energy, which is less expensive to produce. The State only consumed 77.15% of its contract quantity under the Take or Pay with CIPREL, representing a production differential of 870.56 GWh. Studies are underway to assess the development of thermic gas electricity in Azito (253 MW) and CIPREL 5 (390 MW).

The energy mix is still dominated by thermal energy, which remains the main source of the supply of electricity, even though it decreased from approximately 79.9% of total supply in 2017 to 70.3% in 2018. Thermal electricity production, valued at CFAF 176.33 billion in 2018, decreased by 2.84% compared to its level at the end of the December 2017, with an implicit cost of thermal electricity that increased from CFAF 23.37/kWh in 2017 to CFAF 25.601/kWh in 2018, representing an increase of 9.52%, due to the Take or Pay effect linked to domestic demand and the decrease in exports. In 2018, hydraulic electricity production, valued at CFAF 46,276 billion, increased by 111.35% compared to its 2017 level. The electricity production of the Soubré dam (1,300.05 GWh) is sold at CFAF 35/kWh.

In the past, domestic natural gas production did not meet domestic demand, resulting in the use of more expensive HVO (liquid fuel) for electricity production. However, due to increased natural gas production, the entry into production of the Soubré dam in May 2017 and the combined cycles, the use of HVO is residual. This should result in a decrease in production costs over the medium and long term.

At the end of December 2018, fuel purchases stood at CFAF 209.34 billion, including CFAF 207.5 billion dedicated to the purchase of natural gas. Côte d'Ivoire produces more electricity than it consumes and exports electricity to neighbouring sub-Saharan African countries such as Burkina Faso, Mali, Ghana, Togo and Benin. Transmission lines are currently under construction in order to export electricity to Guinea, Sierra Leone and Liberia as part of the West African Power Pool, an ECOWAS initiative that seeks to open up the West African energy market. TRANSCO CLSG is in charge of carrying out this project and ensuring its financing, construction and operation. The implementation of the project is progressing well. Contracts with the construction companies have already been signed. Overall work progress at the end of 2018 is estimated at 22%. The revised work schedule plans for progressive commissioning over the course of the fourth quarter of 2019 for the Côte d'Ivoire-Liberia, Sierra-Leone segment and the third quarter of 2020 for its interconnection with Guinea.

Many households in Côte d'Ivoire still do not have access to electricity because of the high connection costs. The Government has launched works to provide electricity to all villages with more than 500 people. In the period from 2011 to 2015, the coverage rate and access rates went from 34% to 49% and 74% to 80%, respectively. These rates were 54% and 82% in 2017 and 58% and 89.5% in 2018. The Government plans to provide electricity to all villages of more than 500 residents by the end of 2020, and all regions of the country by 2025. Furthermore, measures are being taken to lower household electricity bills, in particular through the distribution of low-electricity-consuming lamps, decreasing subscription costs and a 20% reduction in the domestic low-voltage social rate of five Amperes. The Government intends to increase production capacity to 4,000 MW by 2022 (taking into account the needs of the mining industry), in order to meet domestic and external electricity demand.

An Electricity Code was adopted on 24 March 2014. The Code allows various segments of the electricity sector to open up to the private sector. The Government is anticipating the possibility of transmission and distribution lines being operated by different private companies, and the Electricity Code establishes a framework for the development of renewable energies, and includes provisions to combat fraud and acts of vandalism at the electricity plants. In 2012, actions related to the identification, securing and surveillance of customer counting and a better monitoring of streetlight meters were taken by the concessionaire, the *Compagnie Ivoirienne d'Electricité*, to combat fraud in the country. These actions resulted in satisfactory earnings that reduced financial losses in the electricity sub-sector.

Electricity tariffs are regulated by the State and vary depending on the type of user (public household, general household and professional low voltage, medium voltage and high voltage). As part of the Government Social Program (PSGOUV), the inter-ministerial Decree No. 002/MPEEr/MEF/SEPMBPE of 2 January 2019 on the modification of electricity tariffs, has been adopted to reduce the five Amperes Low Voltage Domestic Social Rate by 20%.

The outlook for the electricity sector was outlined in the Priority Action Plan of the Ministry of Energy, developed as part of the Poverty Reduction Strategy Document (*Document de Stratégie de Réduction de la Pauvreté*) process in 2009 and reflected in the 2012-2015 NDP. As a result, in the last quarter of 2011, structural reforms of the sector were launched to reduce institutional overlapping and streamline the organization of the sector. In December 2011, the Asset Management Company of the Electricity Sector (*Société de Gestion du Patrimoine du secteur de l'Electricité*), which manages assets and monitors financial flows in the sector, and the Ivorian Electricity Company (*Société d'Opération Ivoirienne d'Electricité*), which plans and monitors the management of energy flows, were replaced by a single entity,

the Côte d'Ivoire Energy Company (*Société Côte d'Ivoire Energies* – CI-ENERGIES). A decree modifying the name of Energies Côte d'Ivoire was signed in November 2017. It extends the corporate purpose of CI-ENERGIES to the conversion of all energy sources, including new and renewable energy sources, into power and the sale of power produced from these sources. CI-ENERGIES owns and operates the power plants owned by the State as well as the power storage and transportation facilities.

The National Authority for Electricity Regulation (*Autorité Nationale de Régulation de l'Electricité de Côte d'Ivoire*) remains in charge of distributors and independent electricity producers, and is responsible for arbitration and settling disputes between the different stakeholders, including consumers. With respect to CI-ENERGIES, a two-tranche financing agreement was concluded in 2019 with the support of the World Bank through its partial credit guarantee. The first tranche of CFAF 95 billion was raised from local banks, without the use of the guarantee. The second tranche, for EUR 300 million, was contracted with international banks and is guaranteed by the World Bank. This financing has been used, in priority, to repay domestic bank loans and to partially settle the arrears of independent power producers and gas suppliers. In addition, initiatives to reduce technical and non-technical losses combined with the optimization of thermal power plants are expected to improve efficiency. The expected growth in economic activity combined with the initiatives conducted by the Government aim at generating margins over the period 2019-2020 to cover charges without accumulating any arrears.

Increasing the supply of electricity to foster economic growth remains a priority of the Government. To this end, the Government took measures to reduce losses and in particular to reinforce existing sites with production plants using new types of combustibles, including biomass, and to improve the electricity transportation and distribution network to satisfy growing demand for electricity. In addition, investments amounting to CFAF 10,700 billion over the 2014-2030 period are ongoing. These investments will be financed by both the State and the private sector, with the State's share not exceeding 15% of the planned amount. In this respect, the Government has anticipated an average increase in power of about 150 MW per year for the next few years. The Government's efforts have allowed several projects to be implemented, including (i) the completion and installation of the AZITO 3 project on 30 June 2015, entailing the addition of a 139 MW steam turbine to the two existing ones, as well as recovery equipment for conversion to combined cycle, and (ii) the completion of phase B of the CIPREL 4 project on 31 December 2015, entailing the construction and commissioning of a combined-cycle gas plant consisting primarily of two gas turbines (TAG9 and TAG10), two recovery boilers and one steam turbine (TAV1). With a view to achieving the objective of reaching an electricity production capacity of 4,000 MW by 2020, the State has entered into agreements and/or memoranda of understanding with private developers to complete power generation works. In an effort to improve the share of renewable energies in the energy mix, a strategy for their development was initiated by the Minister of Petroleum, Energy and Renewable Energies, covering both "On-Grid" and "Off-Grid" sectors. In this regard, various initiatives have been taken, including the installation of solar kits and mini solar power plants, as well as the signature of concession agreements for the construction of solar power and biomass plants. Indeed, several solar power plants should be commissioned between 2020 and 2021, including in Boundiali (37,5 MW), Korhogo (25 MW) and Poro (66 MW), and biomass power should be developed as well, with three power plant projects being contemplated, based on: (i) oil palm, in Aboisso (46 MW), (ii) cotton, in Boundiali (20 MW) and (iii) cocoa, in Gagnoa (25 MW).

The electricity sector faced an imbalance in its financial situation due to a combination of several factors: (i) the high price of gas, (ii) the failure to charge at marginal production cost, (iii) the failure to collect invoices in the CNO zone, and (iv) the extent of technical and non-technical losses due to the obsolescence of the distribution network. The results achieved through the implementation of a deficit reduction strategy for the electricity sector have led to a gradual improvement of its financial situation and helped it reach financial equilibrium (taking into account investments) in 2016. In 2018, revenues amounted to CFAF 572.684 billion, including CFAF 38.996 billion from rural electrification fees and VAT. Expenditure over the same period was CFAF 571.642 billion, representing a positive balance of CFAF 1.042 billion. Additional electricity requests from neighbouring countries will continue to be billed at the marginal production cost of HVO.

Significant investments have been made in the electricity sector. Over the 2011-2017 period, these investments stood at CFAF 980.3 billion for production and transport, and CFAF 363.9 billion for distribution.

## Hydrocarbons

Côte d'Ivoire produces and mostly exports crude oil, and refines imported crude oil to satisfy its domestic market. On 31 December 2017, Côte d'Ivoire's reserves amounted to an estimated 188.8 million barrels of crude oil and 756.8 billion cubic feet of natural gas. Taking into account proven reserves, approximately 38% of hydrocarbons remain to be extracted. Since October 2011, 20 exploratory drillings, nine appraisal drillings and four development drillings have been made over the Ivorian sedimentary basin. Exploratory drilling resulted in the discovery of seven hydrocarbon deposits. Three exploration wells and an appraisal well were completed in 2017. In 2017, ExxonMobil completed the two ultra-deep water blocks, for which agreements were signed in December 2014. Oil promotional campaigns carried out by the Government resulted in the signing of nine production sharing contracts (*Contrats de Partage de Production*) in 2017, and five in 2018 including two with the SECI and FOXTROT consortium, two others with TULLOW and one with DRAGON OIL. In June 2019, four production sharing contracts were signed, two with ENI (blocks CI-501 and CI-504) and two with Total (blocks CI-705 and CI-706).

The maritime border between Côte d'Ivoire and Ghana has been officially defined, following the ruling rendered by the International Tribunal for the Law of the Sea on 23 September 2017. This new border allows Côte d'Ivoire to more smoothly pursue its exploration projects with its oil partners. These two countries shared a maritime border that had until now remained non-delimited. In 2008, both countries established a mixed Commission responsible for the delimitation of this border. From 2008 to 2014, the mixed Commission held a series of meetings with the goal of reaching a consensus with regard to the borderline. The parties recommended different methods for the delineation of the border. In September 2014, although the parties had consistently favoured a negotiated solution, Ghana chose to appeal to the International Tribunal for the Law of the Sea (*Tribunal International du Droit de la Mer*) to settle the issue of the delimitation of the maritime border between the two countries. In the face of this unilateral act, the Ivorian Government chose, in turn, to appeal to the International Tribunal for the Law of the Sea with regard to this territorial dispute with Ghana, which led to the above-mentioned decision of September 2017.

## *Oil*

The production of crude oil decreased from 12.4 million barrels in 2011 to 10.8 million barrels in 2012 and 9.1 million barrels in 2013 and 6.9 million barrels in 2014. This is primarily due to the natural depletion of a number of oil fields. In 2015, the production of crude oil grew from 6.901 million barrels in 2014 to 10.735 million barrels, or an increase of 55.5%. This progression is linked to investments in exploration, development and maintenance of existing wells and mines. In 2013, estimated production of 25,021.6 barrels/day was significantly less than imports of approximately 71,000 barrels/day. Côte d'Ivoire remained a net importer of crude oil in 2014 with crude oil production of 18,908.3 barrels/day compared to imports of approximately 62,000 barrels/day. In 2016, crude oil production was 15,425,895 barrels, or 42,147 barrels per day, an increase of 43.70% compared to 2015 due to the contribution of wells established during drilling campaigns at the Baobab (CI-40) and Marlin (CI-27) fields from 2015 to 2016. In 2017, crude oil production amounted to 12,440,504 barrels (34,084 barrels per day), representing a decrease of 19.35% compared to the production levels in 2016, due to the natural depletion of oil fields and production stoppages of the Espoir and Baobab fields during their annual maintenance periods and employee strikes. Crude oil production continued to decline in 2018 (-5.27%), with production reaching 11,784,642 barrels, or 32,287 barrels per day. More precisely, this contraction is mainly due to the CI11 (-43.0%), CI27 (-33.0%) and CI 26 (-8.6%) permits. In contrast, production of the CI40 permit increased moderately by 0.2%. Côte d'Ivoire remains a net importer of crude oil (1,565,194 tons, representing around 11,425,916 barrels, in 2018).

In order to strengthen the national capacities of electric power generation and to reduce disturbances linked to the natural gas deficit, the Government granted its approval for the implementation of the Côte d'Ivoire Liquefied Natural Gas Supply Project (*Projet d'Approvisionnement de la Côte d'Ivoire en Gaz Naturel Liquéfié* – PACI-GNL) during the Council of Ministers on 10 February 2016. Côte d'Ivoire also intends to participate in regional projects such as the construction of gas pipelines. PETROCI could also consider the acquisition of oil assets outside Côte d'Ivoire. Exploration of natural gas resources is carried out as part of the overall hydrocarbon exploration in the Ivorian sedimentary basin.

The Ivorian Refining Company (*Société Ivoirienne de Raffinage* (“**SIR**”)) imports crude oil, mostly from Nigeria, and processes it to meet domestic demand in oil products and to export oil products to WAEMU countries.

PETROCI, a state-owned company, was created in 1975 to oversee the country's oil development following its independence in 1960. PETROCI is involved, through private partnerships with foreign oil companies, in exploring and extracting oil and natural gas reserves. PETROCI is entitled to a 10% participation right in these partnerships. Hydrocarbon research and extraction, as well as all PETROCI activities, are governed by the 1996 Petroleum Code, which was revised by Decree No. 2012-369 on 18 April 2012. Difficulties still persist, however, despite efforts to improve hydrocarbon production and distribution channels for oil products. In order to increase oil production, private investments in oil research and exploitation are needed. Reforms of the Petroleum Code take into account good governance, environmental sustainability and the application of Extractive Industries Transparency Initiative (EITI), adopted by the Government in April 2012. In May 2017, the Government agreed to the sale of PETROCI's GPL distribution activities and assets to private investors, in order to allow the company to refocus its resources on its main activities, namely the development of Ivorian oil and gas potential and the import and storage of hydrocarbons. PETROCI has definitively sold its service stations business to Puma Energy, following the authorisation granted by the Government on 28 February 2018.

Oil permits granted by the State to concessionaires are based on shared production contracts (*Contrats de Partage de Production*) with consortiums headed by a technical operator which has a majority share in the consortium. The consortium is also in charge of revenue distribution and gives PETROCI its respective share based on the terms of the CPP.

The SIR is the country's only oil refinery. Its main shareholders are PETROCI (45.7%), TOTAL (20.4%) and SONANGOL (20.0%). Refined products include super unleaded petrol, kerosene and fuel gas. However, the SIR, which has a monopoly over the import of the crude oil necessary for its production.

The SIR's production of refined products increased from 2.0 million tons in 2011 to 3.2 million tons in 2012, 3.2 million tons in 2013, 3.2 million tons in 2014 and 3.4 million tons in 2015. This increase was due to the revival of the national economy and the strength of exports to ECOWAS countries, particularly to Nigeria. However, the SIR's production of oil products decreased by 8.82% in 2016, amounting to 2.895 million tons. This decrease in production is the result of the combined effects of the shutdown of the HSK3 facility and the SIR's hydrocracker, as well as the low export refinery margins during the second quarter of 2016. The SIR consequently reduced its crude oil processing rate to ensure the supply of the local Ivorian market to the detriment of the export market. In 2017, production stood at 3.1 million tons, an increase of 5.51% compared to 2016. In 2018, oil products production stood at 3.3 million tonnes, representing an increase of approximately 6.62% compared to 2017.

Pursuant to a revised oil price automatic adjustment mechanism adopted by the Government and implemented in April 2009, oil prices on the domestic market are intrinsically linked to international price fluctuations. The SIR has suffered due to the decline in refining margins on the international market. However, it has benefitted from several subsidies from the Government throughout the past decade. In October 2016, the Government approved a strategy for restructuring SIR's debt with a view to achieving financial stability in the medium term. An audit completed in early 2016 established SIR's debts to local banks and overdue liabilities to suppliers at CFAF 368 billion. The debt restructuring aimed to eliminate short-term debt largely borne by crude oil suppliers, improving terms of payment and restoring a positive net financial result. SIR entered in December 2018 into a long-term loan in the amount of CFAF 368 billion, guaranteed by the Government. As the restructuring has been completed, the repayment of this loan is backed in part by the ongoing fuel surcharge (*soutien à la marge*) granted by the Government to SIR. This surcharge is consolidated in the budget and the Government will transfer its proceeds as a subsidy to SIR.

In November 2012, the Government adopted an oil price structure that serves as a basis for an automatic adjustment mechanism of retail station prices. This new price structure has been in place since 1 April 2013. The changes made to this mechanism relate to the introduction of a price component that supports the refinery margin (margin support), the reduction of the VAT rates on oil products (from 18% to 9%) and the flexibility of the Unique Specific Tax (*Taxe Spécifique Unique*) collected by the State so as to maintain prices at a level that is acceptable to the population. Prices at the pump have been identical everywhere throughout Côte d'Ivoire since 1975 for liquid products and since April 2013 for butane gas. Since the beginning of September 2015, the price of super gasoline has decreased from CFAF 715 per litre to CFAF 680 per litre, then CFAF 615 and finally CFAF 570, similar to the price of fuel gas per litre. In addition, the price of super gasoline rose from CFAF 570 to CFAF 593 in May 2017 and CFAF 595 since December 2017, identical

to that of fuel gas. In 2018, the average price of super gasoline is CFAF 610 and the average price of diesel is CFAF 605 per litre.

The distribution network for oil products significantly deteriorated during the 2002-2011 period due to the political and military crisis. About 24 distribution licenses for oil products were nonetheless granted during this period. The largest fuel distributors are members of the Professional Petrol Group created in 1971 (*Groupement des Professionnels de l'industrie du Pétrole*), including Total CI, Corlay CI, Vivo Energy CI, LibyaOil (now OLA Energy), Oryx Energies, Petro Ivoire, which collectively control approximately 76% of the domestic market since 2017. Other companies are members of the Côte d'Ivoire Professional Petrol Association (*Association professionnelle des pétroliers de Côte d'Ivoire*), created in 5 November 2003.

### *Gas*

Natural gas production has been continuously growing over the 2011-2013 period, increasing from 57,660,048 British Thermal Units (“MMBTU”) in 2011 to 62,894,892 MMBTU in 2012 and 75,129,950 MMBTU in 2013, in conjunction with the increased demand from the electricity sector. Natural gas production was 75,306,277 MMBTU in 2014, an increase of 0.2% as compared to 2013 and 78,597,562 MMBTU in 2015, *i.e.*, a 4.4% increase as compared to 2014. In 2016, production is estimated at 84,630,719 MMBTU, an increase of 7.7% compared to 2015. In 2017, production was 76,086,924 MMBTU, a decrease of 10.1% compared to 2016. Similarly, natural gas production in 2018 decreased compared to 2017. Production is 69,091,226.6 MMBTU or 189,291 MMBTU/day, representing a decrease of 9.19%. This change is the result of disturbances observed on the installations of blocks CI-11 and CI-26 referred to above and a decrease in natural gas demand in the CI-27 block.

The population, especially within the interior of the country, has limited access to butane gas due to high prices in these regions. Since April 2013, prices have been standardized throughout the country and consumption in the interior of the country, excluding Bouaké, increased by 34.16% in 2013 as compared to 2012. The country's supply of butane gas is ensured by domestic production and imports.

In 2015, domestic production of butane gas by SIR (61.67%) and PETROCI (38.33%) represented 8.89% of national consumption, which stood at 241,887 metric tons. The remaining consumption (96.15%) was fulfilled by imports made by the SIR (66.91%) and PETROCI (33.09%). Storage capacity progressed from 9,795 metric tons in 2012 to 19,395 metric tons in 2015, an increase of 98.6%. In 2016, domestic production of butane gas by SIR (76.85%) and PETROCI (23.15%) represented 7.89% of national consumption, which stood at 268,904 metric tons. The remaining consumption (92.11%) was fulfilled by imports made by the SIR (67.74%) and PETROCI (32.26%). Storage capacity progressed from 19,395 metric tons in 2016 to 19,448 metric tons in 2017, or an increase of 0.27% and remained unchanged in 2017. In 2017, domestic production of butane gas by SIR (approximately 42%) and PETROCI (approximately 60%) represented approximately 7.1% of domestic consumption, which stood at approximately 305,047 metric tons, an increase of 16.1% compared to 2016. In 2018, butane production by the SIR stood at 18,448 metric tons and domestic consumption at 344,424 metric tons, *i.e.* an increase of 12.91%. The production of the SIR represents approximately 20 days of domestic consumption. Storage capacities in 2018 did not change compared to 2017.

However, the population continues to use fuel wood as an energy source, which is a threat to the conservation of the environment and the balance of biodiversity.

Improving transparency in the hydrocarbon sector remains a priority for the Government, which has introduced the publication of quarterly reports since 2007 by the Council of Ministers concerning physical and financial flows related to the energy sector, including oil and gas.

### Mines

Côte d'Ivoire possesses significant mining potential. Over two-thirds of the country is covered by rock formations that are considered to be rich in diverse minerals including 35% of the greenstone belts of West Africa known for their recognized gold potential.

Studies carried out since independence have revealed significant deposits of:

- semi-precious and precious stones (rough diamonds);
- precious metals (gold);
- base metals (iron, nickel, copper, cobalt, coltan, and manganese);
- other substances (chrome, bauxite, phosphate and ilmenite).

The gold potential of Côte d’Ivoire is estimated at approximately 600 tons, distributed between the central, northern, western and south-eastern regions.

To support its ambition to achieve an emerging economy by 2020, the Government has made serious efforts, since 2011, to implement a more dynamic mining policy, based on the promotion and advancement of the mining sector, with the goal of increasing the sector’s contribution to GDP from its 2010 level of 2% and approximately 3% in 2017 to 4% by 2020.

This political commitment to accelerate development in the mining sector was reflected in the 2014 reform of the legal framework of the mining sector, aiming to adapt it to new requirements relating to the extractive sector development and to attract more Foreign Direct Investments (FDI).

At the institutional level, a ministerial department exclusively dedicated to mines and geology was created for the first time on 10 July 2018. The new Ministry of Mines and Geology is in charge of continuing the implementation of the Government’s sectoral reform policy to attain the objectives set out in the 2016-2020 NDP, in particular, by:

- installing geological and geophysical infrastructure throughout the country;
- increasing and diversifying mining production.

The Mining Development Company of Côte d’Ivoire (*Société pour le Développement Minier de la Côte d’Ivoire* (“**SODEMI**”)), created in 1962, with a share capital of CFAF 600 million, is a State-owned company whose main mission is to promote exploration and exploitation of useful natural mineral substances (with the exception of hydrocarbons) and study the inherent problems of mining exploration. A decade of political-military crisis (2000-2010), coupled with a decrease in the price of base metals have had a negative impact on SODEMI, which has recorded significant losses. In 2011, the management team was reinvigorated, and SODEMI was restructured by the Government. Today, by comparison with established financial objectives, SODEMI is among the five highest-performing government-controlled companies in Côte d’Ivoire. Following audits carried out in 2017 and 2018, a targeted strategic plan in line with policies for development in the Ivorian mining sector is currently being conceived. Its goal is to consolidate the positive dynamic in the sector and generate more resources to turn SODEMI into a leading company in the mining sector.

The Mining Code (Law No. 2014-138 of 24 March 2014) provides that as a consideration for the granting of mining permits, the State is granted 10% of the share capital of the mining companies (non-contributing interest). In addition to its non-contributing interest, the State may subscribe on market terms for an additional contributing interest, not exceeding 15% of the share capital of the mining company.

The current Mining Code increased the maximum exploration period from 7 to 10 years. It also brings more transparency to the mining title and authorization-awarding process and provides for a more advantageous tax treatment for mining companies in order to increase the competitiveness of the Ivorian mining sector.

However, an ordinance adopted on 14 February 2018 removed the tax exemption on Industrial and Commercial Profits (*Bénéfices Industriels et Commerciaux*). This ordinance does not apply to mining permits delivered and mining agreements entered into before 14 February 2018.

The reform of the mining legal framework in 2014 has addressed a number of challenges, including:

- (i) establishing better governance,
- (ii) protecting the environment and ecosystems,
- (iii) increasing State revenue,
- (iv) fostering local development of communities impacted by mining operations;
- (v) making private operators more profitable through win-win partnerships.

As a result of the reforms that have been implemented, mining production has increased, leading to a rise in the extractive sector's contribution to tax income, the creation of jobs and the generation of wealth.

As at 31 December 2018, 178 active exploration permits were recorded compared to 164 in 2017. Gold is the most sought-after substance, with 154 exploration permits compared to 138 in 2017, representing 86.52% of applications. Moreover, 16 industrial mining permits are active, compared to 14 in 2017. These 16 permits are distributed as follows: eight for gold (50%); four for manganese (25%); one for bauxite (6.25%); one for laterite nickel (6.25%); and two for mineral water (12.5%).

The table below presents the evolution of mining production from 2012 to 2018:

	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
Gold (kg)* .....	13,200	15,400	18,600.0	23,540	25,050	25,400	24,488
Manganese (tons) .....	121,000	272,000	362,000.0	281,450	207,000	511,870	930,959
Diamond (carats)** .....	-	-	-	9,250	16,290	7,360	5,678
Nickel (tons)*** .....	-	-	-	-	-	379,770	889,595

*Source: MIM/DGMG*

\* Since 2017, artisanal production is recorded by gold purchase and sale offices. It stood at 0.308 tons, thereby bringing gold production in 2018 to 24.488 tons.

\*\* Diamond mining restarted in 2015 following the lifting of the embargo by the United Nations in 2014.

\*\*\* Nickel mining began in 2017.

Mining production in Côte d'Ivoire is dominated by gold. This trend is expected to be reinforced in the short term as a result of the projects underway, the mining permit requests under review and the formalization and control of semi-industrial and artisanal mining by the Ministry of Mining. Gold production demonstrated solid growth from 2012 to 2017, increasing from 13.2 to 25.4 ton over this period. For 2018, gold production stood at 24.488 tons, compared to the forecasted 26.5 tons, representing a decrease of 3.5% compared to 2017. This decrease in gold production is due mostly to the work stoppage observed at the Tongon SA mine (M'bengué department) observed over a period of five months. However, due to the beginning of production at the new Ity CIL plant intended for the processing of the minerals from the Ity and Daapleu mines and the development of advanced mining projects (Yaouré and Afema), the gold production is expected to represent 26 tons in 2019 and to increase to 28 tons in 2020 and 30 tons in 2021.

As for other ores, manganese production is expected to increase from 930,959 tons in 2018 to 1,000,000 tons in 2019 and 1,100,000 tons in 2020, due in particular to the commissioning of enrichment units for the Lauzoua mines and Bondoukou mines, as well as the entry into production of the Lagonkaha mine, which effectively began operating in 2017. The increase in manganese production from 2016 to 2018 is the result of stable international manganese ore prices and the achievement of a normal production rate for the fourth mine operated by Shiloh Manganese in Lagonkaha, in the Korhogo department. Laterite nickel production, which began in 2017 with production of 379,766 tons, is expected to increase to 750,000 tons in 2018, 1,000,000 tons in 2019 and 1,100,000 tons in 2020, in accordance with the initial production plan. Diamond production is expected to stand at 6,000 carats in 2019 then to increase to 6,500 carats in 2020.

At the end of 2018, the turnover declared to the Mining Authorities by all mining companies was CFAF 582.298 billion, compared to CFAF 539.072 billion in 2017, representing an increase of 8.02%.

Tax income generated in 2018 by the mining sector stood at CFAF 65.841 billion, compared to CFAF 56.441 billion in 2017, CFAF 33.96 billion in 2016 and CFAF 19.547 billion in 2015.

Significant deposits have been discovered, including iron deposits in Mount Klahoyo, Mount Tia (Facobly) and Mount Gao (Bangolo); nickel-copper-platinum deposits in Samapleu; and nickel/cobalt deposits in Sipilou-Foungbesso. Research for the development of iron deposits in the abovementioned locations has been conducted, respectively, by PAN AFRICAN MINERALS and SODEMI. According to initial surveys, iron resources in these deposits are estimated at nearly 4 million tons. Research on the nickel-copper-platinum deposits in Samapleu and the nickel/cobalt deposits in Sipilou-Foungbesso has been conducted by SAMA RESOURCES and IC NICKEL, in partnership with SODEMI. On the basis of their initial surveys, resources in Samapleu have been estimated at 60 million tons of nickel-copper-platinum

and resources in Sipilou-Foungbesso have been estimated at 260 million tons of nickel-cobalt. The nickel-cobalt deposits in Sipilou-Foungbesso are already being exploited, while the nickel-copper-platinum deposits are under development and the iron deposits have not yet been exploited, due to a lack of transportation and port infrastructure and the recent worldwide drop in iron prices.

This situation reveals the challenges in the mining sector, which include, in particular:

- (i) the lack of geological and geophysical infrastructure, as well as the absence of a national laboratory for mineral studies and geological analysis;
- (ii) the lack of road, railway and port infrastructure, which is currently hindering the exploitation of deposits in the western region of the country, such exploitation being part of the *Projet pour le développement minier intégré de l'ouest* (PDMIO);
- (iii) difficulties encountered in supplying power for certain major mining projects (such as Tongon SA and Agbaou);
- (iv) illegal gold mining, which damages the environment, threatens the health of surrounding populations and leads to evasion in artisanal gold production, resulting in the loss of financial resources and tax income; and
- (v) the lack of qualified workers in certain mining professions.

In order to address these challenges, the Ministry of Mines and Geology has initiated immediate and short-term reforms, as of July 2018, which include:

- conducting feasibility studies for the establishment of geological infrastructure and the construction of a national laboratory for geological studies and analysis;
- auditing the mining registry;
- developing the small mine sector by opening training sites throughout the country;
- drafting a local content policy document, accompanied by a strategic action plan for the 2019-2021 period;
- restructuring the Société pour le Développement Minier de Côte d'Ivoire (SODEMI);
- establishing a multi-year training and capacity-building plan for mining authority personnel;
- auditing mining companies;
- creating a brigade to combat illegal gold mining;
- initiating negotiations to revitalize key mining projects; and
- drafting a mining policy document and a strategic action plan for the 2020-2025 cycle, a guiding and steering tool that presents the government's five-year vision, its key aspects and the reforms to implement, as well as the results expected.

### ***Industrial Production***

Industry constitutes the main part of Côte d'Ivoire's formal private sector. Côte d'Ivoire produces a variety of goods from the following major sectors: extractive industries (18.7%), agri-food and tobacco industries (32.1%), textile industries and leather (2.4%), wood and furniture industries (14.9%), paper, cardboard, printing and publishing industries (3.3%), oil, chemical, rubber and plastics industries (15.1%), glass, ceramics and construction materials industry (2.2%), manufacturing of machines and materials of any kind (4.3%), metallic industries (0.3%), electricity, gas and water (6.6%).

The added value of the manufacturing industry in real terms increased by 15.4%, 12.5%, 4.2%, 2.8% and 6.3% in 2012, 2013, 2014, 2015 and 2016, respectively. The estimated progression is expected to be 6.3% in 2017 and 10% in 2018.

The years 2012, 2013 and 2014 benefited from renewed socio-political stability on a domestic level after the post-electoral crisis of 2011 and an increase in investments for major public projects as well as projects in the private sector, with the adoption of a new, more attractive Investment Code in 2012. This favourable environment allowed for the recovery of the industrial sector as a whole, particularly in agro-food, energy, furniture manufacturing, construction materials, petroleum products and textiles, as shown in the table below. In 2015, the industrial sector included more than 6,500 companies and contributed to the creation of over 800,000 jobs. The year 2015 was marked by an increase in the mining sector (20.4% compared to -3.3% in 2014) and the building and public works sector (18.3%). 2016 was marked by an increase in industrial activity, excluding oil and gas extraction, of 6.6%, driven in particular by the dynamism of

the energy and building and public works sectors. Industrial activity slowed by 3% in 2017 and then accelerated by an estimated 7.1% in 2018, mainly due to the recovery in construction and public works sector (+16.5%) and agri-food industries excluding beverages and tobacco (+8.9%)

The businesses active in the industrial sector include both national companies and subsidiaries of multinationals: Sifca, Nestlé, Palmci, Unilever, Solibra, Bouygues, Bolloré, Cargill, Sucaf, Cemoi, Olam, SICABLE, SIR, Barry Callebaut, Carena, ADM Total, Sifcom, SMB, PETROCI, Socimat, Bernabé, Sivop, Gandour, Filtisac and Uniwax are among the principal industrial players in the country.

The table below presents the variation of the value added of the secondary sector from 2013 to 2018:

Variation (in %)	2013	2014	2015	2016	2017 (Estimates)	2018 (Estimates)
<b>Secondary Sector</b> .....	<b>24.2</b>	<b>4.5</b>	<b>8.3</b>	<b>6.6</b>	<b>3.0</b>	<b>7.1</b>
<b>Petroleum products</b> .....	<b>18.1</b>	<b>-4.3</b>	<b>15.8</b>	<b>-7.9</b>	<b>-9.1</b>	<b>7.2</b>

*Source: MEF*

The primary industrial activities reside in agro-food business. Its share of GDP (excluding beverages and tobacco) is estimated at 4.3% in 2017, representing 17.5% of the secondary sector's added-value. In 2018, the share of this business is forecast at 4.6% of the GDP and 18.4% of the secondary sector's added-value. The agrifood sector has largely diversified and is based primarily on cocoa and coffee products, the oilseed industry, dairy products, fruit and vegetable products, beverages, meat and fish products, grain mill products and starch products, tobacco, sugar; bakery, pastry and pastas. A variety of businesses, including subsidiaries of multinationals, share this growing market.

With respect to cocoa processing, 12 companies with a capacity of 746,000 tons per year operated in Côte d'Ivoire in 2018. The quantity of ground beans in 2018 stood at 569,799 tons, representing (as in 2017) approximately 27% of production over the period.

The goal is to increase the cocoa processing rate from 30% in 2016 to 50% in 2020. Additional efforts will be required to achieve the target of 50% of the processing of total production in the country by 2020, projected at a volume of about 1,000,000 tonnes.

The processing of cocoa into butter, cakes, powder and chocolate bars is carried out by major global groups. The American multinationals Cargill and Archer Daniels Midland, the Barry Callebaut group from Zurich (represented in Côte d'Ivoire by the *Société Africaine de Cacao*), the SN Chocodi (acquired in 2008 by the Ivorian group CKG Holding), the French group Cémoi, as well as the Swiss group, Nestlé, which, for the past few decades, has dominated the processing of Robusta cherry into soluble coffee. In 2017, the Carré d'Or Group arrived in the soluble coffee segment.

The fruit industry is controlled by subsidiaries of French groups such as Selecima, *Compagnie Fruitière* and the *Société Agricole Kablan-Joubin*, which handle the conditioning and processing of fruit into juices within Côte d'Ivoire, before exporting them to Europe.

Since Unilever's withdrawal from the oilseed sector in 2009, the Sifca group has been controlling the national production of food oils. Since 2017, SARCI (*Société Africaine de Raffinage en Côte d'Ivoire*) has been operating in this sector with products ranging from food oil to soap.

In the brewery segment, the French multinational Castel, through its local subsidiary Solibra, had a monopoly over this sector until 2013. It acquired Les Brasseries Ivoiriennes in 2015, after it had been operating for two years. Solibra has an annual production capacity of two million hectolitres of beer and 400,000 hectolitres of carbonated beverages. Brassivoire, a joint venture established between HEINEKEN and CFAO Côte d'Ivoire, was established in 2016 in Côte d'Ivoire. It represents an investment of CFAF 100 billion, with an annual production capacity of 1.6 million hectolitres of beer.

With three factories of canned tuna and spices (the *Société des conserveries de Côte d'Ivoire* and *Pêche et froid de Côte d'Ivoire*, held by the ThunnusOverseas Group, and a factory owned by Italian company NuovaCastelli), Abidjan is one of the main canned tuna exporting centres in Africa. This sector represented the fourth largest export of the country in 2016 with more than CFAF 80.0 billion of annual revenue (EUR 122.0 million) in 2016 and CFAF 97 billion (nearly EUR 150 million) in 2017, and clearly prevails over the milk industry, represented by eight companies, namely Nestlé CI, Eurolait, Microdis, Finamark, Sapled, Saprolait, Normandia and Cobci.

Today, many products from the Ivorian agro-food industry are exported to the WAEMU zone, despite competition from products from Europe. The strong performance of the Ivorian agro-food sector relies on increased local demand throughout the country, as well as from neighbouring countries. This sector aims to explore the larger market of ECOWAS, in particular in light of the possibility to export in a customs duty free zone, since the entry into force of the ECOWAS' Common External Tariff (*Tarif Extérieur Commun*) in 2015

Côte d'Ivoire hopes to benefit from the African Continental Free Trade Area ("**AfCFTA**") established by the African Continental Free Trade Agreement, which officially entered into force on 30 May 2019. The operational phase of the AfCFTA was launched on 7 July 2019, during the AU extraordinary summit in Niamey (Niger). The United Nations Economic Commission for Africa ("**UNECA**") and the AU estimate that the AfCFTA may increase trade levels amongst African States by over 50% by eliminating import duties alone (more if non-tariff barriers are also addressed). As to Côte d'Ivoire, the effective implementation of the AfCFTA is expected to improve exports of Ivorian goods throughout the African continent while attracting more investment inflows. The AfCFTA is also expected to enhance productivity and stimulate the external competitiveness of the Ivorian economy.

For certain products, in particular palm oil, all production is processed in Côte d'Ivoire, which is done across the entire value chain. Rubber tree production undergoes 100% primary processing in Côte d'Ivoire. However, there still remains potential for an increase in secondary processing and the manufacturing of much more sophisticated products. Measures relating to the development and processing of rubber and palm oil include: (i) the adoption of a law establishing rules relating to the regulation, control and monitoring of rubber and palm oil sector activities and (ii) the promotion of secondary processing. A study is underway, in connection with the International Finance Corporation, in order to propose measures to develop the value chain in the rubber sector.

With respect to key products such as cocoa and cashew nuts, there is significant potential for increase in the manufacturing segment. In 2018, cocoa production amounted to 2,113,100 tons and cashew nut production to 761,300 tons, with processing rates at 27% for cocoa and 9% for cashew nuts. Agricultural production, namely of cashew nuts, has experienced very significant increases for several years. The Government has taken measures to improve the competitiveness of industrial units in these two sectors, in particular through the guarantee of primary materials at accessible prices, the implementation of taxation favourable to processors and heavier taxation namely on exports of beans and raw nuts among other such taxes. The Single Export Tax (*Droit Unique de Sortie*) ("**DUS**") on cashew nuts (10% of the CIF price) was instituted by the ordinance on the adjustment of the 2018 tax schedule to Law No. 2017-870 of 27 December 2017 for the 2018 State budget. This rate was temporarily reduced to 3.5% in 2018 as a result of falling prices, in order to ensure a profitable price for producers and the viability of the sector, and was increased again to 7%, in April 2019.

Industries in the chemicals, rubber and plastics sector accounted for 2.8% of GDP and 11.1% of the secondary sector in 2018. This sector manufactures diverse products, ranging from intermediary goods to consumer goods destined for both the local market and for export. It consists, in particular, of agrochemicals (including fertilizer and pesticides), cosmetic products (including perfumes and creams) and processing of dampened rubber and plastic goods (including shoes, chairs and tables). In most cases, the inputs for production are imported. The principal companies are AF-Chem Sofaco, Callivoire, Polychimie, Stepc, Ghandour, 2CI, Najibco, SAI, Copaci, Africhim, Sadofoss, Saprochim, Themis and Socida.

Industries in the furniture and other industries sector comprise all branches of the industry that are not specified in the tables above. In 2017, their share of GDP stood at 1.7% and they represented 7.1% of the secondary sector. In 2018, they represented 1.8% of GDP and 7.0% of the secondary sector. Products manufactured by these industries include furniture for household and office use, vehicles and machine tools (fitting and assembling), barrels, trays, electrical cables and sheet metal. These products are primarily used for national and sub-regional needs. The principal companies operating in this sector are Mobidis, Macaci, Sicable, Lassire & Cie, Tôle Ivoire, Siem, Ivoiral, Metalux and Setr.

The following table shows the percentage share of the secondary sector and its principal components in the country's nominal GDP from 2013 to 2018:

<b>Share of GDP as a %</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017 (Estimates)</b>	<b>2018 (Estimates)</b>

*Source: MEF*

After carrying out an assessment of the industrial sector with the UNIDO's support, the Government adopted an industrial policy in 2013 whose purpose was to significantly increase the contribution of the industrial sector to the creation of wealth and jobs. To achieve this goal, the Government decided to: (i) strengthen the production-processing connection in order to create more added value and sustainable jobs in large quantities and (ii) create new development centres for the industrial sectors.

The industrial development strategy focuses on three axes: strong contribution from the private sector, use of comparative advantages and targeted assistance from the State in terms of support (e.g., quality, norms, restructuring, access to credit and industrial zones, targeted tax advantages). This strategy is centred around five key themes: (i) agro-industry; (ii) non-agricultural natural resources; (iii) structuring industries; (iv) consumer products; and (v) light manufacturing industries.

The strategic axes for supporting industrial companies include two essential pillars, which are transversal measures and sectoral measures.

Transversal measures involve: (i) reinforcing the incentive framework; (ii) improving the business climate; (iii) improving the quality and strengthening measures against counterfeiting; and (iv) reinforcing industrial infrastructure.

To reinforce the incentive framework, a more attractive Investment Code (compared to the 1995 Code) was adopted in 2012 in order to increase and encourage private investment. In addition, the objectives of this Code are a reduction of administrative procedures and a move toward paperless procedures and transparency. Over the 2013-2018 period, 1,196 companies were approved by the Center for the Promotion of Investments in Côte d'Ivoire (CEPICI), for an estimated total investment of CFAF 3,450 billion, and 38,700 jobs were created. In addition, a new Investment Code compliant with international standards, and taking into account its ecosystem and governance framework, was adopted by the Council of Ministers in August 2018; its purpose, for the Government, is to promote investment in priority sectors, such as agriculture, agrifood, health and hotels. The new Code entered into force on 1 January 2019. It provides full exoneration from customs duties for imported equipment and materials and an exemption from VAT during the investment period. It also offers a tax credit during the period of operation, takes into account the specificities of small and medium-sized companies and provides additional advantages associated with local content.

With respect to improving the business climate, the reforms and actions undertaken aim to encourage private domestic initiatives and private foreign investment (FDI). It involves, in particular: (i) the establishment of a Single Portal for Business Formalities (*Guichet Unique des Formalités des Entreprises*) within the *Centre de Promotion des Investissements en Côte d'Ivoire* (CEPICI), helping to reduce the time (from 32 days to 24 hours) and costs required to create a company; (ii) the creation in 2012 of a Commercial Court to accelerate the processing of commercial disputes, by making procedures paperless and reducing delays; (iii) the establishment of the Court of Appeal of the Commercial Court in May 2018 with 13 new Consular Advisers (iv) the establishment, in December 2012, of a legal and institutional framework on PPPs, which was reformed by Decree dated 29 March 2018 for a more effective institutional framework and a greater impact on the national economy, (v) the establishment of the National Steering Committee for Public-Private Partnerships (CNP-PPP), (vi) Côte d'Ivoire's joining of the Open Government Partnership in 2015, (vii) the Government's adoption in July 2017 of a draft law on free trade zones and its submission to Parliament, (viii) the streamlining of procedures, wait-times and costs associated with the delivery of building permits (the wait-time is currently three months), (ix) the establishment of a bipartite Committee to monitor the payment of VAT credits pursuant to a clearance plan arranged in agreement with the private sector, (x) the creation of a Single Portal for Foreign Trade to reduce costs, wait-times and procedures in import and export operations in order to promote cross-border trade, (xi) the revitalization of the Committee for Dialogue between the State and the Private Sector (*Comité de Concertation Etat Secteur Privé*), (xii) the creation of a Single Portal for Investment Services in Côte d'Ivoire ([www.225invest.ci](http://www.225invest.ci)) and the introduction of a unique identifier for SMEs. In addition, to reduce administrative complexities, other reforms have been initiated, such as the creation of a Single Portal for Building Permits to reduce wait-times for the delivery of building permits, the deployment of the Commercial Court of Appeal of Abidjan and the opening of the Credit Information Bureau (*Bureau d'information sur le Crédit - BIC*).

Improving the quality system and reinforcing the fight against counterfeiting is intended to reinforce consumer protection and improve companies' competitiveness, through the adoption of the law on standardization and quality and the law on counterfeiting in 2013. In support of the National Laboratory of Metrology Quality Tests and Analysis (*Laboratoire National d'Essais de Qualité de Métrologie et d'Analyse*) and Côte d'Ivoire Standardization (*Côte d'Ivoire*

*Normalisation*), for the implementation of this legal system, two structures were established: the Ivorian Standardization Committee (*Comité Ivoirien de Normalisation*) (“**CIN**”) and the National Committee to Fight Counterfeiting (*Comité National de Lutte contre la Contrefaçon*) (“**CNLC**”). The CIN is responsible for ensuring greater coherence among different stakeholders in the field of quality and assessment with standards compliance. The CNLC carries out awareness-raising and enforcement measures with respect to counterfeit products. In addition, each year, the Ivorian Quality Award (*Prix Ivoirien de la Qualité*) and Award for Excellence (*Prix d’Excellence*) are given to encourage companies to be part of and maintain a quality approach.

In terms of reinforcing industrial infrastructure, the reforms and measures undertaken have allowed: (i) better control of the management of industrial zones with the creation of the Industrial Infrastructure Management and Development Agency (*Agence de Gestion et de Développement des Infrastructures Industrielles*); (ii) the implementation of resources dedicated exclusively to industrial sites, with the creation of Industrial Infrastructure Development Fund (*Fonds de Développement des Infrastructures Industrielles*); (iii) the implementation of new procedures to provide industrial sites with the aim of speed, transparency and simplification; and (iv) the adoption of a draft law implementing a free trade zone regime.

The actions undertaken by the Government relate to the following aspects:

- Streamlining the use of industrial sites via:
  - implementing a withdrawal-reallocation mechanism for undeveloped sites;
  - the creation of a monograph of industrial sites to indicate coordinates and information about companies through a geolocation system (completed for Yopougon).
- Rehabilitating the industrial zones of Abidjan (Yopougon (645 hectares), Koumassi (120 hectares) and Vridi (120 hectares)):
  - work on the Yopougon zone cost CFAF 24 billion;
  - technical studies are underway for those of Vridi and Koumassi.
- Strengthening the availability of industrial sites through:
  - the creation, in phases, of a new industrial zone of 940 hectares in Akoupé-Zeudji, Abidjan/PK24:
    - the ongoing development of 62 hectares for a cost of CFAF 12 billion (development rate is 90%), for which lots have been allocated and are being occupied;
    - the planned development, in the short term, of 200 hectares, broken down as follows: 100 hectares in public project ownership with the CHEC group and 100 hectares in PPP, in connection with AFREXIMBANK.
  - the development of industrial parks within the country, namely Bouaké, San Pedro, Yamoussoukro, Bonoua, Korhogo, Aboisso, Man;
  - the development of industrial parks dedicated to the processing of cashew nuts, as part of the BIRD-Enclave Project, in Korhogo (25 hectares), Bouaké (15 hectares), Bondoukou (15 hectares) and Séguéla (15 hectares);
  - the establishment of a strategy for the development of industrial zones in Côte d’Ivoire, following the approval of strategic studies conducted by Deloitte, with MCC funding;
  - the completion of feasibility studies for the development of the duty-free textile zone in Bouaké;

- a survey, currently underway, of industrial businesses and their establishments, which will provide Côte d'Ivoire with a national directory of industrial businesses and establishments listed by geographical location, thus allowing it to easily measure the industrial sector's contribution to the national economy.

Sectoral measures undertaken by the Government relate to three key pillars: (i) the agri-industry (including cocoa, cashew nuts, coffee, cotton, palm oil, rubber, fruits and vegetables, and cereals among others), (ii) the structuring industries (including chemistry, manufacturing of construction materials, cement, metallurgy and steel mills, automobile among others) and (iii) the light manufacturing industries (assembly, computers, equipment, clothing, shoes, and wood among others).

The agrifood industry is the main value-added component of the manufacturing sector. It is dominated by cocoa and coffee products (38%), oilseed industries (27%) and dairy and fruit and vegetable-based products (18%). The value added of the manufacturing industry, in real terms, increased by an average of 8.3% over the 2012-2017 period. Its growth is estimated at 8.5% in 2018. The primary products for which the development of processing remains a priority are cocoa and cashew nuts.

For cocoa, the objective is to increase the processing rate from approximately 32.6% in 2016 to 50% in 2020. The volume of cocoa processed in the 2016/2017 season is estimated at 577,000 tons as compared to 474,000 tons in the 2015/2016 season, an increase of 21.7%. For the 2017/2018 season, the volume of processed cocoa is estimated at 746,000 tons, representing an increase of 22.6% compared to the previous season (for a stable processing rate of 27% in 2017 and 2018). The measures taken to reinforce the competitiveness of processing units relate to: (i) a cocoa bean supply guarantee to processors at accessible prices; (ii) the implementation of a system of Single Export Taxes (*Droits Uniques de Sortie*) (“DUS”) differentiated according to the degree of the cocoa beans' processing. At the end of 2017, eight processing units had already signed five-year agreements with the State to increase the quantity of processed cocoa. Results after the first year, with respect to the eight businesses that benefitted from the differentiated DUS, show that, for a target of 338,867 tons of cocoa beans to be processed, 345,288 tons were actually processed, representing a completion rate of 102%. These results show the following:

- five businesses fulfilled their commitments;
- one business fulfilled 93% of its commitments, with an undertaking to compensate for the unrealized gap in the second year; a draft amendment has been submitted to the relevant Ministers for validation;
- two businesses lost the benefit of the differentiated DUS;
- one new business (GPA Transformation) required an agreement with the Government in order to benefit from the differentiated DUS. This request is currently under consideration by the relevant Ministers.

For cashew nuts, the objective is to increase the processing rate to 50% in 2020 as compared to 6.2% in 2016. In 2018, the installed processing capacity rose to 116,000 tons from 109,500 tons in 2017, increasing by 5.6%, representing 15.2% of domestic production. The quantity of raw nuts processed increased from 44,628 tons to 68,517 tons over the same period, representing an increase of 34.8%. However, due to the significant increase in agricultural production over several years and speculation on raw material prices, the processing rate remains low (9% in 2018). With a view to accelerating the processing of cashew nuts, drawing lessons from previous campaigns, the Government has adopted measures, including:

- direct support to local processors for technical, managerial and commercial upgrades (as of the end of 2018, 22 companies and three laboratories were supported);
- the grant of subsidies for cashew nut processing, in the amount of CFAF 400 per kilogram of white almonds produced and sold (for the 2016 season, an amount of CFAF 2.98 billion was paid to processors);
- the implementation of a mechanism by which a portion of the unprocessed cashew nuts production is reserved for local processing. For 2018, exporters are required to justify that they have sold 15% of their products to local operators in order to obtain the authorization to export: 54,202 tons have been allocated for local demand, as of the end of June 2018;

- the implementation of a guarantee mechanism through a cash collateral deposit with a bank, depending on the loan amount, to facilitate the processor’s access to financing for the acquisition of raw materials. As of the end of 2018, notifications were made for 18 of the 45 financing applications, representing CFAF 45.12 billion of a total of CFAF 87.19 billion (CFAF 2.6 billion have been disbursed and CFAF 2.6 billion are in the process of being disbursed);
- the implementation of a mechanism to regulate the price at which unprocessed cashew nuts are sold to processing units. For prices over CFAF 850 per Kg of unprocessed nuts, the difference is subsidized by the State, using the Single Export Taxes (*Droits Uniques de Sortie* or “DUS”) on exports of unprocessed nuts;
- the organization of the International Cashew Nut Processing Equipment and Technology Fair (*Salon International des Equipements et Technologies de Transformation de l’Anacarde* (SIETTA)) every two years, to promote cashew nut processing technologies. The 2018 edition was held from 08 to 10 November 2018;
- the implementation of the Program for the Promotion of Competitiveness in the Value Chain (*Programme de Promotion de la Compétitivité de la Chaîne de Valeur*) in the cashew nut sector, financed by the World Bank Group for an amount of US\$200 million to promote competitiveness in the cashew nut processing sector. As part of this Program, the development of industrial parks dedicated to cashew nut processing has been planned in Korhogo, Bouaké, Bondoukou and Séguéla.

Other measures have begun to be implemented by the Government in 2019 to facilitate processors’ access to raw materials and strengthen their competitiveness. For cotton-textile, the measures and actions involve: (i) restructuring underperforming companies such as COTIVO, UTEXI and FTG Textile; (ii) the fight against fraud and counterfeiting; (iii) the sector’s promotion through the organization of an International Textile Fair called SICTHA 2019; and (iv) restoring the sector’s competitiveness, namely through the creation of a free trade zone. With respect to the development fruit and vegetable processing, the measures and actions involve: (i) promoting the conservation and production of fruit juice and dry fruit; (ii) securing the sourcing to product processing units and (iii) improving the storage and conservation capacity.

In terms of structuring industries, the Government has undertaken support measures to significantly increase cement production in order to address the high demand for the development of infrastructure and real estate.

The development of light manufacturing industries aims to create new industrial centres to catalyse the birth of new industry clusters. Discussions are ongoing with external partners to set up labour-intensive industrial units.

All these measures and actions taken by the Government are expected to effectively contribute to Côte d’Ivoire’s industrial development to create an Ivorian economy that is more competitive. In terms of strengthening the competitiveness of industrial companies, it should be noted that as part of the policy of opening markets, namely the Economic Partnership Agreements (*Accords de Partenariats Economiques*), the WAEMU launched the Program for Restructuring and Upgrade of Industries (*Programme de Restructuration et de Mise à Niveau des Industries* (“PRMN”) in order to improve local companies’ competitiveness. The PRMN was replicated at a national level by the States.

The PRMN, at a total cost of CFAF 216.2 billion, benefitted from the support of the EU and UNIDO for its design and pilot phase. The PRMN, which was launched in 2014, received CFAF 8.2 billion from the AfDB in 2016 for a term of four years. The PRMN’s components relate to: (i) direct support to companies for their upgrades, (ii) the development of quality infrastructure and (iii) the creation of Support Centres for Competitiveness and Industrial Development (*Centres d’Appui à la Compétitivité et au Développement Industriel*). At the end of 2017, 59 companies benefitted from the PRMN, out of a target of 120 companies. In the first half of 2018, 18 new industrial businesses acceded to the PRMN, including nine for a strategic assessment, seven to receive support in the various procedural steps and in obtaining a certificate of quality and two for upgrade. Thus, the total number of businesses benefitting from this Program is now 77.

To promote innovation and the wide-spread use of technology, a document presenting the Policy for Innovation and the Widespread Use of Technology was drafted and adopted, with the support of the Japan International Cooperation Agency (JICA). As part of this project, in addition to education, machine tools have been provided to the *Société Ivoirienne de*

*Technologie Tropicale* (I2T) to strengthen its capacity to manufacture agrifood equipment and replacement parts. Additionally, as of the end of June 2018, 132 individuals from 18 SMEs have been trained in soldering techniques and the machining of mechanical parts. Initiatives to raise awareness and provide training in technological innovation to manufacturing SMEs are currently being implemented.

### ***Building and Public Works Sector***

Cement, sheet metal and containers, asphalt, electrical cables and wires, sand, gravel and concrete are, among others, the materials used in the building and public works sector. The usage rate of these materials reflects the production status of building and public works underway with the State’s major projects as well as real estate developments and private entrepreneurs.

The building and public works sector has strengthened in recent years due to the completion of major Government projects (the third Abidjan bridge or Henri Konan Bédié bridge, built in 27 months, the fourth bridge connecting the Yopougon and Plateau municipalities and road infrastructure projects), the social housing program, the high demand driven by economic growth, the numerous private projects as well as through the efforts of private economic operators. International companies in the construction sector such as Colas, Bouygues, Bolloré or ArabContractors, have returned to Côte d’Ivoire in order to accompany the efficient realization of major projects.

In 2019, the share of cement in the building and public works sector is estimated at 48.1%, followed at far lower levels by sheet metal and containers (15.4%) and asphalt (10.6%). Cement production has been increasing since 2012, from 1,969,677.93 tons to 2,601,474 tons in 2014, before decreasing to 2,328,825 tons in 2015 and increasing again in 2016. Cement production increased from 2.5 million tons in 2016 to 3.5 million tons in 2017, representing an increase of 17%. This sharp increase is due to the entry into production of two industrial units with capacities of 1,000,000 tonnes per year each. Taking into account investments underway, cement production capacity reached 9.4 million tons in 2018. If the recorded investment intentions are realized, annual cement production capacity is expected to reach 13.3 million tonnes in 2019.

The cement market has demanded more and more cement and therefore requires increased local production to sufficiently supply it. In order to confront the current economic climate and reduce tension of prices, the Ivorian authorities decided on 24 April 2017 to carry out an emergency import transaction of 150,000 tons of cement over the period from May to July 2017. In addition, as part of the ongoing development of the new PK24 industrial zone, the State plans to grant 60 hectares for a cement plant.

The table below presents the national cement consumption during the 2012 to 2018 period:

<b>Year</b>	<b>Consumption (tons)</b>
2012	1,850,000
2013	2,000,000
2014	2,700,000
2015	3,000,000
2016	3,420,000
2017	4,000,000
2018 (estimates)	5,000,000

*Source: Ministry of Industry and Mining*

In 2018, local cement consumption is estimated at 5,000,000 tons. The commissioning of all project units currently under construction planned for 2017 and 2018, particularly the construction of two last-generation cement plants by CIMAF, made it possible to meet local demand. The Moroccan company CIMAF-Côte d’Ivoire has made its ambition to satisfy national consumption clear. To this end, it announced the start of the production of the San Pedro plant in June 2017 and the launch of the construction of the Bouaké plant in May 2017, to increase the production capacity from 1 million tons

a year to 2.5 million extendable to 4 million tons, and the creation of more than 600 direct and indirect jobs. In addition, LafargeHolcim's local branch completed the construction of its sixth grinder, which will allow it to double its annual production capacity to two million tons at the end of 2017. In short, these new investments will help increase domestic cement production capacity to 5,800,000 tons per year. Thus, cement producers have invested more than CFAF 73 billion over the 2015-2017 period to increase their production capacity. In addition, the Nigerian group Dangoté intends to invest CFAF 150 billion in 2019 through its subsidiary, Dangoté Cement, in the construction of a cement plant in Côte d'Ivoire and the acquisition of logistical means, which is expected to generate approximately 800 direct jobs for a production capacity of 3 million tons with two lines of 1.5 million each; the plant is currently under construction and is expected to open in 2020.

In addition, the majority of large construction projects is open to international tender bids. The State ensures that small- and medium-sized enterprises participate in these projects through subcontracting in order to have a positive impact on local employment.

With respect to the overall evolution of the building and public works sector, its added value, which measures the level of activity in this sector, has recorded increases of 18.3% and 22.1% in 2015 and 2016, respectively, due in particular to the continuation of numerous public sector projects. Investments continue to be made in this sector.

### ***Financial Sector***

The financial sector in Côte d'Ivoire is comprised of banks, insurance companies and microfinance institutions.

#### Banks and Microfinance Institutions

For information on the banking sector, see "*Monetary System*".

#### Insurance Companies

Côte d'Ivoire's insurance business is regulated by the Insurance Code of member states of the InterAfrican Conference of Insurance Markets (*Conférence interafricaine des marchés d'assurance* – CIMA). The market participants, excluding policyholders, include insurance companies (30) and insurance intermediaries (251 insurance agents and 78 certified brokers). There are two professional associations that assist in the development and the stabilization of the market. These are the Association of Insurance Companies of Côte d'Ivoire (*Association des Sociétés d'Assurances de Côte d'Ivoire* – ASA-CI) and the National Association of Côte d'Ivoire Insurance and Reinsurance Brokers (*Association Nationale des Courtiers d'Assurance et de Réassurance de Côte d'Ivoire*). There are also several professional organizations that regulate the sector: ASA-CI, the Regional Commission of Insurance Control (*Commission Régionale de Contrôle des Assurances*) and the African Federation of Insurance Companies for African National Law (*Fédération des Sociétés d'Assurances de Droit National Africain*).

The size of the insurance sector in Côte d'Ivoire is modest but in steady expansion, with CFAF 325 billion in revenue in 2017, compared to CFAF 302.9 billion in 2016, CFAF 278.9 billion in revenue in 2015, CFAF 251 billion in revenue in 2014, CFAF 236 billion in revenue in 2013, and CFAF 209 billion in revenue in 2012. However, it continues to be the main market in the CIMA. Its contribution to GDP (revenue/GDP) remained stable at 1.5% from 2011 to 2015. In 2017, revenue increased by 7.3% compared to 2016, well above the average rate in the CIMA zone, which is 0.9%. According to the Federation of African National Insurance Companies, the penetration rate on the African continent is 4.31%.

Less than 30 insurance companies compete to attract the interest of a population that has not yet developed sufficient interest in insurance products. In the distribution of their products, insurance companies work with intermediaries, including brokers and general agents, such as Gras Savoye and Marsh & McLennan, that still largely dominate the market for company insurance. The Ivorian insurance market also includes a reinsurer and international reinsurance companies or reinsurance representatives.

## **Tourism**

After a period of relative growth, Ivorian tourism experienced a sharp decline from the end of 1999 to the end of the post-electoral crisis in 2011, due to the departure of major actors in tourism, as a result of the unstable socio-political situation and increasing insecurity throughout the political and military crisis that began in 2002. The sector experienced a decline in offer and demand as well as a slowdown in marketing activities. In terms of demand, the crisis has resulted in a significant decline in the number of tourists arriving at the Félix Houphouët Boigny international airport. In terms of supply, several major hotels closed, and other tourism infrastructure and sites deteriorated. Travel agencies have lost more than 80% of their revenue, resulting in the closure of many agencies.

Beyond socio-political instability, several factors were at the root of the decrease in tourist activity. According to the IMF report 13/172 “Côte d’Ivoire: Poverty Reduction Strategy Paper” published in June 2013, the tourism sector is affected by (i) weaknesses in the legal and institutional framework, (ii) inadequate financing of the sector’s activities, (iii) the deterioration and inadequacy of tourist and road infrastructures. To these factors are added (iv) the fragility of management structures, (v) inadequacy of the development of tourist products, (vi) price increases in air transport, (vii) lack of an efficient marketing of Côte d’Ivoire as a destination spot and (viii) insufficient partnerships.

The return to socio-political stability creates a favourable environment for the contribution of the tourism sector to the country’s economic growth, as demonstrated by the 2017 report of the pan-African travel platform Jumia Travel, an operator in the tourism market in Africa. According to this report dated March 2017, the tourism business’ contribution to GDP was 4.8% in 2014 and 3.6% in 2013. This contribution is expected to experience an average growth of approximately 5.6% per year until 2026. The IMF Report 15/148, published in July 2015, highlights that the main achievements of the Government included improving the legal and institutional framework of the sector by validating and adopting the new Tourism Code. Moreover, according to the same report, the private sector remains the main engine of the improvement of the tourist offer, mainly as regards the increase in the number of hotels. Between 2012 and 2014, six luxury hotels respectful of international standards (*hôtel Ivoire*, *Golf hôtel*, *hôtel golf club*, *hôtel le Président*, *hôtel les Parlementaires de Yamoussoukro* et *hôtel la Paix de Daoukro*) have been rehabilitated. The total number of rooms increased from 27,431 in 2012 to 40,748 in 2016, an increase of 48.5%.

Ivorian tourism provides significant financial resources to the Ivorian State. According to figures from Côte d’Ivoire Tourisme, the supervisory body, between 2000 and 2015 the number of hotels virtually doubled, resulting in revenue of more than CFAF 500 billion, with a total amount of 2,038 hotel establishments. In the five years following the crisis, the revival of the tourism sector made an important contribution, providing 3,000 direct jobs and 9,000 indirect jobs to more than 2% of the active population.

The country received more than 470,000 foreign travellers in 2015, compared to 400,000 in 2014, which makes the Ivorian tourism industry one of the most dynamic in West Africa. In order to stimulate tourism in Côte d’Ivoire, the Government intends to capitalize on the country’s tourist assets, in particular the tropical forest and the beaches around San Pedro. The Government aims to favour eco-tourism and contemplates creating an international airport and an *Aérocité* in San Pedro. As for the Abidjan *Aérocité*, it will be an “airport city”, which will offer a range of amenities, including commerce, hotels and housing. Located near the Félix Houphouët-Boigny airport in Abidjan, the *Aérocité* will be developed on a unique site with exceptional natural qualities and located between the ocean and lagoon. In 2016, the number of tourists was estimated to be 1,583,250, with 632,166 arriving by air and 951,084 arriving by land.

Continuing in the same vein, the tourism business performed well in 2018, due to large-scale events that were held in Côte d’Ivoire and numerous investments made in recent years in the sector. Indeed, the number of hotels and hotel residences has increased by 27.8%, rising from 2,040 in 2017 to 2,607 in 2018. In addition, the number of tourists in 2018 reached 3,400,000, compared to 2,000,000 in 2017, representing a 70% increase. Among them, 1,964,699 were international tourists in 2018, compared to 1,800,262 in 2017, representing a 9.1% increase.

This improvement is the result of the Government’s commitment to prioritizing the rehabilitation of Côte d’Ivoire’s image among tourists and business travellers. As part of this effort, the Ministry of Tourism has designed a strategic development plan called “Sublime Côte d’Ivoire”, which has been integrated into the 2016-2020 NDP. This strategy aims to make Côte d’Ivoire the 5<sup>th</sup> largest tourist industry in Africa and co-leader in business tourism by 2025. Achieving this

goal will entail (i) improving the environment in the tourism and leisure sector, (ii) augmenting the tourism and leisure services offered and (iii) strengthening Côte d'Ivoire's competitiveness as a tourist destination. The "Sublime Côte d'Ivoire" strategy can be broken down into nine essential projects, which are expected to make tourism the third largest axis of economic development in Cote d'Ivoire by 2025 and generate over 600,000 jobs, making the tourism and leisure sector a source of job creation capable of participating in the country's overall development.

The tourism sector has developed progressively in recent years and has created 3,000 direct jobs and 9,000 indirect jobs for more than 2% of the active population. The weight of the sector in the GDP grew from 1.6% in 2012 to 5.6% in 2017 and is expected to reach approximately 5.9% in 2018.

The Government's objective is to reach 5 million tourists by 2025. The tourism sector represents a real potential for growth in the Ivorian economy, given that it only accounts for 5.9% of the GDP, compared to a worldwide average of 10%. To fulfil this potential, the sector must continue to promote investment and improve its level of organization.

### ***Economic Infrastructures***

#### **Road Transport**

Côte d'Ivoire has approximately 82,000 km of road network, of which 6,600 km are asphalt roads, and a public urban road network with over 4,000 km of asphalt roads throughout the national territory. Côte d'Ivoire also has approximately 20 ferry boats and approximately 4,600 engineering structures, including over 300 bridges.

Currently, this network is in a state of significant deterioration, with 90% of roads exceeding their theoretical lifespan. This state of deterioration, the result of more than 10 years of under-investment and insufficient maintenance, has major consequences both at the economic and social level, with increased transportation costs, a reduction in exchanges between the country's different regions and the impoverishment of isolated rural populations.

However, since 2012, as part of the strengthening of road infrastructure, several projects were completed. These include, in particular: (i) the third Abidjan bridge, (ii) the extension of the northern freeway (Singrobo-Yamoussoukro) and the renovation of the Abidjan-Singrobo freeway segment, (iii) the construction of the Abobo-Anyama road, (iv) the construction of a bridge over the Marahoué, (v) the improvement of urban roads in several major cities, (vi) the construction of the Boundiali-Tengrela road, (vii) the construction of an interchange over the Valéry Giscard d'Estaing Boulevard in Abidjan, (viii) the construction of the Jacquville bridge, (ix) the completion of the Abidjan-Bassam highway, (x) the construction of the Béoumi and Bassawa bridges, (xi) the construction of the Bolona-Tengrela-Mali border road and (xii) the improvement of the Pont Comoé-Agnibilekro-Abengourou road.

In 2017, 17,744 km of dirt roads were rehabilitated, including 7,740 km of heavy regrading and treatment of critical points and 9,886 km of light regrading. This work has brought the total rehabilitated dirt roads to 41,867 km over the 2012-2017 period. The new constructions have brought total developed roads to 866 km over the 2012-2017 period, including 752 km of new surfaced roads and 114 km of highways built.

In addition, the total percentage of surfaced roads in a state of significant deterioration (out of the total network of surfaced roads) decreased from 15% in 2015 to 10% in 2017, as a consequence of the efforts that have been made to maintain existing roads. However, additional efforts must be made to achieve the goal of 5% in 2020 for this indicator.

Moreover, since 2016, the Government has adopted an extensive National Road Development Program (PNDR) for the period 2016-2025, for an overall cost of CFAF 3,760 billion. The first phase of this program covers the 2016-2020 period. This program aims to improve traffic in Abidjan and the interior of the country and increase the competitiveness of the Ivorian economy. This plan includes strengthening and extending urban roads and large-scale infrastructure projects. In terms of mobility in the Greater Abidjan area, large infrastructure projects have been announced. These include (i) the construction of the Japan-Ivorian Friendship Interchange, (ii) the rehabilitation of the Félix Houphouët-Boigny bridge, (iii) the construction of the 4<sup>th</sup> Yopougon-Adjamé bridge, (iv) the construction of the Cocody-Plateau bridge, (v) the development of Boulevard de Marseille and (vi) the development of the Y4 by-pass highway (Section 1: Boulevard

Mitterrand-Anyama Road (24.4 km) / Section 2: Anyama Road - Pk 24 of the North highway (12 km)). Nearly all of these projects were launched in 2018.

For the interior of the country, extending the paving of roads in district, regional and departmental capitals is planned. The most important project of the 2016-2020 program involves improving and renovating 3,916 km of interurban asphalt roads at a cost of CFAF 1,246 billion, which is expected to be implemented between 2017 and 2020. The Government also plans to build the Tiébissou-Bouaké section of the Yamoussoukro-Bouaké highway before the end of 2020 for an estimated cost of between CFAF 215 billion and CFAF 292 billion. Work officially began in November 2018. Construction of the Yamoussoukro-Tiébissou section (CFAF 64.5 billion) is ongoing. The construction and asphaltting of the Abidjan-Dabou section on the Abidjan-San Pedro highway, as well as the rehabilitation of the Grand Bassam-Aboisso, are also planned.

To date, out of an estimated total of 1,500 km to be completed by 2020, 72% have been built or are in the process of being built.

The Government also intends to develop the road network between large urban communities in Côte d'Ivoire, to allow for harmonized development of the territory, and the major roads to the ECOWAS countries in order to deepen regional integration, including a highway between Abidjan and Lagos.

Urban road transportation services are concentrated in the city of Abidjan and centred around mass urban transportation by bus on specific sites (Bus Rapid Transit – BRT) for approximately 130 km operated by the *Société des Transports Abidjanais* (“SOTRA”) and other private operators.

Intercity road transport services have developed following a series of business reforms in this sector. This reform was put into effect through the preparation of legislation and regulations and the implementation of various actions, in particular:

- law no. 2014-812 of 16 December 2014 on of domestic transportation;
- Decree No. 2019-100 of 30 January 2019 on the organisation and functioning of the Urban Mobility Authority in Greater Abidjan (*Autorité de la Mobilité Urbaine dans le Grand Abidjan* (AMUGA));
- Decree No. 2019-101 of 30 January 2019 on the organisation and functioning of the Regulatory Authority for Domestic Transport (*Autorité de Régulation du Transport Intérieur* (ARTI));
- Decree No. 2015-269 of 22 April 2015 establishing the conditions for admission to the transportation profession and conditions to carry out road transportation activities;
- Decree No. 2015-235 of 8 April 2015 establishing the conditions to create and use bus stations;
- the creation of the Road Transportation Development Fund (*Fonds de Développement du Transport Routier*) to drive the renewal policy for transporters' vehicle fleets;
- the organization of road transportation professionals and of an umbrella organization known as the High Council of Employers of Road Transportation Companies (*Haut Conseil du Patronat des Entreprises de Transport Routier*) of Côte d'Ivoire;
- the delivery of 100 new taxis to transportation companies as part of the renewal of the existing vehicle fleet;
- the reinforcement of SOTRA's fleet with 500 new TATA buses in 2017 and 486 IVECO buses in 2018. This project will continue with 500 new buses per year until the end of 2020 for a total of 2,000 buses. The SOTRA's service capacity will be significantly improved during 2018 with the construction of a 130 km network of roads dedicated to the circulation of buses. SOTRA, due to its strengthened fleet, was able to transport approximately 86 million passengers in 2017 and expects to transport approximately 144 million in 2018 and 300 million in 2019; and

- the commencement of work on a new international bus station for passenger transport by bus in Adjamé.

The reorganization of SOTRA's road network through the project to create urban parking stations for woro-wôrô and Gbaka on the outskirts of Abidjan around the BRT line network will optimize transportation of the population and reinforce urban mobility. The major impact of this will be a reduction in the number of smaller vehicles in urban centres and an improvement in Abidjan's traffic. Studies relating to this measure were completed at the end of 2018. Work on bus stations is about to begin.

With respect to the governance of the infrastructure and transport services sector, the Government adopted the Transport Sector Investment and Adjustment Program (*Programme d'Investissement et d'Ajustement du Secteur des Transports or CI-PAST*), to reorganize the institutional framework and reform the legal and regulatory framework of the sector. This CFAF 12 billion program represents an important component of the Government's efforts to promote road maintenance and safety. Many other road infrastructure development projects are currently in progress. These projects include the construction of approximately 50 interchanges and 20 various transport infrastructures, including the Williamsville-Adjamé pedestrian bridge in Abidjan.

### River, Lagoon and Maritime Transport

Côte d'Ivoire has more than 500 km of coastline and two seaports in San Pedro and Abidjan, with San Pedro being a deep sea port.

The Abidjan Port Authority handles approximately 87% of Côte d'Ivoire's international trade. After the important resumption of port operations in 2012, both 2013 and 2014 had been marked by a contraction in total traffic. However, recent developments in maritime traffic indicate a recovery. Compared to December 2017, total cargo traffic in 2018 increased by 7.2%, reaching 24,177,261 tons. This positive performance, which was reflected in both imports (+6.5%) and exports (+8.6%), was essentially driven by dynamic domestic traffic. Domestic traffic increased by 13.6%, in connection with the steady performance of all of its components, which include general cargo (+11.3%), oil products (+19.4%) and fishing products (+7.2%).

The improvement observed in the Abidjan port is the result of numerous investments carried out. Indeed, in order to improve its competitiveness, modernisation and extension work has been undertaken, notably the widening and deepening of the Vridi canal, completed in December 2018. Other projects such as the construction of a second container terminal, a cereal terminal and a roll-on/roll-off (RORO) terminal, which are currently under way, should make it possible to consolidate sub-regional leadership of the Abidjan port and to position it as a hub on the Atlantic coast of Africa. The completion of all these works should allow the Abidjan port to compete with its counterparts in South Africa and North Africa and breathe new life into the Ivorian port maritime sector.

Concerning the Autonomous Port of San Pedro (*Port Autonome de San Pedro*), compared to the end of 2017, total cargo traffic decreased by 9.9% to reach 4,081,163 tons. This decrease is due mainly to the 37.9% contraction of the transshipment business. Nevertheless, this decrease was attenuated by a 21.7% increase in domestic traffic.

To strengthen the capacity of the Autonomous Port of San Pedro and improve its competitiveness, major investments were scheduled and launched in May 2019 to complete and implement the following infrastructure projects:

- Relocation and expansion of the San Pedro port container terminal;
- Construction of a multipurpose industrial terminal in the San Pedro port; and
- Infilling and development of 150 hectares of the San Pedro port area, as well as the drainage of the access channel basin.

The mineral terminal project is planned for the Port of San Pedro, in line with the San Pedro – Man – Iron Ore Mining Areas (Mount Klahoya) Railroad Construction Project. For the construction of the railway infrastructure, a memorandum of understanding was signed in 2018 with a private investor who will first finalize the preliminary design study (APS) and then conclude a concession agreement with Côte d'Ivoire.

Maritime transportation has thus maintained the dynamic trend that began at the beginning of 2018 with a volume of cargo traffic at 28,258,424 tons, representing an increase of 4.3% compared to 2017. This positive performance is the result of an increase in traffic in the Abidjan port, despite the decrease in trade, which recorded a simultaneous drop in imports (-15.0%) and exports (-6.0%).

River and lagoon transport had been provided since the 1980s by the Société des Transports Abidjanais (SOTRA) and by private small boats known as “pinnaces”. However, since 2013, the Government has lifted the exclusivity on the operation of the lagoon held by the SOTRA, aiming to strengthen the multiple modes of urban transport to facilitate the movements of populations, as such movements are increasing significantly every year. As part of this effort, the State has established concession agreements with two new lagoon transportation companies, the Société de Transport Lagunaire (STL) and the Compagnie Ivoirienne de Transport Lagunaire (CITRANS).

The effective entry into operation of the two new structures in 2017 boosted lagoon transportation in Abidjan. The recent development of the sector has improved mobility among the populations (Yopougon, Koumassi, Marcory and Treichville) by reducing travel time.

These new structures have produced clear results; the total number of transported passengers has risen from 1,923,352 in 2017 to 3,948,058 in 2018, representing an increase of 105.3%.

When they became active in 2017, the operators (STL and CITRANS) were using more than 15 boat buses, which were able to transport approximately 25,000 passengers per day. These transportation capacities are expected to increase to 100,000 passengers per day in the coming years with the commissioning of new stations, currently under construction, and the opening of new lines.

Future plans to maintain a positive dynamic in the lagoon transportation sector include (i) the construction of new stations and the acquisition of new boats to respond to growing demand, in line with the commitments set out in the agreement between the operators and the State, (ii) the development of a strategy to capture middle class populations (transportation via the lagoon of individuals with cars) and (iii) offering additional services in stations (restaurants, internet cafés, banking services, etc.).

In parallel to this formal sector, a network of pinnaces provide daily, informal and relatively significant passenger services in Abidjan , as well as substantial merchandise traffic, carried out on approximately fifteen lines, in uncertain safety and comfort conditions. Beyond the Abidjan district, other pinnaces provide intercity and even interstate transport on the Aby and Ebrié canals. This method of transport is used by passengers in the lagoon zone going from the Ghana border to the city of Grand-Lahou. Efforts to promote multimodal urban transportation in Abidjan include the future completion of line 1 of the Abidjan Metro, for which Côte d’Ivoire has decided to establish a public service concession agreement relating to the design, financing, completion and operation of this line. Construction work was launched on 30 November 2017. Studies and preparatory work are underway, and the public procurement process began in February 2018. The project will be delivered in instalments from 2020 to 2022. The total cost of the project is estimated at CFAF 918 billion.

### Rail Transport

Côte d’Ivoire has a 639 km railroad line that links it to Burkina Faso. This railway, which is made up of only one track, (except in Abidjan where there are dual tracks), passes through several cities in Côte d’Ivoire, with 35 stations and 18 stops. The operation of the rail infrastructures, which was awarded to the *Société Internationale de Transport Africain par Rail* (“**SITARAIL**”) in 1994, has resulted in a growth in merchandise traffic that doubled over five years, increasing from 504,000 tons in 1996 to more than 1 million tons in 2001. However, the rail transport remains confronted with the shortfalls and obsolescence of the infrastructures and of the operating stock. As a result, in constant decline, railway activity has not yet reached its 2001 level.

However, in 2018, the global traffic of merchandise by rail transport reached 928,243.7 tons, representing a 16.2% increase compared to the previous year. This good performance was driven by both trade with Burkina Faso which recorded an increase of 4.6%, and domestic traffic which increased sharply from 7,820 tons in 2017 to 101,068 tons (+1,192.4%).

This improvement is the result of various reforms undertaken with the aim of revitalizing this sector. Indeed, the continued slowing of business due to the poor condition of infrastructure, the Government signed an agreement with the Bolloré group for the rehabilitation of the railway for an amount of approximately CFAF 300 billion. This work will contribute to modernizing and developing services for the transportation of cargo and passengers by rail.

The Government intends to pursue the rehabilitation of the Abidjan-Kaya line to facilitate the transit of minerals from Burkina Faso to the port of Abidjan.

Rehabilitation work on the historic Abidjan-Ouagadougou-Kaya (1,210 km) railway was started on 5 December 2017. The Investment Program of the Revised Concession Agreement (*Programme d'Investissements de la Convention de Concession Révisée*) (“CCR”) was signed on 29 July 2016 between the Licensing Authority (Côte d’Ivoire and Burkina Faso) and Bolloré, and will be realized in two tranches. The first tranche will end by 31 December 2021 at the latest. The project’s total cost is CFAF 262.4 billion.

The implementation of this project will improve access to areas through which this railway passes. With the reopening of closed stations, economic activity will be boosted through the transportation of production from formerly-isolated areas toward consumer areas. Work on the first tranche has begun and is scheduled to end by 31 December 2021 at the latest.

In addition, as part of the search for long-term solutions to public transportation difficulties within the Abidjan District, the State of Côte d’Ivoire decided on the public service concession for the design, financing, completion and operation of Line 1 of the Abidjan Metro. Construction work on line 1 of the Abidjan metro was started on 30 November 2017. Studies and preparatory work are underway and the grant of rights of way was completed in February 2018. The project will be progressively completed between 2020 and the end of 2022. The project’s total cost is estimated at CFAF 918 billion. A concession agreement was signed on 6 July 2015. An amendment to the concession agreement is being drafted to reflect the replacement of the Korean companies Hyundai Rotem and Dong san by Alstom and Colas Rail. With respect to line 2 (Yopougon - Bingerville section), discussions are ongoing for the selection of an operator.

Furthermore, studies and fundraising efforts are underway to help complete several projects including integrated projects for ore mining in both Côte d’Ivoire and neighbouring countries such as Mali and Guinea. These involve the construction of the Pedro-Man-Touba-Odienné-Bougouni-Bamako railway for iron ore mining in the Klahoyo and Gao mountains, nickel in Biankouma, Man, Sipilou and Touba, manganese in Odienné and iron and bauxite in Mali. This construction requires the completion of preliminary design studies and the research of technical and financial partners. These prerequisites must be met as of 2018. The project’s total cost is estimated as CFAF 332 billion.

As for the construction of the Ouangolodougou-Niellé-Sikasso-Bougouni-Bamako railway, the terms of reference for detailed technical studies were adopted by the WAEMU’s railway experts. The WAEMU Commission is waiting to launch a call for bids to hire a firm to carry out these detailed technical studies for an amount of approximately CFAF 60 billion.

The line is 338 km, of which 86 km is on Ivorian territory, for an estimated cost of CFAF 240 billion, including CFAF 60 billion at Côte d’Ivoire’s expense. Other projects include (i) the construction of the 181 km long Man-Nzérékoré (Guinea Conakry) railway for an estimated cost of CFAF 127 billion, of which CFAF 105 billion at Côte d’Ivoire’s expense (151 km), for joint mining of Guinea’s iron ore and (ii) the “Rail City” project to improve the real estate assets of the SIPF in Abidjan Plateau, representing an investment of approximately CFAF 300 billion.

#### Airport Transport

Côte d’Ivoire has eight operational airports and airfields (Abidjan, Yamoussoukro, Bouaké, Daloa, San Pedro, Man, Korhogo and Odienné) three of which are international (Abidjan, Yamoussoukro, Bouaké). Excluding Daloa and Yamoussoukro, the national company Air Côte d’Ivoire currently services six other local destinations and 19 international destinations.

With the creation of Air Côte d’Ivoire in 2012 and the opening of the Ivorian airspace, the number of airline companies servicing Côte d’Ivoire increased from nine in 2010 to approximately 20 in 2017. At the end of 2018, the number of

commercial passengers increased by 4.9% compared to 2017, reaching 1,971,978. Air cargo and direct transit have also increased by 5.9% and 15.5%, respectively. Traffic is dominated by flights to the ECOWAS region (39.4%), Europe (28.4%), particularly France (20.6%), and the rest of Africa (21.7%). The main airlines that account for this traffic are Air Côte d'Ivoire (780,652 passengers; 39.6%) and Air France (294,069 passengers; 15.9%).

These advances are the result of (i) investments made in the Abidjan Félix Houphouët Boigny (FHB) airport, (ii) the development of the national airline, Air Côte d'Ivoire, (iii) the addition of new commercial routes and (iv) the rehabilitation of domestic airports and airfields.

As a result the numerous investments made, Côte d'Ivoire has received certification from the Transportation Security Administration (TSA), allowing it to open a direct line to the United States as of 13 May 2018, in collaboration with Ethiopian Airlines. In addition, as part of its expansion program, the national airline, Air Côte d'Ivoire, has ordered five Airbus A320 aircraft, the first two of which were delivered in July and November 2017. Finally, the reopening, in March 2018, of the San Pedro airport, which had been closed for construction, boosted domestic air traffic, which increased by 29.5% in the third quarter of 2018, after having decreased by 29.7% and 6.7%, respectively, in the first and second quarters of 2018.

In addition, the work carried out to expand the Abidjan airport is expected to begin in 2019, which should enable it to cross the 8-million passenger mark by 2022.

Other projects are also planned, both in Abidjan and in the country's interior. These include:

- the creation of the *Aérocité* consisting of the construction of an Abidjan airport zone;
- feasibility studies for the creation of an international airport in San Pedro that will be dedicated to freight;
- the certification of the Yamoussoukro and Bouaké airports;
- the rehabilitation of certain infrastructure of the Abidjan airport and interior aerodromes;
- the creation of an aerodrome in the east of the country (Bouana or Bondoukou); and
- continuing the reinforcement of the Air Côte d'Ivoire fleet, initiated with the acquisition of three aircraft in 2017. Two aircraft are expected to be delivered before the end of 2019. The State will continue its capital contribution of an additional amount of CFAF 38.5 billion, comprising CFAF 20 billion already paid up in 2017 and the remaining CFAF 18.5 billion expected to be disbursed over a two-year period.

## ***Environment***

Since the 1992 Earth Summit, Côte d'Ivoire, as a stakeholder, has endeavored, within its means, to comply with its international commitments in the field of the environment and sustainable development. To this end, the Ivorian Government drew up the National Environmental Actions Plan (*Plan National d'Action pour l'Environnement*) in 1994. This led to the strengthening of the Government's policy promoting environmental protection, through the ratification of and accession to the Rio Multilateral Agreements, specifically the United Nations Framework Convention on Climate Change and the related Kyoto Protocol, the Convention on Biological Diversity, the Convention to Combat Desertification/Land Degradation and the 2016 Paris Climate Agreement. These international instruments have all been provided with strategic documents required for the planning and coordination of their implementation. More recently, the first National Development Plan (NDP) 2012-2015 integrated actions in favor of the environment and sustainable development. Despite its efforts, Côte d'Ivoire's environmental heritage is threatened and has been deteriorating over the years.

Indeed, Côte d'Ivoire faces environmental challenges relating in general to climate factors, poverty exacerbated by global crises, soaring population growth, the excessive expansion of cities and human activity. Specifically, these difficulties are linked to: (i) regulatory and institutional deficiencies (such as no implementing decrees for the Environmental Code and lack of rigor of the authorities in applying regulations); (ii) the reduction of forest cover, which has decreased from

12 million ha in 1960 to 3,427 million ha in 2016 (representing 10.64% of the national area), representing a 71.44% loss over the past 50 years; (iii) a loss of biodiversity linked to the significant pressure exerted by humans (deforestation, poaching); (iv) pollution of marine and lagoon ecosystems related, among other things, to the use of toxic products in continental fishing; (v) pollution of lagoon bays (Cocody, Banco, Bietry, etc.) as a result of untreated industrial and household runoff; and (vi) a failure to integrate sustainable development into sectoral policies and plans.

In response to these challenges, the environmental actions as defined in the 2016-2020 NDP are intended to: (i) reinforce the institutional and regulatory framework of the environment, (ii) raise awareness among the population about the protection of the environment, (iii) strengthen biodiversity conservation, (iv) contribute to the fight against coastal erosion, (v) promote green sectors, (vi) strengthen sustainable protection of the environment and (vii) reduce the risk of disaster.

With regard to the reinforcement of the institutional and regulatory framework, a road map for sustainable development was adopted in 2014. The national policy document on the environment is in the process of being adopted by the Council of Ministers. The Environmental Code, which dates back to 1996, is being updated. A legislative text introducing an environmental taxation scheme is currently being developed in collaboration with the *Conférence des Grandes Entreprises de Côte d'Ivoire* (CGECI) and the Committee for Dialogue between the State and the Private Sector (*Comité de Concertation Etat Secteur Privé*). To this end, two studies to facilitate the introduction of this tax system were approved at the beginning of January 2019 by all stakeholders. At the international level, Côte d'Ivoire has ratified several international treaties, including the recent Kyoto Protocol to the United Nations Framework Convention on Climate Change and the 2016 Paris Climate Agreement, and implements common policies with other WAEMU or ECOWAS countries, as reflected by the creation of two international authorities to protect the Niger river. In addition to these ratified treaties, Côte d'Ivoire has joined certain mechanisms, the most recent of which include: (i) the Global Methane Initiative (GMI) in March 2018 and (ii) the Global Green Growth Institute (GGGI), to which it submitted its Expression of Interest in August 2018.

With regard to the preservation and promotion of national biological diversity and the support of ecological processes, major initiatives have been taken, including: (i) the creation of committees for local management of natural reserves and parks, composed of representatives from populations in areas surrounding these parks (Mount Nimba, Mount Sangbé National Park, Mount Péko, the Haut Bandama Fauna and Flora Reserve, the Lamto Scientific Reserve and the Marahoué National Park), (ii) the construction of a monitoring station for the Mount Nimba Natural Reserve, (iii) the manual maintenance of 320.5 km of tracks, 763 km of conventional boundaries, the regrading of 12.5 km of boundaries and the installation of 66 boundary landmarks in the Comoé and Taï National Parks, (iv) the preparation of 219 ha of land for natural regeneration in the Mount Péko National Park and (v) the production and distribution of over 11,000 forest fruit tree seedlings to more than three organizations in the area surrounding the Taï National Park.

Concerning efforts to combat coastal erosion and reducing the risk of natural disaster, Côte d'Ivoire has an online geo-portal to improve the system through which environmental information is managed and to develop the coastal region. In addition, in view of strengthening the resilience of Ivorian populations living along the coastline, the investment project to promote the resilience of coastal regions that is part of the West Africa Coastal Areas Management Program (WACA) has been under implementation since November 2018. Investigations for the collection of socio-economic data are underway for the socio-economic assessment of the Grand-Lahou pilot zone as part of the implementation of the WACA project. In connection with this same project, a firm was hired to quantitatively assess the natural risks and install an early warning system (EWS) in the Grand-Lahou pilot zone.

With regard to climate change, one of the main activities consists in raising awareness in rural communities (NGOs, growers) and urban communities with respect to climate change and the solutions for adaptation in the agricultural world, training on inventories for emissions of gas and climate and air quality-related pollutants and training on the Quality Assurance/Quality Control management system for greenhouse gas inventories. The first Payment for Environmental Services (PES) contracts were also signed with 200 producers as part of the PES pilot project. This project will help to simultaneously improve agricultural productivity, food security and living conditions for growers, while also protecting residual forests and biodiversity. To develop a national strategy to mobilize climate finance resources, Côte d'Ivoire, through its technical ministries, is implementing a project to pave the way for access to climate finance. This project

entails improving the institutional framework that governs interactions with climate finance, updating priority sectors to attenuate and adapt to climate change and designing and providing national procedure manuals.

As regards the promotion of sustainable development and green industries, Côte d'Ivoire, in collaboration with its Technical and Financial Partners, has finalized the report on indicators monitoring the progress of SDGs in September 2018. This report concerns the mapping of these indicators, the baseline status of SDG monitoring indicators and the work carried out to prioritize SDG targets with the indicators used to monitor the SDGs implementation. With respect to the Voluntary National Report, which presents the evolution of SDG indicators, the first draft is available and is being discussed with other stakeholders. The final report was presented at the United Nations High-Level Summit in July 2019.

In an effort to protect Ivorian forests, the Government adopted a new forest policy in May 2018: the Declaration of Policy for the Preservation, Rehabilitation and Expansion of Forests (*Déclaration de Politique de Préservation, de Réhabilitation et d'Extension des Forêts*). This policy, which is based on four principles and organized around six main objectives, addresses both the country's goal of achieving 20% forest cover and its land development and agricultural performance policies. This policy is supported by a new Forestry Code, adopted by the Government in 2019, which introduced the innovative approach of classifying forests to categories according to their level of deterioration. The new forest policy's objectives are the following: (i) to preserve biodiversity, (ii) to preserve a "national climate" conducive to agricultural activities and quality of life, (iii) to honor Côte d'Ivoire's commitments in favour of a "world climate"; and (iv) to gather the necessary forest resources to maintain and sustainably develop a competitive timber industry that will satisfy the domestic wood fuel needs. In addition, in view of restoring its forest cover, Côte d'Ivoire has been engaged, since June 2011, in the REDD+ process. This international mechanism aims to reduce greenhouse gas emissions from deforestation and the deterioration of forests, including through sustainable development of natural resources, the reinforcement of forest carbon stocks and the conservation of forests. Côte d'Ivoire has also become a member of two international platforms for technical and financial support for REDD+: the UN-REDD program (an FAO/UNDP/UNEP partnership) and the FCPF (World Bank). In addition, Côte d'Ivoire has benefitted, since 2013, from the support of several technical and financial partners, including the French Development Agency (AFD), through the Debt Reduction-Development Contract (C2D) and the EU REDD+ Facility. The National REDD+ Strategy, approved in 2017, has led to the implementation of several projects, including one concerning the monitoring of Côte d'Ivoire's land from space. Several major results have been obtained through this project, such as the availability of: (i) a land-cover database (maps of forests and land use); (ii) maps of changes in forest cover and land use on pilot sites, and (iii) a reliable system for monitoring and controlling land use.

The environment in urban zones has deteriorated as a result of industrial and domestic effluent wastes without prior treatment. The urban environment is further affected by the lack of an adequate wastewater system, with the poor areas hardly having any wastewater equipment. These issues are compounded by the rapid growth of the urban population, which now represents more than half of the total population. To implement the new system of collection and transportation of household and similar waste in the Abidjan District and definitively close the Akouédo landfill, an international tender process was launched in 2016. This process led, in 2017, to the selection of two private international operators, ECOTI SA and ECO EBURNIE, with which public service contracts for cleaning and sanitation services (in the form of PPPs) were signed and approved by the Council of Ministers on 25 October 2017. To implement these new services, the selected operators have mobilized new equipment and have built and operated, pursuant to technical and environmental requirements, modern waste management infrastructure (pooling sites and transfer centres). The new sanitation services in the Abidjan District were launched in the second half of 2018 under 7-year contracts. In addition, Côte d'Ivoire signed a service delegation agreement (in the form of a PPP) with CLEAN EBURNIE for the design, construction, financing and operation of a technical landfill in Kossihouen, which was approved by the Council of Ministers on 21 December 2017. This process aims to provide the District of Abidjan with modern infrastructure for ecological disposal of household and similar waste, with a view to launch waste recovery in subsequent years. The technical landfill in Kossihouen became operational in August 2018, also under a 7-year contract. The establishment of a sector dedicated to the ecological management of Waste Electronic and Electrical Equipment (WEEE) and used tyres began with the selection of the SGS Group (*Société Générale de Surveillance*) and the SAR (*Société Africaine de Recyclage*) through a service agreement in April 2017, the communication of this contract to the Council of Ministers on 21 December 2017 and the signature of a memorandum of understanding in January 2018. The project launched in November 2018.

With respect to water resources, Côte d'Ivoire has four primary tributaries (the Cavally, the Sassandra, the Bandama and the Comoé) and three main lagoon systems as well as many coastal rivers (the Ebrié, Grand-Lahou and Aby lagoon systems and the Mé and Agneby rivers). These lagoon systems and basins are the recipients for industrial effluents as well as agricultural and urban ground leaching. These areas are made up of invasive aquatic plant species and concentrations of algae.

Subterranean water is available throughout Côte d'Ivoire, often with varied supply and accessibility conditions, in the main geological formations which are the granitic bedrock and the sedimentary basin, occupying 97% and 3% of the territory, respectively. This water is used primarily for water supply through urban and village hydraulic systems. During the 2011 post-election crisis, the hydrological observation networks were destroyed. This situation was very detrimental to quality of data and especially to the supervision of hydrometric stations calibration. As part of a policy of sustainable development and preservation of water tables, the Government is concentrating on linking provincial villages and rural areas to rivers in close proximity, to ensure their drinking water supply. The Government thus expects to resolve the drinking water supply issue for the Abidjan area. It is in this context that it engaged in the construction and the inauguration in December 2014 of the water treatment facility of Yopougon Niangon and in March 2015 of the provision centre for drinking water in Bonoua. Additional projects designed to provide drinking water to the rest of the country are underway.

As part of the effort to monitor the quality of surface waters in rural areas, measurements and analyses are regularly carried out in Ivorian waters, particularly in the Aby lagoon, along the Ivorian coast and in the Comoé and Bandama rivers. Also, as part of the preparation for possible accidental pollution, a simulation exercise of the National Oil Spill Contingency Plan is organized in Abidjan and Jacqueville on an annual basis in order to develop the reflex of the plan's stakeholders. As part of the project to safeguard and enhance the value of the Cocody Bay, a feasibility study on the clean-up of Abidjan's lagoon bays was carried out in 2018, after which the identified the sanitation work was carried out.

In terms of fishery production, the use of toxic products in continental fishing has also resulted in the destruction of fishing areas. This situation has contributed to a drastic reduction in the number of species, some of which are threatened with extinction. Due to the lack of an adequate treatment system for contaminated waste coming from domestic, industrial, agricultural, mining and maritime activities, the sea and lagoon ecosystems are strongly affected by pollution.

The implementation of the first generation NAIP has also led, in general, to a net increase in fishery production (fishing and aquaculture), which has recorded cumulative growth of 90.76% over the 2012-2016 period. Environmental matters and sustainable development were not sufficiently taken into account in the first generation NAIP. However, efforts have been made in terms of raising awareness and training for (i) NGOs involved in climate change matters, as noted above and (ii) producers in environmentally safe agricultural practices, soil conservation and environmental protection techniques using renewable energy and the proper agrochemical products. In the agricultural sector, a project aiming to manage obsolete pesticides and related waste has led to the establishment of a national inventory of pesticides in 90% of the country and the identification of 6,000 repositories. Approximately 1,000 tons of obsolete pesticides have been seized through voluntary declarations and the control of illegal pesticides. A pesticide database has been created and is currently being consolidated in preparation for its use.

The Government has prepared the second phase of the NAIP, whose major goals are the local processing of agricultural production, an integrated way of addressing production questions with full water control, agricultural mechanization, professional training and marketing.

This second generation NAIP, covering the 2018-2025 period, for a total estimated cost of CFAF 11,905 billion, takes environmental matters and sustainable development further into consideration. This investment program intends to address the need for a coordination of action and results between the various activities concerned. The innovation introduced by this second phase of the NAIP is the establishment of nine agropoles covering the entire national territory. It will improve agricultural production and address the needs of private and public actors in terms of conservation, processing and sales.

## *Information and Communication Technologies (ICTs)*

ICTs have experienced a notable expansion since the privatization of the telecommunications sector at the end of the 1990s. The telecommunications sector today counts three mobile telephone operators, two fixed telephone operators, four Internet providers and many value-added service providers. The sector is supported by high-quality and modern infrastructure as well as an expanding market. It represented 5.5% of nominal GDP in 2013 and generated approximately CFAF 952.6 billion of revenue the same year. In 2014 and 2015, this sector contributed 5.0% and 4.7% of the GDP, respectively, and its contribution represented 4.6% of the GDP in 2016 and 4.1% in 2017. It is estimated at 4.2% of the GDP in 2018 and forecasted at 4.3% of the GDP in 2020, according to the data of the National Accounts and the estimates of the Ministry of Economy and Finance.

In 2013, the investment in this sector was CFAF 146.5 billion, of which CFAF 131.4 billion were for mobile telephony and CFAF 15.1 billion for fixed telephony and Internet. In 2014, investments in the sector reached CFAF 131.7 billion, of which CFAF 106.6 billion were for mobile telephony, CFAF 21.3 billion for fixed telephony and CFAF 3.8 billion for Internet. In 2015, investments came to CFAF 108.3 billion, of which CFAF 94.4 billion were for mobile telephony, CFAF 12.9 billion for fixed telephony and CFAF 937.5 billion for Internet. In 2016, investments significantly increased to reach CFAF 280.3 billion, primarily in connection with the acquisition of 4G licenses by the three mobile telephony operators and the completion of significant investments to deploy such technology. In 2017, investments decreased by 39% by comparison to the significant investments carried out in 2016. Over the past six years, cumulative investments in the telecommunications sector are estimated at approximately CFAF 1,023.3 billion. The number of jobs created in December 2015 was 2,310 as compared to 2,620 in December 2016.

The sector is dominated by mobile telephony with revenues of CFAF 743.3 billion in 2013, or 78.0% of total revenues for the sector (mobile telephony, landline telephony and internet), which reached CFAF 952.6 billion in 2013. In 2014, mobile telephony revenues reached CFAF 776.1 billion, fixed telephony revenues reached CFAF 172.1 billion and Internet revenues stood at CFAF 34.3 billion. In 2015, revenues reached CFAF 852.3 billion for mobile telephony, CFAF 142.4 billion for fixed telephony and CFAF 34.9 billion for Internet. In 2016, mobile telephony recorded revenues of CFAF 852.3 billion, or 79% of the sector's overall revenues, fixed telephony revenues reached CFAF 196.5 billion, or 18.2% of the sector's overall revenues, and CFAF 30.0 billion for fixed Internet (the revenue connected to mobile Internet and to mobile money are included in the revenues of mobile telephony operators), or 2.8% of the sector's overall revenues. In 2017, revenue from mobile telephony, fixed telephony and fixed Internet were CFAF 927.8 billion (89.2% of the sector's total revenue), CFAF 81.6 billion (7.8%) and CFAF 30.9 billion (3%), respectively. Fixed and mobile telephony respectively count 272,145 and 19.4 million subscribers in 2013. In 2014, the number of mobile telephony subscribers was 22.1 million and 5.2 million subscribers to the internet service (including mobile internet). In 2015 and 2016, mobile telephony comprised 25.4 million and 27.5 million subscribers, respectively. In 2017, the number of mobile telephony subscribers was 31.8 million, an increase of 15.6% compared to 2016. In 2018, the number of subscribers of mobile telephony was 33.8 million, an increase of 6.3% compared to 2017. In order to further increase their number of subscribers, private operators continue to extend their telecommunications services to users living in rural areas.

The services offered to clients of the sector include mobile telephony 2G/3G/4G, fixed telephony (with and without cable), data transmission, access to fixed and mobile Internet as well as added value services (games, multimedia downloading and virtual currency).

In 2013, the number of Internet subscribers in Côte d'Ivoire was 133,955, an increase of 12.1% as compared to 2012. From 2009 to 2013, the revenue generated by the activities of Internet providers increased from CFAF 16.9 billion to CFAF 30.2 billion, which reflects the expansion of the Internet market in Côte d'Ivoire. In 2014 and 2015, taking into account mobile internet, the number of subscribers to internet services rose to 5.2 million and 8.7 million, respectively. In 2017, the number of internet subscribers rose to 17.2 million. In 2018, the number of internet service subscribers stood at 16.8 million. International connectivity passes through three undersea cables (SAT-3, WACS and ACE) while national connectivity passes through the National Internet Exchange Point (CIVIX). Some mobile telephone operators also offer mobile Internet solutions, by using technologies such as GPRS/EDGE, CDMA (EVDO protocol), 3G, Wimax and LTE. The means of connection used are USB data Internet, boxes and WIFI stations.

The table below presents the number of telephone lines as well as Internet subscriptions from 2012 to 2018:

<b>Year</b>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
Mobile Telephones (in millions)	18.1	19.4	22.1	25.4	27.5	31.8	33.8
Fixed Telephones .....	276,135	272,145	242,684	277,248	289,108	305,562	302,398
Internet <sup>(1)</sup> .....	119,526	133,556	5,232,831	8,712,464	10,490,997	17,227,389	16,827,974

Source: Ministry of Communication, the Digital Economy and the Post Office

<sup>(1)</sup> The 2014, 2015, 2016, 2017 and 2018 data take into account mobile internet.

The audio-visual space is comprised of multiple private and public television channels as well as private, public and local radio channels. In the audio-visual sector, the leading national channel covers the entire country, as compared to a 80% coverage before the political and military crisis than began in 2002. The written press includes approximately 30 dailies, weeklies, monthlies, bimonthlies and quarterlies.

The 2016-2020 NDP provides for the elaboration of a new Telecommunications Code and a new Postal Code to allow for the creation of a legal and regulatory framework promoting access to information and communication technologies as well as a universal postal service.

The Government is also planning certain measures to encourage the population's access to a high-quality, low-cost telecommunications service, including (i) the realization of a project to develop the country's optic fibre network, (ii) the reopening of 66 postal offices, and (iii) the reopening the *Institut Supérieur Africain des Postes et Télécommunications*, that occurred in 2012 (and is now called *Ecole Supérieure Africaine des Technologies de l'Information et de la Communication*). With AFD's support, Côte d'Ivoire is building an optic fibre network, expected to reach 7,000 km by the end of 2019.

### **Labour Market**

The labour market in Côte d'Ivoire is divided into two branches: the formal sector and the informal sector. The formal sector involves the public sector and the private formal sector. Save for surveys on the employment situation and registrations with Social Security Institutions, information about Côte d'Ivoire's labour market (particularly the informal sector) is limited by the lack of available statistical data.

After the November 2012 study of the employment situation, the Government carried out a second study for which the indicators were determined by the new rules adopted by the International Labor Office at the end of the International Conference of Labor Statisticians in October 2013. This second study found an unemployment rate of 5.3%, as compared to 5.8% in the previous study. However, the results of the 2016 National Survey on Employment and the Informal Sector (*Enquête Nationale sur la Situation de l'Emploi et le Secteur Informel "ENSESI"*) found that Côte d'Ivoire's unemployment rate was 2.8%.

According to this survey, the unemployment rate is high in urban areas (6.9% in Abidjan, 3.4% in other cities) compared to rural areas (0.9%). It is also higher among young people. The unemployment rate is higher among women (3.5%) than men (2.3%). The survey also indicated that the majority of unemployed individuals seek a salaried (37.9%), permanent and full-time position (67.9%), regardless of whether such position corresponds to the profession they have learned (71.3%), and they are indifferent as to the type of organization at which they would work (44.0%).

This survey showed that the employed population is relatively significant in rural areas (62.2%) compared to 53.0% in urban areas, higher among men (67.2%) than women (45.8%) and particularly among those between 36 and 59 years old (75.2%).

An analysis of the characteristics of employment in Côte d'Ivoire found that independent agricultural jobs are the most prevalent (34.0%), followed by non-agricultural independent jobs (27.0%) and non-agricultural salaried jobs (21.0%). Agriculture remains the largest provider of employment in Côte d'Ivoire, with 49.3% of jobs, and recorded an increase of nearly 6 points compared to 2014 (43.55%), as indicated by the 2016 ENSESI. In addition, the survey showed that employment in Côte d'Ivoire is mostly informal (93.6%), regardless of socio-demographic characteristics, except for

workers with higher levels of education (52.8%). Salaried employment accounts for less than 25% of employment. It is held mostly by men over 25 years old with relatively low levels of education and residing in urban areas.

Côte d’Ivoire is involved in eradicating child labour, through an international and national legal framework. The international framework includes the African Charter on the Rights and Welfare of the Child (since February 2003), the ILO Convention no. 138 on Minimum Age (since February 2003), the ILO Convention no. 182 on the Worst Forms of Child Labour (since February 2003) and the UN Optional Protocol on the Involvement of Children in Armed Conflict (since August 2011). On a national level, an inter-ministerial and a national committee are both dedicated to fighting child labour. Over the 2011-2019 period, three national plans have been implemented, with 8,000 children saved from human trafficking and more than 200 traffickers arrested and sent to jail. Achievements also include the completion by the foundation Children of Africa of a children’s home in Soubré. The third plan, which has just been launched, aims at significantly reducing the worst forms of child labour by 2025.

### Informal Sector

According to the 2016 ENSESI, more than half of the persons operating in Informal Production Units (IPUs) (53.0%) are found in the “commerce, vehicle repair and household items” area, as well as in the “hotels and restaurants” area (24.1%). Approximately eight persons out of 10 (77.1%) are recorded in these two areas. This structure of distribution of IPUs according to the business area remains the same regardless of gender or place of residence.

The distribution by gender shows that the informal sector is mostly held by women (59%). Approximately two persons out of three employed in the informal sector working for their own account or providing home help are women. Conversely, the share of women is low among employees (29.2%), paid interns (11.4%), paid apprentices (21.7%) and even lower among employers (1.9%).

The average age of the workforce is approximately 34. However, differentials in the average age can be observed depending on the employment status. The average age of the workers of the informal sector is relatively low for paid apprentices (23.7), paid interns and caregivers (27.1 for each). Conversely, it is relatively high for independent workers (36.8 for own account workers and 39.7 for employers).

The informal sector exists in industry, trade and services. The table below presents the structure by branch of IPU:

Business area	Socio-demographic characteristics (as a percentage)						Collectively
			Other				
	Men	Women	Collectively	Abidjan	urban	Rural	
<b>Industry</b>							
Mining	0.3	0.2	0.3	0.0	0.6	0.0	0.3
Manufacturing	15.3	5.0	8.5	7.4	7.5	10.7	8.5
Construction	6.3	0.2	2.3	3.2	1.5	2.6	2.3
<b>Trade</b>							
Trade; Repair of motor vehicles and household goods	49.7	54.7	53.0	54.8	56.0	47.7	53.0
<b>Services</b>							
Hotels and restaurants	7.8	32.6	24.1	23.1	21.0	28.8	24.1
Transportation, auxiliary transportation and communication	7.8	0.2	2.8	3.0	3.5	1.7	2.8
Real estate, renting and services to companies	1.7	0.0	0.6	0.5	0.7	0.5	0.6
Healthcare and social work	0.9	0.4	0.6	0.7	0.5	0.7	0.6
Collective and personal services <sup>(1)</sup>	10.2	6.7	7.9	7.4	8.6	7.3	7.9
<b>Total</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

(1) This includes activities of membership organisations, repairs of personal equipment, household and personal properties, and various personal service activities.

The table below presents information on employment by business segments according to the place of residence:

Socio-demographic characteristics	Business Segments				Total
	Agriculture	Industry	Trade	Services	
<b>Place of Residence</b>	<i>(as a percentage)</i>				
Abidjan	1.2	14.6	36.7	47.5	100.0
Other Urban	29.9	10.2	29.8	30.1	100.0
Rural	77.7	4.1	10.7	7.5	100.0
<b>Total</b>	<b>49.3</b>	<b>7.9</b>	<b>21.2</b>	<b>21.6</b>	<b>100.0</b>

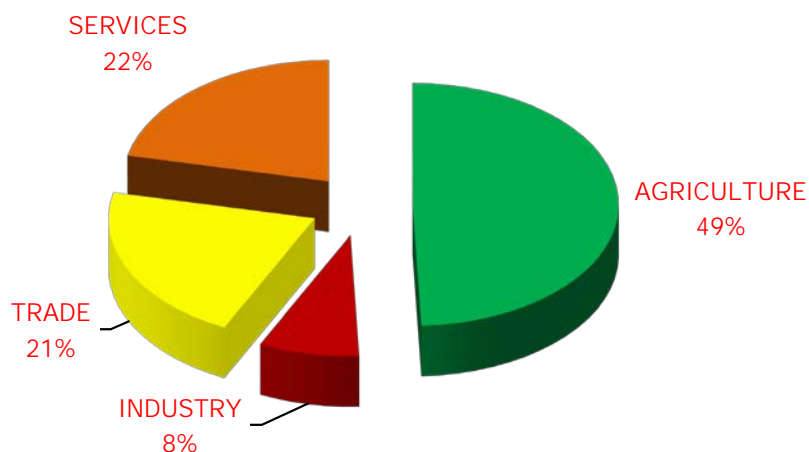

Source: 2016 ENSESI

An analysis of the characteristics by business segment indicates that in 2014 men (54.9%) work more in agriculture than do women (41.0%). However, within the trade segment, women were more prevalent, with two women for every man. In the industry segment, there were nearly three times as many men (10.7%) as women (3.7%).

Furthermore, in 2014 agriculture remained a larger provider of jobs in rural areas (77.7%) than in urban areas (29.9% in other cities and 1.2% in Abidjan).

However, most jobs in other segments were concentrated in urban areas, particularly in services and trade, with, respectively, 47.5% and 36.7% in Abidjan, 30.1% and 29.8% in other cities and only 7.5% and 10.7% in rural areas.

The graph below presents the breakdown of jobs by business segment:

Source: graph created on the basis of ENSESI 2016 data

Employment continues to be at the centre of the Government's priorities and has been subject to several reforms in order to offer more quality jobs to young people and further reduce job precariousness. After having adopted a National Employment Policy (*Politique Nationale de l'Emploi*) on 7 June 2012, and an Employment Revival Strategy (*Stratégie de Relance de l'Emploi*) on 26 November 2013, the Government, in its desire to promote the creation of sustainable employment, established the Youth Employment Agency (*Agence Emploi Jeunes*) in April 2015. This organization is responsible for organizing the contributions of various participants in order to address the issue of youth employment. The Youth Employment Agency has already provided employment opportunities to over 120,000 young people since its creation.

On 26 November 2013, the Government adopted the SRE, which places particular emphasis on youth employment. In this respect, 114 development and integration projects were identified and are expected to help attain a target of over 1,770,326 jobs by 2016/2017. In parallel, the Government is carrying out significant reforms relating to updating available degree and skills training programs in order to ensure youth employability and integration. As such, a Fund to Support Youth Professional Integration and Employment (*Fonds d'Appui à l'Insertion Professionnelle et à l'Emploi des*

*Jeunes*) was established to support, in particular, the National Program to Support the Integration of Vulnerable Individuals (*Programme National d'Appui à l'Insertion des Personnes Vulnérables*) (women, handicapped individuals, individuals over 35 years of age) and the 2016-2020 Decent Employment Country (*Pays du Travail Décent*) program.

The Government is committed to adapting professional training to the needs of the labour market by carrying out reforms to professional training. These reforms aim to (i) meet the demands of technical and professional training, (ii) provide training adapted to the qualification needs expressed by the labour market, (iii) strengthen the school and company partnership, (iv) ensure the conditions for the sustainable integration of job seekers and individuals in precarious situations, (v) set up a skill certification mechanism, in cooperation with professional communities and (vi) promote and implement an effective and efficient governance of Technical and Professional Training (*Formation Technique et Professionnelle*), while emphasizing the autonomy and responsibility of educational and training institutions.

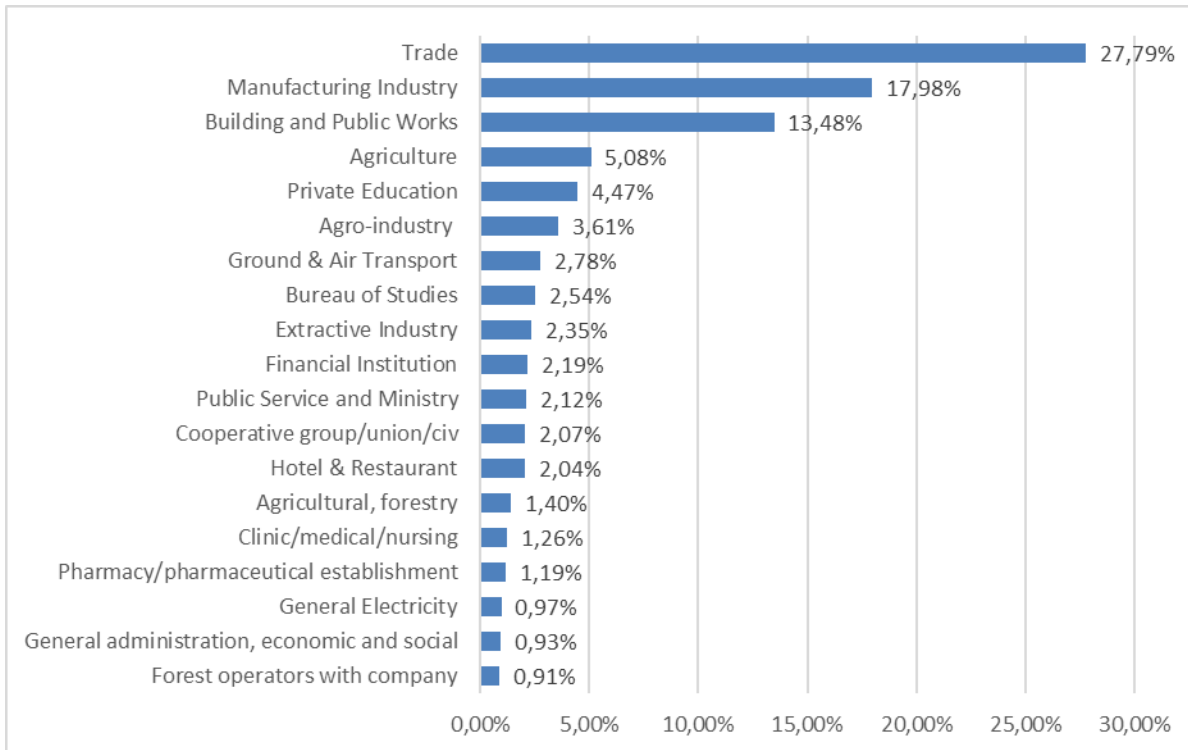

The labour market in the modern sector (i.e. the sector covering workers registered in social protection structures) in Côte d'Ivoire recorded since 2012 an annual registration of approximately 85,500 new employees. Estimated at 86,191 in 2012, the number of new registrations in the modern sector decreased to 69,711 in 2013 before rising to 101,072 in 2018. Most of the new registrations (86.36%) came from the private sector, whose performance supports the upward trend in registrations. The private sector registered 74,392 and 58,719 employees respectively in 2012 and 2013, and 89,041 employees in 2018.

The table below presents the evolution of registrations for the private sector as well as the inclusions to the Public Administration payroll file from 2012 to 2018:

	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>	<b>Total</b>
<b>Private sector</b> .....	74,392	58,719	73,610	79,629	76,072	83,764	89,041	<b>535,227</b>
<b>Public sector</b> .....	11,799	10,992	10,296	17,313	10,123	11,946	12,031	<b>84,500</b>
<b>Total</b> .....	<b>86,191</b>	<b>69,711</b>	<b>83,906</b>	<b>96,942</b>	<b>86,195</b>	<b>95,710</b>	<b>101,072</b>	<b>619,727</b>

In Côte d'Ivoire, in accordance with the Labor Code, the latest of which dates back to 2015, employees have the right to organize themselves to defend and promote their rights. Union legislation, in particular the right to strike, is guaranteed by the Constitution. There are five trade union federations in Côte d'Ivoire which are the General Union of Côte d'Ivoire Workers (*Union Générale des travailleurs de Côte d'Ivoire* (UGTCI)); the Federation of Autonomous Unions of Côte d'Ivoire (*Fédération des syndicats autonomes de Côte d'Ivoire* (FESACI)); and the *Confédération des syndicats libres de Côte d'Ivoire*, also known as “*Dignité*”, the Humanism Trade Union Federation (*Centrale Syndicale Humanisme* (CSH)) and the National Union of Côte d'Ivoire Workers (*Union Nationale des Travailleurs de Côte d'Ivoire* (UNATRCI)). There are different unions, depending on their corporations, their ministerial entities or other considerations, that are affiliated to these five trade union federations.

### **Promotion of SMEs**

The implementation of the 2016-2020 NDP, which aims to change Côte d'Ivoire into an emerging economy, establishes the private sector as the engine of economic growth and the principal provider of jobs. As such, the Government has drafted a strategy with respect to SMEs, which accounted for 98% of the formal economic fabric, 20% of GDP, 12% of national investment and 23% of the active population in 2015. This strategy seeks to establish a series of measures to facilitate the creation, development and improved access to credit for SMEs, which represent approximately 50,000 companies). The goal is to create by 2020 a critical mass of competitive, dynamic and innovative SMEs, significantly contributing to Côte d'Ivoire's sustainable socio-economic development.

To this end, in view of stabilizing the SME environment, the Ivorian State adopted (i) Law No. 2014-140 of 24 March on the National Policy for the Promotion of SMEs (*Politique Nationale de Promotion des PME*) in 2014 as part of the implementation of the recommendations stemming from Decision No. 16/2003/CM/WAEMU relating to the Action Plan for the Promotion and Financing of SMEs in the WAEMU Region (*Programme d'Actions pour la Promotion et le Financement des PME dans l'UEMOA*), (ii) Decree No. 2015-525 of 15 July 2015 modifying Decree No. 2009-259 of 6 August 2009 on the Public Procurement Code, as amended by Decree No. 2014-306 of 27 May 2014, setting a quota for procurement contracts to be awarded to SMEs and introducing a margin of preference of 5% for local subcontracting, (iii) the tax credit that entered into force in 2016, (iv) Law No. 2017-802 of 7 December 2017 relating to leasing agreements, (v) the subcontracting and joint contracting charter signed on 12 August 2015 at the office of the Prime Minister in the presence of the Minister of National Entrepreneurship, the Promotion of SMEs and Crafts and the executives of the Ivorian Federation of SMEs (*Fédération ivoirienne des PME* (FIPME)), (vi) the creation of a Credit Information Bureau, on the basis of Decision No. CM/UEMOA/007/06/2013 of 28 June 2013 on the adoption of the draft uniform law on the regulation of Credit Information Bureaux (*Bureaux d'Information sur le Crédit* (BIC)) in the member States of the WAMU, (vii) the creation of the *Caisse des dépôts et consignations* during the Council of Ministers held on 10 January 2018 and the subsequent Law No. 2018-574 of 13 June 2018 on the creation, role, organization and functioning of the *Caisse des Dépôts et Consignations de Côte d'Ivoire* (Cdc-CI), adopted by the National Assembly, (viii) and finally, the Development Strategy for Ivorian SMEs, entitled the Phoenix Program, at the meeting of the Council of Ministers on 18 September 2015.

The Phoenix Program is a global strategy for the development of SMEs. The coherence of this strategy adopted by the Government is ensured by the adoption of a road-map for the promotion and development of SMEs, and the creation of a SMEs Development Agency (*Agence de Développement des PME*). Its role will be to coordinate strategic actions to promote SMEs.

The Phoenix Program focuses on four strategic axes: (i) facilitating access to financing and to public and private markets, (ii) reinforcing technical and managerial capacities, (iii) improving the business environment for SMEs, and (iv) developing a culture of entrepreneurship and innovation. The plan was adopted by the Council of Ministers on 25 February 2014. At an expected cost of between CFAF 150 and 250 billion, the plan is designed to facilitate the creation and development of a fabric of innovative, dynamic and performing SMEs, that could amount to between 100,000 and 120,000 enterprises by 2020 and would contribute to the creation of jobs and wealth in the long term. With respect to public procurement, the State and the banks signed a convention on 11 March 2015 to facilitate access to bank loans for SMEs participating in public procurement.

The Phoenix program is currently being implemented. For this purpose, the Côte d'Ivoire SME Agency, in charge of implementing the Program, was created and is now operational, which has contributed to accelerating the implementation of the Program in order to promote and provide support for SMEs. Several initiatives have been launched as part of its implementation, including: (i) the creation in August 2017 of the Committee for the Identification of Support and Aid Structures on the initiative of the BCEAO and with the aim of supporting the financing of SMEs by establishing special dedicated windows in lending establishments through a mechanism for loan refinancing and assistance for eligible SMEs, (ii) the creation of a credit bureau for SMEs, established in 2016, which takes into account the specific characteristics of SMEs, (iii) the creation of an effective guarantee fund (under a public-private arrangement) for banks and the IMF, for which a proposal was adopted by the Council of Ministers on 9 November 2016, (iv) the signature of a CFAF 5 billion agreement to finance Ivorian women entrepreneurs and a CFAF 10 billion agreement for artisans and local merchants with the Banque Atlantique Côte d'Ivoire (BACI) and Coris Bank, respectively, which has provided 80 women entrepreneurs with over CFAF 1,317 billion from the BACI, (v) the establishment of a collaborative platform with the Public Procurement Directorate (*Direction des Marchés Publics* (DMP)) to improve SMEs' access to the public procurement process, (vi) the signature of a framework agreement with the *Bourse de Sous-Traitance et des Partenariats* (BSTP) for the implementation of the SME development program through the reinforcement of subcontracting in June 2016 with the FIPME, the CGECI, the Ministry of Economic Infrastructure, the Ministry of Budget and the Ministry of Economy and Finance, (vii) the establishment in Côte d'Ivoire of "entrepreneur status" (*statut de l'entrepreneur*), (viii) the establishment of a collaborative platform with the Ministry of National Education in view of designing and implementing a program for the promotion of entrepreneurial culture in schools, (ix) the organization of National SME Promotion Days by the FIPME; (x) the organization of the first edition of the women's financing day on 17 October 2017; (xi) the launching of the 100,000 women entrepreneur "caravan" by the FIPME in Dabou in May 2018 and (xii) the annual organization of the CGECI Academy, which began in 2012.

In addition, as part of the completion of a mapping of SMEs, the Agency is overseeing the establishment of an electronic identification platform and the "entrepreneur status" (*statut de l'entrepreneur*). With regard to SMEs' access to financing, two agreements have been signed with two private banks, for a total financing of CFAF 15 billion, and initiatives have been taken to sign other agreements of this kind. With the support of Bpifrance, a French organization centred on business financing and development, the Agency is also establishing a guarantee fund with a SME risk rating system. Efforts are also being made to create incubators in Abidjan and Yamoussoukro, as a result of an agreement planned with the Regional Incubator of Aquitaine-Bordeaux (*Incubateur Régional d'Aquitaine-Bordeaux* (IRA)), an internationally renowned structure. In addition, a multi-year capacity-building program for managers, executives and associations of SMEs is currently being implemented.

Furthermore, the Government will continue to implement the Financial Sector Development Strategy (*Stratégie de Développement du Secteur Financier*) driven by the Financial Sector Development Program (*Programme de Développement du Secteur Financier*) to build a stable, attractive financial sector that responds to the economy's growing financing needs. The strategy's major initiatives relate primarily to stabilizing and developing the sector and improving financial inclusion. In this context, the final options concerning the portfolio restructuring of public banks and the microfinance sector will be finalized and implemented. Furthermore, improving the business framework, strengthening the transparency and availability of financial information and developing innovative financing for SMEs will be pursued, in addition to implementing the National Financial Inclusion Strategy (*Stratégie Nationale d'Inclusion Financière*) and strengthening the supervision of the insurance sector. The PDESFI is expected to help entrench the stability of the financial sector over time and allow for increased financing of the economy by increasing the bank usage rate and improving access to loans by households and SMEs.

The Government will also pursue the stabilization and strengthening of the supervision of the microfinance sector in order to facilitate financing of SMEs. In this respect, it will continue to carry out the National Microfinance Strategy (*Stratégie Nationale de la Microfinance*) to consolidate the stability of the microfinance institutions sector, improve the sector's governance and boost small savers' confidence.

To support SMEs in their search for financing, BRVM created on 19 December 2017 a compartment dedicated to SMEs on the stock exchange. To this end, it has launched a support programme called "ELITE BRVM LOUNGE", similar to the programme implemented by the London Stock Exchange and the Casablanca Stock Exchange. According to BRVM,

this programme is designed to help the most efficient and effective companies in the industry to prepare and structure the next stage of their growth. The selection of issuers is in progress.

The Government is also focused on increasing the share of the SMEs in public procurement. The Government has thus adopted a competition management framework for public procurement below the procurement threshold of CFAF 100 million and completed in 2017 the creation of Public Procurement Departments (*Cellules de Passation des Marchés Publics*) within different ministries, with a view to gradually decentralizing public procurement procedures in order to facilitate competition by SMEs for public procurement.

Lastly, the Government plans to strengthen the attractiveness of its economy by pursuing the implementation of “Focus Doing Business” reforms designed to develop and strengthen the role of the private sector as an engine of economic growth and a job provider. In this respect, several reforms have already been implemented: (i) the Single Portal for Building Permits and the Credit Information Bureau (*Bureau d’Information sur le Crédit*), (ii) enhancing minority shareholder rights against agreements involving a conflict of interest, (iii) facilitating the repayment of VAT credits and (iv) implementing special procedures to settle small disputes.

The Government is committed ensuring the successful implementation of its new Agenda for Doing Business reforms planned for the 2018-2020 period. With the implementation of this Agenda, Côte d’Ivoire intends to continue to improve its “Doing Business” ranking. The main indicators that are expected to show remarkable progress are the following:

#### *Company creation*

- regularizing previously registered companies by assigning them a unique identifier;
- establishing a system for locating newly created companies and connecting them to the tax department;
- implementing a single portal for delivering business licenses, certificates and permits; and
- gradually moving towards paperless procedures for the delivery of business licenses and permits (approvals, certificates, authorizations).

#### *Connection to electricity*

- establishing a collaborative and coordinated framework for controls and work acceptance for transformer stations and major projects; and
- setting up a viable financing facility to connect SMEs to electricity.

#### *Transfer of ownership*

- carrying out the remote publication of real estate transfer deeds; and
- introducing and implementing a unique identifier for plots.

#### *Payment of taxes and duties*

- establishing online tax returns and online payment of social security contributions; and
- introducing paperless tax audit procedures.

#### *Granting building permits*

- reducing wait times for the delivery of Certificates of Compliance from 73 to 10 days; and
- reducing the time needed to complete geotechnical surveys from 25 to 10 days and wait times for the delivery of fire safety instructions from 10 to 2 days.

#### *Obtaining loans*

- reducing the BIC’s legal timeframe for processing claims and correcting inaccurate data from 30 to 15 days;
- streamlining, simplifying and reducing the CIE and SODECI’s costs and formalities for subscription, transfer and cancellation; and
- establishing a national registry of personal property securities that is geographically unified and accessible online for formalities relating to registration, modification and removal.

### *Performance of contracts*

- registering deeds and court decisions online; and
- publishing court decisions issued at all judicial levels in commercial and civil proceedings online with free access; and reducing wait time from the moment a case is referred to a court until a decision is issued.

### ***Private Investment Promotion***

#### Strategy

Faced with the challenge of economic development, Côte d'Ivoire is committed to making the private sector the engine of its growth. The promotion of the private sector, begun in the 1990s with the policy of Government withdrawal from productive sectors, has accelerated over the years with the implementation of reforms aiming to increase Côte d'Ivoire's attractiveness. Since the implementation of the first 2012-2015 NDP, the private sector has contributed to more than two-thirds of the GDP and to the creation of jobs. The Government has focused on consolidating the business climate. The "Doing Business 2019" ranking positions Côte d'Ivoire 122<sup>nd</sup> out of 190 countries in 2019 compared to 139<sup>th</sup> out of 190 countries in 2018, representing an increase of 45 ranks between 2012 and 2019. Côte d'Ivoire is once again among the top 10 reformers worldwide according to this report. In terms of good governance, according to the 2018 Mo Ibrahim index report, Côte d'Ivoire is the only nation that progressed in each of the four categories and fourteen subcategories of the index. It rose from 41<sup>st</sup> place to 22<sup>nd</sup> place from 2008 to 2017. In addition, Côte d'Ivoire received the Anti-Corruption Award from the African Union during its 32<sup>nd</sup> ordinary session of the Assembly in February 2019. In terms of achievements, the private investment rate was 20.8% in 2018 compared to 19.5% of GDP in 2017 and 18.3% of GDP in 2016, reflecting efforts undertaken by the Government to simplify procedures to create business, good governance and the fight against corruption. This rate is expected to be 22.1% of GDP in 2019.

In addition, a Foreign Direct Investment (FDI) strategy was prepared by the Government. It is based on recent reports that present Asia and North America as the largest providers of FDI in the world. As such, the Government's efforts are targeted toward these geographic areas without forgetting its traditional partner, Europe.

According to the 2019 United Nations Conference on Trade and Development report on worldwide FDIs covering the 2017-2018 period, global FDI flows to Africa increased by 11% to reach US\$46 billion in 2018. However, FDI flows to West African countries decreased by 14.6%, reaching US\$ 9,565 million. Among them, Côte d'Ivoire recorded a 6.2% decrease from 2017 to 2018, from US\$ 973 million to US\$ 913 million (representing a 58.2% increase from 2016, where the FDI inflows stood at US\$ 577 million). Nevertheless, Côte d'Ivoire remains the most attractive country in the WAEMU with 28.8% of FDI attracted over the period.

Furthermore, the Government intends to continue attracting private investments and to maintain the dynamic of strong, sustained and inclusive growth through (i) the restoration of security throughout the entire country, (ii) the consolidation of national reconciliation, (iii) the continued improvement of the business environment, with a view toward consolidating the confidence of households, economic operators and investors and (iv) the promotion of good governance. This framework is designed to encourage strong involvement of the private sector in building and public works, port and airport sectors, agriculture, energy, road infrastructure and housing. These investments are expected to help reduce the poverty rate and to revive employment, especially in the youth.

#### Investment Incentive Measures

The Government's private investment promotion strategy is strengthened by a set of investment incentive measures provided by the Investment Code, the Mining Code, the Telecommunications Code, the Environmental Code and the Labour Code. In this context, fiscal reductions were agreed upon in order to create the conditions necessary for a sustainable revival of the private sector. As such, the tax rate for industrial and commercial profits was reduced from 35% to 27% for individuals and to 25% for companies and legal persons. Furthermore, in the context of regional economic integration, customs, fiscal and sector-specific reforms were initiated to benefit companies.

The Investment Code, adopted through law 2012/487 of 7 June 2012 significantly improved the business climate and encouraged the flow of foreign capital, due, in particular, to (i) specific advantages to small and medium enterprises, (ii)

lower investment caps, (iii) lengthening of the duration of guarantees (five, eight and 15 years) and (iv) the possibility to grant more favourable advantages to investors than those under the 1995 Code. In order to promote investments in the priority sectors of agriculture, agri-food, health and hotels, a new Investment Code was adopted in 2018. This new Code places a higher priority on regional development and the promotion of local content.

The Government adopted Decree No. 2012-05 of 11 January 2012, defining Small- and Medium-Sized Enterprises (SMEs) for better targeting of policies. In 2013, the Government established a Single Portal for Business Formalities (*Guichet Unique des Formalités des Entreprises*) which aims to reduce the time required to set up businesses to a maximum of 48 hours and a minimum of 24 hours while simplifying procedures; and a Single Portal for Foreign Trade (*Guichet Unique de Commerce Extérieur*) to simplify formalities for the import of goods and reduce the number of documents required and deadlines for approvals.

Furthermore, on 2 May 2013, the Government adopted a new competition law to combat anti-competitive cartels and the abuse of dominant positions. In addition, the Government has carried out an in-depth reform of the public procurement law. Except for strictly regulated exceptions, public procurement contracts are the subject of a competitive tender bid process. The National Authority of the Regulation of Public Markets (*Autorité Nationale de Régulation des Marchés Publics*), an independent administrative authority, is in charge of ensuring fair and independent attribution procedures. Furthermore, a guideline to strengthen public markets was adopted on 27 May 2014 and provides for a separation of regulatory, executive and control functions in contracting as well as a procurement plan for credit administrators for greater transparency in the implementation in the budget. The public procurement system is now operational and will continue to be improved, in particular, by establishing Public Procurement Units (*Cellules de Passation des Marchés Publics* (“CPMPs”)) throughout the ministries and putting the Integrated System for Public Procurement Management (*Système Intégré de Gestion des Marchés Publics*) online, which is intended to make transactions more accessible and accelerate their processing. All CPMPs have now been installed within the various ministries.

In addition to these measures, the implementation of a single form and other measures related to online procedures (online payments and statements) are effective and operational since January 2017. In addition, online tax reporting and payment were extended in 2018 to all medium and large companies. Payment of taxes and duties by mobile phone for property tax payers and combined tax payers has been in effect since February 2018. The Government has also intensified the implementation of reforms which have encouraged the move towards paperless procedures. In this respect, the single portal for investment services in Côte d’Ivoire is operational as of 8 December 2018 and features information on real estate property. The virtual electricity connection desk has been operational since 18 October 2018. Procedures for requesting electricity connections can now be completed online and Unit Price Slips (*Bordereau de Prix Unitaire* (BPU)) for connections are available, in addition to a quotation calculator and user access to Electricity Sector services. Capitalizing on these achievements, the Government is continuing to improve the business climate through the implementation of its new Reform Agenda for the 2018-2020 period, adopted by the Council of Ministers in September 2018.

Several targeted actions have been undertaken to favour the private sector, including the continuation of fiscal measures to support economic recovery, within the framework of the 2011, 2012, 2013 and 2014 tax annexes; the establishment of a bipartite committee to monitor VAT credit payments resulting in the non-accumulation of new VAT credits in 2012; the continuation of efforts to clear internal arrears; the regular payment of capital expenditure within 90 days to stimulate economic recovery by increasing investment through a system of isolation of resources allocated to the payment of investments with dedicated monitoring; the improvement of the conditions under which economic activity is carried out in order to fight against smuggling and counterfeiting and strengthen customs risk analysis; the strengthening of the fight against money laundering, with the creation of the National Cell for Financial Information Processing (*Cellule Nationale de Traitement de l’Information Financière*) and the operationalization of the Intergovernmental Action Group Against Money Laundering (*Groupe Intergouvernemental d’Actions contre le Blanchiment d’Argent*); the strengthening of private initiative dedicated structures such as the Investment Promotion Center in Côte d’Ivoire (*Centre de Promotion des Investissement en Côte d’Ivoire*), the Exportation Promotion Association in Côte d’Ivoire (*Association pour la Promotion de l’Exportation en Côte d’Ivoire*), the Ivorian Fund for Development of National Enterprise (*Fonds Ivoirien pour le Développement de l’Entreprise Nationale*), the Laboratory of Metrology and Analysis (*Laboratoire de Métrologie et d’Analyses*); and the creation of credit offices (*Bureaux de crédit*).

Reforms of the legal system have also been undertaken to improve the business climate, including the adoption in 2012 of a regulation on the recognition of arbitration judgments and the creation of commercial courts which issue decisions within a maximum period of 90 days. The Court of Appeal of the Commercial Court has been operational since April 2018.

### Public-Private Partnerships

The Government considers PPPs to be a major tool for the fulfilment of the NDP and an important factor of growth and job creation. In addition to facilitating the realization of major infrastructure projects, PPPs are expected to boost Ivorian production, particularly in the agricultural sector, to stimulate the core of local SME/SMIs and develop the private sector. They are also expected to reinforce the Government's decentralization policy by fostering the creation of local regional economic poles.

Côte d'Ivoire already has a long tradition in PPPs in various forms, particularly in the sectors of water (SODECI), energy (CIE, AZITO, CIPREL), transport (AERIA, SITARAIL, BIVAC and WEBB FONTAINE) and road infrastructure construction (third bridge of Abidjan, Henri Konan Bédié). PPPs have also been put into place for the hydraulics and sanitation sectors (wastewater treatment and household waste collection). Concessions have been signed in the telecommunications sector between the State and Orange Côte d'Ivoire (formerly Côte d'Ivoire Telecom). Some PPPs have also been entered into in the domain of public health (such as the Mère-Enfant de Bingerville Hospital).

To capitalize on the country's strong potential to attract private investors and realize such partnerships, and to assist the Government's PPP strategy, a specific legal framework was implemented, in addition to the Investment Code and the Public Procurement Code, via three decrees: Decree No. 2012-1151 of 19 December 2012 relating to PPP contracts; Decree No. 2012-1152 of 19 December 2012 on the responsibilities, organization and functioning of the institutional framework for managing PPPs; and Decree No. 2014-246 of 8 May 2014 amending Decree No. 2012-1152 of 19 December 2012. Furthermore, a National Steering Committee responsible for the promotion and development of PPPs was officially created on 23 August 2011. It is currently operational and constitutes a decision-making, validation and policy-making body for PPPs.

In December 2017, the CNP-PPP proposed draft texts to its upper management intended to replace the legal and institutional regime of public-private partnerships that has prevailed since 2012 with a new regulatory framework based on feedback on the implementation of PPP projects over the past four years.

The proposals of the CNP-PPP were approved, and the Council of Ministers, in its meeting on 29 March 2018, adopted two new decrees:

- Decree No. 2018-358 of 29 March 2018 establishing rules relating to public-private partnership agreements; and
- Decree No. 2018-359 of 29 March 2018 on the responsibilities, organization and functioning of the National Steering Committee for Public-Private Partnerships.

These new decrees intend to improve and strengthen the legal and institutional framework of PPP agreements with a view to encouraging and simplifying the execution of this specific type of public agreement in Côte d'Ivoire, in particular by providing a clear definition of PPP agreements and reinforcing the role of the CNP-PPP, which is now placed under the authority of the Prime Minister

### Privatizations

In order to promote the private sector and efficiently manage the State's portfolio, the Ivorian Government adopted a strategy on 26 May 2012 in order to restructure public companies. The strategy's goal was to reduce the State's portfolio by 25% through privatization, merger and liquidation. At the 2 December 2013 Council of Ministers, the Government established a list of 15 companies to be privatized: SIB, BIAO-CI, BFA, VERSUS-BANK, SMI, NEI-CEDA, SUCRIVOIRE, CI-ENGINEERING, SN-SOSUCO, SIVAC, SONITRA, TRCI, CI-TELECOM, IPS-WA and PALMAFRIQUE.

To successfully accomplish this goal, a Privatization Committee was created in May 2013 by the President of the Republic, via Decree No. 2013-321 of 21 May 2013 appointing nine members, later supplemented by 11 members via Decree No. 2014-315 of 4 June 2014. This committee became operational in November 2013. It is responsible for implementing the privatization strategy prepared by the Government. From 2013 to 2016, it carried out six privatization transactions concerning the SMI, SIB, NEI-CEDA, the 10 villas of the Indénié hotel, Sucrivoire and the CIDT. These transactions provided the State of Côte d'Ivoire with total proceeds of CFAF 72.9 billion. Furthermore, BFA bank was liquidated on 30 September 2014 and the Communications of the Council of Ministers with respect to the privatization of Versus Bank and Sucrivoire were approved.

To date, the status of progress of privatizations is as follows:

- Process completed: nine companies

- Société Ivoirienne de Banque (SIB)
- Nouvelle Edition Ivoirienne – Centre d'Edition et de Diffusion Africaine (NEI-CEDA)
- Adjoining villas of the Hôtel Indénié d'Abengourou
- Compagnie Ivoirienne de Développement des Textiles (CIDT)
- SUCRIVOIRE
- Société Nouvelle Sucrière de la Comoé (SN SOSUCO)
- Société des Mines d'Ity (SMI): sale of 25% to ENDEAVOUR MINING CORPORATION
- Nouvelle Société Interafricaine d'Assurance (NSIA) Banque
- Banque de l'Habitat de Côte d'Ivoire

- In progress: eight companies

- Société des Mines d'Ity (SMI): sale of 5% of the share capital of the Didier DROGBA group
- CI-ENGINEERING
- Industrial Promotion Services-Côte d'Ivoire (IPS WA)
- PETROCI – Gas
- La Loyale Vie: sale of the stake held by Caisse Nationale des Caisses d'Epargne (CNCE)
- Société Nationale Ivoirienne des Travaux (SONITRA)
- Orange Côte d'Ivoire (formerly, Côte d'Ivoire TELECOM)
- Palmafrique

- Awaiting review: one company

- Versus Bank

- Suspended: one company

- Tropical Rubber Côte d'Ivoire (TRCI)

### Free Trade Zones

The development of free trade zones or of special economic zones plays an increasing role in Ivorian economic policy. It targets two main objectives: (i) creating a regional development centre and (ii) increasing the labour sector's potential. The creation of the first free trade zone, initially planned in Grand Labou (152 km from Abidjan), was finally completed in 2007 in the city of Grand Bassam (43 km from Abidjan). A company with a minority public shareholding, *Village des*

*Technologies de l'Information et de la Biotechnologie*, was created in November 2007 to develop and coordinate the activities of this free trade zone, known as the “Free Trade Zone of Biotechnology and Information and Communication Technologies” (*Zone Franche de la Biotechnologie et des Technologies de l'Information et de la Communication*) of Grand-Bassam. To date, approximately 30 companies are licensed users and there is one authorized facilitating company within the Free Trade Zone.

In addition, since 2015, development works of 180 hectares are underway to establish high-quality, viable facilities that are easy to access and less than 10 minutes from the Abidjan airport, thereby making the ZBTIC the most attractive zone for investment within the region.

The Government intends to exports goods to the region from this free trade zone and thereby strengthen its business leadership. In this respect, VITIB's development plan will take place over 20 years. The Government's objective is to involve the country in the knowledge-based economy of the future and offer foreign and multinational companies an economic space favourable to their investments.

In this respect, Law No. 2018-985 relating to the free trade zone regime was adopted by the National Assembly and promulgated by the President of the Republic on 28 December 2018. This law is intended to (i) strengthen the domestic economy's competitiveness, (ii) develop export-oriented economic activities and (iii) strengthen job and wealth creation. This law is consistent with the broader goal of the Government's industrial policies. It will involve developing new centres of economic growth in Abidjan and inside the country, seizing the opportunity of the relocation of numerous export-oriented international companies and accelerating the transfer of technologies and developing new sectors of activities, namely in the sectors of fitting, assembly, electromechanics and electronics.

## FOREIGN TRADE AND BALANCE OF PAYMENTS

### Introduction

#### *Balance of Payments*

The balance of payments is used to record the value of the transactions carried out between a country's residents and the rest of the world. The balance of payments is composed of:

- the current account, which comprises:
  - net exports of goods and services (the difference in value of exports minus imports);
  - net factor income;
  - net transfers;
- the capital account, which represents the balance of non-financial assets and capital transfers between residents and non-residents; and
- the financial account, which represents the difference between financial inflows and outflows of direct investments, portfolio investments, derivatives and reserve assets.

#### *Current Account*

The current account records (i) flows of goods and services, (ii) flows of primary revenue and (iii) flows of secondary revenue between residents and non-residents. The balance of these accounts is known as the current account balance.

One of the most important components of the current account is the trade balance. The four primary factors that drive the trade balance are:

- the relative rate of economic growth of a country as compared to that of its trading partners generally: if a country's economy grows faster than that of its trading partners, its relative level of consumption of goods and services will tend to increase, and its level of imports will tend to increase more rapidly than its level of exports;
- the relative level of domestic prices against foreign prices, as reflected by the real exchange rate: generally, if a country's domestic prices increase relative to those of its trading partners, there is a tendency for the country's level of exports to decline, and for its level of imports to increase;
- changes in production costs, technology and worker skills: more efficient production will tend to lower production costs, which in turn will tend to lower prices. As prices fall, there will be a tendency for the country's level of exports to increase; and
- changes in consumer tastes, which may affect the demand for a country's goods and services abroad, and the demand for foreign products in the domestic market.

Côte d'Ivoire's current account deficit was CFAF 119.1 billion in 2015 (0.6% of nominal GDP), CFAF 245.5 billion in 2016 (1.1% of nominal GDP), CFAF 609.2 billion (2.8% of nominal GDP) in 2017 and is estimated at CFAF 1,121.6 billion in 2018 (4.7% of nominal GDP).

## Capital Account

The capital account records the financial flows linked to project grants and includes (i) capital transfers to be received and to be paid between residents and non-residents and (ii) the acquisition and sale of non-financial, non-produced assets between residents and non-residents.

Côte d'Ivoire received CFAF 137.3 billion, CFAF 156.4 billion and CFAF 110.9 billion of capital transfers in 2014, 2015 and 2016, respectively. This amount stood at CFAF 111.8 billion in 2017 and is estimated at CFAF 88.7 billion in 2018.

## Financial Account

The financial account describes the way in which net financing capacities/needs are allocated or financed. It serves to quantify (i) FDIs, (ii) portfolio investments, (iii) financial derivatives and (iv) other investments.

## Balance of Payments

As a member country of the WAEMU, Côte d'Ivoire's balance of payments is established by the BCEAO.

The table below presents balance of payments data for Côte d'Ivoire from 2014 to 2019.

	2014	2015	2016	2017	2018 (Estimates)	Sept. 2019 (Forecasts)

### Balance of Payments in 2015

The balance of payments recorded a surplus of CFAF 248.5 billion at the end of 2015, after recording a global surplus of CFAF 273.8 billion a year before.

In particular, the current account balance recorded a deficit of CFAF 119.1 billion (-0.6% of the GDP), compared to a surplus of CFAF 252.2 billion in 2014, in connection with a deepening of the deficit in services, primary and secondary income, combined with a decrease in the surplus of the balance of goods.

The surplus of the balance of payments decreased by 2.1% compared to the level reached in 2014, in connection with a less significant rise in exports than in imports.

The deficit of services grew by 11.8% compared to 2014, due to an increase in freight payments, consumption of construction and public works services and a strong demand in various specialized services.

Similarly, the primary income deficit worsened by 32.5% in 2015, due to an increase in public debt interest and investment income payments, as a result of increased financial liabilities of companies towards foreigners.

With regard to secondary income, the deficit worsened by 40.1% compared to 2014, due to a decrease in budgetary aid received by the Public Administration and an increase in contributions to the functioning of international organizations, in particular the payment of community contributions and an increase in migrants' remittances issued.

The capital account surplus improved, in particular, with an increase of project grants received by the private sector.

The financial account showed a deficit of CFAF 250.3 billion, after a surplus of CFAF 89.9 billion in 2014, reflecting increased financial liabilities due to growth in foreign direct investments and portfolio investments.

### Balance of Payments in 2016

At the end of 2016, the balance of payments showed a deficit of CFAF 53.1 billion, after recording a surplus of CFAF 248.5 billion in 2015, primarily as a result of an increase in the current account deficit.

The current account recorded a deficit of 1.2% of GDP due to deficits in primary and secondary incomes, as well as in services, despite the surplus of the balance of goods.

The surplus in the balance of goods decreased by 3.0% compared to 2015 in connection with a drop in the value of exports, which outweighed the drop in imports. Exports decreased by CFAF 488.7 billion in 2016 compared to 2015, due to a drop in the prices of several products, such as crude oil, oil products, rubber, processed wood, and green coffee. In addition, the quantities exported decreased in connection with the decrease in production of main export crops, particularly cocoa, cashew nuts, cotton and certain processed products (palm oil, processed cocoa and oil products). Imports of goods decreased by CFAF 432.5 billion in 2016 compared to 2015. They showed a rise in the volume of goods and a decrease in prices. The quantities of equipment goods, food products, and intermediate goods grew in connection with the implementation of the second NDP (2016-2020) and the increase in household consumption. Conversely, prices of goods fell, due to the lowering prices of food products, energy products, intermediate goods and equipment goods.

The structural deficit of the balance of services decreased by 1.2% in 2016, after having risen by 11.8% in 2015. This reduction reflects a rise in exports of services that more than offset a rise in imports of services. In addition, expenses linked to freight payments decreased due to a decline in imports of goods.

The deficit in the balance of primary income rose by 7.1%, in connection with a rise in investment income payments, due to a rise in financial liabilities of the economy with respect to foreign countries.

Similarly, the deficit in the balance of secondary income increased by 20.8% compared to 2015 as a result of an increase in amounts paid to sub regional bodies for community contributions and increased outward transfers of migrants.

The capital account recorded a reduced surplus compared to 2015, as a result of a decline in inward project grants.

The financial account showed a deficit of CFAF 87.4 billion, compared to CFAF 250.3 billion in 2015. This situation reflects a rise in financial liabilities of the economy with respect to foreign countries, due to inflows from portfolio investments and a rise in foreign direct investments.

#### Balance of Payments in 2017

At the end of 2017, having recording a deficit of CFAF 53.1 billion a year earlier, the balance of payments showed a deficit of CFAF 3.6 billion.

In particular, the current account balance recorded a deficit of CFAF 609.2 billion (-2.8% of the GDP), compared to a deficit of CFAF 245.2 billion (-1.1% of the GDP) in 2016, in connection with a deepening of the deficit in services and income, despite a recovery in the trade balance.

The surplus of the balance of payments rose by 7.8%, in connection with a greater rise in exports than in imports. Exports of goods (on the basis of the balance of payments) stood at CFAF 6,899.6 billion, compared to CFAF 6,449.3 billion a year earlier, representing an increase of CFAF 450.3 billion (+7.0%).

This performance resulted from an increase of CFAF 442.1 billion (+7.4%) in exports of general goods. These exports have been driven, on the one hand, by an increase in the quantity of cocoa, gold and rubber sold and, on the other hand, by a rise in prices across a number of raw materials, such as cashew nuts, uncombed cotton, rubber and crude oil.

Imports increased by 6.7% due to an increase in the purchase of food products (+12.3%) and other consumer goods (+16.3%).

The deficit in services grew by 16.5% in 2017 in connection with an increase in freight payments, specialized services, technical services, particularly in the extraction industry, and construction services.

Similarly, the primary income deficit grew from CFAF 637.8 billion in 2016 to CFAF 893.7 billion in 2017, due, in particular, to an increase in investment income, as a result of a rise in financial liabilities of the economy with respect to foreign countries.

With regard to secondary income, the deficit worsened by 22.0% compared to 2016 due mainly to an increase in migrants' remittances issued.

The capital account surplus improved by 0.9%, with an 8.5% increase in the surplus of capital transfers from the Public Administration due to an increase in project grants received and a deficit in capital transfers from other sectors.

The financial account showed a net foreign capital inflow of CFAF 496.6 billion, compared to CFAF 87.4 billion in 2016. This development can be explained mainly by a rise in financial inflows from portfolio investments in connection with the issuance of CFAF 1,143.5 billion in Eurobonds by the State in June 2017.

#### Balance of Payments in 2018 – Estimates

According to the 2018 estimates of the BCEAO and the Government, the current account is expected to record a deficit corresponding to 4.7% of the GDP and a year-on-year variation of -84.1%, due to deficits in services and income alongside a sharp decline in the balance of goods.

With respect to trade in goods, the balance excess is expected to fall by 35% on fob basis in connection with the combined effects of a 5.0% decrease in exports and a 6.9% increase in imports. Exports are expected to fall by 5.0% due to a decrease in value of cocoa bean sales (-CFAF 225.2 billion or -12.4%), processed cocoa (-CFAF 117.1 billion or -13.8%), non-monetary gold (-CFAF 45.6 billion or -9.4%), cashew nuts (-CFAF 20.8 billion or -3.4%), rubber (-CFAF 70.4 billion or -14.4%). These developments are expected to result from a decrease in the price of cocoa, cashew nuts and rubber and a drop in the quantity of non-monetary gold exported. Imports are expected to rise by 6.9% in FOB value due to an increase in energy demands (+42.4%), purchases of intermediate goods (+10.8%) and acquisitions of food products (+8.8%).

The structural deficit in the services balance is expected to decrease by 16.9%, mainly in connection with a drop in imports of technical services in the gold and crude oil extraction industries.

The deficit in primary income is expected to increase by 6.2%, due to an increase in payments of investment income and to a rise in expenditures as a result of the State's contributions to the functioning of international organizations and transfer of personnel to foreign countries.

The capital account surplus is expected to diminish by -20.7% due to a decrease in project grants received by the Government.

The financial account is expected to show a net capital inflow into the Ivorian economy. This development (+162.2%) is expected mainly as a result of foreign direct investments inflows (+91.6%), inward portfolio investments (+24.9%), including the issuance of Eurobonds by the State for CFAF 1,115 billion and public drawings on external financial resources.

This change in the financial account is expected to offset the economy's financing requirements in the amount of CFAF 1,035.3 billion. This should allow for a total balance of payments of CFAF 269.3 billion

### *Balance of Payments in 2019 – Forecasts*

According to the 2019 forecasts of the BCEAO and the Government, the total balance of payments is expected to record a surplus of CFAF 170.5 billion (0.7% of the GDP), as a result of high levels in the mobilization of external financial resources.

The trade balance surplus is expected to rise by 21.4% after having decreased by 35% in 2018, due to a greater recovery in exports (+6.4%) than in imports (+2.8%). The deficit in the services balance is expected to increase by 10.2%.

The deficit in the primary and secondary income balances are expected to continue to worsen by 12.1% and 0.03%, respectively.

The surplus in the capital account is also expected to increase to 0.6% of the GDP, compared to 0.4% in 2018.

Finally, the financial account is expected to record a decrease in capital inflows, in connection with the slowdown in portfolio investments.

## **Foreign Trade**

### ***Trade Policy***

Foreign trade in Côte d'Ivoire is not regulated by a specific law. Most trade policy tools were instituted by presidential decree, sometimes supplemented by orders from the relevant ministry or by decrees and administrative rulings. Questions of trade policy are the responsibility of the Ministry of Trade, which oversees its coordination. Other ministries that exercise jurisdiction in this domain include the Ministries of Agriculture and Animal Resources, Economy and Finance, Industry, Foreign Affairs, Mining and Energy and Transportation and the promotion of SMEs.

The major objective of Côte d'Ivoire's trade policy is to consolidate its economic growth, particularly through foreign trade. Côte d'Ivoire is pursuing a policy aimed at encouraging exports and further liberalizing imports in order to stimulate the external competitiveness of the Ivorian economy and lower consumer prices.

Côte d'Ivoire's tariff policy is primarily governed by the CET regime of the ECOWAS. The ECOWAS CET requires members to harmonize ad valorem tariff rates into four bands: (i) zero duty on social goods such as medicine and publications, (ii) 5% duty on imported raw materials, (iii) 10% duty on intermediate goods, and (iv) 20% on finished goods. The four-band CET was subsequently revised in June 2009 to include a fifth band of 35% duty on finished goods that are manufactured locally and which are considered to require some protection in the interest of promoting local industries. In September 2008, Côte d'Ivoire's trade regime was amended to lower tariffs for a wide range of goods and

to replace a number of import bans with tariffs. The CET was confirmed in October 2013 in Dakar by ECOWAS Member State Presidents and came into force on 1 January 2015. The CET is regularly amended as the international market evolves. Accordingly, to adapt to technological developments, environmental constraints and international trade requirements, a new CET, based on the 2017 version of the harmonized system, was adopted and entered into force on 1 January 2018.

Côte d'Ivoire's trade policy may benefit from the African Continental Free Trade Area ("**AfCFTA**") established by the African Continental Free Trade Agreement, which officially entered into force on 30 May 2019. The operational phase of the AfCFTA was launched on 7 July 2019, during the African Union ("**AU**") extraordinary summit in Niamey (Niger). The United Nations Economic Commission for Africa ("**UNECA**") and the AU estimate that the AfCFTA may increase trade levels amongst African States by over 50% by eliminating import duties alone (more if non-tariff barriers are also addressed). This is expected to increase investment flows within Africa and thus support the economic development all members. A number of other potential benefits have been identified, including access to markets (African and global) particularly for small and medium-sized companies, intra-African supply chain integration, job creation and an increase of sustainable exports. As for Côte d'Ivoire, the effective implementation of the AfCFTA is expected to improve exports of Ivorian goods throughout the African continent while attracting more investment inflows. The AfCFTA is also expected to enhance productivity and stimulate the external competitiveness of the Ivorian economy.

### ***Exports and Imports***

In 2015, exports of goods (excluding exceptional goods) stood at CFAF 6,729.1 billion, compared to CFAF 6,141.5 billion the year before, i.e. an increase of CFAF 587.6 billion (+9.6%). This progression was due to an increase in the export of cocoa beans (+593.8 billion; +39.4%), processed cocoa (+141.4 billion; +19%), cashew nuts (+35.5 billion; +9.1%) and gold (+99.3 billion; +28.6%). The five main exports comprised: cocoa (beans and processed cocoa), petroleum products (crude and processed goods), cashew nuts, gold and rubber. These goods represented 76.8% of export revenues in 2015.

Imports in 2015 stood at CFAF 5,227.7 billion, compared to CFAF 4,951.7 billion in 2014, representing an increase of 5.2%, in connection with an increase in the purchase of food products (+16.2%) and growth in the acquisition of equipment goods (+33.6%). The principal goods acquired from suppliers were crude oil, mechanical machinery, iron, cast iron, steel and steel works, refined oil products, rice, plastics and fish. Together, these goods represented 50.0% of purchases from abroad.

In 2016, exports of goods (excluding exceptional goods) stood at CFAF 6,404.2 billion, compared to CFAF 6,729.1 billion in 2015, representing a decrease of CFAF 324.9 billion (-4.8%). They decreased due to the effects of diminishing values in the sale of primary goods (-3.8%) and processed goods (-6.3%).

This decrease in value of primary goods originated from industrial agriculture and export products (-6.8%), in particular cocoa beans (-CFAF 281.3 billion; -13.4%) and uncarded, uncombed cotton (-CFAF 25.0 billion; -18.0%). However, this decrease was attenuated by growth in exports of cashew nuts (+CFAF 42.2 billion; +9.9%) and rubber (+CFAF 26.6 billion; +9.9%), as well as mining products, such as gold (+CFAF 35.1 billion; +8.5%) and crude oil (+CFAF 23.3 billion; +7.2%).

The decrease in value of processed goods was primarily evident in oil products (-CFAF 199.3 billion; -31.2%), processed cocoa (-CFAF 9.2 billion; -1.0%) and essential oils (-CFAF 0.9 billion; -0.7%). This decrease in processed goods was offset by an increase in exports of certain products, in particular, palm oil (+CFAF 12.5 billion; +13.6%).

Imports in 2016 represented CFAF 5,087.1 billion, compared to CFAF 5,227.7 billion in 2015, in connection with a decrease in the associated sub-components: food products (-0.4%), intermediate goods (-23.5%) and equipment goods (-2.8%). The main imported goods, which represented close to 50%, evolved as follows: crude oil (-32.3%), mechanical machinery (-13.8%), iron, cast iron, steel and steel works (-36.1%), refined oil products (+3.9%), rice (+6.4%), plastics (-11.1) and fish (-0.7%).

In particular, consumer goods increased by 2.4% due mainly to increases in pharmaceutical products (+40.4%), rice (+6.4%), oil products (+3.9%) and automobiles (+4.5%). These increases were countered by a decrease in imports of rubber (-20.3%), plastic products (-11.1%), dairy products (-15.4%), meat and edible offal (-15.8%) and wheat (-8.3%).

Intermediate goods decreased due to the diminished value of crude oil (-32.3%), iron, cast iron, steel and steel works (-36.1%), clinker (-11.2%) and metal products (-13.8%). However, this decrease was offset by increased purchases of chemical products (+2.0%), essential oils and plant extracts (+5.4%) and cement (+15.9%).

Equipment goods decreased due to diminished acquisitions of mechanical machinery (-15.0%), electrical machinery (+5.0%), road transportation equipment (-28.6%) and air navigation equipment (-44.0%).

In 2017, the exchange of goods through special trade, which refers to the goods that have been cleared through customs (excluding exceptional goods), increased by 12.2% compared to 2016. Despite the congestion observed in the Abidjan port area in the first half of 2017, which contributed to hindering trade, exports increased by +CFAF 560.8 billion (+8.8% and imports by +CFAF 169.5 billion (+3.3%). This has resulted in a trade surplus (FOB-CAF) (excluding exceptional goods) of CFAF 1,708.4 billion, up by 29.7% (+CFAF 391.4 billion) from the surplus recorded in 2016.

The 8.8% increase in exports (excluding exceptional goods) was due to primary goods, which grew by 15.1%, despite a slight decrease in processed goods (-0.6%). This increase in the value of primary goods stemmed from agriculture, particularly cocoa beans (+CFAF 238.5 billion; +13.1%), cashew nuts (+CFAF 137.0 billion; +29.2%), rubber (+CFAF 160.9 billion; +48.9%) and uncombed cotton (+CFAF 5.9 billion; +5.2%). However, this increase was offset by a decrease in the value of processed goods (-4.8%), particularly exports of processed cocoa (-CFAF 74.2 billion; -8.1%) and palm oil (-CFAF 10.3 billion; -9.9%).

Imports (excluding exceptional goods) stood at CFAF 5,256.6 billion in 2017, compared to CFAF 5,087.1 billion in 2016, an increase of 3.3%. Equipment goods increased by CFAF 200.6 billion (+17.6%) compared to 2016. However, intermediate goods decreased by CFAF 80.2 billion (-5.4%). Consumer goods also increased by CFAF 384.85 billion (+23.0%), due mainly to a rise in rice imports (+CFAF 19.5 billion; +6.3%), oil products (+CFAF 318.2 billion; +229.6%) and plastics (+CFAF 38.5 billion; +16.2%). These increases were offset by a decrease in imports of pharmaceutical products (-CFAF 46.0 billion; -18.6%).

Intermediate goods declined due to a drop in crude oil (-CFAF 135.3 billion; -22.3%). However, this decrease was partly compensated by an increase in purchases of chemical products (+CFAF 13.5 billion; +12.8%), as well as cast iron, steel and steelworks goods (+CFAF 1.3 billion; +0.5%).

Equipment goods increased due to purchases of road transportation equipment (+CFAF 6.1 billion; +3.3%), printing machinery (+CFAF 1.4 billion, +8.5%), transportation equipment for air navigation (+CFAF 14.7 billion, +99.5%), and marine transportation and navigation equipment (+CFAF 224.4 billion, +168.5%). These increases were attenuated by decreases in acquisitions of mechanical machinery (-CFAF 17.6 billion; -3.8%) and electrical machinery (-CFAF 24.1 billion; -11.1%).

In 2018, foreign trade of goods through special trade, excluding exceptional goods, is expected to record a decrease in the value of exports of CFAF 417.8 billion (-6.0%) and an increase of CFAF 747.9 billion (+14.2%) in the value of imports. At the end of December 2018, exports (excluding exceptional goods) are expected to reach CFAF 6,547.2 billion, while imports (excluding exceptional goods) are expected to amount to CFAF 6,004.5 billion. This is expected to cause a decline in the trade surplus (FOB-CIF), which is estimated at CFAF 542.7 billion in 2018 compared to CFAF 1,708.4 billion in 2017, representing a decrease of (-68.2%). The rate of coverage of imports by exports is estimated at 109.0% in 2018.

A decrease in value of exports is expected as a result of the reduction of sales of primary goods (-CFAF 253.2 billion; -5.8%) and processed goods (-CFAF 164.5 billion; -6.4%). This decrease in primary goods is expected as a result of a decrease (-7.3%) in prices, despite a slight increase in volume (+1.6%). The decrease in exports of processed goods is expected as a result of a decrease in price (-4.0%) and volume (-2.5%).

A decrease in value of primary goods is expected mainly as the result of a decline in industrial and exported agriculture goods, in particular, cocoa beans (-CFAF 255.2 billion; -12.4%), cashew nuts (-CFAF 20.8 billion; -3.4%) and rubber (-CFAF 70.5 billion; -14.4%). These three products are expected to record a decrease in prices of (-13.3%), (-7.9%) and (-17.7%), respectively.

The expected decrease in value of processed goods is due to the decline in products of primary processing (-CFAF 101.9 billion; -7.6%) and in manufactured goods (-CFAF 389.4 billion; -26.5%). Specifically, the sale of processed cocoa is expected to decrease in value by CFAF 117.3 billion (-13.8%), while the sale of essential oils and plant extracts should increase by CFAF 9.8 billion (+7.6%), despite a 2.3% decrease in their price. Moreover, the price of palm oil, processed wood and processed coffee is expected to decrease by (-15.0%), (-11.2%) and (-8.3%), respectively.

Imports (excluding exceptional goods) are estimated at CFAF 6.004.5 billion for 2018, representing an increase of CFAF 747.9 billion (+14.2%) compared to 2017. This is due to an expected increase in volume (+7.5%) and in price (+6.3%). In addition, this increase in imports should reflect an increase in associated sub-components: consumer goods and intermediate goods, with the exception of equipment goods, which decreased.

Intermediate goods are expected to increase in value by CFAF 507.2 billion (+35.9%), driven by a 12.7% increase in volume and a 20.6% increase in price. The principal intermediate goods that are expected to record an increase in imports are crude oil (+CFAF 387.9 billion; +82.2%), cast iron, steel and steelworks goods (+CFAF 75.3 billion; +30.1%), metal products (+CFAF 40.8 billion; +52.8%), chemical products (+CFAF 8.5 billion; +7.1%) and paper and cardboard (+CFAF 7.1 billion; +7.1%). The value of purchases of crude oil should be affected by an increase in quantity and price of imports of 51.9% and 20.0%, respectively.

With regard to the purchase of equipment goods in 2018, the CFAF 113.0 billion (8.4%) decrease is the result of that of prices (-22.2%). The main goods that are expected to record the highest increase in imports are electrical machinery (+CFAF 66.2 billion; +34.4%), mechanical machinery (+56.5 billion; +12.6%) and road transportation equipment (+CFAF 29.4 billion; +15.4%).

The table below presents Côte d'Ivoire's imports and exports of goods from 2015 to 2018:

	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u> (est.)

### **Principal Trading Partners**

Based on customs statistics, in 2017, sales to Europe stood at CFAF 3,119.0 billion, CFAF 1,561.4 billion for Africa, CFAF 1,200.8 billion for Asia and CFAF 923.7 billion for North and Latin America. In 2016, these figures stood at CFAF 2,979.4 billion for Europe, CFAF 1,622.9 billion for Africa, CFAF 917.2 billion for Asia and CFAF 837.8 billion for North and Latin America.

Europe was thus the main market for Côte d'Ivoire exports in 2017. The share of this continent stood at 45.4% in 2017, compared to 46.5% in 2016. Europe is followed by Africa, with a share of 22.7% in 2017, compared to 25.3% in 2016. Asia is next, with a share of 17.5% in 2017, compared to 14.3% in 2016, followed by North and Latin America with a 13.4% share in 2017, compared to its 13.1% share in 2016.

In Europe, the main clients of resident economic operators were the Netherlands (11.8% of total exports and 26.1% of sales to the area in 2017, compared to 11.6% and 25.0% respectively in 2016), France (5.9% of total exports and 13.0% of sales to the area in 2017, compared to 5.4% and 11.7% respectively in 2016) and Germany (5.2% of total exports and 11.5% of sales to the area in 2017, compared to 5.1% and 10.9% in 2016, respectively).

In Africa, Burkina Faso remained the leading recipient of Ivorian products (4.5% of total exports, compared to 4% in 2016).

In North and Latin America, goods were shipped mainly to the United States (10.0% of total exports in 2017, compared to 8.9% in 2016) and Canada (1.7% of sales, compared to 2.2% in 2016).

In Asia, the most significant buyers were India (2.8%, compared to 3.5% in 2016) and China (1.0% of exports to this area in 2017, after 0.7% in 2016).

In 2018 on the basis of estimates, Europe continued to be the main recipient of Ivorian exports, accounting for CFAF 2,802.5 billion (41.7%), followed by Africa with CFAF 1,654.5 billion (24.6%), Asia with CFAF 1,307.9 billion (19.4%) and North and Latin America with CFAF 842.7 billion (12.5%).

In Europe, the principal partners should remain the same as in 2017, namely the Netherlands, Germany and France, which should account for 11.1%, 6.2% and 5.6% of total exports, respectively.

In Africa, Burkina Faso should remain the main partner with 5.2% of total exports, followed by Mali, which should account for 4.8%.

In North and Latin America, goods are expected to be shipped mainly to the United States (8.9% of total exports) and Canada (2.2%).

Finally, in Asia, India is expected to remain the most significant buyer (4.3%), while China's share of Ivorian exports is estimated to be 1.5% in 2018.

The table below summarizes the geographic exports distribution from 2015 to 2018:

GEOGRAPHIC AREAS	2015	2016	2017	2018

Source: DGD/BCEAO

The geographical distribution of imports (special trade excluding exceptional goods) was characterized in 2016 by the continued decline in the market share of African countries (-4.7%), in favour of those of European (+4.2%), Asian (+2.2%) and North and Latin American countries (+1.0%) compared to 2015.

Concerning imports in 2017, purchases from Europe stood at CFAF 2,050.5 billion, CFAF 1,151.2 billion for Africa, CFAF 1,738.6 billion for Asia and CFAF 334.3 billion for North and Latin America in 2017. In 2016, these figures stood at CFAF 1,796.9 billion for Europe, CFAF 1,071.7 billion for Africa, CFAF 379.2 billion for North and Latin America and CFAF 1,806.4 billion for Asia.

In terms of proportions, the share of imports originating from European countries increased from 35.3% in 2016 to 38.0% in 2017. Asia's share stood at 33.0% in 2017 compared to 35.3% in 2016. The share of African countries increased from 21.1% in 2016 to 21.7% in 2017. As for North and Latin American countries, their share stood at 6.5% in 2017, as compared to 7.5% in 2016.

In Europe, France remained the main supplier with 11.9% of total purchases in 2017, compared to 13.3% in 2016. The share in total imports from Europe represented 30.8%.

The same applies to Africa for Nigeria, totalling 11.7% of total orders, compared to 11.4% in 2016, and 54.1% in 2017 of imports originating from Africa in 2017, compared to 53.5% in 2016.

In Asia, Côte d'Ivoire imported predominantly from China with 14.3% of total imports, compared to 17.4% in 2016. China accounted for 43.9% of imports from the Asian continent in 2017, compared to 47.2% in 2016. The second Asian supplier was India, with 4.6% of total imports in 2017, compared to 4.5% in 2016.

In North and Latin America, purchases originate mainly from the United States with 4.1% of total imports in 2017, compared to 3.7% in 2016. In North and Latin America, the share of products imported by the US represented 64.5% of total imports from the area, compared to 50.8% in 2016.

In 2018, imports are expected to experience an overall increase of 17.4% (general trade, excluding exceptional goods), and to originate mainly from Europe with 34.8% of total imports, followed by Asia with 33.7% and Africa with 22.7%.

In bilateral trade, France should remain the main supplier in 2018, with 10.4% of total imports and 29.9% with respect to Europe.

In Africa, Nigeria should account for 12.0% of total imports and 53.0% of imports from Africa.

In Asia, Côte d'Ivoire is expected to import largely from China, which should account for 14.8% of total imports and 44.1% of imports from the Asian continent in 2018. The second main supplier in Asia should be India, with 4.5% of total imports.

In North and Latin America, the main supplier is expected to be the United States in 2018, representing 3.4% of total imports and 42.6% of goods imported in the region.

The table below presents the geographic imports distribution from 2015 to 2018:

### Foreign Direct Investments

Several factors have encouraged FDI inflows into Côte d'Ivoire, including (i) an increasingly secure environment, (ii) an improvement in the supply and quality of infrastructure, (iii) an improvement in the regulatory and institutional framework to facilitate economic activity and (iv) an improvement in the supply and quality of labour. FDI trends form

part of prospects for growth over the medium-term, in connection with the significant reforms implemented and currently underway. See “*The Economy – Principal Sectors of the Ivorian Economy*”.

Inflows of FDIs stood at an estimated net capital inflow of CFAF 173.2 billion in 2017, compared to CFAF 325.5 billion in 2016. This change is the result of a net increase of CFAF 566.1 billion in the Ivorian economy’s liabilities and of CFAF 392.5 billion in net acquisitions of assets from foreign residents.

FDIs received by the Ivorian economy amounted to CFAF 566.1 billion in 2017, compared to CFAF 342.4 billion in 2016, representing an increase of (+65.33%). These FDIs include CFAF 166.2 billion from flows other than reinvestment of profits, compared to CFAF 144.1 billion in 2016, CFAF 207.8 billion from reinvestment of profits, compared to CFAF 170.6 billion in 2016, and CFAF 192.1 billion in debt instruments, compared to CFAF 27.7 billion in the previous year.

The main sectors of activity that are net beneficiaries of these capital inflows are the extractive industry (39.2%), financial intermediation (27.8%) and telecommunications (13.6%). They are followed by the manufacturing industries (8.0%), the hotel industry (5.3%) and transportation (4.1%).

In 2018, according to the BCEAO, net FDI inflows are expected to almost double compared to 2017, reaching CFAF 332.7 billion. This change is due to a rebound in FDI inflows after a net exceptional decline in 2017. In 2017, domestic economic operators made significant direct investments abroad in an amount of CFAF 392.5 billion, after CFAF 17.0 billion in 2016. The amount of FDI outflows are usually not very significant. However, in 2017, an economic operator in the banking sector made significant investments abroad by extending its network in the WAEMU. These external investments have thus reduced the amount of net FDI inflows in 2017 compared to previous years. These investments abroad are expected to decline in 2018 to their usual level.

The table below presents net FDI inflows from 2014 to 2018:

<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b> <b>(Estimates)</b>
208.9	283.8	325.5	173.2	332.7

Source: BCEAO

Europe is the main source of FDI (42.1% in 2017, compared to 64.8% in 2016). In Europe, in 2017, France, Belgium and Switzerland were the three leading investors in Côte d’Ivoire with CFAF 96.6 billion, CFAF 96.0 billion and CFAF 34.2 billion, respectively. In Africa, Morocco was the primary investor in Côte d’Ivoire in 2017, with a share of 17%.

The table below presents gross incoming FDI per country of origin from 2014 to 2017:

<b>Country</b>	<b>2014</b>	<b>Country</b>	<b>2015</b>	<b>Country</b>	<b>2016</b>	<b>Country</b>	<b>2017</b>

## PUBLIC FINANCE

### General

The 2016 and 2017 budgets were executed in a context shaped by the consolidation of progress achieved since 2012 on an economic and socio-political level. In 2018, despite the general context a slowing of global economy, the Ivorian economy has sustained its momentum. At the economic level, the budget significantly contributed to the achievement of the objectives of the Government's economic and financial programme established with the IMF, thanks to an overall control of expenditure and a good level of revenue collection. The global budget balance was -3.9% of GDP in 2016, compared to a forecast of -4.0%. Côte d'Ivoire's public finance management efforts continued in 2017, despite domestic (social movements) and external disruptions (drop in cocoa prices and rise in oil prices) that adversely affected the mobilization of income and placed significant pressure on expenses. Despite these challenges, measures taken by the Government limited the deficit in 2017 to an estimated 4.2% of GDP compared to a forecast of 4.5% of GDP. In 2018 the deficit is expected at 4.0% of GDP, a slight improvement compared to 2017. On the socio-political front, the actions taken by the Government aimed at strengthening social peace and national cohesion contributed well-adapted solutions to recent social movements, particularly with the signature of a memorandum of understanding establishing a five-year "truce" by which, in exchange for a no strike movement, the State committed to improve the quality of life and working conditions of civil servants through various measures, including the payment of all civil servant arrears estimated at CFAF 249.6 billion as of 2018, with 70% of the total payable between 2018 and 2022 and the remaining 30% between 2023 and 2025. From February to May 2019, some teachers in the primary and secondary education sectors and their unions went on strike demanding a revaluation of their wages and an increase in their housing allowances. None of the claims were accepted and no payments were made by the Government.

In addition, efforts to implement the NDP for the 2016-2020 period led to consistent economic growth. Following real GDP growth of 8.8% in 2015 and 8.0% in 2016, the economic growth rate was estimated by the Government at 7.7% for 2017 and 7.4% for 2018, maintaining Côte d'Ivoire's rank among the leading developing countries in terms of economic growth. This dynamic was driven by the implementation of reforms to promote improvement in the country's business climate, in particular (i) the online availability of all information relating to building permits, (ii) the creation of a web portal with commercial information designed to strengthen cross-border exchanges, (iii) the continued implementation of the Phoenix programme to promote SMEs, and (iv) the establishment of online tax returns and tax payment systems to improve revenue collection.

In this context, the country has been able to maintain the trust of its foreign partners. The organization of the 5<sup>th</sup> Africa-European Union Summit in Abidjan in November 2017, Côte d'Ivoire's participation in the Compact G20 initiative and the compact programme of the MCC are evidence of this fact. With regard to the MCC, a grant agreement for an amount of CFAF 315 billion was signed with the US Government in 2017 to finance, in particular, projects in the education and road infrastructure sectors. As of this date, no disbursement date has been confirmed in relation to the grant.

To support this improving trend, the World Bank provided budgetary support of US\$425 million over the 2017 – 2019 period. This budgetary support is part of the Development Policy Financings ("DPF"), which are aimed at enhancing tax revenue collection, strengthening the education sector, improving the energy sector and consolidating transparency in the cocoa sector. The first tranche of US\$125 million was disbursed in December 2017. The disbursement of the second tranche of US\$100 million occurred in 2018 and the third tranche of US\$200 million in 2019.

Budgetary policies for 2019 and the medium-term are centred around the 2016-2020 NDP's objectives and take into account the 2016-2020 NDP's priority actions.

In light of this situation, the 2019 budget focuses on the continued implementation of Government priorities, in particular, expanding socio-economic infrastructure and basic services that have a significant impact on the population's well-being, improving the education system to adapt to the needs of the job market, reinforcing the healthcare system to make it more accessible to the most disadvantaged groups, improving the population's food situation and reinforcing the security and defence system whose major guidelines are defined in the military and security planning laws. The 2019 budget is also designed in particular to promote job creation, particularly for young people, and to strengthen investments in the energy, transport and drinking water provision sectors.

As part of its economic policy, the Government's efforts aim to preserve the stability of the macroeconomic framework and the consolidation of public finances by strengthening the collection of revenues and streamlining expenses. In particular, over the medium-term, the Government intends to control changes in the payroll bill and operating expenses, reduce subsidies to the electricity sector until it achieves financial equilibrium and reform the domestic debt situation.

The Government is also pursuing the implementation of policies and priorities with respect to the improvement of the population's well-being, namely through developing education and healthcare infrastructure and reinforcing economic activity. In this respect, the Government intends to increase the completion rate of its investments, in particular those subject to C2D financing, by implementing measures intended to help regularly monitor projects. The purpose of C2Ds is to ensure that the resources used for the repayment of loans are (with the lender's consent) allocated to the financing of specific expenses for targeted development projects. When a loan repayment is made, France pays Côte d'Ivoire a non-refundable grant equal to such repayment. The grant is then allocated to financing poverty reduction programmes jointly selected by the two parties. The country is thus able to use its resources previously allocated to debt repayment for the purposes of financing development projects. Following bilateral negotiations, in 2012 France granted a debt cancellation of a portion of Côte d'Ivoire's outstanding debt, in the amount of CFAF 1,486 billion (€2.265 billion) and signed the first C2D for a total amount of CFAF 413.25 billion (€630 million over the 2012-2015 period), of which 85% has already been allocated to projects. A second C2D contract was signed in Paris on 3 December 2014 between France and Côte d'Ivoire, for an amount of CFAF 738 billion (€1.125 billion) for the 2016-2020 period. (See "Public Debt")

As part of the implementation of the Government's targets with regard to employment, in 2017, 52,129 young people were able to benefit from the services of the Youth Employment Agency (*Agence de l'Emploi pour les Jeunes*) under the programme "training, my ticket to a job" ("*Une formation, mon passeport pour l'emploi*"). Initiatives have also been undertaken to support young independent entrepreneurs and entrepreneurship. In this context, more than 13,000 individual and collective projects were financed with governmental resources and the support of the French Development Agency (*Agence française de développement*). In addition, 1,133 young people were placed in internships prior to employment and 409 young people were placed directly into employment.

Furthermore, the Government continues to strengthen the education system in order to promote education for all. In this respect, it works on increasing the number of classrooms and hiring teachers. In addition, registration costs were reduced, in particular for the poorest people, through the free distribution of school supplies to children registered in public primary schools. Various awareness-raising campaigns were also carried out, primarily to promote education for girls. The Government intends to continue this trend with the implementation of the sectoral education and training plan covering the 2016-2025 period. The plan aims to broaden fair access to different education levels both in terms of the quality and diversity of the education programme offered.

### **The Priorities of the 2019 Budget**

The 2019 budget, consisting of expenditures of CFAF 7,334.3 billion, a 8.6% increase in spending compared to the 2018 budget, focuses on the continued implementation of Government priorities as described above.

#### *Employment*

Employment across multiple sectors benefits from CFAF 21.4 billion under the 2019 budget in favour of promoting youth employment.

In the 2019 budget, personnel expenses have been projected for an amount of CFAF 1,720.8 billion, in accordance with the objectives targeted by the strategy for payroll control for the 2014-2020 period. These expenses have increased by CFAF 85.5 billion compared to 2018 and take into account, in particular:

- the second tranche of the stock of civil servant salary arrears (CFAF 34.9 billion);
- the ordinary recruitment of 17,226 agents (CFAF 76.3 billion);
- the payment of 240 salary payments postponed from 2018 to 2019 (CFAF 2.3 billion);

- changes in administrative situation for a total cost of CFAF 24.3 billion including CFAF 13.8 billion for advancements and CFAF 10.5 billion for promotions.

### *Improvement of Living Conditions*

Through the 2019 budget, the Government intends to pursue its policy of combating poverty and social disparities. Consequently, it pays particular attention to expenditure aimed at improving the living conditions and well-being of the least-favoured category of the population. For this purpose, it provides for an allocation of CFAF 2,505.5 billion towards "pro-poor" expenditure. This level represents an increase of 9.4% compared to 2018 and accounts for 9.6% of anticipated GDP.

These expenses cover the following social sectors in particular:

- education (CFAF 1,315.6 billion);
- health sector (CFAF 376.3 billion);
- social affairs (CFAF 39.2 billion);
- agriculture, animal, and fishing resources (CFAF 138.2 billion);
- sanitation and improvement of drinking water and electricity supply (CFAF 231.2 billion); and
- economic and social development actions by local authorities (CFAF 76.5 billion).

### *Education and Training*

Credits for training, education and research amount to CFAF 1,340.9 billion for the 2019 budget. These credits cover:

- strengthening the operational resources of educational structures;
- private school subsidies for student and pupils school fees (CFAF 130.0 billion);
- the payment of student and pupils scholarships, school kits and transportation costs (CFAF 68.2 billion); and
- the organization of exams (CFAF 14.4 billion) and teacher overtime hours (CFAF 11.6 billion).

The 2019 budget also emphasizes the development of infrastructure in the field of education and training through:

- the construction, outfitting and rehabilitation of secondary school infrastructure (CFAF 25.1 billion), namely the construction programme of middle and high schools (CFAF 13.5 billion), the construction and outfitting of five boarding high schools for girls (CFAF 10.3 billion) and the rehabilitation project for three vocational high schools (CFAF 3.2 billion);
- the construction, outfitting and rehabilitation of higher education infrastructure (CFAF 58.8 billion), primarily including the construction, rehabilitation and outfitting of universities (CFAF 38.7 billion) and C2D support to reinforce higher education infrastructure (CFAF 12.5 billion); and
- the construction, outfitting and rehabilitation of vocational training infrastructure (CFAF 24.6 billion), including C2D support to reinforce vocational training infrastructure (CFAF 10.8 billion), the construction project of the Bouna agricultural and fishing vocational training centre (CFAF 2.8 billion), the project to create and renovate technical and vocational education institutions (CFAF 2.2 billion), construction and equipment of the Daloa vocational high school in partnership with the Kuwaiti fund (CFAF 3.3 billion) and the development project for the vocational training system (CFAF 3.2 billion).

### *Health and Social Affairs*

The health and social services sector has benefitted from a CFAF 436.5 billion allocation, including CFAF 382.6 billion for the health sector, intended for:

- the payment of scholarships for INFAS students and hotel industry students (CFAF 6.3 billion);

- the renovation and provision of new equipment to CHUs, general hospitals and other health facilities;
- consolidating efforts to prevent and fight pathologies and endemic diseases, as well as HIV/AIDS;
- free targeted healthcare (CFAF 15.0 billion) covering childbirth costs, caesarean sections, the fight against malaria, social expenditures (CFAF 6.8 billion) targeted to support the vaccination and drug price reduction policy, including antiretroviral; and
- orphanages and nurseries (CFAF 1.9 billion).

#### *Defence, Security and Justice*

The 2019 budget allocated CFAF 620.4 billion for defence, security and justice, including CFAF 263.4 billion for army services, CFAF 76.0 billion for *gendarmerie* and CFAF 175.7 billion for police. This allocation is destined to numerous expenditures, including:

- the operation of the CNS (CFAF 10.0 billion);
- military installation leases (CFAF 40.7 billion) and police installation leases (CFAF 19.0 billion); and
- food (CFAF 38.5 billion) and fuel (CFAF 14.0 billion) for the military.

The 2019 budget provides for CFAF 95.8 billion to reinforce the judicial and penitentiary system.

#### *Sanitation, Water and Electricity*

A CFAF 443.1 billion allocation is provided to fund actions to improve sanitation and the supply of drinking water and the supply of electricity. These allocations are dedicated namely to sanitation and removal of domestic waste, as well as urban and village hydraulics via the reparation and installation of human-powered pumps. These allocations also cover the continuation of rural electrification programmes and the extension of urban networks.

#### *Agriculture, Animal and Fishing resources*

The agricultural, animal and fishing resources sectors are allocated CFAF 179.9 billion in the 2019 budget, covering the Rural Area Investment Fund (*Fonds d'Investissement en Milieu Rural*) (CFAF 12.5 billion), programmes for the development and promotion of agriculture, hydro-agricultural planning projects, agricultural diversification projects and land management as well as rural equipment. These credits also take into account the reliance on cattle rearing, dairy production, fishing, aquaculture, and subsistence crops in order to ensure food self-sufficiency.

#### *Road Infrastructure*

For the reinforcement of road infrastructure, the 2019 budget provides CFAF 522.9 billion for the purpose of road opening and refurbishment works, as well as for the construction of civil engineering works. This entails the Road Maintenance Fund (*Fonds d'Entretien Routier*) (CFAF 148.3 billion) and multiple specific projects, including:

##### *Projects in Abidjan*

- the Abidjan Urban Transport project (CFAF 147.6 billion);
- developing Marseille boulevard (15.5 billion); and
- constructing the Japan-Ivorian friendship intersection (*échangeur de l'amitié Ivoiro-Japonaise*) (CFAF 22.4 billion) ;
- constructing the Abidjan Urban Train Infrastructure (CFAF 5.0 billion).

##### *Projects in the Rest of the Country*

- developing the Boundiali-Odiénné-Guinea border road (CFAF 25.8 billion);
- the project for road development and facilitation of transport within the Mano River Union (CFAF 21.0 billion);

- developing the Yamoussoukro-Bouaké highway (CFAF 23.4 billion);
- Abidjan-Lagos Trade Transport Corridor Facilitation Project (PFCTCAL) (CFAF 10.6 billion);
- Transport Sector Modernization Support and Abidjan-Ouagadougou Trade Corridor Facilitation Project (PAMOSSET) (CFAF 8.3 billion);
- developing the Toulepleu Zouan-Hounien road (CFAF 22.0 billion);
- developing the Bamako-Kani-Boundiali-San Pédro Corridor Road (CFAF 18.6 billion).

### **Fiscal Policy and Administrative Reforms**

In recent years, the Government has been implementing a series of major measures to significantly strengthen revenue collection. Since 2014, the average annual amount of revenue collection increased by approximately 12%. The tax pressure rate was 16.2% in 2018, compared to a rate of 16.5% in 2017 and a rate of 16.0% in 2016. Measures taken by the Government to reach these levels include administrative measures and a series of measures aimed at expanding the tax base. The goal is to attain 20% of GDP in 2022. The principal measures that have been implemented since 2014 are the following:

- the adoption of a single declaration form in January 2016, which helped significantly reduce the number of procedures undertaken by taxpayers as well as the amount of time spent on tax formalities;
- the establishment of online declarations and payments since January 2017 for companies whose revenue is equal to or greater than CFAF 200 million. These companies must now declare and pay their taxes and duties online via an online e-tax portal on the [e-impots.gouv.ci](http://e-impots.gouv.ci) or [dgi.gouv.ci](http://dgi.gouv.ci) website;
- the digitalization of the land registry via the creation of an electronic land registry. It has been accessible to sector professionals (notaries) since 2014 via the link <http://econsultation.dgi.gouv.ci>;
- the creation of a Fiscal Policy Coordination Cell in November 2016 within the cabinet of the Budget Ministry. This Cell is responsible for coordinating and conducting fiscal reform activities;
- since January 2017, the implementation of a programming and execution system for the automated fiscal control programme in order to avoid overlapping controls, and the increase in the number of companies subjected to this procedure;
- the continuation of large-scale survey operations targeted at taxpayers;
- the improvement in the quality of financial information contained in the summary financial statements of companies, through the creation in 2016 of an obligation for a prior visa on such financial statements before their transmission to the Single Filing Window for Financial Statements (*Guichet unique de Dépôt des Etats Financiers*);
- the improvement of customs clearance for land borders, namely through the modification of the procedure of customs clearance and the deployment of two new scanners at the land border offices;
- the reinforcement of the control of customs transformation regime for the purpose of insuring the veracity of declarations;
- the reinforcement of international transit controls to improve the traceability of goods in transit;
- in 2014, the harmonization of tax rates applicable to income from capital to adapt Ivorian tax to WAEMU community standards;
- since 2014, the improvement of telecommunications taxation, by imposing a new tax on telephone communications at a rate of 3% of revenues and increasing the income tax rate from 25% to 30% for companies in this sector;
- in 2014, the establishment of a minimum tax charge of CFAF 400,000 for taxpayers subject to the simplified taxation regime;

- in 2017, developing regulations relating to transfer prices, namely via the establishment of an obligation to produce a status of transactions between related companies or with foreign companies, as well as the adoption of a more restrictive tax regime on transactions made with low-tax countries (tax havens) in terms of income tax;
- the optimization of VAT credit repayments to companies by improving the processing of repayments to such companies.
- the gradual reduction of VAT exemptions by terminating certain such exemptions, except for those provided for by the WAEMU Directive and in compliance with prior commitments;
- the extension of online tax declarations and payments to all taxpayers;
- the limitation of one-time exemptions to the social sectors and those related to grants, and the non-renewal of temporary exemptions;
- the completion of various studies relating to increasing VAT proceeds and reinforcing its neutrality;
- the adoption of a new Investment Code by the Council of Ministers in August 2018. This Code came into force on 1 January 2019;
- the implementation of measures relating to thin capitalization;
- an upward adjustment of excise duties on alcoholic and energy drinks and tobacco;
- the electronic transmission of financial statements and the development of an IT processing application for financial statement data;
- the establishment of withholding tax on the sale of timber;
- the establishment of a tax on gambling receipts.

In addition, laws were adopted relating to the reduction of the Community Solidarity Tax (*Prélèvement Communautaire de la Solidarité*) through decree no. 2017-412 of 28 June 2017, the establishment of an import tax of the African Union (AU) through decree no. 2017-425 of 28 June 2017 and the amendment of decree no. 1916-1012 establishing Single Exit Tax (*Droit Unique de Sortie*) rates applicable to coffee cherries, cocoa beans and coffee and cocoa products. A 10% tax on cashew nut exports was introduced in accordance with order no. 2018-145 of 14 February 2018. However, this tax has been temporarily revised to 3.5% from September in 2018 to March 2019 and to 7.0% since April 2019 in order to take into account the adverse economic situation resulting from the decline in external demand. Tax revenues expected for 2019 amount to CFAF 36.87 billion compared to CFAF 49.64 billion in 2018.

On an organizational level, the measures implemented by the Government involved the creation at the end of 2016 of the Medium-Sized Companies Department to ensure better tracking of transactions as part of the continued segmentation of taxpayers, and the Investigation, Cross-Referencing and Analysis Department (*Direction des Enquêtes, des Recoupements et de l'Analyse*) to enhance the fight against tax fraud and evasion. In addition, fiscal controls were decentralized by assigning this responsibility to the Large Companies Department (revenue greater than CFAF 3 billion), the Medium-Sized Companies Department (revenue between CFAF 200 million and CFAF 3 billion) and the Regional Departments (revenue below CFAF 200 million).

In addition, the customs authorities have stepped up the fight against fraud by (i) optimizing the use of scanners for imported and exported goods in the Autonomous Port of Abidjan and San Pedro, (ii) increasing the monitoring of the coastline and lagoons, (iii) strengthening the capacity to combat fraud and smuggling at land borders through the acquisition and installation of two scanners at the border offices of Noé in the east and Ouangolodougou in the north in 2017, (iv) increasing control over international transit to improve tracking of goods in transit, (v) the installation of a second scanner at the northern border (Ouangolodougou office) in May 2018 and (vi) the rehabilitation of six customs posts at land borders in the second half of 2018 as part of the strengthening of control operations.

With regard to strengthening its operational capacity, the needs of the Directorate General of Customs for additional weapons and ammunition have been addressed under the military planning law.

Concerning international transit, several measures have been implemented, including: (i) prohibiting re-export by land to neighbouring countries with a maritime border (circular no.1857/MBPE/DGD of 22 May 2017), (ii) rearranging the procedure for processing operations for the re-export of goods inland by rail (circular no. 1846/MBPE/DGD of 22 March 2017) and (iii) the modification of the Committee for the Approval of Economic Operators and Customs Commissioners (*comité d'Agrément des Opérateurs Economiques et des Commissionnaires en Douane Agréés*) in charge of transit operations (Decision no. 63/MBPE/DGD of 18 May 2017). On 28 December 2017, a special flying squad for the customs was also created for transit operations.

### **The Medium-Term Payroll Control Strategy**

On 5 May 2014, the Government adopted a medium-term payroll control strategy for the 2014-2022 period. It intends to continue its implementation pursuant to the priorities under the 2016-2020 NDP, in particular, in terms of recruitment in the education and healthcare sectors. The budgetary repercussions linked to the implementation of the military planning and domestic security laws, as well as laws relating to agreements with civil servant and State agent unions, were taken into account in the 2018 draft finance law. The ratio of the payroll bill to tax revenues is expected to maintain a declining trend and converge with the WAEMU standard in 2020, according to which the payroll bill cannot exceed 35% of tax revenues. In addition, as part of an effort to modernize and streamline procedures and practices in the public sector, a draft law revising the general status of the public sector is expected to be adopted by the Government.

The main measures within this strategy are the following:

- unfreezing of indexed salary raises (unblocking of salaries);
- the readjustment of the State's employers' contribution rates from 19% to 16.67%, as of the last year of the unfreezing;
- resumption of paygrade advancement every two years; and
- supervised hiring: hiring forecasts for the 2014-2020 period are based on personnel reinforcement needs due to the implementation of the NDP, mainly in social sectors (education and health).

Since the implementation of the strategy, the "payroll to tax revenue" ratio has seen a decreasing trend and has dropped from 46% in 2015 to 41.9% in 2018. It is expected to remain above the 35% standard in 2019 (39.8%) and 2020 (36.4%), due to the implementation of salary increase measures for civil servants and State agents as well as recruitment in the social sectors. However, the ratio is expected to gradually improve to 34.2% in 2021 and 34% in 2022.

In addition, particular attention has been given to recruitment in the education and healthcare sectors.

### **Transparency, Fight against Corruption and Public Procurement Framework**

The Government continues to prioritize the fight against corruption. To this effect, the Government implemented a Programme for Supporting Good Governance (*Programme d'Appui à la Bonne Gouvernance*) for the 2009-2013 period, which benefited from US\$83.8 million of Government funding. The Government has also funded the development of a National Good Governance and Anti-Corruption Plan (*Plan National de Bonne Gouvernance et de Lutte contre la Corruption*), the implementation of which has resulted in the following measures and actions:

- the Court of Audit (*Cour des comptes*) was created by organic law no. 2015-494 of 7 July 2015, and its president was appointed on 8 January 2018;
- a High Authority for Good Governance (*Haute Autorité pour la Bonne Gouvernance*) was created by a presidential decree adopted on 20 November 2013;
- campaigns to raise awareness among political, economic and social figures with regard to the harmful effects of corruption; and
- an Observatory and a Special Court in charge of preventing and fighting against corruption (*Observatoire de la lutte contre la corruption* and *Cour spéciale de prévention et de lutte contre la corruption*).

The Government also took measures to further regulate the conditions of applicability of the public procurement code with respect to bilateral contracts awarded without tenders below CFAF 30 million and therefore were not subjected to the Public Procurement Code.

It is fighting against corruption in particular by seeking to make public procurement systems more transparent on two fronts:

- since November 2013, all procurements agreed outside of public procurement proceedings are systematically audited by the Public Expense Review Committee (CRDP) before they may be approved; and
- the effectiveness of the implementation of sanctions was strengthened through decree no. 118 MPMB of 26 March 2014 which sets out the rules for the application of sanctions for violations of public procurement regulations.

In addition, Côte d'Ivoire complies with the standards established by the Extractive Industries Transparency Initiative (EITI) since May 2013. The purpose of this organization is to increase public transparency with regard to State revenues originating from the oil, gas and mining sectors and their use.

In order to strengthen the public procurement management framework, new measures promoting SMEs were adopted by the Government in 2016. These measures aim to promote the extensive participation of SMEs in public procurement and facilitate their access to public procurement. They involve:

- increasing the public procurement threshold: increasing the thresholds helped to reduce the volume of contracts subject to prior controls by the Public Procurement Department (*Direction des Marchés Publics*) and thereby increasing the share of transactions made below this reference threshold subject to more accessible procedures for SMEs;
- reserving bids for SMEs by setting the bid quota to be granted to SMEs: to increase the share of bids won by SMEs, contracting authorities are asked to reserve an annual share of their budget for SMEs equal to 20% of the expected value of expenses for works, supplies and services that are eligible for public procurement;
- granting a preference margin for local subcontracting: this involves encouraging large companies to subcontract a share of their bids (30% of total value) by granting them, during tender bids, a preference margin on the price that may not exceed 5%;
- reducing requirements of administrative documents: in order to reduce constraints and thus the rejection of SMEs' offers during the Tender Opening and Bid Assessment Committee (*Commission d'Ouverture des plis et de Jugement des Offres*) preliminary review for absence or non-validity, it was decided that tax and labor certifications are now only required upon market approval;
- raising awareness of contracting authorities for a favourable allocation to SMEs;
- introducing simplified competitive processes in public procurement;
- reducing the amount of the provisional deposit; and
- implementing a company categorization.

Moreover, in the context of the consolidation of the public procurement system, several actions were carried out in 2018, including the following:

- all public procurement units have become operational and cover all ministries since October 2018;
- the dematerialized public procurement system is now operational in ten ministries, with the "*e-marchés publics*" (electronic public procurement) module since July 2018; and
- 12 State enterprises and 26 national public institutions are connected to the Integrated Public Procurement Management System (SIGMAP) via the Internet;

- preparation of amendments to the Public Procurement Code to take into account new methods of contracting and new methods of bid evaluation with a view to ensuring more efficient public procurement procedures. The revised code is expected to be adopted by the Council of Ministers by the end of 2019;
- continuation of the process of dematerialisation of public procurement procedures with the extension of Phase 1 modules to all ministries at the end of December 2019. Phase 2, which is dedicated to the private sector, will be implemented with the support of the World Bank and tested in 2020 with a view to generalizing the dematerialization process in 2021; and
- the connection of national public institutions and state enterprises to the Integrated Public Procurement Management System (SIGMAP) in a gradual manner from the first quarter of 2019 with a view to covering all these entities by the end of 2019.

### **The Budget Process**

The process begins each year in March and ends with the submission of the draft budget to the National Assembly at the latest on the first Tuesday of October. The draft budget becomes a Finance Law (*Loi des finances*) upon a vote by the National Assembly. The Finance Law for each year is enacted by the President of the Republic and made effective as of January 1st of the relevant year.

Côte d'Ivoire's budget elaboration process comprises the following steps:

- development of the macro-economic framework: it allows for the making of projections for the main aggregate figures for the years to come with regards to macroeconomic growth;
- validating the macroeconomic framework: it allows the Government to declare its approval or suggest adjustments to the macroeconomic framework;
- development of the budgetary framework: this aims to establish a balance between the commitments of the State and available resources;
- validation of the budgetary framework: this enables the Government to approve the spending decisions and the level of available resources and opens the way to the distribution of funds between the Ministries, Institutions and Decentralized Authorities;
- determination of the use of budgetary funds: this allows the allocation of budgetary credits to the Ministries, Institutions and Decentralized Authorities;
- Prime Minister's framework letter: this communicates to the Ministries, Institutions and Decentralized Authorities the budgetary funding allocated to each of them;
- budgetary conferences with the Heads of Administrative and Financial Affairs (*Directeurs des Affaires Administratives et Financières*): this allows for an examination of the proposed allocations prepared by the Ministries, Institutions and Decentralized Authorities;
- arbitrage and amendments to the draft budget: these aim to summarize the modifications carried out and an arbitrage of additional requests;
- adoption of the draft budget by the Council of Ministers: this marks the end of the executive power's involvement in the budget elaboration process; and
- examination of the budget by the National Assembly: this step allows the National Assembly to examine the budget after a presentation by the Minister in charge of Budget, after which the budget is voted into law.

In order to ensure that budgeted investments are carried out efficiently, a research fund was set up by the Government in 2012 to finance the necessary feasibility studies for relevant projects. For 2018, this fund received an allocation of CFAF 10.0 billion. CFAF 15.0 million has been allocated to it for 2019.

To render Côte d'Ivoire's budget management more transparent and more efficient, the Government has instituted a publicly available quarterly report. A publicly available quarterly report on the status of public procurement contracts awarded by the Ministry in Charge of the Budget has also been instituted. Adjustments may be made to the national budget via Amended Finance Laws (*Lois de Finances Rectificatives*), adopted under the same conditions as the Finance Law (*Loi de Finances Initiale*).

### **New Framework for Public Finance Management**

In 2009, the Council of Ministers of the WAEMU adopted six new Directives for purposes of harmonizing the public financial management legal framework in the Union. This new framework institutes, among other things, multi-year expenditure programs and budgeting by program.

Côte d'Ivoire transposed the WAEMU Directives into national law following the adoption by the National Assembly of two laws (*lois organiques*) voted on 5 June 2014: one establishing a Transparency Code, and another one dealing with the Finance Law. Four implementing decrees were adopted on 9 July 2014 with respect to:

- the State Budget Nomenclature: this decree sets the fundamental principles of presentation of the general budget, ancillary budgets and special Treasury accounts.
- the State Financial Transactions Table: this decree sets the general principles relating to the preparation and presentation of the statistics on the financial transactions of the WAEMU member States.
- the Accounting Plan of the State: it determines the subject matter of the State's general accounting and the standards, rules and procedures relating to its preparation and the production of the accounts and financial statements. It adopts an accounting plan the basis of which is common to all WAEMU member States.
- the General Rulebook on Public Accounting: it sets the fundamental rules governing the spending of public budgets, accounting, control of financial transactions, management of public funds, values and assets.

The principal changes brought about by the adopted laws include:

- the shift from a means- to an outcome-oriented strategy so that public money is spent more efficiently;
- the use of multi-year budgets;
- a programme-based approach: the budget will no longer be presented by expense items but by "programmes" regrouping credits implementing an action or a coherent set of defined actions for the medium-term;
- the decentralization of the principal authorizing power: the Ministers and Institution Presidents are the principal authorizers of credits and their programmes;
- a debate on budget execution in the National Assembly at the end of the second quarter of every year, during which the Government will defend its social and economic policies; and
- the reinforcement of the mission of each Technical Minister: to this effect, each Minister will have to defend his budget in front of the National Assembly and provide an account of his management through a detailed yearly performance report.

In order to facilitate the application of these rules, the Government carried out several actions in the course of 2018, including:

- the transposition of the community Directive relating to stock records in the national legal framework. Decree no. 2018-928 of 12 December 2018 on stock records determines the organization, management and control of operations relating to the accounting of materials held in inventory. With this legal framework, the keeping of sincere, accurate, regular, precise and exhaustive accounting records will facilitate the decision-making process, and so, to contribute to the control of asset management by public decision makers;

- continued work to finalize the Budgetary and Accounting Information System which will allow for the preparation and spending of the budget as part of the budget programme. The development module has been completed and work in relation to the execution module is being finalized;
- the adoption of directive no. 001/SEPMBPE/DGBF/DRBMGP of 20 December 2018 providing for the terms for the codification of budget items;
- continued preparation of the Annual Performance Reports (*Rapports Annuels de Performance* (APRs)) by five pilot ministries, which began in 2017 and the ongoing education of the other ministries in view of preparing their respective APRs;
- continued dissemination of collections of transposed regulations, the methodological guide on performance and instructional guides;
- the adoption of the circular no.0567/cab-PM/SEMPBPE/DGBF/DRBMGP on the designation of the Programme Managers within the various Ministries; and
- the continued strengthening of the capacities of the central and decentralized parties involved in the implementation of the program budgets as described in the organic law relating to finance laws.

Moreover, in order to consolidate the legal framework for public finance management, decree no. 2019-81 of 23 January 2019 on the Charter for the Management of Programs and Allocations (*Charte de Gestion des Programmes et des Dotations*) was adopted in January 2019. This decree defines the roles and responsibilities of the various participants involved in the implementation of programs and allocations as well as rules relating to their management. It also sets out the rules relating to the steering and performance of programs.

### ***Treasury Single Account***

A methodology for the creation of a Treasury Single Account (*Compte Unique du Trésor*) (“TSA”) and a timetable for closing the public accounts in commercial banks were adopted in December 2014.

Treasury management will be further modernised and optimised through the TSA’s implementation, which addresses the necessity of controlling all public funds in real time and ensuring optimal management of treasury and public debt. To this end, all public resources must be held in a Settlement Account with the BCEAO from which all State expenditures will be carried out.

Accordingly, the Government initiated a survey of public accounts mainly held with commercial banks and the Central Account Agency (*Agence Comptable Centrale des Dépôts*) (“CAA”) (also referred to as the Government Deposit Bank (*Banque des Dépôts du Trésor*)). The closing process has begun with dormant or redundant accounts. A pilot phase relating to the revenue section of the TSA has also been launched. To this end, the CAA agencies have been given equipment to scan bank notes so as to accelerate collection of revenue for deposit in the TSA. This operation is expected to aid in rapidly processing bank accounts held by these agencies.

The revenue and expenditure components of the TSA are now operational at the level of the Directorates-General for Taxes, Customs and the Public Treasury. After the pilot phase of the TSA from 28 February 2017 to 24 January 2018, which was deemed satisfactory, the rollout is under way with the completion of the first phase in December 2018, which involved 278 line items for the revenue component and 65 accounting line items for the expenditure component.

Thus, at the end of December 2018, 1,121 accounts have been closed in public and commercial banks. The operationalization of the TSA should accelerate the closure of bank accounts.

### ***Integrated System for the Management of Public Finances***

In order to ensure control over public expenditures, in 1999 the Government introduced a management tool for public finances, known as the Integrated System for the Management of Public Finances (*Système Intégré de Gestion des Finances Publiques* – “SIGFiP”). This system connects principal participants of the public expenditure chain and provides a framework for expenses within budgetary allocations and regulates the budget.

## Revenues and Expenses

The table below shows the changes in public revenues and expenses from 2012 to 2018 as set forth in the State Financial Transactions Table (*Tableau des Opérations Financières de l'Etat*):

<i>in CFAF billions</i>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
<b>Total revenues and Grants</b> .....	<b>2,621.5</b>	<b>3,039.5</b>	<b>3,293.3</b>	<b>3,916.8</b>	<b>4,176.6</b>	<b>4,523.4</b>	<b>4,764.1</b>

Source: MEF/DGE/DPPSE

(1) Total revenues (excluding grants) minus expenses, excluding scheduled interests and investment expenses financed through foreign resources.

In 2018, the situation of public finances indicates tax collection levels stood at CFAF 3,882.4 billion (16.2% of GDP) compared to a target of CFAF 3,947.3 billion (16.5% of GDP). The difference of CFAF 64.9 billion is due to the weak performance of domestic tax (CFAF -14.9 billion) and to port taxes (CFAF -61.6 billion). Compared to 2017, tax revenues and net expenditure and loans improved by 5.3% and 3.4% respectively. Specifically, capital investment expenditure increased by 1.3%.

Total expenses and net loans were CFAF 5,708.3 billion in 2018 compared to a target of CFAF 5,833.7 billion, an underutilisation of CFAF 125.4 billion primarily in connection with an implementation level of investment expenses lower than expected at CFAF 111.6 billion (an implementation rate of 93.3%), and an underutilisation of CFAF 24.7 billion in operating expenses.

The basic primary balance was a deficit of CFAF 99.2 billion and the total budgetary deficit was CFAF 944.2 billion, compared to expected deficits of CFAF 119.7 billion and CFAF 954.3 billion, respectively. Recourse to both domestic (CFAF 467.1 billion) and external financing (CFAF 1,115.1 billion) partly helped to finance this deficit.

## **Taxation**

### ***Missions of the General Tax Directorate (Direction Générale des Impôts)***

The *Direction Générale des Impôts* (“**DGI**”) is responsible for elaborating and applying fiscal and para-fiscal legislation and preparing and applying international tax treaties. As such, it is responsible for determining the tax base, the liquidation and the collection of taxes and the collection of fiscal and para-fiscal revenue other than customs duties on behalf of the State. It is also responsible for managing tax disputes relating to the tax base and tax collection.

### ***Certain Duties and Taxes***

#### General Income Tax

Côte d’Ivoire’s taxation system for natural persons includes category-specific taxes and a base tax on overall revenue, after deduction of category-specific taxes.

The base for the general income tax is the net overall income of natural persons. This is a progressive tax with a specific rate per earning band.

The general income tax is part of payroll and income taxes (excluding taxes on securities), which amounted to CFAF 314.7 billion in 2013, CFAF 339.5 billion in 2014, CFAF 354.4 billion in 2015, CFAF 403.7 billion in 2016, CFAF 449.0 billion in 2017 and CFAF 498.6 billion in 2018.

#### Tax on Industrial and Commercial Profit

The tax on profits is due on profits generated in Côte d’Ivoire, in particular arising from the exercise of commercial or industrial activities, provision of services, crafts or forestry, agricultural, mining or oil operations.

The ordinary tax rate is 25% for legal entities and 20% for individuals. The ordinary tax rate for companies operating in the telecommunications sector is 30%.

However, the amount of the tax may not be lower than a minimum amount equal to 0.5% of revenues (all taxes included) for the ordinary tax regime and 2% of revenues for the simplified tax regime, subject to certain exceptions.

Special provisions are provided for the taxation of the mining and oil sectors.

Côte d’Ivoire’s taxes on industrial and commercial profit (excluding oil and gas) represented CFAF 211.0 billion, CFAF 226.6 billion, CFAF 237.1 billion, CFAF 259.4 billion, CFAF 306.8 billion in 2013, 2014, 2015, 2016, and 2017 respectively. In 2018, they represented CFAF 354.1 billion.

#### Value Added Tax (VAT)

VAT is applied to activities carried out against payment such as deliveries of goods and provisions of services, excluding salaried and agricultural activities. Imports, operations carried out by the developers, and real estate agents and similar, the specialized transports and the deliveries of materials extracted in Côte d’Ivoire are also subject to VAT.

The WAEMU set the basic rate of VAT at between 15% and 20%, with a restricted list of exemptions.

However, in accordance with WAEMU community standards, WAEMU member states have the option of applying a reduced VAT rate ranging from 5% to 10% for certain products and operations.

With respect to Côte d'Ivoire, the base rate was reduced by the Finance Act 2003 from 20% to 18% to be applied to revenues before tax. In addition, a reduced 9% rate applies to certain recurrent consumer goods such as milk, 100% durum wheat semolina pasta and oil products.

Côte d'Ivoire's VAT revenues were CFAF 619.4 billion, CFAF 710.5 billion, CFAF 809.4 billion and CFAF 903.9 billion in 2015, 2016, 2017, and 2018, respectively.

The table below shows the changes in VAT revenues from 2012 to 2018:

	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>

## PUBLIC DEBT

### Overview

The Government stresses that external debt figures in this section for 2014 and later years do not take into account (i) the amount of debt eligible under Debt Reduction and Development Contracts (*Contrats de Désendettement et de Développement* (“C2D”)) due to France, and (ii) the amount of debt under the Program for the Conversion of Debt into Development Projects (*Programme de Conversion de dette en projets de Développement* – PCD) with Spain. C2D-eligible debt and PCD debt is excluded from the stock of external debt in accordance with the definition of the IMF and the World Bank (IMF report dated 20 November 2014).

Public debt is comprised of domestic and external debt. Public debt amounted to CFAF 11,607.8 billion at the end of 2018 (compared to CFAF 10,045.1 billion at the end of 2017), including CFAF 7,613.4 billion of external debt (CFAF 5,770.0 billion at the end of 2017) and CFAF 3,994.4 billion of domestic debt (CFAF 4,275.1 billion at the end of 2017). Outstanding public debt represented 48.6% of GDP in 2018 compared to 45.3% in 2017. The WAEMU convergence criteria for public debt is 70% of nominal GDP, Côte d’Ivoire complies with this standard.

Outstanding external debt at the end of 2018 comprised 18.1% in bilateral debt, 24.7% in multilateral debt and 57.2% in debt to private creditors. 93.6% of bilateral debt is due to creditors that are not members of the Paris Club, of which 80.6% is due to China, and 6.4% is due to members of the Paris Club, of which 6.2% is due to France. With respect to multilateral debt, the main creditors are the IMF (41.5%), the World Bank (the IBRD and IDA) (28.9%), the AfDB (9.0%), the IDB (8.8%) and the BOAD (6.8%). Private sector external debt, calculated based on total commercial debt, is essentially made up of Eurobonds (95.1%) maturing in 2024, 2025, 2028, 2030, 2032, 2033 and 2048.

Outstanding C2D-eligible debt stood at CFAF 811.3 billion (3.4% of GDP) at the end of 2018, compared to CFAF 965.1 billion (4.4% of GDP) at the end of 2017 and CFAF 1,080.1 billion (5.2% of GDP) at the end of 2016. Total stock of C2D-eligible debt represents a total amount of CFAF 1,044.2 billion at the end of 2018. This amount includes CFAF 295.2 billion in maturities to be paid under the C2Ds already concluded in 2019 and 2020 and a balance of CFAF 749 billion to be negotiated from 2021 onwards.

Outstanding PCD debt stood at CFAF 18.3 billion (0.08% of GDP) at the end of 2018 and CFAF 29.4 billion (0.13% of GDP) at the end of 2017.

At the end of 2018, domestic public debt was comprised of banking sector debt (68.8%) and non-banking sector debt (31.2%) incurred in WAEMU zone. Banking sector debt is principally borrowed from holders of securities issued by the Government on the primary financial market of the WAEMU (81.1%) and the BCEAO (9.9%). Non-banking sector public debt is mainly borrowed from holders of bond certificates (99.1%).

The table below presents the trends in public debt figures between 2014 and 2018. Figures are in CFAF billions, unless otherwise indicated.

	2014	2015	2016	2017	2018 (Estimates)
	<i>(CFAF billions)</i>

Source: Department of Public Debt and Grants (Direction de la Dette Publique et des Dons)

<sup>(1)</sup> Total debt, including C2D-eligible debt and PCD debt, amounted to CFAF 7,812.5 billion at the end of 2014, CFAF 9,198.1 billion at the end of 2015, CFAF 10,129.0 billion at the end of 2016, CFAF 11,039.7 billion at the end of 2017 and is estimated at CFAF 12,437.4 billion at the end of 2018.

<sup>(2)</sup> External debt, including C2D-eligible debt and PCD debt, amounted to CFAF 4,682.7 billion at the end of 2014, CFAF 5,772.4 billion at the end of 2015, CFAF 6,080.2 billion at the end of 2016, CFAF 6,764.6 billion at the end of 2017 and is estimated at CFAF 8,443.0 billion at the end of 2018.

Due to greater public investments (6.7% of GDP on average over the 2012-2018 period), the outstanding amount of public debt after cancellation of external debt obtained as a result of achieving the completion point of the HIPC initiative reached CFAF 7,914.8 billion (40.4% of GDP) in 2015, CFAF 9,023.2 billion (43.1% of GDP) in 2016, CFAF 10,045.1 billion (45.3% of GDP) at the end of 2017 and CFAF 11,607.8 billion (48.6% of GDP) in 2018.

The debt service is the sum of principal and interest recorded in the State's annual budget. The debt service paid corresponds to the sum of settlements made of both principal and interest, be it redemptions due in the current year or arrears paid in the current year.

### Public Debt Management Policy

The public indebtedness and public debt management policy in Côte d'Ivoire seeks to optimize the mobilization and use of loans, maintain the debt at a sustainable level and make effective, on-time payments upon the debt maturity dates, at the lowest cost and a prudent level of risk, both in the medium- and long-term. This policy aims to improve the process of determining the form of financing for the economy and optimize the decision-making process regarding the allocation of budget and financing resources in order to promote sustainable and inclusive growth.

Since 2011, the State has undertaken reforms in connection with public debt management to adopt an approach that meets international standards. This involves:

- implementing a new public debt management institutional framework through the creation of the Public Debt National Committee (*Comité National de la Dette Publique* ("CNDP")), the Debt Experts Committee (*Comité des Experts de la Dette* ("CED")) and the new Department of Public Debt & Grants (*Direction de la Dette Publique et des Dons* ("DDPD"));

- implementing a new legislative framework for managing public debt with the development of laws and decrees (for example the Law on national policy of public indebtedness in Côte d'Ivoire, the Decree amending Decree 83-501 of 2 June 1983 regulating the conditions for the grant of State guarantees and their management and the Decree on the reorganization of the CNDP);
- regulating and monitoring indebtedness via the SDMT and the DSA;
- reducing the country's credit risk, reflected by the Government's intent to continually improve the country's sovereign credit rating in foreign and local currencies; and
- complying with commitments toward its creditors.

### **Indebtedness and debt management institutional framework**

In order to attain its objectives relating to indebtedness and debt management, the Government considered it necessary to undertake further institutional reforms. The reforms carried out in 2011 resulted in the creation of the CNDP, the CED and the reorganization of the DDPD. In addition, a trading room was created to follow changes in the price and yield of securities in real time, in order to carry out transactions geared towards active debt management.

The CNDP was created by Decree No. 2011-424 of 30 November 2011. The CNDP is a body that coordinates the national indebtedness and debt management policy with budgetary and monetary policies. It is under the authority of the Minister of Economy and Finance. This Committee is responsible for approving and monitoring the SDMT's implementation, validating significant readjustments to the annual financing plan during the course of the fiscal year and approving non-concessional and unanticipated financing to the annual financing plan.

The CED was created by ministerial decree No. 078/MEF/MPD/SEPMBPE of 5 February 2018 on the creation, organization and functioning of the Debt Experts Committee. Like the CNDP, the CED is placed under the authority of the Minister of Economy and Finance. Its mission includes preparing the medium-term debt management strategy document, examining the annual financing plan, expressing an opinion on various financing options and carrying out any assignment entrusted to the CNDP. The CED examines all documents before they are sent to the CNDP.

Pursuant to Article 13 of WAEMU Regulation no. 9, which provides that "*Each Member State shall prepare and implement a manual of procedures relating to the borrowings and debt management functions and activities*", a CNDP manual of procedures has been prepared.

The new DDPD, created by Decree No. 298/MPMEF/DGTCP/DEMO of 11 August 2015 as amended by Decree No. 512/MPMEF/DGTCP/DEMO of 30 December 2016, is from now on the sole debt management entity. It is organized with a front, middle and back office in accordance with international standards. The reorganization of the DDPD aims to centralize all the departments responsible for public debt management (single debt desk) and the treasury for more effective functioning.

At the WAEMU level, the *Agence UMOA-Titres*, in collaboration with the BCEAO, undertook reforms, namely with the introduction of Primary Dealers (*Spécialistes en Valeurs du Trésor*, "SVT") to stimulate the financial market in order to raise more significant amounts. Côte d'Ivoire has ten institutions authorized as SVTs by the Public Treasury since 7 September 2015. SVTs are responsible for participating in Treasury securities issuances by tender and by syndication, leading the secondary market of public debt securities, promoting Treasury securities and providing advisory and information services to the Treasury and the *Agence UMOA-Titres*. SVTs are effectively operating since 1 March 2016.

### **The SDMT and the DSA**

The use of loans is governed by the SDMT, which is prepared each year and reinforced by the DSA. The SDMT helps to guide the Government's decisions on indebtedness and public debt management every year. At the end of 2018, the rate of indebtedness of 48.6%, like that of previous years, remained below 70% (the WAEMU indebtedness convergence threshold) with a moderate risk of over-indebtedness. However, the Government is working to improve the debt sustainability level, namely by strengthening the macroeconomic framework.

Current financing over the 2016-2020 period required for the implementation of the NDP stands at CFAF 30,000 billion, including CFAF 11,284 billion for the public sector. In order to reach this target, the State, while remaining cautious, is focusing in particular on investor diversification and new financing opportunities. This includes resorting to (i) the international financial market, (ii) Islamic loans and (iii) the domestic financial market, in order to develop this market. The SDMT's objective for this same period is to borrow under the most favourable conditions (i.e. extend the maturities of public securities, reduce the cost of loans, limit exchange rate risk, favour external financing for structural projects and increase the use of semi-concessional loans).

The table below sets out the new disbursements of the Central Administration for 2019 to 2023:

Sources and Types of Instruments	2019	2020	2021	2022	2023	Average 2019- 2023
	60	70	70	70	70	68

(1) CFAF of West Africa (XOF).

The 2019 financing plan, elaborated after discussions between Côte d'Ivoire and the IMF, provides for a CFAF 2,344.9 billion financing requirement, including CFAF 1,524.3 billion in external debt and CFAF 820.6 billion in domestic debt.

The table below sets out the outstanding public debt profile for 2018 to 2023, taking into account borrowings projected during the period from 2018 to 2023:

YEAR	2018 (Estimates)	2019 SDMT	2020 SDMT	2021 SDMT	2022 SDMT	2023 SDMT
<b>TOTAL</b>	11,607.8	12,422.5	13,207.4	13,976.2	14,562.1	15,125.6
As a % of GDP	48.6%	47.9%	46.7%	45.3%	43.3%	41.3%
<b>Source of financing</b>						
<b>External</b>	7,613.4	8,290.0	9,467.4	10,497.0	11,556.3	12,688.0
<b>Domestic</b>	3,994.4	4,132.5	3,740.0	3,479.2	3,005.8	2,437.6
Nominal GDP (CFAF billions)	23,899.8	25,955.1	28,307.7	30,858.5	33,619.3	36,580.5

Source: CNDP

This strategy helps to contain the average cost of the debt portfolio, reduce the risk of refinancing, limit exchange rate risks and improve the indebtedness rate over the long-term. The expected composition of the public debt portfolio by 2023 is a 70-30 distribution between external debt and domestic debt compared to a 66-34 distribution, at the end of 2018. The debt exposed to exchange rate fluctuations (which excludes CFAF and EUR due to the fixed exchange rate between these two currencies) in 2023 should be reduced by 29.1% compared to 37.1% in 2018.

The share of domestic debt maturing within one year should be limited to 19% in 2023 compared to 20% in 2018 in connection with the profile of existing debt and the investor base which still relies mainly on banks.

While the risk of external over-indebtedness is considered to remain moderate, however, the portfolio of external debt remains vulnerable to a shock from deteriorating export revenues, a depreciation of the euro/US dollar exchange rate or tighter financing conditions.

Similarly, while the risk of overall indebtedness also remains moderate, the portfolio of total public debt remains vulnerable to a shock from a deterioration of the economic growth rate.

### **Reducing the country's credit risk**

Sovereign financial ratings help to evaluate solvency and credit risk. The authorities have adopted this process to meet the Government's objective of improving the country's image vis-à-vis investors and strengthening mutual confidence in order to obtain financing at competitive terms. In 2014, the international credit rating agencies Moody's and Fitch assigned Côte d'Ivoire ratings of B1 and B, both with a positive outlook. These ratings reflect the country's performance on economic, financial and socio-political levels following the post-election crisis. At the end of the last quarter of 2015, Côte d'Ivoire's rating was upgraded, from B1 to Ba3 by Moody's, with a stable outlook, and from B to B+ by Fitch, with a stable outlook. Fitch and Moody's confirmed these ratings in 2016, 2017 and 2018, as well as by Fitch only in 2019 as of the date of this Prospectus.

According to Fitch's fifth review of Côte d'Ivoire's sovereign rating, which took place in November 2016, the country benefits from a stable currency, moderate inflation and lower macroeconomic volatility than other countries in the WAEMU, resulting to a large extent from its membership to the WAEMU and, to a lesser extent, a certain degree of economic diversification. As Côte d'Ivoire is the largest economy of the WAEMU, it benefits from its situation as a regional centre, which increases investment opportunities.

Good relations with the international community since 2012 have helped the country secure substantial amounts of concessional loans to finance reconstruction and development efforts.

### **Complying with commitments toward creditors**

The Government is committed to making debt service payments on time and not accumulating debt arrears. In this respect, Côte d'Ivoire has respected all of its public, external and domestic debt service commitments. From 2012 onwards, the State has not accumulated any arrears.

Côte d'Ivoire's last debt service arrears date back to 2011. During the 2011 post-election crisis, Côte d'Ivoire was not able to honor the interest payments in respect of the 2032 Eurobonds falling due in December 2010, June 2011 and December 2011, totalling approximately US\$91.0 million; which led to a payment default on these interest payments. In November 2012, Côte d'Ivoire agreed an arrears clearance plan providing for full settlement of these three missed interest payments by 31 December 2014 and fully complied with its undertaking under this plan.

In 2018, the current debt maturities (external and domestic) falling due amounted to CFAF 1,547.2 billion. These payments included CFAF 610.2 billion of external debt service and CFAF 937.0 billion of domestic debt service. For this service, the Government made a payment of CFAF 147.6 billion for the annual C2D payment with France and CFAF 11.1 billion for its PCD with Spain.

### **Public Debt**

The table below sets out the debt profile for the next 10 years on the basis of provisional outstanding debt estimates at the end of December 2018 (provisional figures in CFAF billion), using end-of-period exchange rates (published by the IMF), (with USD 1 = CFAF 572.89 in 2018 and USD 1 = CFAF 546.95 in 2017), with the situation in 2016, 2017 and 2018 as a reminder. As a result, they do not take into account disbursements after 2018.

*Source: Department of Public Debt and Grants*

Since 31 July 2018, the thresholds of indebtedness indicators are defined by a composite index taking into account the CPIA (initially used for the definition of thresholds). Côte d'Ivoire's composite index is 2.95 and ranks it among the countries with moderate debt capacity. The ratio of the current value of debt to GDP was assessed at 45.0% at the end of 2018 and remains below the reference point (55%) of the IMF Debt Sustainability Assessment Framework.

The continuation and the finalization of ongoing investment works in the country will require more borrowing in 2019 and for the following years. These borrowings are expected to lead to a significant increase in total outstanding debt. The Government intends to align the pace of the debt's growth with that of the GDP so that changes in the debt ratio remain under control.

The table below sets out Côte d'Ivoire's outstanding public debt with a residual maturity of up to one year, from 2014 to 2018:

	2014	2015	2016	2017	2018
External debt	7.40	7.20	0	2.82	18.3
Domestic debt	370.89	401.98	339.20	311.18	387.2
<b>Total debt</b>	<b>378.29</b>	<b>409.18</b>	<b>339.20</b>	<b>313.98</b>	<b>405.4</b>

*Source: Department of Public Debt and Grants / in CFAF billions*

The weighted average maturity of the total debt portfolio at the end of 2018 was eight years and two months; that of external debt was ten years and one month and that of the domestic debt four years and six months. The average interest rate of the total public debt portfolio stood at 4.2% at the end of 2018. The average cost of external debt (including concessional and non-concessional borrowings) stood at 3.8% at the end of 2018, and the average cost of domestic debt stood at 4.9%.

### **External Public Debt**

External debt is comprised of bilateral debt, multilateral debt and debt held by private creditors (including commercial debt and international capital markets issues).

As of the date of this prospectus, the average cost of the external public debt is estimated at 3.8%.

At the end of December 2018, the total outstanding amount of external public debt was estimated to be CFAF 7,613.4 billion, compared to CFAF 5,770.0 billion at the end of 2017 and CFAF 4,974.2 billion in 2016. The increase in 2018 compared to 2017, representing CFAF 1,843.4 billion, or 31.9%, is primarily attributable to the 2030 and 2048 Eurobonds issued in 2018, the disbursements relating to the project loans of Eximbank China (CFAF 179.3 billion), the World Bank

(CFAF 116.7 billion), the AfDB (CFAF 54.8 billion), the IDB (CFAF 39 billion), the BOAD (CFAF 13.8 billion) and Eximbank India (CFAF 12.4 billion), as well as budgetary assistance from the IMF (CFAF 154.4 billion).

In 2018, debt service due for external debt, totalling CFAF 610.2 billion, was fully repaid, including the C2D payment of CFAF 147.6 billion and the PCD payment of CFAF 11.1 billion.

As of the date of this Prospectus, the Government is in compliance with all its borrowed moneys obligations, having made all debt payments in a timely manner, for an amount of CFAF 1,180.7 billion, including CFAF 477.1 billion to its external creditors in 2019.

The external public debt position of Côte d'Ivoire on 31 December 2018 is set out in the table below (in CFAF billions):

31 December 2018	MULTILATERALS			BILATERALS			PRIVATE CREDITORS			TOTAL

<sup>(1)</sup> External debt and domestic debt (BOAD, IMF, WAEMU).

At the end of 2018, the CFAF (XOF) is the dominant currency in Côte d'Ivoire's debt (42.4% of the total), followed by the US Dollar (31.5%) and the Euro (20.5%). The CFAF is the national currency and all domestic debt (34.4% of the portfolio of public debt) is denominated in CFAF. Furthermore, certain multilateral organizations, in particular the IMF and the BOAD hold loans denominated in CFAF. Outstanding debt denominated in Euro includes essentially the 2025, 2030 and 2048 Eurobonds, debt owed to France and to the European Investment Bank (*Banque Européenne d'Investissement*), which together represent 31.3% of total external debt. The relatively high level of debt denominated in US Dollars is mainly due to the outstanding Eurobonds due 2024, 2028, 2032 and 2033 (48% of the external debt) and structured loans due to China.

The table below sets out the changes in outstanding external public and publicly guaranteed debt in 2019-2023, following the medium-term debt management strategy:

	<b>2019</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>	<b>2023</b>	<b>Average 2019-2023</b>
<b>External debt.....</b>	<b>8,290.0</b>	<b>9,467.4</b>	<b>10,497.0</b>	<b>11,556.3</b>	<b>12,688.0</b>	<b>10,499.7</b>

<b>Guaranteed debt ..</b>	<b>368.3</b>	<b>317.5</b>	<b>267.4</b>	<b>217.2</b>	<b>166.8</b>	<b>267.4</b>
<b>Total.....</b>	<b>8,658.3</b>	<b>9,784.9</b>	<b>10,764.4</b>	<b>11,773.5</b>	<b>12,854.8</b>	<b>10,767.2</b>

*Source: Department of Public Debt and Grants*

Over the 2019-2023 period, external public debt service is expected to record an upward trend, due to Eurobond maturities, particularly the 2032 Eurobonds, whose grace period on principal payments expired at the end of 2015, coupons of the 2024, 2028, 2025 and 2033 Eurobonds and repayment of IMF budgetary support.

### ***Domestic Public Debt***

The amount of domestic debt has been constantly growing since 2002 after the removal of statutory advances by the BCEAO. Indeed, the BCEAO used to grant to each member State of the WAEMU a cash advance as a percentage of the Member State's economic weight within the Union. This direct monetary assistance was terminated in 2003, resulting in significant recourse to domestic issuance on the WAEMU market to finance the Government's budget needs.

As at the end of December 2018, the total estimated amount of domestic debt amounted to CFAF 3,994.4 billion (excluding the CFAF 491.6 billion outstanding publicly guaranteed domestic debt), compared to CFAF 4,275.1 billion in 2017, CFAF 4,049.1 billion in 2016 and CFAF 3,425.7 billion in 2015. This debt includes mainly outstanding debt held by various investors in market securities (including banks) (CFAF 3,479.5 billion, or 87.1%), the BCEAO (CFAF 395.4 billion, or 9.9%), commercial banks (excluding market securities) (CFAF 107.8 billion, or 2.7%) and private sector companies (CFAF 11.7 billion, or 0.3%). This debt is denominated in CFAF.

It is important to note that the Government negotiations with the BCEAO led to the signing of a rescheduling agreement in January 2015 with respect to the debt stock due 31 December 2014, excluding SDR special allowances for which the maturities are paid on time. The terms of this restructuring, currently underway, of a global amount of CFAF 366.48 billion, are as follows:

- rescheduling over 40 years, with a ten-year grace period, of the consolidated statutory overdrafts. The interest rate is 3% and repayments would be semi-annual; and
- rescheduling over 30 years, with a ten-year grace period, of the repayment of cash withdrawn from the BCEAO branches of Bouaké, Man and Korhogo during the post-election crisis and the payments due to the IMF made by the BCEAO for the account of Côte d'Ivoire. The rate is nil and repayments would be semi-annual.

The table below presents the situation of outstanding domestic public debt at 31 December 2018 (in CFAF billions, unless otherwise indicated):

<b>CREDITORS</b>	<b>Outstanding Debt as of 31 December 2018</b>	<b>As a % of Outstanding Debt</b>	<b>As a % of GDP</b>
<b>Domestic Debt</b> .....	<b>3,994.39</b>	<b>100%</b>	<b>16.7%</b>

Source: Department of Public Debt and Grants

As of the date of this Prospectus, the average cost of domestic public debt is 4.8%.

## Guarantees

The outstanding amount of guaranteed debt at the end of 2018 amounted to CFAF 491.8 billion and corresponds to 2.1% of GDP. It includes in particular the SIR debt of CFAF 338.9 billion (amount actually disbursed out of a total of CFAF 368 billion) and the Cashew and Cotton Council of CFAF 107.3 billion.

Unlike public debt borrowings, the issue of guarantees by the State is not subject to parliamentary approval. Guarantees are granted by the Minister in charge of finance and subject to authorization or ratification by a decree adopted in the Council of Ministers. Guaranteed debt is not included in the calculation of the State's public debt figures. The Government's policy is to grant guarantees only in limited cases, in light of the fact that amounts covered by State guarantees are taken into account in Côte d'Ivoire's DSA. As of the date of this Prospectus, the existing guarantees are those granted to Air Côte d'Ivoire, to the Cotton and Cashew Nut Council and to the SIR, amounting to CFAF 490.6 billion at the end of December 2018. In 2015, the State granted a guarantee in respect of a 10-year loan incurred by Air Côte d'Ivoire for the purpose of financing the acquisition of aircraft. The total amount covered by this guarantee was CFAF 34 billion as of 31 December 2017. In October 2016, the Government approved a strategy for restructuring the debt of SIR, estimated at CFAF 368 billion in early 2016. The restructuring of accumulated debts, through a new long-term loan in an amount of CFAF 368 billion guaranteed by the Government, was completed in December 2018. The repayment of the loan is backed in part by the ongoing fuel surcharge (*soutien à la marge*) granted by the Government to SIR. This surcharge will be consolidated in the budget and the Government will transfer its proceeds as a subsidy to SIR (see "The Economy").

## Financial debt of State-related entities

State-related entities are public sector bodies, in particular national public institutions (*établissements publics nationaux*, "EPN"), including administrative public institutions (*établissements publics administratifs*, "EPA") and industrial and commercial public institutions (*établissements publics à caractère industriel et commercial*, "EPIC").

The financial and accounting regime of EPN is established by the following regulations: Law No. 98-388 of 2 July 1998 establishing rules and categories applicable to EPN and Decree 81-137 of 18 February 1981 regarding the financial and accounting regime of EPN, which set out in particular the conditions under which an EPIC may apply for loans. Pursuant to these regulations, (i) the loan must be for an investment project, (ii) the opportunity analysis must demonstrate the economic, financial and social profitability of the proposed investment and (iii) at least 60% of the entity's resources

must be its own funds. In addition, any borrowing by these entities is subject to the prior authorization of the Ministries in charge of the Budget and Finances who ensure compliance with the above-mentioned conditions. The directorate in charge of reviewing these proposed loans has the authority to approve the financing proposals of the investment projects presented by the EPN.

As of the date of this Prospectus, no EPN has incurred external or domestic financial debt.

In 2018, the 102 EPN (including 17 public health institutions and 16 public higher education institutions) had a cumulative budget of approximately CFAF 478.7 billion, compared to a budget of CFAF 468.5 billion in 2017. In the 2018 budget, operating expenses stood at approximately CFAF 362.5 billion (75.7% of the budget) and investment expenses stood at approximately CFAF 116.2 billion (24.3% of the budget).

## **Hedging**

The Minister of Economy and Finance of Côte d'Ivoire may enter into swap and other derivatives transactions for the purpose of managing the State's debt liabilities, subject to prior authorization by the Council of Ministers. In this context, as part of the debt management strategy in the medium term, Côte d'Ivoire entered into a strip of FX Forwards transaction to hedge the currency risk associated with its external public debt in September 2018. This currency hedging transaction concerned the service of public debt denominated in US Dollars, for a total amount of USD 1.4 billion, and made it possible to fix the euro/dollar exchange rate for part of the maturities to be paid for debt service on Eurobonds denominated in US Dollars over the period from December 2018 to December 2022.

## **Relationship with Creditors**

### ***Concessional and Non-Concessional Debt***

Unlike non-concessional debt, concessional debt is characterized by lower interest rates, longer maturities and relatively long grace periods. For Côte d'Ivoire, concessional loans include a grant element of at least 35%. According to the IMF, a non-concessional loan includes a negative grant element, whereas concessional financing contains a grant element of at least 35%. A loan is deemed semi-concessional when its grant element is positive but less than 35%. As such, the authorities prioritize recourse to concessional loans in the context of the SDMT management. However, the significant financing need, in line with the high level of public investments and the scarcity of concessional financings, have led the Government to turn to non-concessional forms of financing, including bond issuances such as the Eurobonds. These resources will be used for the financing of development projects provided for 2016-2020 NDP.

The issuance of the 2030 and 2048 Eurobonds on non-concessional terms was taken into account by the SDMT 2018-2023 and was authorized in the 2018 budget. The Government believes that such non-concessional financing allows Côte d'Ivoire to achieve the investments necessary to reach the emerging country status objective.

However, Côte d'Ivoire intends to find the means to finance its development with controlled costs and risks. The reliance on financing by the State should not lead to unlimited borrowing. To this end, the Government intends to use new sources of financing, while complying with the strategic choices recommended by the SDMT.

### ***Multilateral Debt***

In terms of multilateral debt, the principal creditors, based on their share in the outstanding debt at the end of 2018, are the IMF (41.5%), the World Bank "IBRD and IDA" (28.9%), the AfDB (9.0%), the IDB (8.8%) and the BOAD (6.8%).

### **Heavily Indebted Poor Countries Initiative**

Côte d'Ivoire reached the completion point of the Heavily Indebted Poor Countries ("HIPC") initiative in June 2012. This success allowed the country to benefit from CFAF 4,090.0 billion in external debt relief vis-à-vis its multilateral creditors and the Paris Club creditors. These debt cancellations involved debt relief under the HIPC initiative and additional debt relief under the MDRI and the implementation of C2Ds by France. In addition to HIPC debt cancellations,

80% of total commercial debt in connection with the Brady bonds held by London Club creditors was exchanged in April 2010 for 2032 Eurobonds, of a term of 23 years, with the remaining 20% being cancelled.

All this restructuring significantly contributed to restoring Côte d'Ivoire's debt servicing capacity, the sustainability of its public debt and of its public finances. The most recent Ivorian DSA prepared by the CNDP in December 2018 and the one prepared by the IMF's department in September of that same year concluded that the risk of over-indebtedness remains moderate, notwithstanding the significant volume of loans taken out between 2012 and 2018, including three Eurobonds denominated in US Dollars and three Eurobonds denominated in Euros.

However, Côte d'Ivoire's debt remains vulnerable to potential external economic shocks. Since 2011, the Government has undertaken various institutional reforms whose primary objective is to control the changes in its indebtedness ratio. The following main reforms were carried out:

- the CNDP was created in 2011 and is operational;
- the Debt Experts Committee (CED) was created in 2018 and is also operational;
- a draft law establishing a national public debt policy was prepared and is currently being finalized;
- a document on the SDMT is regularly prepared and annually updated at the same time as a DSA;
- the department responsible for public debt management was reorganized into a single entity with a front, middle and back office. At the back office level, the scope of the public debt management has been expanded to take account of public organization debt.

In terms of the outlook of external debt management, the authorities intend to continue to carry out and strengthen reforms in order to effectively contain costs and risks related to new external loans, in particular funds to be obtained from the international financial market. This involves:

- sustaining improvement of the SDMT's quality, including through the conduct of more detailed analysis and evaluating risks related to different loan instruments, simulating a larger debt burden by taking into account the other conditional liabilities;
- smoothing out the medium-term debt repayment profile (for example, avoiding a concentration of significant maturities between 2024 and 2028);
- carrying out, as needed, buyback transactions as important debt maturities draw near;
- hedging against potential risks related to new loans from the international market;
- diversifying the investor base by focusing new loans on niche financing that has not yet been sufficiently explored (for example, Islamic finance);
- improving the quality and reliability of the debt reporting of public undertakings through the interconnection between the Debt Analysis and Management System (SYGADE) and the Public Company Information and Management System (SIGEP).

#### International Monetary Fund (IMF)

Côte d'Ivoire has maintained good relationships with multilateral institutions, including the IMF, as evidenced by the visit made to Côte d'Ivoire by the Deputy Managing Director from 24 February to 27 February 2016 and the entering into of a new economic program supported by the Extended Credit Facility ("ECF") and the Extended Fund Facility ("EFF") for the 2016-2019 period.

Between 2009 and 2011, an economic and financial program supported by the ECF (formerly the PRGF) was adopted, but its implementation was disrupted by the post-election crisis from November 2010 to April 2011. The Rapid Credit Facility was then adopted in May 2011 and its successful implementation allowed the creation of another ECF over the 2011-2015 period.

The 2011-2015 ECF allowed for the implementation of important structural reforms in key economic sectors (public finance, governance, the coffee-cocoa sector, financial sector, energy sector, business climate and a reform of public administrations). This was followed by the restoration of macroeconomic stability and an improvement in the economy's competitiveness and resilience.

The implementation of the 2009-2011 and 2011-2015 three-year programs, supported by the ECF, helped to reach the completion point of the HIPC initiative in June 2012, thereby significantly reducing total debt from 69.9% of GDP in 2011 to 33.9% of GDP in 2012.

The debt portfolio remained relatively less costly due to, in particular, a diversification of instruments used and international sovereign ratings.

The satisfactory implementation of the Economic and Financial Program resulted in access to more significant resources. Total disbursements under the 2012-2015 ECF agreement stood at US\$728.84 million. Furthermore, Côte d'Ivoire was able to raise funds on the international capital markets at competitive interest rates.

To support the 2016-2020 NDP, the Government entered into a new agreement on 12 December 2016 under an economic and financial program with the IMF for the 2016-2019 period. The new EFP/EFF-ECF program has granted access to a combined total of SDR 487.8 million (about US\$658.9 million, or 75% of Côte d'Ivoire's quota), given Côte d'Ivoire's outstanding credit (119.1% of its share) and the fact that its share doubled at the end of 2015 to reach SDR 650.4 million.

The four program reviews already carried out by the IMF have all considered that the implementation of Côte d'Ivoire's economic and financial program was satisfactory.

According to IMF report no. 17/372 Second reviews under the EFF-ECF from December 2017, Côte d'Ivoire was selected from among the seven countries eligible to receive the 2017 funding as part of the G20 Compact with Africa.

For the fifth review, the IMF delegation that visited Côte d'Ivoire from March 14 to March 27, 2019 and the Ivorian authorities reached an agreement, approved by the IMF Management and the Board of Directors on 14 June 2019 (see IMF report no. 19/197). The IMF's report confirmed that all quantitative indicators and almost all structural benchmarks had been met and accordingly the IMF maintained its growth forecasts for 2019 and 2020.

For the sixth review, the IMF delegation visited Côte d'Ivoire from September 17 to October 1, 2019. The resulting report is expected to indicate that performance under the IMF-supported program was satisfactory in the first half of 2019. All performance criteria and all indicative targets for end-June 2019 were met. All but one of the structural benchmarks on public finance management, public enterprise monitoring, and tax policy and administration were also met. The fiscal budget deficit is expected to converge with the WAEMU regional deficit norm of 3.0 percent of GDP in 2019 thereby meeting a key program objective. The IMF mission and authorities reached a staff level agreement, subject to IMF Executive Board approval, on a one-year program extension and fiscal policy measures for the 2020 budget to secure key program objectives.

In addition, according to the IMF, its adherence to the Open Government Partnership reflects the Government's commitment to improve public services and public resource management. These funds should help it to reach the 2016-2020 NDP objectives, including average growth above 7% over the 2018-2020 period.

### World Bank

Côte d'Ivoire has also maintained good relationships with the World Bank. The World Bank Group has taken an active role in implementing Côte d'Ivoire's social and economic development program through its institutions (the IBRD, IDA, IFC and MIGA) and its special funds.

The World Bank's operations in Côte d'Ivoire began prior to independent infrastructure financing (US\$7.5 million for the Abidjan-Niger Railway in 1954). They were consolidated after 1960 with an initial loan in 1968 (US\$5.8 million for a road network project) and in 1969 (US\$3.3 million for the palm oil sector).

In addition, Côte d'Ivoire benefits from MIGA guarantees in its capacity as a member country of the World Bank Group. These guarantees are subject to framework agreements attached to each financing and are used according to needs defined by the Government.

Overall, there have been five phases in the development of the World Bank's operations in Côte d'Ivoire:

- Until 1980, Côte d'Ivoire had access to international financial markets and the World Bank's gross disbursements stood at US\$492 million and did not exceed 0.5% of Côte d'Ivoire's GDP. These loans were primarily dedicated to infrastructure in an expanding economy. During this period, more than half of all loans were for agriculture and transportation; in 91% of cases, project results were deemed satisfactory.
- During the 1980-1993 period, given that Côte d'Ivoire had lost access to financial markets in 1981 and to most sources of credit after the first debt rescheduling in 1984, the World Bank's loans reached 2% of GDP. Between 1980 and 1987, the World Bank's disbursements reached 2.4% of Côte d'Ivoire's GDP and adjustment loans replaced investment loans. From 1988 to 1993, the World Bank's involvement was limited to analysing measures to accompany a potential devaluation. This preparatory work contributed to the preparation of extensive economic liberalization measures.
- From 1994 to 2000, the World Bank's disbursements reached their maximum (3.6% of GDP over the 1994-1996 period) and the World Bank enhanced its role as a coordinator of aid to Côte d'Ivoire's development. Its principal partners have been (and still are) the European Union, the United States and Japan. The World Bank's influence was also strengthened by its close cooperation with the IMF.
- From 2000 to 2011, the World Bank adapted its interventions to the successive socio-political and military crises, namely in 2000, 2002, 2004 and 2010. Certain projects were interrupted and the IDA program was suspended in June 2004 due to arrears. Nonetheless, the World Bank maintained its relationship with Côte d'Ivoire via (i) analysis activities and a trust fund program to promote the reinsertion of child soldiers, support community recovery in former CNW zones and employment of at-risk youth and (ii) a grant of US\$120 million for a post-conflict assistance project exceptionally approved in 2007 before the clearance of arrears toward the IDA.
- Since 2011, the World Bank's actions have been reinforced and close to 30 financing agreements were entered into with the Republic of Côte d'Ivoire. These actions are, for the most part, budgetary support in an amount of approximately CFAF 419.5 billion. With regard to project financing, the main sectors that benefitted from the support of the World Bank are infrastructure, in an amount of approximately CFAF 204.3 billion, and employment and socio-professional integration of young people, in an amount of CFAF 52.1 billion. The education-training and agricultural sectors each received financing in a total amount of CFAF 29.5 billion and CFAF 34.7 billion, respectively. On 21 April 2018, two credit agreements were signed with the IDA to finance the projected investment for the resilience of the coastal areas of West Africa for an amount of EUR 24,1 million and the projected improvement of the land in Côte d'Ivoire for a total amount of EUR 41.8 million.

The implementation of the Ouagadougou Political Agreement signed in March 2007 helped restore relationships with technical and financial partners and to adopt a post-conflict program with the IMF, the World Bank and the AfDB. The satisfactory implementation of this program combined with the adoption of the Poverty Reduction Strategy Papers prepared with the technical support of the World Bank resulted in attaining the decision point of the HIPC initiative and the adoption of a three-year economic program supported by the ECF in March 2009.

In addition, in November 2009, in connection with the post-Ivorian economic crisis recovery strategy, the World Bank granted Côte d'Ivoire US\$15 million to implement the Small and Medium Enterprise Revitalization and Governance Project (*Projet d'Appui à la Revitalisation et à la gouvernance des Petites et Moyennes Entreprises* ("PARE-PME")).

The 2010 post-election crisis led to another suspension of the ECF program, thereby explaining the low amount of disbursements during this period during which interventions were designated as “post-election financing”, as the World Bank solely approved grants.

The 2012-2015 period was characterized by the normalization and consolidation of Côte d’Ivoire’s relationship with the World Bank. Due to participants’ proactiveness, Côte d’Ivoire quickly restored its relationships with all its technical and financial partners. Projects begun since 2009 (in particular PIUIR and PASEF) were strengthened and new projects were launched.

Among others, these include the Agriculture Support Project (*Projet d’appui au secteur agricole* (“PSAC”)) of an amount of CFAF 25 billion, which is part of recovery efforts for agricultural development, via the implementation of the National Agricultural Investment Program (*Programme National d’Investissement Agricole* (“PNIA”)). A total of US\$993 million was approved, including US\$502 million already disbursed.

The table below sets out changes in the World Bank’s disbursements to Côte d’Ivoire:

	<b>Authorized (\$)</b>	<b>Disbursed (\$)</b>
<b>Before 1980</b>	<b>492,800,000</b>	<b>492,800,000</b>
IBRD	485,300,000	485,300,000

*Source: World Bank/Department of Public Debt and Grants*

In conclusion, since the reopening of the portfolio in 2007, Côte d’Ivoire benefits from budgetary assistance to support its financing plan. Over the 2007-2018 period, the cumulative amount of this budgetary assistance was CFAF 642.6 billion.

Budgetary assistance for 2018 was EUR 86.4 million, or approximately CFAF 56.7 billion, for the Third Support Credit to reforms on the Education-Energy-Cacao budgetary management.

On 29 September 2015, the World Bank Group’s Board of Directors approved a new partnership framework with Côte d’Ivoire covering the 2015-2019 period. For this four year period, the World Bank Group provided a loan and investment program of approximately US\$3 billion. The goal is to help Côte d’Ivoire build a competitive and inclusive economy.

In the context of this program, around 30 financing agreements were signed with the World Bank between 2015 and 31 December 2018, for a total amount of CFAF 1,070.54 billion. The main projects financed include:

- The PRSC-3 of an amount of US\$100 million, or approximately CFAF 58.7 billion;
- The Obsolete Pesticides Management Project (*Projet de gestion des pesticides obsolètes en Côte d'Ivoire* (“**PROGEP-CI**”)) of an amount of US\$7 billion, or approximately CFAF 4.2 billion, in the form of a grant;
- The African Centres of Excellence in Higher Education Project (*Projet de Centres d'Excellence d'Enseignement Supérieur en Afrique*) of an amount of EUR 13.4 million, or approximately CFAF 8.9 billion in the form of a loan;
- The electricity transmission and access project for an amount of USD 325 million, or approximately CFAF 187 billion; and
- Infrastructures for urban development and competitiveness of secondary agglomerations for an amount of EUR 112.4 million, or approximately CFAF 73.7 billion.

Disbursements for the loans signed over the 2015-2018 period stand at FCFA 560.4 billion.

The World Bank granted a CFAF 229.1 billion funding to Côte d'Ivoire on 19 April 2019, through the signing of three agreements relating to the Public Services Improvement Program (PAGDS) in the amount of CFAF 57.1 billion, the Development Support for Higher Education (PADES) in the amount of 57.7 billion and the Strategic Procurement and Alignment of Health Resources and Knowledge Project (SPARK) in the amount of CFAF 114.3 billion, respectively.

### African Development Bank

Côte d'Ivoire is home to the AfDB's headquarters.

The 2013-2017 Country Strategy Paper (“**CSP**”), elaborated by the AfDB, had two pillars: (a) to strengthen governance and accountability and (b) to develop infrastructure to support economic recovery. The first pillar was aimed at: (i) strengthening post-crisis socio-economic inclusion, by responding to demands for improved governance and delivery of basic services to populations; (ii) supporting social and economic integration/reintegration processes; (iii) strengthening economic, financial and institutional governance; and (iv) accelerating the structural reforms needed for industrialization. The second pillar was intended (i) to support economic recovery through the optimal use of natural resources, through the development of quality infrastructure in the fields of agriculture, transport and energy, while preserving the environment; and (ii) accelerate the development of human capital and the promotion of well-being; and to strengthen regional integration and international cooperation.

On a strategic level, both pillars of the strategy were aligned with the country's priorities and, on an operational level, the implementation of the CSP was generally satisfactory and contributed to the end of the crisis. Most of the initiatives made it possible to achieve the planned outcomes, although there were some differences depending on the sectors of the initiatives. Thus, the various assessment tasks for the implementation of the CSP highlighted the challenges hereinafter which will have to be addressed as part of the strategies to come and include:

- Strengthening the inclusiveness of growth, by accelerating the structural transformation of the agricultural sector;
- Giving priority to rural infrastructure that can have a catalytic effect on the development of agro-industrial value chains while promoting a gender-sensitive approach;
- Strengthening the alignment and coherence of the AfDB's actions with the national budgetary framework to make resource mobilization predictable;
- Strengthening the dialogue on policy and strategic issues, supported by relevant analytical work through sectoral studies and reviews ;
- Strengthening monitoring and assessment of the achievement of results at the level of the AfDB's operations and strategies;
- Consolidating and capitalizing on sectoral initiatives by strengthening the AfDB's action in rural development infrastructure.

With a view to making the gains sustainable and to addressing the challenges that arose from the implementation of the 2013-2017 CSP, the AfDB has prepared the 2018-2022 CSP. This strategy is aligned with the 2016-2020 NDP, while keeping an eye on the AfDB's operational priorities (High 5s: (i) feeding Africa; (ii) lighting Africa; (iii) industrializing Africa; (iv) integrating Africa; and (v) improving living conditions in Africa). It is focused on sectoral governance and the development of agro-industrial value chains for a structural transformation of the economy. The AfDB's strategy relies on two pillars: (i) strengthening structuring infrastructure and governance, for the competitiveness of the economy and the efficiency of investments; and (ii) developing agro-industrial value chains for inclusive and sustainable growth.

The first pillar includes three of the strategic focuses (1, 4 and 5) of the 2016-2020 NDP (strengthening the quality of the country's institutions and proper governance; developing infrastructure that is equitably spread throughout the country while at the same time protecting the environment; and strengthening both regional integration and international cooperation). The objective is to develop ICT transport, urban development and energy infrastructure at the national and regional levels.

The second pillar includes the two other strategic focuses (2 and 3) of the 2016-2020 NDP (accelerating the development of human capital and social well-being; and accelerating the structural transformation of the economy through industrialization). This pillar aims to move up the value chain in the agro-industrial transformation processes of buoyant sectors, with a view to diversifying the Ivorian economy's sources of growth and making it more inclusive and less vulnerable to external shocks resulting from fluctuations in commodity prices and climatic variations.

Transversal aspects are also systematically taken into account by the AfDB in order to facilitate the implementation of the strategy and the preparation of its operations. This includes better consideration in all the AfDB's operations of aspects related to fragility, climate change, green growth, gender, social protection, health, nutrition and youth employment. Thus, the AfDB continually reinforces its cooperation with certain specialized agencies of the United Nations system (UN Women, ILO, UNIDO, UNFPA, WHO, UNICEF and UNHCR), national public agencies (ANAFOR, CI-PME Agency, AGEPE) and civil society organizations.

Part of the financing of the CSP will be carried out using ADF resources, as part of the Performance Based Allocations (PBA). The CSP will also benefit from AfDB window resources, on a case-by-case basis, for sovereign loans. Therefore, the inclusion in the CSP of projects with high integrative potential will make it possible to leverage additional funds from the regional ADF envelope. These resources will be complemented by those from trust and/or mobilizable funds through the use of partial guarantee instruments. All these resources would make it possible to attract joint financing from technical and financial partners (TFPs) as well as private sector participation through PPPs.

### *Update on the implementation of the Country Strategy of the AfDB in Côte d'Ivoire*

At the end of May 2018, the active portfolio consisted of 23 operations with net commitments of UA 930.5 million<sup>1</sup> mainly oriented towards transport and energy infrastructure. The sectoral distribution of the portfolio highlights transport (56.3%) and energy (28.8%), followed by other sectors such as agriculture (11.8%), governance (2.8%), finance (0.2%) and water/sanitation (0.1%). The portfolio's orientation is consistent with the Government's priorities as set out in the National Development Plan (2016-2020 NDP), as well as with the AfDB's top five strategic priorities (Top 5). The portfolio review conducted in April 2018 concluded that the portfolio's performance is satisfactory, with a rating of 3 on a scale of 1 to 4. Performance indicators indicate the rejuvenation of the portfolio, with an average maturity of 2.5 years in 2018 compared to 6.6 years in 2011, the increase in the portfolio disbursement rate to 23% at the end of May 2018 as well as the absence of any risky project. However, the May 2018 Flashlight monthly report<sup>2</sup> indicated that 32.4% of projects are pinned down because of different obstacles to proper implementation thereof. Based on lessons learned from the implementation of operations, a new Portfolio Performance Improvement Plan (PAPP 2) was prepared. This plan identified the main difficulties encountered by the projects, both at the institutional and fiduciary levels. It includes measures to be carried out according to a precise timetable, the implementation of which should remove obstacles to the proper performance of operations.

---

<sup>1</sup> In September 2018, 1UA= CFAF 786,722

<sup>2</sup> AfDB Group Monthly Portfolio Performance Review Report for Côte d'Ivoire, May 2018.

Since 2017, Côte d'Ivoire has been a member of the African Trade Insurance Agency ("ATIA"), which aims at ensuring the availability of financing for investment in Africa and the expansion of African foreign trade and intra-African trade. As a result, Côte d'Ivoire has access to the insurance provided by this organization, as well as risk syndication in the reinsurance market through the ATI-ACA. Two bank loans to the Government were signed and disbursed in 2019 for amounts of EUR 164 million and EUR 150 million, respectively, benefiting from an ATI-ACA insurance policy and a number of private insurers' reinsurance.

### ***Bilateral Debt***

#### Paris Club

In terms of bilateral debt at the end of 2018, debt owed to non-Paris Club creditor countries has become largely dominant (93.6%).

As a reminder, on 29 June 2012, following admission to the "completion point" under the HIPC initiative, the Paris Club creditors of Côte d'Ivoire (the main creditors being France, the United States, Germany, Spain, the United Kingdom, Italy and Japan) granted a debt cancellation in principal amount equal to US\$1.77 billion (approximately CFAF 900 billion).

Following bilateral negotiations in 2012, certain Paris Club creditors of Côte d'Ivoire agreed on an additional cancellation of CFAF 3,143.7 billion, including an outstanding C2D eligible debt of CFAF 1,486.2 billion from France and CFAF 23.6 billion through debt conversion agreement with Germany.

As of 31 December 2018, the amount of outstanding debt owed to the Paris Club creditors<sup>3</sup> was CFAF 87.6 billion (excluding the C2D), compared to CFAF 113.4 billion at the end of 2017.

#### Debt Reduction and Development Contracts (*Contrats de Désendettement et de Développement*)

Upon reaching the completion point of the HIPC initiative, France granted Côte d'Ivoire an additional cancellation of its debt under the terms of ODA, in December 2012. This cancellation involved the gradual implementation of the C2D program. The process with France consists in transferring back to Côte d'Ivoire in the form of grants all of its reimbursements made under conditions defined in the C2D contracts effectively concluded. Total C2D-eligible debt, taking into account the outstanding amount as well as the interest to be paid on all ODA loans was estimated at EUR 2.86 billion, or CFAF 1,900 billion at the end of 2012.

Two C2Ds have already been concluded with France, amounting to EUR 1,755 million, or CFAF 1,151.2 billion. The first C2D, totalling EUR 630 million, or CFAF 413.25 billion, was signed in December 2012 and was repaid over the 2012-2015 period. The second C2D, totalling EUR 1,125 million, or CFAF 737.95 billion, was signed in December 2014 and is to be repaid over the 2016-2020 period.

As they take into account both the State's ability to mobilize its resources to meet debt repayments and its capacity to absorb these resources through the implementation of projects, the C2D contracts consist in modifying the initial structure of the repayment schedule of the cancelled ODA debt. These development projects are mutually agreed upon and jointly monitored by France and Côte d'Ivoire.

At the end of 2018, outstanding C2D-eligible debt was an estimated CFAF 811.3 billion (3.4% of GDP), including CFAF 295.2 billion for C2Ds already concluded, compared to an outstanding amount of CFAF 965.1 billion (4.1% of GDP) at the end of 2017 and CFAF 1,080.1 billion (5.2% of GDP) at the end of 2016.

---

<sup>3</sup> Since the cancellations at the completion point of the HIPC initiative in 2012, Côte d'Ivoire no longer has any debt in the Paris Club. The debt concerned in this paragraph is that owed to the member countries of the former Paris Club for Côte d'Ivoire.

### Program for the Conversion of Debt into Development Projects (*Programme de Conversion de dette en projets de Développement*) – Spain PCD

After having completed the HIPC initiative, the Spanish government granted Côte d’Ivoire additional debt relief in 2014.

Accordingly, a Program for the Conversion of Debt into Development Projects was concluded with Spain on 6 October 2017 for an amount of CFAF 32.7 billion, representing 50% of the Ivorian debt owed to Spain of a total amount of CFAF 67.3 billion. The Spain PCD will be carried out over the 2017-2020 period. It functions in a similar manner to the French C2D. The water and energy sectors were elected in the context of this programme.

Under the PCD, CFAF 11.1 billion was repaid by Côte d’Ivoire in 2018. The outstanding debt for this PCD stood at CFAF 18.3 billion as at 31 December 2018.

### China

China is the most significant bilateral creditor outside the members of the Paris Club for Côte d’Ivoire. At the end of 2018, the outstanding debt of Côte d’Ivoire to China represented CFAF 1,111.3 billion, or 80.6% of its bilateral debt and 9.6% of its external public debt, compared to CFAF 935.2 billion, or 76.9% and 16.2% in 2017, respectively.

Côte d’Ivoire maintains close economic and financial relations with China. The Government concluded financing agreements for important development projects with China, in particular through Eximbank China, through (i) the financing agreement for the building of the Soubré hydroelectric dam for an amount of US\$500 million in January 2013 for which construction work was completed at the end of March 2017, (ii) the signature of the expansion and modernization project of the Abidjan Port Authority for an amount of US\$793 million in December 2014, (iii) the signature of the project for the rehabilitation and development of Côte d’Ivoire’s electrical network for an amount of US\$776 million in December 2015 and (iv) the financing agreement for the construction project of the Agboville-Rubino-Céchy and Odienné-Gbéléban roads concluded on 14 November 2017 for an amount of CNY 801 million (CFAF 68.9 billion).

The financing agreements concluded with China were assigned to certain public companies in order to complete the relevant public projects. In particular, these include: (i) the Abidjan Port Authority, in connection with a loan for its expansion and modernization, (ii) Côte d’Ivoire Energie (CI-ENERGIES), for the financing of the renovation and development project of Côte d’Ivoire’s electrical network, and (iii) the National Water Fund (*Fonds National de l’Eau*) for the financing of the second phase of the project to supply drinking water to Abidjan from the Bonoua groundwater.

### ***External Debt due to Commercial/Private Creditors***

At the end of 2018, external debt due to commercial/private creditors amounted to US\$7,605.7 million<sup>4</sup> (CFAF 4,355.7 billion) compared to US\$5,431.8 million<sup>5</sup> (CFAF 2,970.9 billion) on 31 December 2017 and US\$ 4,261.1 million<sup>6</sup> (CFAF 2,652.3 billion) on 31 December 2016. Private debt represented 57.2% of external debt, compared to 51.5% at the end of 2017 and 53.5% at the end of 2016. All outstanding Eurobonds of the issuer correspond to 95.1% of external debt due to private creditors.

### ***WAEMU Financial Stability Fund (FSF)***

Following a decision by the WAEMU Council of Ministers on 10 May 2012, a FSF was established to manage the member states’ potential payment defaults on their debt issued on financial markets.

The financial assistance of the FSF consists exclusively in managing the public debt service issued in the form of Treasury bills and bonds on the regional or international markets. FSF assistance cannot exceed a period of five years and

---

<sup>4</sup> US\$1 = CFAF 572.6881, to estimate the debt at the end of December 2018.

<sup>5</sup> US\$1 = CFAF 546,9500, to estimate the debt at the end of December 2017.

<sup>6</sup> US\$1 = CFAF 622,4555, to estimate the debt in 2016.

repayment procedures are determined on a case-by-case basis, subject to significant fund replenishment constraints. Contributions to the FSF are being made progressively by the Central Bank.

### ***Active Debt Management***

On 7 June 2017, Côte d'Ivoire repurchased US\$250 million in aggregate principal amount of its outstanding 2024 Eurobonds and US\$500 million in aggregate principal amount of its outstanding 2032 Eurobonds. As a result, its outstanding debt from the 2024 Eurobonds decreased from US\$750 million to US\$500 million, and its outstanding debt from the 2032 Eurobonds decreased from US\$2,468.5 million to US\$1,968.5 million. These transactions reduced annual amortisation on the 2032 Eurobonds and limited the risk linked to refinancing the 2024 Eurobonds.

On 3 October 2019, Cote d'Ivoire launched the Tender Offers for up to US\$1.5 billion in aggregate principal amount of its outstanding 2024 Eurobonds, 2025 Eurobonds, 2032 Eurobonds and, subject to the sub cap specified in the tender offer memorandum, the 2028 Eurobonds. The Tender Offers are scheduled to expire at 5:00 p.m. New York City time on the Expiration Date (9 October 2019) and are expected to settle two business days after the settlement of the Notes, in each case unless extended, reopened, amended or terminated by Côte d'Ivoire. See "Overview" and "Use of Proceeds".

## MONETARY SYSTEM

### **The Franc Zone and the BCEAO**

Côte d'Ivoire has been a member of the Franc zone since its independence in 1960 and a member of the West African Monetary Union ("WAMU") since 1962. The BCEAO, headquartered in Dakar, Senegal, is the common central bank for the WAMU member States. A national branch of the BCEAO is installed in each WAMU member State.

### *The Franc Zone*

The Franc zone is composed of 14 French-speaking countries of sub-Saharan Africa, the Comoros and France. It is the offspring of monetary relations between France and its former African colonies, and it reflects the desire of its member nations to maintain an institutional framework of monetary cooperation. Like the BEAC and the Central Bank of the Comoros, the BCEAO has an operational account on the books of the French Treasury, which guarantees the convertibility of its CFAF. The peg of the CFAF to the French franc was replaced by a peg to the Euro from 1 January 1999, with a fixed exchange rate of 1 Euro = CFAF 655.957. The substitution of the Euro for the French franc did not affect the monetary cooperation mechanism of the CFAF zone.

The monetary cooperation between France and the African countries of the CFAF zone is governed by four fundamental principles: (i) a guarantee by the French Treasury of unlimited convertibility of the three central banks' currency, (ii) a fixed peg, (iii) free transferability and (iv) centralization of currency reserves. In exchange for this convertibility guarantee, the BCEAO and the BEAC are required to deposit at least 50% of their currency reserves in an operational account with the French Treasury (this rate is set at 65% for the Central Bank of the Comoros). The management of the operational accounts is formalized by agreements between the French authorities and representatives of the member States of the three African central banks in question. These accounts are operated as current accounts opened at the French Treasury, are remunerated and may, in exceptional circumstances, have a debit balance. The convertibility guarantee comes into play when the operational account is overdrawn. Several preventive measures provided for in the operational account agreement, such as direct debits by the BCEAO from foreign currency cash results other than those deposited on the operational account, the use by member States of their SDR with the IMF, or the exchange of their SDR against cash are put into place to avoid any overdrafts.

The cooperation between France and the CFAF zone is the subject of regular meetings between French and African officials, in particular the bi-annual meeting of the Finance Ministers and Central Bank Governors of the CFAF zone.

During its ordinary session on 29 June 2019, the ECOWAS Assembly of Heads of State and Government adopted a principle of "a flexible exchange rate regime with a monetary policy framework based on inflation targeting". The conference further instructed the ECOWAS Commission, in consultation with the West African Monetary Agency and the Central Banks, to accelerate the implementation of the revised roadmap, in particular the work on the single currency symbol (the ECO) to be presented during it at its next session.

The ECO is the name of the single currency project for the fifteen countries of the ECOWAS, whose origin dates back to 1983. Its introduction was initially planned for 2003, but was postponed several times, in 2005, 2010 and 2014. According to the new roadmap, the ECO should enter into force in 2020 in the fifteen ECOWAS countries. Nonetheless, ECOWAS stated that adoption would, however, be gradual, so that countries that meet the criteria could join, and others later. These criteria are of two kinds: the first set of criteria are (i) to maintain the budget deficit at a level below or equal to 3% of nominal GDP, (ii) to maintain an annual average inflation rate below 10%, (iii) to ensure that the budget deficit/central bank ratio is below 10% of the previous year's tax revenues, and (iv) to hold a 3-month or more gross reserves in months of imports. The second set of criteria are (i) to maintain the variation of the nominal exchange rate with a range of 10% upwards or downwards, and (ii) to maintain the total public debt ratio below the threshold of 70% of nominal GDP. The Conference of Heads of State and Government held in Abuja on 29 June 2019 decided to adopt a flexible exchange rate regime with a monetary policy framework based on inflation targeting. However, the identification of the anchor currencies has not yet taken place.

## ***The BCEAO***

The BCEAO is the common central bank of the eight member States of the WAMU, which are Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo. It is a public international institution with headquarters located in Dakar, Senegal. It is governed by the bylaws annexed to the WAMU Treaty. In all WAMU member States, it enjoys privileges and immunities usually only granted to international financial institutions. The BCEAO is managed by a Governor, with the support of a board of directors and national credit boards. The Governor is appointed by the WAMU Council of Ministers for a renewable six-year term.

The institutional reform of the WAMU and Central Bank which took place in 2010 strengthened the independence of the BCEAO and established a better division of roles and responsibilities between the different WAMU and BCEAO entities. These entities are as follows:

- The WAEMU Council of Ministers, in which every member-state of the WAMU is represented by two ministers, is responsible for implementing the general guidelines and decisions made by the Conference of Heads of States and Governments (*Conférence des Chefs d'Etat et de Gouvernement*), which is the WAEMU supreme body. The WAMU Council of Ministers is also responsible for defining the regulatory framework for the financial and banking system and for defining the WAMU exchange rate policy);
- the Monetary Policy Committee (*Comité de Politique Monétaire*, “MPC”) is responsible for defining monetary policy;
- the Board of Directors is in charge of the management of BCEAO, in accordance with its constitutional provisions. The Board is assisted by an Audit Committee;
- the Governor is responsible for the management of the BCEAO and implements the monetary policy defined by the MPC; and
- the National Credit Councils (*Conseils Nationaux de Crédit*) are consultation committees at the member State level, comprised of representatives of the administration and of the principal associations or socio-professional groups. They are in charge of issuing opinions and recommendations on the functioning of the banking system to better manage the concerns of economic actors in the implementation of credit and monetary policy.

Building on this reform, in the context of the devaluation of the CFAF, the **WAEMU** was created on 10 January 1994 in Dakar, Senegal, in an effort to consolidate economic integration in the CFAF zone.

As an issuing institution and a monetary authority, the BCEAO maintains a wide range of relationships with banks and financial institutions working with the WAEMU member States. These relationships consist mainly of banking system monitoring operations and distribution/credit control operations. As part of its implementation of monetary policy, the BCEAO regulates liquidity on the WAEMU interbank market. Assistance granted to credit institutions includes advances guaranteed by negotiable debt securities, as well as discounts, acquisitions, sales, repurchases or secured loans against security of claims in respect of WAEMU's member states, companies and individuals.

In addition to issuing the common currency in the member States, which is the exclusive mission of the BCEAO, the BCEAO is in charge of (i) implementing monetary policy, (ii) ensuring the stability of the banking and financial system, (iii) promoting, monitoring and safeguarding payment systems, (iv) implementing the WAEMU exchange rate policy, (v) centralizing the WAEMU currency reserves, (vi) accounts keeping for WAEMU member States, and (vii) monitoring banking and financial activity. The principal objective of the BCEAO is to ensure monetary and price stability, target inflation and maintain the CFA-Euro peg. The BCEAO also supports the economic policies of WAEMU member States to foster sound and sustainable growth.

Monetary policy tools include setting reference rates and establishing the system of mandatory reserves. Their implementation takes into account changes in the internal and external economic and financial environment of the WAEMU zone, in particular the situation of the Euro zone. As a result of the peg of the CFAF to the Euro, the monetary policies of the CFAF zone closely follow those of the European Central Bank. Slight policy differences will normally

arise because the BCEAO takes into account its members' economic situation such as inflationary pressures, the outcome of agricultural campaigns, trends in credits to the economy and bank liquidity.

With respect to the monitoring of credit institutions, a community supervisory institution, the Banking Commission (*Commission Bancaire*), was created on 24 April 1990 for the WAEMU. It is chaired by the Governor of the BCEAO and is entrusted with the supervision of the organization and control of the banking system in the WAEMU.

The current regulation of the banking sector is based on several texts, namely the banking law and its implementing provisions, memoranda from the Banking Commission, regulations governing banking and financial activity, prudential regulations and instructions and notices to credit institutions.

The WAEMU is characterized in particular by the adoption of a single foreign exchange policy in all member States in order to ensure the freedom of financial relations within the Union. Financial payments and capital movements between the WAEMU and foreign countries, as well as foreign exchange transactions within the WAEMU, can only take place through the BCEAO, the postal administration or a licensed intermediate bank.

## Inflation

The table below sets out certain information regarding inflation rates in Côte d'Ivoire for the periods indicated:

<b>Inflation (Consumer Price Index)</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>	<b>2019 (estimates)</b>
Côte d'Ivoire – Annual average	0.5%	1.2%	0.7%	0.4%	0.6%	0.6%
WAEMU – Annual average	-0.1%	1.0%	0.3%	1.0%	1.1%	0.0% <sup>(1)</sup>

<sup>(1)</sup> WAMU Monetary Policy Report, BCEAO, March 2019, p. 45., annual report, BCEAO June 2019, p. 18, and WAMU monetary report, BCEAO September 2019, p.46

Source: MEF, BCEAO

The panel used for the determination of Consumer Price Index includes 684 different products and has not been modified since 2008.

In 2014, inflation was at 0.5% on average, as a result of the action plan implemented by the Government since 2013 against the high cost of living. This plan significantly lowered the prices of basic products, and accordingly decreased inflation. The measures taken include a better supply of markets supported by an efficient subsistence agricultural sector, due to the results of the implementation of the NAIP and the Government's efforts in ensuring a smooth flow of trade.

In 2015, inflation was at 1.2% on average, due to good food crop production and improved distribution channels. Control of inflation was also facilitated by market measuring instruments.

In 2016 and 2017, inflation decreased to an annual average of 0.7%. The evolution of consumer prices reflected, on the one hand, the actions of the Government which allowed to contain tensions on food prices, and, on the other hand, the contraction in the prices of non-food products. The Government's actions included improvements to the water management system, distribution of enhanced seeds, and extension of cultivated areas dedicated to food crop production.

The Government expects inflation to remain at an annual average of 0.6% until 2019, due to government policies to promote food production and the reprofiling of roads to ensure better market access.

The Government expects inflation in Côte d'Ivoire to stay below WAEMU's 3.0% inflation rate ceiling until 2019, and beyond. The entire CFAF zone has historically exhibited low inflation, because of the relative stability of the regional currency as well as the conservative monetary policy of the BCEAO. This helps dampen inflationary volatility in Côte d'Ivoire, which stems in part from the diversification of the food-crop production.

## WAEMU Foreign Reserves

Foreign reserves are centralized within the BCEAO and managed according to a solidarity principle between WAEMU member States, subject to the conditions set out in the operational account agreement. There is no apportionment between the member States.

The table below sets out certain information regarding the WAEMU's foreign reserves in number of months of imports for each of the years indicated:

	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>
Reserves in CFAF billions.....	7,033.6	7,487.0	6,529.4	7,184.2	8,561.0
Reserves in number of months of imports.....	4.8	5.4	4.3	4.1	4.7

Source: MEF, BCEAO

In 2017, the foreign reserves of WAEMU member countries covered 4.1 months of imports. At the end of December 2018, this ratio was 4.7 months of imports. This increase is due to an improvement in the level of export revenue repatriation. As of the second quarter 2019, the ratio has improved to 5.0 months of imports.

## Money Supply

The table below sets out certain information regarding Côte d'Ivoire's monetary situation, including foreign reserves, as at 31 December for each of the years indicated:

	<u>2016</u>	<u>2017</u>	<u>2018</u>
		(CFAF billions)	
<b>Net foreign assets</b> .....	1,753.5	1,762.7	2,032.1

<b>Change in percentage as at 31 December</b>			
Net foreign assets .....	5.1	0.5	15.3
Net domestic assets .....	14.3	14.8	12.6
Net credit to the State .....	17.5	14.9	17.0
Central bank .....	(13.4)	(7.7)	(6.4)
Commercial banks .....	36.5	23.7	23.8
Credit to the economy .....	13.3	15.3	11.3
Money supply.....	11.0	9.2	13.4

Source: MEF, BCEAO

The monetary situation at the end of December 2018 was marked in particular by an increase in net foreign assets of 15.3% and stood at CFAF 2,032.1 billion compared to CFAF 1,762.7 billion in 2017. This increase was due mainly to an increase in the rate of repatriation of export revenues (61.1% at the end of December 2018, compared to 29.5% in 2017). The growth in credits to the economy and net credits to the State was due to the vibrancy of the economic activity, improvements in the business climate and restored confidence in both the economic operators and the banking system.

### **Exchange Rate**

Due to its membership in the WAEMU monetary zone, Côte d'Ivoire applies an exchange regime that is exempt from any restrictions on payments and transfers relating to normal international transactions.

The common currency of the WAEMU is the CFAF, which is pegged to the Euro at a fixed exchange rate of 1 Euro = CFAF 655.957. As a result, the U.S. Dollar exchange rate will fluctuate in line with Euro/U.S. Dollar rates. This rate has been fixed and has not changed since the introduction of the Euro.

According to the latest available information published by the BCEAO (*WAMU Monetary Policy Report, September 2019*), the Real Effective Exchange Rate (“**REER**”) decreased by 4.7% in the second quarter of 2019 compared to the same period in 2018. This reflects a gain in competitiveness primarily due to an inflation differential favourable to the WAEMU (-3.7%) with respect to its partners and the decrease, in the nominal effective exchange rate (“**NEER**”) (-1.0%). The change in the NEER in the second quarter of 2019 primarily signals a depreciation, on an annual basis of the CFAF compared to the Nigerian naira (-7.7%), the U.S. Dollar (-5.7%), the Japanese yen (-5.1%), the Swiss franc (-4.1%) and the Canadian Dollar (-2.3%). However, the CFAF appreciated against the South Africa rand (+7.3%) and the Ghanaian cedi (+10.1%). The year-on-year change in the WAMU inflation rate stood at -0.3% in the second quarter of 2019 compared to a 3.4% average increase in partner countries.

According to Government estimates, following a decrease in competitiveness in the first and second quarters of 2018, marked by an increase in the REER of 3.1% and 1.0%, respectively, the Ivorian economy improved its competitiveness in the third and fourth quarters, with REER decreases of 1.5% and 1.7%, respectively, compared to the same periods in 2017. This was due to a favourable inflation differential of 3.5% and 2.6% respectively, compared to partner countries, in spite of NEER increases of 1.7% and 0.8%, respectively, compared to the same periods in 2017.

In 2019, Côte d'Ivoire's competitiveness improved with respect to its main trade partners in the first quarter of 2019, compared to the fourth quarter of 2018 and during the same period in the previous year. The REER decreased by 2.1% from the fourth quarter of 2018 to the first quarter of 2019. Compared to the same period in 2018 (Q1 2018), the REER decreased by 4.7% during the period under review (Q1 2019). This favourable competitive position continued during the second quarter of 2019. Indeed, according to the forecasts, the REER decreased by 1.3% compared to the first quarter of 2019 and decreased by 4.8% compared to the same period in 2018. Unlike in 2018, the decline in the REER is driven by the decline in the nominal exchange rate of 1.4% and 0.8%, respectively, in the first and second quarters of 2019 and by an increase in the inflation differential of 3.9% and 4.7%, for the same periods, between Côte d'Ivoire and its main trading partners.

### **Monetary Policy**

Following its session held on 4 September 2013, the BCEAO's MPC decided to lower each of the BCEAO reference rates, (the minimum bid rate on liquidity injection tender transactions and the marginal lending rate) by 25 basis points. The minimum bid rate on liquidity injection tender transactions went from 2.75% to 2.50% and the marginal lending rate was fixed at 3.5%, lowered from the previous rate of 3.75%. This initiative sought to encourage the downward trend in bank interest rates for clients and improve financing conditions for the economy.

In 2014 and 2015, the MPC decided to maintain the BCEAO's reference rates in effect since September 2013 due to favourable monetary conditions characterized by a decrease in interbank market rates and inflation forecasts in line with monetary policy objectives.

In 2016, the MPC decided to maintain the minimum bid rate applied to liquidity injection tenders at 2.50%, the rate in force since September 2013, thus confirming the accommodating trend in the BCEAO monetary policy. However, in order to boost the interbank market and generally improve the functioning of the Union's monetary market, the MPC decided to expand the range between the minimum bid rate applied to liquidity injection tenders and the marginal lending rate by one percentage point. Thus, the marginal lending rate was raised from 3.50% to 4.50%, effective as of 16 December 2016.

In 2017, to accompany the implementation of measures aiming to improve the functioning of the interbank market, the MPC decided to decrease the mandatory reserves coefficient applicable to banks within the Union by 200 basis points, lowering it from 5.0%, the rate in effect as of 16 March 2012, to 3.0%. This decision came in effect as of 16 March 2017.

In 2018 and as at 4 September 2019, the reserve requirement coefficient was 3.0% and benchmark rates remained unchanged.

## Banking System

### Banking Environment

As of 31 July 2019, the Ivorian banking system comprised 31 credit institutions, including 29 banks and 2 financial institutions with banking activities. A new bank, the *Orange Abidjan Compagnie*, was accredited by a ruling dated 23 July 2019 and issued by the Minister of the Economy and Finance. One bank had its licence withdrawn by the BCEAO in October 2018 for failure to comply with the minimum capital requirement of CFAF 10 billion and steady deterioration of its financial situation .

As of 31 December 2018, 5 of the 27 operating banks had total assets of over CFAF 1,000 billion each. They represented 56.4% of the deposits and 59.8% of the outstanding loans of the banking sector.

The table below presents information on assets of Côte d'Ivoire's banking sector from 2014 to 2018:

	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>
	<i>(CFAF billions)</i>				
<b>Commercial banks' assets</b>					
Total assets .....	6,639	8,294	9,669	11,096	12,144

*Source: MEF, BCEAO*

### Banking sector performance

The table below presents information on the performance of Côte d'Ivoire's banking sector from 2014 to 2018:

	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>
<b>Result indicators</b>					
Capital adequacy ratio (%) <sup>(1)</sup>					
<i>Equity capital/ assets weighted according to risk</i> <i>(Core capital/RWA) .....</i>	10.7	8.2	8.0	9.8	9.5
<i>Total skilled human capital / assets weighted by</i> <i>risk .....</i>	8.9	7.0	7.0	8.6	8.6
Asset quality					
<i>Non-performing loans / total loans (%) .....</i>	11.3	10.6	9.0	9.8	9.2
<i>Provisions / gross non-performing loans (%) .....</i>	77.1	68.6	71.0	63.6	65.1

*Source: BCEAO*

(1) The capital adequacy ratio is equal to equity capital divided by risk-weighted assets.

As at the end of December 2018, the Ivorian banking system showed a negative cash position of CFAF 738.3 billion compared to a CFAF 731.1 billion deficit the previous year. This deficit was funded through loans from the BCEAO, the regional interbank market and other financial institutions outside the WAMU.

Indicators of financial stability in the Ivorian banking sector as of the indicated dates are shown in the table below:

	<b>As of the end of December 2015</b>	<b>As of the end of December 2016</b>	<b>As of the end of December 2017</b>	<b>As of the end of December 2018</b>
	<i>(in %)</i>			
<b>Capital Standards</b>				
<i>Equity capital/ assets weighted according to risk (Core capital/RWA).....</i>	8.2	8.0	9.8	9.5
<i>Total skilled human capital / assets weighted by risk</i>	7.0	7.0	8.6	8.6
<i>General provisions/ Risk-weighted assets .....</i>	7.9	7.0	6.7	5.7
<i>Equity capital/Total assets.....</i>	4.5	4.3	5.6	6.3
<b>Composition and quality of the assets</b>				
<i>Gross distressed credits/Total credits .....</i>	10.5	9.0	9.8	9.2
<i>General provisions/Gross distressed credits .....</i>	68.6	71.0	63.6	65.1
<b>Liquidity</b>				
<i>Liquid assets/Total assets .....</i>	52.0	52.8	50.6	31.7
<i>Liquid assets/Total deposits .....</i>	71.0	73.8	74.1	46.0
<i>Total credits/Total deposits .....</i>	76.1	81.7	87.4	84.5

<sup>(1)</sup> Tier 1 Capital.

### ***Financing of the Economy***

Since 2009, the offer of new payment means and of new financial services in general has become more diverse thanks to the use of mobile phones as a support system. The use of this instrument has significantly contributed to increasing access of populations to financial services, which stood at nearly 60.71% in Côte d'Ivoire in 2017, while the bank penetration rate, strictly speaking, was 17.80% in 2016 and 16.65% in 2017.

In addition, the meeting of the WAEMU Council of Ministers of 24 and 25 June 2016 adopted the framework document of policy and regional strategy for financial inclusion in the WAEMU, along with a corresponding roadmap and budget. Elaborated in the context of the prominent role of microfinance and the solid expansion of financial services via mobile phones, this strategy aims at ensuring access to a diversified range of suitable and affordable products and financial services over the next five years to 75% of the WAEMU adult population.

The quality of the credit portfolio improved with a gross rate of outstanding receivables of 9.16% at the end of December 2018, compared to 9.80% as at the end of December 2017. The net rate went from 3.80% to 3.40% over the abovementioned period.

According to the BCEAO, despite strong growth, financial intermediation in Côte d'Ivoire is still low: the credit to the economy/nominal GDP ratio was 29.4% at the end of December 2018. The main obstacles to greater financial intermediation are, in particular: the difficulties to register property and land, which inhibits owners from using them as collateral to obtain loans and banks from repossessing them in the event of default; a legal system that does not allow fast resolution of trade or credit disputes, which discourages bank credit; and a lack of information relating to borrower solvency and the lack of internal credit desks to which banks can resort to make their loan decisions, in particular for small businesses.

An analysis of the structure of loans reported to the BCEAO's central risk department revealed that the tertiary sector absorbed 48.5% of outstanding loans at the end of December 2018 (49.3% in 2017) and remains the principal beneficiary of bank financing. The secondary sector ranks second and accounts for 41.9% of bank loans (42.6% in 2017). The share accounted for by the primary sector is 9.6% (8.1% in 2017). Medium- and long-term loans, which are essential for real estate investments and other investment projects, represented 23.8% and 2.7%, respectively, of global outstanding loans declared (25.7% and 3.0%, respectively, in 2017).

However, the ratio of loans to the private sector/GDP, which represents an indicator of the depth of the financial system, increased from 19.7% in December 2014 to 28.5% at the end of 2017 and then 29.4% at the end of December 2018, according to the BCEAO's monetary statistics, reflecting the slight improvement of the business climate and a consolidation of the economic recovery.

### ***Compliance with Prudential Regulations***

New prudential regulations implementing Basel II and Basel III Standards have been in force since 1 January 2018. The measures were supplemented by five circulars, listed below, adopted by the WAMU Banking Commission and in force as of 2 July 2018:

- Circular No. 01-2017/CB/C relating to the governance of WAMU credit institutions and financial companies;
- Circular No. 02-2017/CB/C relating to the exercise conditions of the duties of administrators and directors at WAMU credit institutions and financial companies;
- Circular No. 03-2017/CB/C relating to the internal control of WAMU credit institutions and financial companies;
- Circular No. 04-2017/CB/C relating to risk management at WAMU credit institutions and financial companies; and
- Circular No. 05-2017/CB/C relating to the management of compliance with applicable standards by WAMU credit institutions and financial companies.

The table below presents banking violations of prudential regulations at the indicated dates:

<b>PRUDENTIAL STANDARDS</b>	<b>Required level</b>	<b>31/12/17</b>	<b>30/06/18</b>	<b>31/12/18</b>
<b>Number of banks concerned *</b> .....		<b>26</b>	<b>26</b>	<b>25</b>
<b>A. Solvency standards</b>

11- Limit on loans to shareholders, executives and personnel (%).....	20%	1	3	4
<b>Total amount of violations.....</b>		<b>37</b>	<b>38</b>	<b>36</b>

*Source: BCEAO, banks' prudential statements*

As of the date of this Prospectus, five credit institutions are under close supervision by the WAMU Banking Commission, due to failure to comply with banking and/or prudential regulations. Amongst these five banks, three are (and one previously was) State-controlled. In October 2018, the BCEAO withdrew the license of one bank for noncompliance with prudential norms.

As part of the implementation of the PDESFI, for which a decree determining the organization and functioning of the programme was adopted by the Council of Ministers in September 2015, the Government has built a strategy to build an attractive and reliable financial sector capable of responding to the growing financing needs of the economy. The key aspects of the strategy include the consolidation and development of the sector and the improvement of financial inclusion. In the long term, this programme will help to maintain the soundness of the financial sector, increase the financing of the economy by fostering the utilization of the banking system, and, ultimately, improve access to credit for households and SMEs.

A restructuring process is underway for three State wholly-owned banks: the CNCE, the BNI and the Versus Bank. With respect to the CNCE, the implementation of the restructuring plan is expected to reinforce its capital, currently in the negative, and restore profitability by 2021. Moreover, land sales and reversals of 2018 provisions are planned in connection with its recapitalization, as well as the identification of strategic acquirers. Concerning the optimization of operating costs, action will be taken to reduce general costs, specifically by introducing tender procedures. Concerning the two other State wholly-owned banks (the BNI and the Versus Bank), one (Versus Bank) was recapitalized in December 2018, while the decision to recapitalize and open the capital of the second one (BNI) was taken by the Government in March 2019, with a closing of such transaction scheduled for the second half of 2019. The privatization process of the BHCI bank, which was previously majority-owned by the State, was successfully carried out in 2018.

The implementation of the strategic plan for the 2017-2021 period has continued in accordance with the timeline set out with the support of an international strategic advisory firm. This strategy is based on (i) the intensification of commercial activity through the digitalization of banking services, (ii) the development of a network of agencies, (iii) the improvement of risk management, (iv) the development of human capital and (v) the improvement of governance.

## **Microfinance**

In addition to the traditional banks, the financing of Côte d'Ivoire's economy also relies on Microfinance Institutions ("MFIs"). The MFIs seek to meet the needs of the less solvent population.

Total MFI's assets amounted to CFAF 272.3 billion as of 30 September 2016, as compared to CFAF 231.5 billion as of 31 December 2015.

The MFIs have multiplied over the past decade, increasing from a single licensed MFI in 1996 to 55 licensed MFIs as at September 2016 (4 cooperative unions (*unions coopératives*); 35 unitary cooperatives (*coopératives unitaires*); and 16 public limited companies (*sociétés anonymes*). The MFIs have (i) 350 points of service across the country, (ii) 1,093,107 members or clients, (iii) aggregate savings amounting to CFAF198 billion, and (iv) aggregate outstanding loans amounting to CFAF 176.2 billion. The microfinance sector benefited from significant support between 1994 and 1999 through subsidies, subsidized loans and technical support, which helped its expansion. Following this period, the issuance of licences to unsustainable institutions was not matched by a strengthening of their institutional capacities, which led to a deterioration of their operating conditions, in connection with the low repayment rate of numerous "bad debtor" enterprises that benefit from microloans.

The MFIs tend to be undercapitalized and often suffer from problems of governance, non-compliance with prudential laws, poor management capabilities, and low-quality information systems. Since 2008 as of 30 September 2016, a total of 126 approvals were withdrawn (including the basic funds which are affiliated to network), including 15 in 2016. According to monitoring tasks reports and collected financial statements, four other Decentralized Financial Systems (*Systèmes Financiers de Décentralisation*) were identified as non-viable. With respect to such entities, procedures for the withdrawal of their approvals are underway.

To address this situation, Côte d'Ivoire has developed a SNM for the 2010-2018 period. The SNM's action plan has a budget of CFAF 61.8 billion over eight years covering three objectives:

- improving the legal, regulatory and institutional environment, for a safer development of the sector;
- developing a viable and sustainable offer for an adapted, diversified and larger range of products and services, particularly in rural regions and regions not covered by increasingly professional MFIs; and
- strengthening the collaboration between MFIs and banks, encouraging the financing of SMEs and integrating the microfinance sector into the financial sector.

There has been a significant focus on strengthening the supervision over the last few years as part of a consolidation policy. This includes (i) strengthening the conditions for the grant of approvals, (ii) auditing Decentralized Financial Systems, and (iii) adopting and implementing measures and sanctions.

The Government intends to pursue its efforts with respect to the restructuring and consolidation of the sector of microfinance. Significant progress has been made regarding the delivery of licenses, the closing of illicit institutions, the control of documents and the implementation of measures and sanctions imposed on MFIs. For instance, the UNACOOPEC-CI, one of two main networks, was placed under temporary administration.

### **Financial Inclusion**

Like the other countries in the WAEMU zone, Côte d'Ivoire still has a low bank penetration rate. The extended bank penetration rate calculated by the BCEAO stood at 24.92% in 2017, compared to a sub-regional average of 35.88%, obtained using the 15-plus population as a basis. The strict bank penetration rate stood at 16.65% in 2017, compared to a regional average of 16.99%.

This distinction between the two indicators shows the impact of decentralized financing systems on financial inclusion, which includes four aspects: access, use, quality and well-being. The fourth aspect is not yet taken into account by the data-collection system implemented by the BCEAO to monitor financial inclusion, as it requires qualitative information that is currently unavailable.

Specifically, the emergence of mobile money and the promotion of microfinance institutions have contributed to improving financial inclusion. As of 31 December 2018, Côte d'Ivoire had 50 approved institutions. As a result, financial inclusion indicators have shown marked progress in Côte d'Ivoire over the past 10 years.

In general, reforms have been introduced as part of the national development strategy in the financial sector and specifically aim to improve financial inclusion. As part of these reforms:

- The Agency for the Promotion of Financial Inclusion (*Agence de Promotion de l'Inclusion Financière* (“**APIF**”)), established on 30 May 2018, is now operational. It is an executive agency in charge of promoting financial inclusion in Côte d'Ivoire and implementing the national strategy for financial inclusion for the 2019-2024 period. For these purposes, it is expected to develop and adapt the financial service offering to low-income people and small and medium-sized companies;
- The *Caisse des Dépôts et Consignations* is currently being prepared for its entry into operation, with the establishment of governing bodies, including the appointment of members of the Supervisory Committee, the General Manager and the Secretary General;
- The Credit Information Bureau (*Bureau d'Information sur le Crédit* (“**BIC**”)) has been strengthened through the development of “credit scoring” services for financial institutions, and the finalization of the procedure to integrate major utilities into the BIC's database. At the end of 2018, the BIC's database included 2.8 million individuals, compared to 1.2 million individuals at the end of 2017, and 9,105 businesses at the end of 2018, compared to 6,920 businesses at the end of 2017; and

The following table shows the evolution of the main indicators of financial inclusion, with regard to its first three aspects, i.e. access, use and quality:

Indicators	2013	2014	2015	2016	2017
<b>Indicators of financial service access</b>					
TGPSFd	8.30	15.58	23.03	25.11	35.44
TGPSFg	34.83	66.63	101.81	114.66	167.51
<b>Indicators of financial service use</b>					
TBS (%)	16.51	15.62	15.83	17.80	16.65
TBE (%)	22.28	21.62	23.03	25.72	24.92
TUSME (%)	23.08	39.30	25.51	33.10	45.92
TGUSF-1 (%)	45.36	60.92	48.56	58.82	70.84
TGUSF-2 (%)	38.88	52.21	41.60	50.41	60.71
<b>Indicators of accessibility – financial service price</b>					
TRD	2.57	4.67	3.72	4.35	4.25
TRC	0.276	0.325	0.346	0.363	0.410

Source: BCEAO, (Indicators of financial inclusion monitoring in the WAEMU for 2017, April 2019)

- *TGPSFd = Total rate of demographic penetration of financial services: (total number of financial service points / adult population)\*10,000*
- *TGPSFg = Total rate of geographic penetration of financial services: (total number of financial service points / total area)\*1,000 km<sup>2</sup>*
- *TBS = Strict banking rate :number of individuals holding deposit or credit accounts with banks, postal services, savings banks and the Treasury / adult population*
- *TBE = Extended banking rate: number of individuals holding deposit or credit accounts with banks, postal services, savings banks, the Treasury and Decentralized Financial Systems (Systèmes Financiers Décentralisés) / adult population*
- *TUSME = Rate of use of electronic money services (active account basis): number of individuals holding active electronic money accounts with EMIs, banks that issue electronic money and other financial institutions / adult population*
- *TGUSF = Total rate of use of financial services:*
  - *TGUSF-1 (active electronic money account basis): extended banking rate + rate of use of electronic money services, active account basis, adjusted to account for multibanking*
  - *TGUSF-2 (active electronic money account basis, adjusted to account for multibanking):extended banking rate + rate of use of electronic money services, active account basis, adjusted to account for multibanking*
- *TRD = Real interest rate on deposits at the bank level: nominal interest rate on deposits at the bank level – average inflation rate*

- *TRC = Real interest rate on loans at the bank level: nominal interest rate on loans at the bank level – average inflation rate.*

Total rate of demographic penetration of financial services (TGPSFd), calculated on the basis of the adult population, increased by 10 service points, from 25 service points for 10,000 adults in 2016 to 35 service points for 10,000 adults in 2017.

Like the demographic penetration rate, the total rate of geographic penetration of financial services (TGPSFg) increased from 115 service points for 1,000km<sup>2</sup> in 2016 to 168 service points for 1,000km<sup>2</sup> in 2017.

The total rate of use of financial services (TGUSF), or financial inclusion rate, calculated on an active electronic money account basis, increased by 10.3 service points between 2016 and 2017, from 50.4% to 60.7%. Taking into accounts all the opened electronic money accounts, the TGUSF was 76.6% in 2017, and 53.2% in 2016. Those results show that electronic money significantly contributed to the progression of financial services use in Côte d’Ivoire. Indeed, the rate of use of electronic money services (active account basis) stood at 45.9% in 2017, contributing to more than half of the financial inclusion rate (TGUSF).

In order to improve financial inclusion, besides the creation of the above-mentioned APIF by the Government in 2018, the DGTCP set up on 31 May 2018 a Network of the Financial Education Stakeholders in Côte d’Ivoire.

In addition, the DGTCP launched, on 23 August 2018, the third edition of the awareness campaign on the topic “Financial service quality in favour of the people”. This campaign followed the previous one organized in 2016 and 2017. It took place in the regions of the Bas-Sassandra (South-West), the Indénié-Djuablin (East), the Gôh (Centre-West) and the Tonkpi (West), from October to September 2018. The APIF organized, on 26 and 27 July 2018 in Grand-Bassam, and 2 November 2018 in Abidjan, workshops on the framework and validation, respectively, of the national strategy for financial inclusion for the 2019-2024 period. Such workshops elaborated a framework document setting out, among other things, the vision, goals, strategic axis and actions to be implemented in order to improve financial inclusion in Côte d’Ivoire.

At a regional level, the BCEAO organised, from 26 November to 1 December 2018, the 2018 WAEMU Financial Inclusion Week, on the topic “Financial Inclusion: a source of economic and social development”.

### ***Banking Regulator***

The regulation of the banking sector is performed by the Banking Commission. This commission is responsible for monitoring the organization and control of banks and financial institutions. It meets at least once every quarter. It has a permanent secretariat composed of BCEAO officers, who prepare reports and studies concerning compliance by WAMU credit institutions with liquidation and sound management rules.

In order to fulfil its responsibilities, the Banking Commission has the following powers: (i) document inspection and on-site visits of banks and financial institutions, (ii) approval of banks and financial institutions operating on the territory of a WAMU member State, (iii) implementation of administrative measures in case of non-compliance with applicable provisions (warning, injunction, disciplinary measures) and (iv) disciplinary sanctions depending on the seriousness of the violation (warning, reprimand, suspension or ban of some or all operations, limitations on practicing the profession, suspension or resignation of responsible executives, withdrawal of authorization).

### **Regional Stock Exchange**

On 18 December 1996, the eight member States of the WAEMU established the *Bourse régionale des valeurs mobilières* (“BRVM”). The BRVM is a specialized financial institution headquartered in Abidjan which is responsible for organizing and ensuring the proper execution of securities transactions and proper information of the public in the WAEMU zone.

The BRVM has the following functions: organizing the market, managing the rating and trading of securities, publishing stock prices and stock market information and ensuring the promotion and development of the securities market. The BRVM has a representative from each WAEMU country.

The BRVM is an entirely electronic stock exchange. The central site of the stock exchange in Abidjan ensures all of the quotation services, the negotiations and the diffusion of information. The BRVM is composed of a stock market which has a debt securities compartment and an equity securities compartment.

The Regional Council for Public Savings and the Financial Market is the regulatory body of the regional financial market. In 2012, this body strengthened market regulations to safeguard transactions and the interests of market participants.

### **Stock Market**

There are currently 46 companies listed on the BRVM market, of which 35 are Ivorian, three are Senegalese, three are from Burkina Faso, one is Beninese, one is Nigerian, one is Malian and two are Togolese.

The BRVM has established two indices, the BRVM 10 index and the BRVM composite index, to measure the development of listed companies' stock prices. The first index comprises the 10 most liquid shares and the second comprises all listed companies.

Stock market activity decreased in 2018, compared to 2017. The BRVM 10 fell from 219.7 points on 31 December 2017 to 154.4 points on 31 December 2018 and the BRVM composite, from 243.1 points on 31 December 2017 to 172.2 points on 31 December 2018. Similarly, capitalization recorded a decrease of CFAF 1,991.7 billion over this period.

The decline in the indices is due to the micro structure of the market. First, the decline resulted from a readjustment of the market after three years of intensive growth from 2012 to 2015. Second, the decline was due in part to the attractiveness of bond market rates, which have been marked by the pressing demand from governments, which preempted some of the liquidity available on the market. A third cause is the disaffection of small savers who have turned away from the market. This situation does not only affect the BRVM. Most African markets have been similarly affected by the decrease.

The table below shows the evolution of BRVM 10 and of BRVM composite over the past three years.

	2015	2016	2017	2018
BRVM 10	290.38	261.95	219.65	154.4
BRVM composite	303.93	292.17	243.06	172.2
Stock market capitalization (in CFAF billion)	7,499.7	7,706.3	6,836.2	4,844.5

*Source: BRVM, data as of 31 December 2018*

The equity market capitalization was CFAF 4,252 billion as of 27 September 2019.

### **Bond Market**

The BRVM is one of the most dynamic bond markets in Africa with 54 bond issues listed as of 27 September 2019, for a bond market capitalization of CFAF 3,970 billion.

These 54 bonds are composed as of 27 September 2019 of 34 sovereign bonds, 3 private sector bonds, 13 bonds by regional and international institutions, and 4 Sukuk issues.

As of 31 December 2018, total bonds represented a nominal amount of CFAF 3,444.2 billion, including CFAF 3,193.6 billion of sovereign bonds, or 92.7 % of the total market capitalization.

### ***Ongoing Reforms***

In terms of reforms, the 2014-2021 Strategic Plan for the WAEMU regional financial market is mainly centred around four key actions:

- enhancing the attractiveness of the regional financial market and its contribution to financing WAEMU economies;
- strengthening protections for savings, as well as monitoring market participants;
- improving regional and international institutional integration, and the organization, functioning and financing of all market players; and
- promoting the financial market at the WAEMU level and strengthening inter-African and international cooperation.

The current major reforms aim at ensuring stronger regional integration and increasing significantly the stock market's impact on financing the economy. Since 2013, the BRVM and other ECOWAS stock markets (Lagos in Nigeria and Accra in Ghana) are working to implement a mechanism for cross-transactions. The possibility to invest across these three markets should contribute to improving the depth of the WAEMU regional financial market. In addition, on 19 March 2018, the BRVM opened a compartment (the third share compartment) dedicated to small capitalizations in order to position itself as an alternative to bank financing.

## TERMS AND CONDITIONS OF THE 2031 NOTES

*The following is the text of the Terms and Conditions of the 2031 Notes which, upon issue, will represent the terms and conditions applicable to all 2031 Notes, and, subject to completion and amendment and except for the text in italics, will be endorsed on each Certificate in respect of the 2031 Notes. The terms and conditions applicable to any 2031 Note in global form will differ from those terms and conditions which would apply to the 2031 Note in definitive form to the extent described under the “Form of the Notes” section. Within this section entitled “Terms and Conditions of the 2031 Notes”, please note that the use of the term the “Notes” applies only to the 2031 Notes. Elsewhere in the Prospectus, the use of the term the “Notes” applies to the 2031 Notes and the 2040 Notes, together.*

The €50,000,000 5.875% Amortizing Notes due 2031 (the “**Notes**”, which expression shall in these Conditions, unless the context otherwise requires, include any further notes issued pursuant to Condition 15 (*Further Issues*) and forming a single series with the Notes) of the Republic of Côte d’Ivoire (the “**Issuer**”) are issued subject to and with the benefit of an Agency Agreement to be dated on or about 17 October 2019 (such agreement as amended and/or supplemented and/or restated from time to time, the “**Agency Agreement**” entered into between the Issuer, Citibank, N.A., London Branch, as fiscal agent (the “**Fiscal Agent**”), as paying agent (the “**Paying Agent**”) and as transfer agent (the “**Transfer Agent**”) and Citigroup Global Markets Europe AG as registrar (the “**Registrar**” and, together with the Fiscal Agent, the Transfer Agent and the Paying Agent, the “**Agents**”). The holders of the Notes are entitled to the benefit of a Deed of Covenant dated 17 October 2019 (the “**Deed of Covenant**”) and made by the Issuer.

The statements in these Conditions include summaries of, and are subject to, the detailed provisions of and definitions in the Agency Agreement. Copies of the Agency Agreement are available for inspection during normal business hours by the Noteholders (as defined below) at the Specified Office (as defined in the Agency Agreement) of each of the Paying Agents. The Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions of the Agency Agreement applicable to them. References in these Conditions to the Fiscal Agent, the Registrar, the Paying Agents and the Agents shall include any successor appointed under the Agency Agreement.

### 1. **Form, Denomination and Title**

#### 1.1 **Form and Denomination**

The Notes are in registered form, serially numbered and issued in denominations of €100,000 and integral multiples of €1,000 in excess thereof, each an “**Authorized Denomination**”. The Issuer will cause a register of Noteholders (the “**Register**”) to be kept by the Registrar, in which will be entered the names and addresses of the holders of the Notes and the particulars of the Notes held by them and all transfers and redemptions of the Notes.

#### 1.2 **Title**

Title to the Notes passes only by registration in the Register. The holder of any Note will (except as otherwise required by law) be treated as its absolute owner for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any interest or any writing thereon, or the theft or loss thereof) and no person will be liable for so treating the holder. In these Conditions, “**Noteholder**”, and in relation to a “**Note**”, “**holder**” means the person in whose name a Note is registered in the Register (or, in the case of a joint holding, the first named thereof). A certificate in definitive form (each a “**Certificate**”) will be issued to each Noteholder in respect of its registered holding of Notes.

*Notes sold to qualified institutional buyers in the United States in reliance on Rule 144A under the Securities Act of 1933, as amended (the “**Securities Act**”) will be represented by a Restricted Global Note Certificate. Notes sold to investors outside the United States in reliance on Regulation S under the Securities Act will be represented by an Unrestricted Global Note Certificate (the “**Global Note Certificates**”). The Global Note Certificates will be deposited with, and registered in the name of a nominee for, a common depositary for Euroclear Bank SA/NV (“**Euroclear**”) and Clearstream Banking, société anonyme (“**Clearstream, Luxembourg**”). Ownership of beneficial interests in the Global Note Certificates will be limited to persons that have accounts with Euroclear or Clearstream, Luxembourg or persons that may hold interests through such participants. Beneficial interests*

*in the Global Note Certificates will be shown on, and transfers thereof will be effected through, records maintained in book-entry form by Euroclear, Clearstream, Luxembourg and their participants as applicable. Global Note Certificates will be exchangeable for Certificates only in certain limited circumstances specified in the Global Note Certificates.*

## **2. Transfers of Notes and Issue of Certificates**

### **2.1 Transfers**

Subject to Condition 2.4 (*Closed Periods*) and Condition 2.5 (*Regulations*), a Note may be transferred, in whole or in part, by depositing the Certificate issued in respect of that Note, with the form of transfer on the back duly completed and signed, at the Specified Office of the Registrar or any of the Agents together with such evidence as the Registrar or Agent may require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer; *provided however that* a Note may not be transferred unless the principal amount of the Notes transferred and (where not all of the Notes held by a Holder are being transferred) the principal amount of the Notes not transferred, are Authorized Denominations.

### **2.2 Delivery of New Certificates**

Each new Certificate to be issued upon transfer or exchange of Notes will, within five business days of receipt by the Registrar or the Transfer Agent of the duly completed form of transfer endorsed on the relevant Certificate, be mailed by uninsured mail at the risk of the holder entitled to the Note to the address specified in the form of transfer. For the purposes of this Condition, “**business day**” shall mean a day on which banks are open for business in the city in which the Specified Office of the Agent with whom a Certificate is deposited in connection with a transfer is located.

Where some but not all of the Notes in respect of which a Certificate is issued are to be transferred a new Certificate in respect of the Notes not so transferred will, within five business days of receipt by the Registrar or the Transfer Agent of the original Certificate, be mailed by uninsured mail at the risk of the holder of the Notes not so transferred to the address of such holder appearing on the Register or as specified in the form of transfer.

### **2.3 Formalities Free of Charge**

Any transfer of Notes will be effected without charge by or on behalf of the Issuer, the Registrar, or any Agent but upon payment (or the giving of such indemnity as the Registrar or any Agent may reasonably require) in respect of any stamp duty, tax or other governmental charges which may be levied or imposed in relation to such transfer.

### **2.4 Closed Periods**

No Noteholder may require the transfer of a Note to be registered during the period of 15 calendar days ending on the due date for any payment of principal or interest on that Note.

### **2.5 Regulations**

All transfers of Notes and entries on the Register will be made subject to the detailed regulations concerning transfer of Notes scheduled to the Agency Agreement. The regulations may be changed by the Issuer with the prior written approval of the Registrar. A copy of the current regulations will be mailed (free of charge) by the Registrar to any Noteholder upon request.

## **3. Status**

The Notes constitute direct, unconditional and (subject to the provisions of Condition 4 (*Negative Pledge*)) unsecured obligations of the Issuer and (subject as provided above) rank and will rank *pari passu*, without any preference among themselves, and with all other unsecured and unsubordinated External Indebtedness (as defined in Condition 10.2 (*Interpretation*)) of the Issuer outstanding from time to time, *provided, however, that*

the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any other External Indebtedness and, in particular, shall have no obligation to pay other External Indebtedness at the same time or as a condition of paying sums due on the Notes and *vice versa*. The full faith and credit of the Issuer is pledged to the due and punctual payment of the Notes.

#### 4. Negative Pledge

##### 4.1 Negative Pledge

So long as any Note remains outstanding (as defined in the Agency Agreement) the Issuer will not, save for the exceptions set out below in Condition 4.3 (*Exceptions*) create, incur, assume or permit to subsist any Security upon the whole or any part of its present or future assets, undertakings or revenues to secure (i) any of its Public External Indebtedness; (ii) any Guarantees in respect of Public External Indebtedness; or (iii) the Public External Indebtedness of any other person; without at the same time or prior thereto securing the Notes equally and rateably therewith or providing such other arrangement (whether or not comprising Security) as shall be approved by an Extraordinary Resolution or by a Written Resolution (each as defined in the Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*)). For the avoidance of doubt, any such approval shall not constitute a Reserved Matter (for the purposes of and as defined in the Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*)).

##### 4.2 Interpretation

In these Conditions:

- (a) “**Guarantee**” means any obligation of a person to pay the Indebtedness of another person including, without limitation: an obligation to pay or purchase such Indebtedness; an obligation to lend money, to purchase or subscribe shares or other securities or to purchase assets or services in order to provide funds for the payment of such Indebtedness; an indemnity against the consequences of a default in the payment of such Indebtedness; or any other agreement to be responsible for such Indebtedness;
- (b) “**Indebtedness**” means any obligation (whether present or future) for the payment or repayment of money which has been borrowed or raised (including money raised by acceptances and leasing);
- (c) “**person**” means any individual, company, corporation, firm, partnership, joint venture, association, organization, trust or other juridical entity, state or agency of a state or other entity, whether or not having a separate legal personality;
- (d) “**Public External Indebtedness**” means any Indebtedness (i) expressed or denominated or payable or which, at the option of the relevant creditor may be payable, in any currency other than the lawful currency from time to time of the Republic of Côte d’Ivoire, and (ii) which is in the form of, or is represented by, bonds, notes or other securities with a stated maturity of more than one year from the date of issue which are, or are capable of being, quoted, listed or ordinarily purchased or sold on any stock exchange, automated trading system, over the counter or other securities market; and
- (e) “**Security**” means any mortgage, pledge, lien, hypothecation, security interest or other charge or encumbrance including, without limitation, anything analogous to the foregoing under the laws of any jurisdiction.

##### 4.3 Exceptions

The following exceptions apply to the Issuer’s obligations under paragraph 4.1 (Negative Pledge) of this Condition:

- (a) any Security upon property to secure Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing the

acquisition or construction of such property and any renewal and extension of such Security which is limited to the original property covered thereby and which (in either case) secures any renewal or extension of the original secured financing; and

- (b) any Security securing Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing all or part of the costs of the acquisition, construction or development of a project; provided that (A) the holders of such Public External Indebtedness or Guarantee expressly agree to limit their recourse to the assets and revenues of such project or the proceeds of insurance thereon as the sole source of repayments of such Public External Indebtedness and (B) the property over which such Security is granted consists solely of such assets and revenues.

## 5. Interest

The Notes bear interest on their outstanding principal amount from time to time from and including 17 October 2019 (the “**Issue Date**”) to but excluding the Maturity Date (as defined in Condition 7.1 (*Redemption*)) at the rate of 5.875% per annum (the “**Rate of Interest**”), payable annually in arrear on 17 October in each year (each an “**Interest Payment Date**”) commencing on 17 October 2020. Each period beginning on (and including) the Issue Date or any Interest Payment Date and ending on (but excluding) the next Interest Payment Date is herein called an “**Interest Period**”.

Each Note will cease to bear interest from and including its due date for redemption unless, upon due presentation, payment of the principal in respect of the Note is improperly withheld or refused or unless default is otherwise made in respect of payment. In such event, interest will continue to accrue until whichever is the earlier of:

- (a) the date on which all amounts due in respect of such Note have been paid; and
- (b) seven days after the date on which the full amount of the moneys payable in respect of such Notes has been received by the Fiscal Agent and notice to that effect has been given to the Noteholders in accordance with Condition 12 (*Notices*) (except to the extent that there is any subsequent default in payment).

Where interest is to be calculated in respect of a period which is equal to or shorter than an Interest Period, the day count fraction applied to calculate the amount of interest payable in respect of each Note shall be the number of days in the relevant period from (and including) the date from which interest begins to accrue to (but excluding) the date on which it falls due, divided by the number of days in the Interest Period in which the relevant period falls (including the first such day but excluding the last).

## 6. Payments

### 6.1 Payments in Respect of Notes

Payment of principal and interest will be made by transfer to the registered account of the Noteholder or by a cheque in Euro drawn on a bank that processes payments in Euro mailed to the registered address of the Noteholder if it does not have a registered account. Payment of principal will only be made against presentation and surrender of the relevant Certificate at the Specified Office of any of the Paying Agents. Interest on Notes due on an Interest Payment Date will be paid to the holder shown on the Register at the close of business on the date (the “**record date**”) being the fifteenth day before the due date for the payment of interest.

*For so long as the Notes are represented by Global Note Certificates, the Issuer will make each interest payment to the holders of record of the Notes at the close of business (in the relevant clearing system) on the Clearing System Business Day immediately before the due date for such payment (which date shall constitute the “record date” when the Notes are represented by Global Note Certificates), where “Clearing System Business Day”*

*means a day on which each clearing system for which Global Note Certificates are being held is open for business.*

For the purposes of this Condition 6, a Noteholder's "**registered account**" means the Euro account maintained by or on its behalf with a bank that processes payments in Euro, details of which appear on the Register at the close of business, in the case of principal, on the second Business Day (as defined below) before the due date for payment and, in the case of interest, on the relevant record date, and a Noteholder's "**registered address**" means its address appearing on the Register at that time.

## 6.2 **Payments Subject to Applicable Laws**

Payments in respect of principal and interest on Notes are subject in all cases to any fiscal or other laws and regulations applicable in the place of payment, but without prejudice to the provisions of Condition 8 (*Taxation*).

## 6.3 **No Commissions**

No commissions or expenses shall be charged to the Noteholders in respect of any payments made in accordance with this Condition 6 (*Payments*).

## 6.4 **Payment on Business Days**

Where payment is to be made by transfer to a registered account, payment instructions (for value the due date or, if that is not a Business Day, for value the first following day which is a Business Day) will be initiated and, where payment is to be made by cheque, the cheque will be mailed, on the due date for payment or, in the case of a payment of principal, if later, on the Business Day on which the relevant Certificate is surrendered at the Specified Office of an Agent.

Noteholders will not be entitled to any interest or other payment for any delay after the due date in receiving the amount due if the due date is not a Business Day, if the Noteholder is late in surrendering its Certificate (if required to do so) or if a cheque mailed in accordance with this Condition 6 arrives after the due date for payment.

In this Condition 6, "**Business Day**" means a day (other than a Saturday or Sunday) on which commercial banks are open for general business in London, on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET) System (the "**TARGET System**") is open and, in the case of presentation of a Certificate, in the place in which the Certificate is presented.

## 6.5 **Partial Payments**

If the amount of principal or interest which is due on the Notes is not paid in full, the Registrar will annotate the Register with a record of the amount of principal or interest in fact paid.

## 6.6 **Agents**

The names of the initial Agents and their initial Specified Offices are set out in the Agency Agreement. The Issuer reserves the right at any time to vary or terminate the appointment of any Agent and to appoint additional or other Agents *provided that* there will at all times be a Fiscal Agent, a Registrar and a Transfer Agent in a major European city.

Notice of any termination or appointment and of any changes in Specified Offices will be given to the Noteholders promptly by the Issuer in accordance with Condition 12 (*Notices*).

In acting under the Agency Agreement and in connection with the Notes, the Agents act solely as agents of the Issuer and do not assume any obligations towards or relationship of agency or trust for or with any of the Noteholders.

## 7. Redemption and Purchase

### 7.1 Redemption

#### *Redemption by Amortization and Final Redemption*

Unless previously redeemed, or purchased and cancelled, each Note shall be partially redeemed on each date specified below (each an “**Amortization Date**”) by the relevant amortization amount specified below (each an “**Amortization Amount**”) payable as provided in Condition 6 (*Payments*). The outstanding principal amount of each such Note shall be reduced by the Amortization Amount for all purposes with effect from the relevant Amortization Date, unless the payment of the relevant Amortization Amount is improperly withheld or refused. In such a case, the relevant principal amount will remain outstanding until whichever is the earlier of (a) the day on which all sums due in respect of such Note up to that day are received by or on behalf of the relevant Noteholder and (b) the Business Day after the Fiscal Agent has given notice to the Noteholders of receipt of all sums due in respect of all Notes up to that Business Day (except to the extent that there is any subsequent default in payment in accordance with these Conditions). Each Note shall be finally redeemed on 17 October 2031 (the “**Maturity Date**”) at its final Amortization Amount payable as provided in Condition 6 (*Payments*).

<b>Amortization Date</b>	<b>Outstanding principal amount of each €1,000 principal amount of Notes on the relevant Amortization Date prior to payment of the relevant Amortization Amount (in €)</b>	<b>Amortization Amount per €1,000 principal amount of Notes to be repaid on the relevant Amortization Date (in €)</b>	<b>Outstanding principal amount of each €1,000 principal amount of Notes on the relevant Amortization Date after payment of the relevant Amortization Amount (in €)</b>
17 October 2029	1,000	333	667
17 October 2030	667	333	334
17 October 2031	334	334	0

In these Conditions, references to “**principal**” shall, unless the context requires otherwise, be deemed to include any Amortization Amount and references to the “**due date**” for payment shall, unless the context requires otherwise, be deemed to include any Amortization Date.

### 7.2 Purchase and Cancellation

The Issuer may at any time purchase Notes in the open market or otherwise and at any price, *provided that* such purchase is made in accordance with the U.S. Securities Act of 1933, as amended (the “**Securities Act**”) and any other applicable securities laws. Any Notes so purchased may be cancelled or held or resold (*provided that* any resales in the United States must be in accordance with an effective registration statement or in a transaction exempt from or not subject to the registration requirements of the Securities Act). Any Notes so purchased, while held by or on behalf of the Issuer shall not entitle the holder to vote at any meeting of Noteholders and shall not be deemed to be outstanding for the purposes of such meetings. Any Notes so cancelled will not be reissued.

## 8. Taxation

### 8.1 Payment Without Withholding

All payments in respect of the Notes by or on behalf of the Issuer shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature (“**Taxes**”) imposed or levied by or on behalf of the Relevant Jurisdiction, unless the withholding or deduction of the Taxes is required by law. In that event, the Issuer will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholders after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the Notes in the absence of the withholding

or deduction (“**Additional Amounts**”); except that no Additional Amounts shall be payable in relation to any payment in respect of any Note:

- (a) in circumstances where the holder of the Note is liable for Taxes on payments in respect of the Note by reason of his having some connection with the Relevant Jurisdiction other than the mere holding of the Note; or
- (b) if such Note is presented or surrendered for payment more than 30 days after the Relevant Date (as defined below), except to the extent that the relevant holder would have been entitled to such Additional Amounts if it had presented or surrendered such Note on the last day of such period of 30 days assuming, whether or not such is in fact the case, that day to have been a Business Day (as defined in Condition 6 (Payments)); or
- (c) where such withholding or deduction is imposed as a result of any combination of (a) and (b) above.

## 8.2 Interpretation

In these Conditions:

- (a) “**Relevant Date**” means the date on which the payment first becomes due but, if the full amount of the money payable has not been received by the Fiscal Agent on or before the due date, it means the date on which, the full amount of the money having been so received, notice to that effect has been duly given to the Noteholders by the Issuer in accordance with Condition 12 (*Notices*); and
- (b) “**Relevant Jurisdiction**” means the Republic of Côte d’Ivoire or any political subdivision or any authority thereof or therein having power to tax in respect of payments made by it of principal and interest on the Notes.

## 8.3 Additional Amounts

Any reference in these Conditions to any amounts in respect of the Notes shall be deemed also to refer to any Additional Amounts which may be payable under this Condition 8.

## 9. Prescription

Claims against the Issuer in respect of principal and interest will become void unless made within 10 years (in the case of principal) and five years (in the case of interest) from the Relevant Date, as defined in Condition 8 (*Taxation*).

## 10. Events of Default

### 10.1 Events of Default

If any of the following events (each, an “**Event of Default**”) shall have occurred and be continuing:

- (a) **Non-payment**
  - (i) the Issuer fails to pay any principal on any of the Notes when due and payable and such failure continues for a period of 15 business days; or
  - (ii) the Issuer fails to pay any interest on any of the Notes or any amount due under Condition 8 (*Taxation*) when due and payable, and such failure continues for a period of 30 days; or

(b) **Breach of Other Obligations**

the Issuer does not perform or comply with any one or more of its other obligations in the Notes or the Agency Agreement, which default is incapable of remedy or is not remedied within 45 days following the service by any Noteholder on the Issuer of notice requiring the same to be remedied; or

(c) **Cross-acceleration**

- (i) any other External Indebtedness of the Issuer becomes due and payable prior to stated maturity thereof by reason of default, or
- (ii) any such External Indebtedness is not paid at maturity; or
- (iii) any Guarantee of such External Indebtedness is not honoured when due and called upon, and, in the case of (ii) or (iii), that failure continues beyond any applicable grace period,

*provided that* the aggregate amount of the relevant External Indebtedness in respect of which one or more of the events mentioned in this paragraph (c) have occurred equals or exceeds US\$25,000,000 or its equivalent in any other currency or currencies; or

(d) **Moratorium**

a moratorium on the payment of principal of, or interest on, the External Indebtedness of the Issuer shall be declared by the Issuer; or

(e) **International Monetary Fund Membership**

the Issuer shall cease to be a member of the International Monetary Fund or any successor (whether corporate or not) that performs the functions of, or functions similar thereto (the “**IMF**”) or shall cease to be eligible to use the general resources of the IMF; or

(f) **Validity**

- (i) the validity of the Notes shall be contested by the Issuer; or
- (ii) the Issuer shall deny any of its obligations under the Notes (whether by a general suspension of payments or a moratorium on the payment of debt or otherwise); or
- (iii) it shall be or become unlawful for the Issuer to perform or comply with all or any of its obligations set out in the Notes or the Agency Agreement, including, without limitation, the payment of interest on the Notes, as a result of any change in law or regulation in the Republic of Côte d’Ivoire or any ruling of any court in the Republic of Côte d’Ivoire whose decision is final and unappealable or for any reason such obligations cease to be in full force and effect; or

(g) **Consents**

if any authorization, consent of, or filing or registration with, any governmental authority necessary for the performance of any payment obligation of the Issuer under the Notes, when due, ceases to be in full force and effect or remain valid and subsisting,

then the holders of at least 25% in aggregate principal amount of the outstanding Notes (as defined in the Agency Agreement) may, by notice in writing to the Issuer (with a copy to the Fiscal Agent), declare all the Notes to be immediately due and payable, whereupon they shall become immediately due and payable at their principal amount together with accrued interest without further action or formality. Notice of any such declaration shall promptly be given to all other Noteholders by the Issuer.

If the Issuer receives notice in writing from holders of at least 50% in aggregate principal amount of the outstanding Notes to the effect that the Event of Default or Events of Default giving rise to any above mentioned declaration of acceleration is or are cured following any such declaration and that such holders wish the relevant declaration to be withdrawn, the Issuer shall, give notice thereof to the Noteholders (with a copy to the Fiscal Agent), whereupon the relevant declaration shall be withdrawn and shall have no further effect but without prejudice to any rights or obligations which may have arisen before the Issuer gives such notice (whether pursuant to these Conditions or otherwise). No such withdrawal shall affect any other or any subsequent Event of Default or any right of any Noteholder in relation thereto.

## 10.2 Interpretation

As used herein:

“**External Indebtedness**” means Indebtedness expressed or denominated or payable, or which at the option of the relevant creditor may be payable, in any currency other than the lawful currency from time to time of the Republic of Côte d’Ivoire.

## 11. Replacement of Certificates

If any Certificate is lost, stolen, mutilated, defaced or destroyed it may be replaced at the Specified Office of the Registrar upon payment by the claimant of the expenses incurred in connection with the replacement and on such terms as to evidence, security and indemnity as the Issuer may reasonably require. Mutilated or defaced Certificates must be surrendered before replacements will be issued.

## 12. Notices

All notices to the Noteholders will be valid if mailed to them at their respective addresses in the Register. Any notice shall be deemed to have been given on the fourth business day after being so mailed. Notices concerning the Notes shall also be published (so long as the Notes are listed on Euronext Dublin and the rules of that Exchange so require) on the website of Euronext Dublin ([www.ise.ie](http://www.ise.ie)).

## 13. Meetings of Noteholders, Modifications and Waivers

### 13.1 Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions

- (a) The Issuer may convene a meeting of the Noteholders at any time in respect of the Notes in accordance with the Agency Agreement. The Issuer will determine the time and place of the meeting. The Issuer will notify the Noteholders of the time, place and purpose of the meeting not less than 21 and not more than 45 days before the meeting.
- (b) The Issuer or the Fiscal Agent will convene a meeting of Noteholders if the holders of at least 10 per cent. in principal amount of the outstanding Notes (as defined in the Agency Agreement and described in Condition 13.9 (*Notes controlled by the Issuer*)) have delivered a written request to the Issuer or the Fiscal Agent (with a copy to the Issuer) setting out the purpose of the meeting. The Fiscal Agent will agree the time and place of the meeting with the Issuer promptly. The Issuer or the Fiscal Agent, as the case may be, will notify the Noteholders within 10 days of receipt of such written request of the time and place of the meeting, which shall take place not less than 21 and not more than 45 days after the date on which such notification is given.
- (c) The Issuer (with the agreement of the Fiscal Agent) will set the procedures governing the conduct of any meeting in accordance with the Agency Agreement. If the Agency Agreement does not include such procedures, or additional procedures are required, the Issuer and the Fiscal Agent will agree such procedures as are customary in the market and in such a manner as to facilitate any multiple series aggregation, if in relation to a Reserved Matter the Issuer proposes any modification to the terms and conditions of, or action with respect to, two or more series of debt securities issued by it.

- (d) The notice convening any meeting will specify, *inter alia*;
- (i) the date, time and location of the meeting;
  - (ii) the agenda and the text of any Extraordinary Resolution to be proposed for adoption at the meeting;
  - (iii) the record date for the meeting, which shall be no more than five business days before the date of the meeting;
  - (iv) the documentation required to be produced by a Noteholder in order to be entitled to participate at the meeting or to appoint a proxy to act on the Noteholder's behalf at the meeting;
  - (v) any time deadline and procedures required by any relevant international and/or domestic clearing systems or similar through which the Notes are traded and/or held by Noteholders;
  - (vi) whether Condition 13.2 (*Modification of this Series of Notes only*), or Condition 13.3 (*Multiple Series Aggregation – Single limb voting*), or Condition 13.4 (*Multiple Series Aggregation – Two limb voting*) shall apply and, if relevant, in relation to which other series of debt securities it applies;
  - (vii) if the proposed modification or action relates to two or more series of debt securities issued by the Issuer and contemplates such series of debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group of debt securities;
  - (viii) such information that is required to be provided by the Issuer in accordance with Condition 13.6 (*Information*);
  - (ix) the identity of the Aggregation Agent and the Calculation Agent (each as defined in these Conditions), if any, for any proposed modification or action to be voted on at the meeting, and the details of any applicable methodology referred to in Condition 13.7 (*Claims Valuation*); and
  - (x) any additional procedures which may be necessary and, if applicable, the conditions under which a multiple series aggregation will be deemed to have been satisfied if it is approved as to some but not all of the affected series of debt securities.
- (e) In addition, the Agency Agreement contains provisions relating to Written Resolutions. All information to be provided pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*) shall also be provided, mutatis mutandis, in respect of Written Resolutions.
- (f) A “**record date**” in relation to any proposed modification or action means the date fixed by the Issuer for determining the Noteholders and, in the case of a multiple series aggregation, the holders of debt securities of each other affected series that are entitled to vote on a Multiple Series Single Limb Extraordinary Resolution or a Multiple Series Two Limb Extraordinary Resolution, or to sign a Multiple Series Single Limb Written Resolution or a Multiple Series Two Limb Written Resolution.
- (g) An “**Extraordinary Resolution**” means any of a Single Series Extraordinary Resolution, a Multiple Series Single Limb Extraordinary Resolution and/or a Multiple Series Two Limb Extraordinary Resolution, as the case may be.
- (h) A “**Written Resolution**” means any of a Single Series Written Resolution, a Multiple Series Single Limb Written Resolution and/or a Multiple Series Two Limb Written Resolution, as the case may be.
- (i) Any reference to “**debt securities**” means any notes (including the Notes), bonds, debentures or other debt securities (which for these purposes shall be deemed to include any sukuk or other trust certificates

representing the credit of the Issuer) issued by or on behalf of the Issuer in one or more series with an original stated maturity of more than one year.

- (j) **“Debt Securities Capable of Aggregation”** means those debt securities which include or incorporate by reference this Condition 13 (*Meetings of Noteholders, Modifications and Waivers*) and Condition 14 (*Aggregation Agent; Aggregation Procedures*) or provisions substantially in these terms which provide for the debt securities which include such provisions to be capable of being aggregated for voting purposes with other series of debt securities.

### 13.2 **Modification of this Series of Notes only**

- (a) Any modification of any provision of, or any action in respect of, these Conditions, the Agency Agreement and/or the Deed of Covenant (other than changes which are formal, minor or technical nature, are made to correct a manifest error, or in the sole opinion of the Issuer, are not materially prejudicial to the interests of Noteholders, as provided in the Agency Agreement) may be made or taken if approved by a Single Series Ordinary Resolution, a Single Series Extraordinary Resolution or a Single Series Written Resolution as set out below.
- (b) For the purposes of a meeting of Noteholders convened in respect of the Notes only and for the purposes of passing a Single Series Ordinary Resolution and/or a Single Series Extraordinary Resolution (each as defined below) (a **“Single Series Meeting”**), at any such Single Series Meeting any one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 50 per cent. in principal amount of the Notes for the time being outstanding (or, in the case of an adjourned meeting, one or more persons present in person holding Notes or being proxies or representatives (whatever the principal amount of Notes so held or represented)) shall (except for the purposes of passing a Single Series Extraordinary Resolution) form a quorum for the transaction of business and no business (other than the choosing of a chairman) shall be transacted at any such Single Series Meeting unless the requisite quorum be present at the commencement of business. The quorum at any such Single Series Meeting convened for the purpose of passing a Single Series Extraordinary Resolution shall be one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 66.67 per cent. of the principal amount of the Notes for the time being outstanding, (or, in the case of an adjourned meeting, one or more persons so present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 33.34 per cent. in the principal amount of Notes for the time being outstanding).
- (c) A **“Single Series Ordinary Resolution”** means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Conditions 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*) and 13.2(b) in respect of any matter other than a Reserved Matter, by a majority of at least 66.67 per cent. of the votes cast.
- (d) A **“Single Series Extraordinary Resolution”** means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*) and Condition 13.2(b) in respect of a Reserved Matter by a majority of at least 75 per cent. of the votes cast.
- (e) A **“Single Series Written Resolution”** means a resolution in writing signed or confirmed in writing by or on behalf of the holders of:
  - (i) in the case of a Reserved Matter, at least 75 per cent. of the aggregate principal amount of the outstanding Notes; or

- (ii) in the case of a matter other than a Reserved Matter more than 50 per cent. of the aggregate principal amount of the outstanding Notes.

Any Single Series Written Resolution may be contained in one document or several documents in the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders.

- (f) Any Single Series Ordinary Resolution, Single Series Extraordinary Resolution duly passed or Single Series Written Resolution approved shall be binding on all Noteholders, whether or not they attended such Single Series Meeting, whether or not they voted in favour thereof and whether or not they signed or confirmed in writing any such Single Series Written Resolution, as the case may be.

### 13.3 Multiple Series Aggregation – Single limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Single Limb Extraordinary Resolution or by a Multiple Series Single Limb Written Resolution as set out below, provided that the Uniformly Applicable condition is satisfied.
- (b) A “**Multiple Series Single Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*), as supplemented if necessary, which is passed by a majority of at least 75 per cent. of the aggregate principal amount of the outstanding debt securities of all affected series of Debt Securities Capable of Aggregation (taken in aggregate).
- (c) A “**Multiple Series Single Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of at least 75 per cent. of the aggregate principal amount of the outstanding debt securities of all affected series of Debt Securities Capable of Aggregation (taken in aggregate). Any Multiple Series Single Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of debt securities.
- (d) Any Multiple Series Single Limb Extraordinary Resolution duly passed or Multiple Series Single Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Single Limb Written Resolution, as the case may be.
- (e) The “**Uniformly Applicable**” condition will be satisfied if:
  - (i) the holders of all affected series of Debt Securities Capable of Aggregation are invited to exchange, convert, or substitute their debt securities, on the same terms for (i) the same new instrument or other consideration or (ii) a new instrument, new instruments or other consideration from an identical menu of instruments or other consideration; or
  - (ii) the amendments proposed to the terms and conditions of each affected series of Debt Securities Capable of Aggregation would, following implementation of such amendments, result in the amended instruments having identical provisions (other than provisions which are necessarily different, having regard to different currency of issuance).

- (f) It is understood that a proposal under Condition 13.3(a) above will not be considered to satisfy the Uniformly Applicable condition if each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation (or, where a menu of instruments or other consideration is offered, each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation electing the same option from such menu of instruments).
- (g) Any modification or action proposed under Condition 13.3(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.3 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

#### 13.4 Multiple Series Aggregation – Two limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Two Limb Extraordinary Resolution or by a Multiple Series Two Limb Written Resolution as set out below.
- (b) A “**Multiple Series Two Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*), as supplemented if necessary, which is passed by a majority of:
  - (i) at least 66.67 per cent. of the aggregate principal amount of the outstanding debt securities of affected series of all Debt Securities Capable of Aggregation (taken in aggregate); and
  - (ii) more than 50 per cent. of the aggregate principal amount of the outstanding debt securities in each affected series of Debt Securities Capable of Aggregation (taken individually).
- (c) A “**Multiple Series Two Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of:
  - (i) at least 66.67 per cent. of the aggregate principal amount of the outstanding debt securities of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and
  - (ii) more than 50 per cent. of the aggregate principal amount of the outstanding debt securities in each affected series of Debt Securities Capable of Aggregation (taken individually).

Any Multiple Series Two Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of Debt Securities Capable of Aggregation.

- (d) Any Multiple Series Two Limb Extraordinary Resolution duly passed or Multiple Series Two Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Two Limb Written Resolution, as the case may be.
- (e) Any modification or action proposed under Condition 13.4(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.4 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

### 13.5 **Reserved Matters**

In these Conditions, “**Reserved Matter**” means any proposal:

- (a) to change the dates, or the method of determining the dates, for payment of principal, interest or any other amount in respect of the Notes, to reduce or cancel the amount of principal, interest or any other amount payable on any date in respect of the Notes or to change the method of calculating the amount of principal, interest or any other amount payable in respect of the Notes on any date;
- (b) to change the currency in which any amount due in respect of the Notes is payable or the place in which any payment is to be made;
- (c) to change the majority or quorum required to pass a Single Series Ordinary Resolution, an Extraordinary Resolution, a Written Resolution or any other resolution of Noteholders or the number or percentage of votes required to be cast, or the number or percentage of Notes required to be held, in connection with the taking of any decision or action by or on behalf of the Noteholders or any of them;
- (d) to change this definition, or the definition of “Extraordinary Resolution”, “Single Series Ordinary Resolution”, “Single Series Extraordinary Resolution”, Multiple Series Single Limb Extraordinary Resolution, Multiple Series Two Limb Extraordinary Resolution, Written Resolution, Single Series Written Resolution, Multiple Series Single Limb Written Resolution or Multiple Series Two Limb Written Resolution;
- (e) to change the definition of “debt securities” or “Debt Securities Capable of Aggregation”;
- (f) to change the definition of “Uniformly Applicable”;
- (g) to change the definition of “outstanding” or to modify the provisions of Condition 13.9 (*Notes controlled by the Issuer*);
- (h) to change the legal ranking of the Notes or other specified substantive covenants as appropriate, to be determined on a case-by-case basis;
- (i) to change any provision of the Notes describing circumstances in which Notes may be declared due and payable prior to their scheduled maturity date, set out in Condition 10 (*Events of Default*);
- (j) to change the law governing the Notes, the courts to the jurisdiction of which the Issuer has submitted in the Notes, any of the arrangements specified in the Notes to enable proceedings to be taken or the Issuer's waiver of immunity, in respect of actions or proceedings brought by any Noteholder, set out in Condition 16 (*Governing Law and Submission to Jurisdiction*);

- (k) to impose any condition on or otherwise change the Issuer's obligation to make payments of principal, interest or any other amount in respect of the Notes, including by way of the addition of a call option;
- (l) to modify the provisions of this Condition 13.5;
- (m) except as permitted by any related guarantee or security agreement, to release any agreement guaranteeing or securing payments under the Notes or to change the terms of any such guarantee or security; or
- (n) to exchange or substitute all the Notes for, or convert all the Notes into, other obligations or securities of the Issuer or any other person, or to modify any provision of these Conditions in connection with any exchange or substitution of the Notes for, or the conversion of the Notes into, any other obligations or securities of the Issuer or any other person, which would result in the Conditions as so modified being less favourable to the Noteholders which are subject to the Conditions as so modified than:
  - (i) the provisions of the other obligations or debt securities of the Issuer or any other person resulting from the relevant exchange or substitution or conversion; or
  - (ii) if more than one series of other obligations or debt securities results from the relevant exchange or substitution or conversion, the provisions of the resulting series of debt securities having the largest aggregate principal amount.

### 13.6 Information

Prior to or on the date that the Issuer proposes any Extraordinary Resolution or Written Resolution pursuant to Condition 13.2 (*Modification of this Series of Notes only*), Condition 13.3 (*Multiple Series Aggregation – Single limb voting*) or Condition 13.4 (*Multiple Series Aggregation – Two limb voting*), the Issuer shall publish in accordance with Condition 14 (*Aggregation Agent; Aggregation Procedures*), and provide the Fiscal Agent with the following information:

- (a) a description of the Issuer's economic and financial circumstances which are, in the Issuer's opinion, relevant to the request for any potential modification or action, a description of the Issuer's existing debts and a description of its broad policy reform programme and provisional macroeconomic outlook;
- (b) if the Issuer shall at the time have entered into an arrangement for financial assistance with multilateral and/or other major creditors or creditor groups and/or an agreement with any such creditors regarding debt relief, a description of any such arrangement or agreement. Where permitted under the information disclosure policies of the multilateral or such other creditors, as applicable, copies of the arrangement or agreement shall be provided;
- (c) a description of the Issuer's proposed treatment of external debt securities that fall outside the scope of any multiple series aggregation and its intentions with respect to any other debt securities and its other major creditor groups; and
- (d) if any proposed modification or action contemplates debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group, as required for a notice convening a meeting of the Noteholders in Condition 13.1(d)(vii) (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*)

### 13.7 Claims Valuation

For the purpose of calculating the par value of the Notes and any affected series of debt securities which are to be aggregated with the Notes in accordance with Condition 13.3 (*Multiple Series Aggregation – Single limb voting*) and Condition 13.4 (*Multiple Series Aggregation – Two limb voting*), the Issuer may appoint a calculation

agent (the “Calculation Agent”). The Issuer shall, with the approval of the Aggregation Agent and any appointed Calculation Agent, promulgate the methodology in accordance with which the Calculation Agent will calculate the par value of the Notes and such affected series of debt securities. In any such case where a Calculation Agent is appointed, the same person will be appointed as the Calculation Agent for the Notes and each other affected series of debt securities for these purposes, and the same methodology will be promulgated for each affected series of debt securities.

### 13.8 **Manifest error, etc.**

The Notes, these Conditions and the provisions of Agency Agreement may be amended without the consent of the Noteholders to correct a manifest error. In addition, the parties to the Agency Agreement may agree to modify any provision thereof, but the Issuer shall not agree, without the consent of the Noteholders, to any such modification unless it is of a formal, minor or technical nature or it is not materially prejudicial to the interests of the Noteholders.

### 13.9 **Notes controlled by the Issuer**

For the purposes of (i) determining the right to attend and vote at any meeting of Noteholders, or the right to sign or confirm in writing, or authorise the signature of, any Written Resolution and (ii) this Condition 13 (*Meetings of Noteholders; Modifications and Waivers*) and (iii) Condition 10 (*Events of Default*), any Notes which are for the time being held by or on behalf of the Issuer or by or on behalf of any person which is owned or controlled directly or indirectly by the Issuer or by any public sector instrumentality of the Issuer shall be disregarded and be deemed not to remain outstanding, where:

- (a) **“public sector instrumentality”** means the Central Bank of West African States (BCEAO), any department, ministry or agency of the government of the Republic or any corporation, trust, financial institution or other entity owned or controlled by the Republic or any of the foregoing; and
- (b) **“control”** means the power, directly or indirectly, through the ownership of voting securities or other ownership interests or through contractual control or otherwise, to direct the management of or elect or appoint a majority of the board of directors or other persons performing similar functions in lieu of, or in addition to, the board of directors of a corporation, trust, financial institution or other entity.

A Note will also be deemed to be not outstanding if the Note has previously been cancelled or delivered for cancellation or held for reissuance but not reissued or previously become due and payable at maturity or otherwise and the Issuer has previously satisfied its obligations to make all payments due in respect of the Note in accordance with its terms.

In advance of any meeting of Noteholders, or in connection with any Written Resolution, the Issuer shall provide to the Fiscal Agent a copy of the certificate prepared pursuant to Condition 14.4 (*Certificate*), which includes information on the total number of Notes which are for the time being held by or on behalf of the Issuer or by or on behalf of any person which is owned or controlled directly or indirectly by the Issuer or by any public sector instrumentality of the Issuer and, as such, such Notes shall be disregarded and deemed not to remain outstanding for the purposes of ascertaining the right to attend and vote at any meeting of Noteholders or the right to sign, or authorise the signature of, any Written Resolution in respect of any such meeting. The Fiscal Agent shall make any such certificate available for inspection during normal business hours at its specified office and, upon reasonable request, will allow copies of such certificate to be taken.

### 13.10 **Publication**

The Issuer shall publish all Extraordinary Resolutions and Written Resolutions which have been determined by the Aggregation Agent to have been duly passed in accordance with Condition 14.7 (*Manner of publication*).

### 13.11 **Exchange and Conversion**

Any Extraordinary Resolutions or Written Resolutions which have been duly passed and which modify any provision of, or action in respect of, the Conditions may be implemented at the Issuer's option by way of a mandatory exchange or conversion of the Notes and each other affected series of debt securities, as the case may be, into new debt securities containing the modified terms and conditions if the proposed mandatory exchange or conversion of the Notes is notified to Noteholders at the time notification is given to the Noteholders as to the proposed modification or action. Any such exchange or conversion shall be binding on all Noteholders.

## 14. **Aggregation Agent; Aggregation Procedures**

### 14.1 **Appointment**

The Issuer will appoint an aggregation agent (the “**Aggregation Agent**”) to calculate whether a proposed modification or action has been approved by the required principal amount outstanding of Notes, and, in the case of a multiple series aggregation, by the required principal amount of outstanding debt securities of each affected series of debt securities. In the case of a multiple series aggregation, the same person will be appointed as the Aggregation Agent for the proposed modification of any provision of, or any action in respect of, these Conditions or the Agency Agreement in respect of the Notes and in respect of the terms and conditions or bond documentation in respect of each other affected series of debt securities. The Aggregation Agent shall be independent of the Issuer.

### 14.2 **Extraordinary Resolutions**

If an Extraordinary Resolution has been proposed at a duly convened meeting of Noteholders to modify any provision of, or action in respect of, these Conditions and other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as practicable after the time the vote is cast, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have voted in favour of the Extraordinary Resolution such that the Extraordinary Resolution is passed. If so, the Aggregation Agent will determine that the Extraordinary Resolution has been duly passed.

### 14.3 **Written Resolutions**

If a Written Resolution has been proposed under the terms of these Conditions to modify any provision of, or action in respect of, these Conditions and the terms and conditions of other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as reasonably practicable after the relevant Written Resolution has been signed or confirmed in writing, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have signed or confirmed in writing in favour of the Written Resolution such that the Written Resolution is passed. If so, the Aggregation Agent will determine that the Written Resolution has been duly passed.

### 14.4 **Certificate**

For the purposes of Condition 14.2 (*Extraordinary Resolutions*) and Condition 14.3 (*Written Resolutions*), the Issuer will provide a certificate to the Aggregation Agent up to three days prior to, and in any case no later than, with respect to an Extraordinary Resolution, the date of the meeting referred to in Condition 13.2 (*Modification of this Series of Notes only*), Condition 13.3 (*Multiple Series Aggregation – Single limb voting*) or Condition 13.4 (*Multiple Series Aggregation – Two limb voting*), as applicable, and, with respect to a Written Resolution, the date arranged for the signing of the Written Resolution.

The certificate shall:

- (a) list the total principal amount of Notes outstanding and, in the case of a multiple series aggregation, the total principal amount of each other affected series of debt securities outstanding on the record date; and
- (b) clearly indicate the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities which shall be disregarded and deemed not to remain outstanding as a consequence of Condition 13.9 (*Notes controlled by the Issuer*) on the record date identifying the holders of the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities.

The Aggregation Agent may rely upon the terms of any certificate, notice, communication or other document believed by it to be genuine.

#### 14.5 **Notification**

The Aggregation Agent will cause each determination made by it for the purposes of this Condition 14 (*Aggregation Agent; Aggregation Procedures*) to be notified to the Fiscal Agent and the Issuer as soon as practicable after such determination. Notice thereof shall also promptly be given to the Noteholders.

#### 14.6 **Binding nature of determinations; no liability**

All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 14 (*Aggregation Agent; Aggregation Procedures*) by the Aggregation Agent and any appointed Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Fiscal Agent and the Noteholders and (subject as aforesaid) no liability to any such person will attach to the Aggregation Agent or the Calculation Agent in connection with the exercise or non-exercise by it of its powers, duties and discretions for such purposes.

#### 14.7 **Manner of publication**

The Issuer will publish all notices and other matters required to be published pursuant to the Agency Agreement including any matters required to be published pursuant to Condition 13 (*Meetings of Noteholders, Modifications and Waivers*), this Condition 14 (*Aggregation Agent; Aggregation Procedures*) and Condition 10 (*Events of Default*) in accordance with Condition 12 (*Notices*) and:

- (a) through Euroclear and Clearstream and/or any other international or domestic clearing system(s) through which the Notes are for the time being cleared;
- (b) in such other places and in such other manner as may be required by applicable law or regulation; and
- (c) in such other places and in such other manner as may be customary.

#### 15. **Further Issues**

The Issuer may from time to time without the consent of the Noteholders create and issue further notes, having terms and conditions the same as those of the Notes, or the same except for the amount and date of the first payment of interest, which may be consolidated and form a single series with the outstanding Notes; *provided, however, that unless any further Notes are issued pursuant to a “qualified reopening” of the original Notes, are otherwise treated as part of the same “issue” of debt instruments as the original Notes or are issued with no more than a de minimis amount of original issue discount, in each case for U.S. federal income tax purposes, such further Notes will have a separate CUSIP, ISIN or Common Code (as applicable) so that they are distinguishable from such Notes.*

## 16. **Governing Law and Submission to Jurisdiction**

### 16.1 **Governing Law**

The Notes and the arbitration agreement contained in Condition 16.2 (*Arbitration*) including any non-contractual obligations arising from or connected therewith are governed by, and shall be construed in accordance with, English law.

### 16.2 **Arbitration**

Subject to Condition 16.3 (*Noteholders' Option*) and 16.4 (*English Courts*), the Issuer agrees that any claim, dispute or difference of whatever nature arising under, out of or in connection with the Notes (including a claim, dispute or difference regarding its existence, termination or validity or any non-contractual obligations arising out of or in connection with the Notes) (a "**Dispute**"), shall be referred to and finally settled under the Rules of Arbitration of the International Chamber of Commerce by three arbitrators appointed in accordance with the said Rules. The seat or legal place of the arbitration shall be London, England. The language of the arbitration shall be English. Sections 45 and 69 of the Arbitration Act 1996 shall not apply.

### 16.3 **Noteholders' Option**

At any time before any Noteholder has nominated an arbitrator to resolve any Dispute or Disputes pursuant to Condition 16.2 (*Arbitration*), the Noteholders, at their sole option, may elect by notice in writing (an "**Election Notice**") to the Issuer that such Dispute(s) shall instead be resolved in the manner set out in Condition 16.4 (*English Courts*), 16.5 (*Appropriate Forum*) and 16.6 (*Rights of the Noteholders to take proceedings outside England*).

Following any such election, no arbitral tribunal shall have jurisdiction in respect of such Dispute(s).

### 16.4 **English Courts**

In the event that any of the Noteholders serves an Election Notice in respect of any Dispute(s) pursuant to Condition 16.3 (*Noteholders' Option*), the Issuer agrees for the benefit of the Noteholders that Condition 16.2 (*Arbitration*) shall not apply to any such Dispute and that the courts of England shall have exclusive jurisdiction to hear and determine any such Dispute(s) and that the Issuer may not commence proceedings ("**Proceedings**") for the determination of any such Dispute(s) in any other jurisdiction.

### 16.5 **Appropriate forum**

For the purposes of Condition 16.4 (*English Courts*), the Issuer irrevocably submits to the jurisdiction of the courts of England and waives any objection which it might now or hereafter have to the courts of England being nominated as the forum to hear and determine any Proceedings and agrees not to claim that any such court is not a convenient or appropriate forum.

### 16.6 **Rights of the Noteholders to take proceedings outside England**

Condition 16.4 (*English Courts*) and 16.5 (*Appropriate Forum*) are for the benefit of the Noteholders only. As a result, following the service of an Election Notice by any of the Noteholders, nothing in this Condition 16 (*Governing Law and Submission to Jurisdiction*) shall (or shall be construed so as to) limit the right of any of the Noteholders to bring Proceedings for the determination of any such Dispute(s) in the courts of England or in any other court of competent jurisdiction, nor shall the bringing of such Proceedings in any one or more jurisdictions preclude the bringing of Proceedings by any other Noteholders in any other jurisdiction (whether concurrently or not) if and to the extent permitted by law.

### 16.7 **Process Agent**

The Issuer confirms and agrees that the documents which start any Proceedings and any other documents required to be served in relation to those Proceedings may be served on it by being delivered to His Excellency Mr. Ambassador of the Republic of Côte d'Ivoire located at 2 Upper Belgrave Street, London SW1X 8BJ, United Kingdom. If such agent ceases to be able to act as a process agent or to have an address in England, the Issuer irrevocably agrees to appoint a new process agent in England as soon as practicable thereafter. Nothing in this paragraph shall affect the right of any party to serve process in any other manner permitted by law.

#### 16.8 **Consent to Enforcement and Waiver of Immunity**

The Issuer consents generally in respect of any Proceedings to the giving of any relief or the issue of any process in connection with such Proceedings including (without limitation but subject as provided in the following paragraph) the making, enforcement or execution against any property whatsoever of any order or judgment which is made or given in such Proceedings.

To the extent that the Issuer may in any jurisdiction claim for itself or its assets or revenues immunity from suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process, including in relation to the enforcement of any arbitration award, and to the extent that such immunity (whether or not claimed) may be attributed in any such jurisdiction to the Issuer or its assets or revenues, the Issuer agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction (and consents generally for the purposes of the State Immunity Act 1978 to the giving of any relief or the issue of any process in connection with any Proceedings). The Issuer does not hereby waive such immunity from execution or attachment in respect of (a) property, including any bank account, used by a diplomatic or consular mission of the Issuer or its special missions or delegations to international organizations, (b) property of a military character and under the control of a military authority or defence agency of the Issuer, or (c) property located in the Republic of Côte d'Ivoire and dedicated to a public or governmental use by the Issuer (as distinct from property which is for the time being in use or intended for use for commercial purposes within the meaning of the State Immunity Act 1978). The Issuer reserves the right to plead sovereign immunity under the US Foreign Sovereign Immunities Act of 1976 with respect to any actions brought against it in any court of or in the United States of America under any United States federal or state securities law.

#### 17. **Rights of Third Parties**

No rights are conferred on any person under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of the Notes, but this does not affect any right or remedy of any person which exists or is available apart from that Act.

#### 18. **Currency Indemnity**

If any sum due from the Issuer in respect of the Notes or any order or judgment given or made in relation thereto has to be converted from the currency (the “**first currency**”) in which the same is payable under these Conditions or such order or judgment into another currency (the “**second currency**”) for the purpose of (a) making or filing a claim or proof against the Issuer, (b) obtaining an order or judgment in any court or other tribunal or (c) enforcing any order or judgment given or made in relation to the Notes, the Issuer shall indemnify each Noteholder, on the written demand of such Noteholder addressed to the Issuer and delivered to the Issuer or to the Specified Office of the Fiscal Agent, against any loss suffered as a result of any discrepancy between (i) the rate of exchange used for such purpose to convert the sum in question from the first currency into the second currency and (ii) the rate or rates of exchange at which such Noteholder may in the ordinary course of business purchase the first currency with the second currency upon receipt of a sum paid to it in satisfaction, in whole or in part, of any such order, judgment, claim or proof.

This indemnity constitutes a separate and independent obligation of the Issuer and shall give rise to a separate and independent cause of action.

## TERMS AND CONDITIONS OF THE 2040 NOTES

*The following is the text of the Terms and Conditions of the 2040 Notes which, upon issue, will represent the terms and conditions applicable to all 2040 Notes, and, subject to completion and amendment and except for the text in italics, will be endorsed on each Certificate in respect of the 2040 Notes. The terms and conditions applicable to any 2040 Note in global form will differ from those terms and conditions which would apply to the 2040 Note in definitive form to the extent described under the “Form of the Notes” section. Within this section entitled “Terms and Conditions of the 2040 Notes”, please note that the use of the term the “Notes” applies only to the 2040 Notes. Elsewhere in the Prospectus, the use of the term the “Notes” applies to the 2031 Notes and the 2040 Notes, together.*

The €50,000,000 6.875% Amortizing Notes due 2040 (the “**Notes**”, which expression shall in these Conditions, unless the context otherwise requires, include any further notes issued pursuant to Condition 15 (*Further Issues*) and forming a single series with the Notes) of the Republic of Côte d’Ivoire (the “**Issuer**”) are issued subject to and with the benefit of an Agency Agreement to be dated on or about 17 October 2019 (such agreement as amended and/or supplemented and/or restated from time to time, the “**Agency Agreement**” entered into between the Issuer, Citibank, N.A., London Branch, as fiscal agent (the “**Fiscal Agent**”), as paying agent (the “**Paying Agent**”) and as transfer agent (the “**Transfer Agent**”) and Citigroup Global Markets Europe AG as registrar (the “**Registrar**” and, together with the Fiscal Agent, the Transfer Agent and the Paying Agent, the “**Agents**”). The holders of the Notes are entitled to the benefit of a Deed of Covenant dated 17 October 2019 (the “**Deed of Covenant**”) and made by the Issuer.

The statements in these Conditions include summaries of, and are subject to, the detailed provisions of and definitions in the Agency Agreement. Copies of the Agency Agreement are available for inspection during normal business hours by the Noteholders (as defined below) at the Specified Office (as defined in the Agency Agreement) of each of the Paying Agents. The Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions of the Agency Agreement applicable to them. References in these Conditions to the Fiscal Agent, the Registrar, the Paying Agents and the Agents shall include any successor appointed under the Agency Agreement.

### 1. **Form, Denomination and Title**

#### 1.1 **Form and Denomination**

The Notes are in registered form, serially numbered and issued in denominations of €100,000 and integral multiples of €1,000 in excess thereof, each an “**Authorized Denomination**”. The Issuer will cause a register of Noteholders (the “**Register**”) to be kept by the Registrar, in which will be entered the names and addresses of the holders of the Notes and the particulars of the Notes held by them and all transfers and redemptions of the Notes.

#### 1.2 **Title**

Title to the Notes passes only by registration in the Register. The holder of any Note will (except as otherwise required by law) be treated as its absolute owner for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any interest or any writing thereon, or the theft or loss thereof) and no person will be liable for so treating the holder. In these Conditions, “**Noteholder**”, and in relation to a “**Note**”, “**holder**” means the person in whose name a Note is registered in the Register (or, in the case of a joint holding, the first named thereof). A certificate in definitive form (each a “**Certificate**”) will be issued to each Noteholder in respect of its registered holding of Notes.

*Notes sold to qualified institutional buyers in the United States in reliance on Rule 144A under the Securities Act of 1933, as amended (the “**Securities Act**”) will be represented by a Restricted Global Note Certificate. Notes sold to investors outside the United States in reliance on Regulation S under the Securities Act will be represented by an Unrestricted Global Note Certificate (the “**Global Note Certificates**”). The Global Note Certificates will be deposited with, and registered in the name of a nominee for, a common depositary for Euroclear Bank SA/NV (“**Euroclear**”) and Clearstream Banking, société anonyme (“**Clearstream, Luxembourg**”). Ownership of beneficial interests in the Global Note Certificates will be limited to persons that have accounts with Euroclear or Clearstream, Luxembourg or persons that may hold interests through such participants. Beneficial interests in the Global Note Certificates will be shown on, and transfers thereof will be effected through, records*

*maintained in book-entry form by Euroclear, Clearstream, Luxembourg and their participants as applicable. Global Note Certificates will be exchangeable for Certificates only in certain limited circumstances specified in the Global Note Certificates.*

## 2. **Transfers of Notes and Issue of Certificates**

### 2.1 **Transfers**

Subject to Condition 2.4 (*Closed Periods*) and Condition 2.5 (*Regulations*), a Note may be transferred, in whole or in part, by depositing the Certificate issued in respect of that Note, with the form of transfer on the back duly completed and signed, at the Specified Office of the Registrar or any of the Agents together with such evidence as the Registrar or Agent may require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer; *provided however that* a Note may not be transferred unless the principal amount of the Notes transferred and (where not all of the Notes held by a Holder are being transferred) the principal amount of the Notes not transferred, are Authorized Denominations.

### 2.2 **Delivery of New Certificates**

Each new Certificate to be issued upon transfer or exchange of Notes will, within five business days of receipt by the Registrar or the Transfer Agent of the duly completed form of transfer endorsed on the relevant Certificate, be mailed by uninsured mail at the risk of the holder entitled to the Note to the address specified in the form of transfer. For the purposes of this Condition, “**business day**” shall mean a day on which banks are open for business in the city in which the Specified Office of the Agent with whom a Certificate is deposited in connection with a transfer is located.

Where some but not all of the Notes in respect of which a Certificate is issued are to be transferred a new Certificate in respect of the Notes not so transferred will, within five business days of receipt by the Registrar or the Transfer Agent of the original Certificate, be mailed by uninsured mail at the risk of the holder of the Notes not so transferred to the address of such holder appearing on the Register or as specified in the form of transfer.

### 2.3 **Formalities Free of Charge**

Any transfer of Notes will be effected without charge by or on behalf of the Issuer, the Registrar, or any Agent but upon payment (or the giving of such indemnity as the Registrar or any Agent may reasonably require) in respect of any stamp duty, tax or other governmental charges which may be levied or imposed in relation to such transfer.

### 2.4 **Closed Periods**

No Noteholder may require the transfer of a Note to be registered during the period of 15 calendar days ending on the due date for any payment of principal or interest on that Note.

### 2.5 **Regulations**

All transfers of Notes and entries on the Register will be made subject to the detailed regulations concerning transfer of Notes scheduled to the Agency Agreement. The regulations may be changed by the Issuer with the prior written approval of the Registrar. A copy of the current regulations will be mailed (free of charge) by the Registrar to any Noteholder upon request.

## 3. **Status**

The Notes constitute direct, unconditional and (subject to the provisions of Condition 4 (*Negative Pledge*)) unsecured obligations of the Issuer and (subject as provided above) rank and will rank *pari passu*, without any preference among themselves, and with all other unsecured and unsubordinated External Indebtedness (as defined in Condition 10.2 (*Interpretation*)) of the Issuer outstanding from time to time, *provided, however, that* the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any other

External Indebtedness and, in particular, shall have no obligation to pay other External Indebtedness at the same time or as a condition of paying sums due on the Notes and *vice versa*. The full faith and credit of the Issuer is pledged to the due and punctual payment of the Notes.

#### 4. Negative Pledge

##### 4.1 Negative Pledge

So long as any Note remains outstanding (as defined in the Agency Agreement) the Issuer will not, save for the exceptions set out below in Condition 4.3 (*Exceptions*) create, incur, assume or permit to subsist any Security upon the whole or any part of its present or future assets, undertakings or revenues to secure (i) any of its Public External Indebtedness; (ii) any Guarantees in respect of Public External Indebtedness; or (iii) the Public External Indebtedness of any other person; without at the same time or prior thereto securing the Notes equally and rateably therewith or providing such other arrangement (whether or not comprising Security) as shall be approved by an Extraordinary Resolution or by a Written Resolution (each as defined in the Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*)). For the avoidance of doubt, any such approval shall not constitute a Reserved Matter (for the purposes of and as defined in the Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*)).

##### 4.2 Interpretation

In these Conditions:

- (a) “**Guarantee**” means any obligation of a person to pay the Indebtedness of another person including, without limitation: an obligation to pay or purchase such Indebtedness; an obligation to lend money, to purchase or subscribe shares or other securities or to purchase assets or services in order to provide funds for the payment of such Indebtedness; an indemnity against the consequences of a default in the payment of such Indebtedness; or any other agreement to be responsible for such Indebtedness;
- (b) “**Indebtedness**” means any obligation (whether present or future) for the payment or repayment of money which has been borrowed or raised (including money raised by acceptances and leasing);
- (c) “**person**” means any individual, company, corporation, firm, partnership, joint venture, association, organization, trust or other juridical entity, state or agency of a state or other entity, whether or not having a separate legal personality;
- (d) “**Public External Indebtedness**” means any Indebtedness (i) expressed or denominated or payable or which, at the option of the relevant creditor may be payable, in any currency other than the lawful currency from time to time of the Republic of Côte d’Ivoire, and (ii) which is in the form of, or is represented by, bonds, notes or other securities with a stated maturity of more than one year from the date of issue which are, or are capable of being, quoted, listed or ordinarily purchased or sold on any stock exchange, automated trading system, over the counter or other securities market; and
- (e) “**Security**” means any mortgage, pledge, lien, hypothecation, security interest or other charge or encumbrance including, without limitation, anything analogous to the foregoing under the laws of any jurisdiction.

##### 4.3 Exceptions

The following exceptions apply to the Issuer’s obligations under paragraph 4.1 (Negative Pledge) of this Condition:

- (a) any Security upon property to secure Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing the acquisition or construction of such property and any renewal and extension of such Security which is

limited to the original property covered thereby and which (in either case) secures any renewal or extension of the original secured financing; and

- (b) any Security securing Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing all or part of the costs of the acquisition, construction or development of a project; provided that (A) the holders of such Public External Indebtedness or Guarantee expressly agree to limit their recourse to the assets and revenues of such project or the proceeds of insurance thereon as the sole source of repayments of such Public External Indebtedness and (B) the property over which such Security is granted consists solely of such assets and revenues.

## 5. Interest

The Notes bear interest on their outstanding principal amount from time to time from and including 17 October 2019 (the “**Issue Date**”) to but excluding the Maturity Date (as defined in Condition 7.1 (*Redemption*)) at the rate of 6.875% per annum (the “**Rate of Interest**”), payable annually in arrear on 17 October in each year (each an “**Interest Payment Date**”) commencing on 17 October 2020. Each period beginning on (and including) the Issue Date or any Interest Payment Date and ending on (but excluding) the next Interest Payment Date is herein called an “**Interest Period**”.

Each Note will cease to bear interest from and including its due date for redemption unless, upon due presentation, payment of the principal in respect of the Note is improperly withheld or refused or unless default is otherwise made in respect of payment. In such event, interest will continue to accrue until whichever is the earlier of:

- (a) the date on which all amounts due in respect of such Note have been paid; and
- (b) seven days after the date on which the full amount of the moneys payable in respect of such Notes has been received by the Fiscal Agent and notice to that effect has been given to the Noteholders in accordance with Condition 12 (*Notices*) (except to the extent that there is any subsequent default in payment).

Where interest is to be calculated in respect of a period which is equal to or shorter than an Interest Period, the day count fraction applied to calculate the amount of interest payable in respect of each Note shall be the number of days in the relevant period from (and including) the date from which interest begins to accrue to (but excluding) the date on which it falls due, divided by the number of days in the Interest Period in which the relevant period falls (including the first such day but excluding the last).

## 6. Payments

### 6.1 Payments in Respect of Notes

Payment of principal and interest will be made by transfer to the registered account of the Noteholder or by a cheque in Euro drawn on a bank that processes payments in Euro mailed to the registered address of the Noteholder if it does not have a registered account. Payment of principal will only be made against presentation and surrender of the relevant Certificate at the Specified Office of any of the Paying Agents. Interest on Notes due on an Interest Payment Date will be paid to the holder shown on the Register at the close of business on the date (the “**record date**”) being the fifteenth day before the due date for the payment of interest.

*For so long as the Notes are represented by Global Note Certificates, the Issuer will make each interest payment to the holders of record of the Notes at the close of business (in the relevant clearing system) on the Clearing System Business Day immediately before the due date for such payment (which date shall constitute the “record date” when the Notes are represented by Global Note Certificates), where “Clearing System Business Day” means a day on which each clearing system for which Global Note Certificates are being held is open for business.*

For the purposes of this Condition 6, a Noteholder's "**registered account**" means the Euro account maintained by or on its behalf with a bank that processes payments in Euro, details of which appear on the Register at the close of business, in the case of principal, on the second Business Day (as defined below) before the due date for payment and, in the case of interest, on the relevant record date, and a Noteholder's "**registered address**" means its address appearing on the Register at that time.

## 6.2 **Payments Subject to Applicable Laws**

Payments in respect of principal and interest on Notes are subject in all cases to any fiscal or other laws and regulations applicable in the place of payment, but without prejudice to the provisions of Condition 8 (*Taxation*).

## 6.3 **No Commissions**

No commissions or expenses shall be charged to the Noteholders in respect of any payments made in accordance with this Condition 6 (*Payments*).

## 6.4 **Payment on Business Days**

Where payment is to be made by transfer to a registered account, payment instructions (for value the due date or, if that is not a Business Day, for value the first following day which is a Business Day) will be initiated and, where payment is to be made by cheque, the cheque will be mailed, on the due date for payment or, in the case of a payment of principal, if later, on the Business Day on which the relevant Certificate is surrendered at the Specified Office of an Agent.

Noteholders will not be entitled to any interest or other payment for any delay after the due date in receiving the amount due if the due date is not a Business Day, if the Noteholder is late in surrendering its Certificate (if required to do so) or if a cheque mailed in accordance with this Condition 6 arrives after the due date for payment.

In this Condition 6, "**Business Day**" means a day (other than a Saturday or Sunday) on which commercial banks are open for general business in London, on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET) System (the "**TARGET System**") is open and, in the case of presentation of a Certificate, in the place in which the Certificate is presented.

## 6.5 **Partial Payments**

If the amount of principal or interest which is due on the Notes is not paid in full, the Registrar will annotate the Register with a record of the amount of principal or interest in fact paid.

## 6.6 **Agents**

The names of the initial Agents and their initial Specified Offices are set out in the Agency Agreement. The Issuer reserves the right at any time to vary or terminate the appointment of any Agent and to appoint additional or other Agents *provided that* there will at all times be a Fiscal Agent, a Registrar and a Transfer Agent in a major European city.

Notice of any termination or appointment and of any changes in Specified Offices will be given to the Noteholders promptly by the Issuer in accordance with Condition 12 (*Notices*).

In acting under the Agency Agreement and in connection with the Notes, the Agents act solely as agents of the Issuer and do not assume any obligations towards or relationship of agency or trust for or with any of the Noteholders.

## 7. Redemption and Purchase

### 7.1 Redemption

#### *Redemption by Amortization and Final Redemption*

Unless previously redeemed, or purchased and cancelled, each Note shall be partially redeemed on each date specified below (each an “**Amortization Date**”) by the relevant amortization amount specified below (each an “**Amortization Amount**”) payable as provided in Condition 6 (*Payments*). The outstanding principal amount of each such Note shall be reduced by the Amortization Amount for all purposes with effect from the relevant Amortization Date, unless the payment of the relevant Amortization Amount is improperly withheld or refused. In such a case, the relevant principal amount will remain outstanding until whichever is the earlier of (a) the day on which all sums due in respect of such Note up to that day are received by or on behalf of the relevant Noteholder and (b) the Business Day after the Fiscal Agent has given notice to the Noteholders of receipt of all sums due in respect of all Notes up to that Business Day (except to the extent that there is any subsequent default in payment in accordance with these Conditions). Each Note shall be finally redeemed on 17 October 2040 (the “**Maturity Date**”) at its final Amortization Amount payable as provided in Condition 6 (*Payments*).

<b>Amortization Date</b>	<b>Outstanding principal amount of each €1,000 principal amount of Notes on the relevant Amortization Date prior to payment of the relevant Amortization Amount (in €)</b>	<b>Amortization Amount per €1,000 principal amount of Notes to be repaid on the relevant Amortization Date (in €)</b>	<b>Outstanding principal amount of each €1,000 principal amount of Notes on the relevant Amortization Date after payment of the relevant Amortization Amount (in €)</b>
17 October 2038	1,000	333	667
17 October 2039	667	333	334
17 October 2040	334	334	0

In these Conditions, references to “**principal**” shall, unless the context requires otherwise, be deemed to include any Amortization Amount and references to the “**due date**” for payment shall, unless the context requires otherwise, be deemed to include any Amortization Date.

### 7.2 Purchase and Cancellation

The Issuer may at any time purchase Notes in the open market or otherwise and at any price, *provided that* such purchase is made in accordance with the U.S. Securities Act of 1933, as amended (the “**Securities Act**”) and any other applicable securities laws. Any Notes so purchased may be cancelled or held or resold (*provided that* any resales in the United States must be in accordance with an effective registration statement or in a transaction exempt from or not subject to the registration requirements of the Securities Act). Any Notes so purchased, while held by or on behalf of the Issuer shall not entitle the holder to vote at any meeting of Noteholders and shall not be deemed to be outstanding for the purposes of such meetings. Any Notes so cancelled will not be reissued.

## 8. Taxation

### 8.1 Payment Without Withholding

All payments in respect of the Notes by or on behalf of the Issuer shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature (“**Taxes**”) imposed or levied by or on behalf of the Relevant Jurisdiction, unless the withholding or deduction of the Taxes is required by law. In that event, the Issuer will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholders after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the Notes in the absence of the withholding

or deduction (“**Additional Amounts**”); except that no Additional Amounts shall be payable in relation to any payment in respect of any Note:

- (a) in circumstances where the holder of the Note is liable for Taxes on payments in respect of the Note by reason of his having some connection with the Relevant Jurisdiction other than the mere holding of the Note; or
- (b) if such Note is presented or surrendered for payment more than 30 days after the Relevant Date (as defined below), except to the extent that the relevant holder would have been entitled to such Additional Amounts if it had presented or surrendered such Note on the last day of such period of 30 days assuming, whether or not such is in fact the case, that day to have been a Business Day (as defined in Condition 6 (Payments)); or
- (c) where such withholding or deduction is imposed as a result of any combination of (a) and (b) above.

## 8.2 Interpretation

In these Conditions:

- (a) “**Relevant Date**” means the date on which the payment first becomes due but, if the full amount of the money payable has not been received by the Fiscal Agent on or before the due date, it means the date on which, the full amount of the money having been so received, notice to that effect has been duly given to the Noteholders by the Issuer in accordance with Condition 12 (*Notices*); and
- (b) “**Relevant Jurisdiction**” means the Republic of Côte d’Ivoire or any political subdivision or any authority thereof or therein having power to tax in respect of payments made by it of principal and interest on the Notes.

## 8.3 Additional Amounts

Any reference in these Conditions to any amounts in respect of the Notes shall be deemed also to refer to any Additional Amounts which may be payable under this Condition 8.

## 9. Prescription

Claims against the Issuer in respect of principal and interest will become void unless made within 10 years (in the case of principal) and five years (in the case of interest) from the Relevant Date, as defined in Condition 8 (*Taxation*).

## 10. Events of Default

### 10.1 Events of Default

If any of the following events (each, an “**Event of Default**”) shall have occurred and be continuing:

- (a) **Non-payment**
  - (i) the Issuer fails to pay any principal on any of the Notes when due and payable and such failure continues for a period of 15 business days; or
  - (ii) the Issuer fails to pay any interest on any of the Notes or any amount due under Condition 8 (*Taxation*) when due and payable, and such failure continues for a period of 30 days; or

(b) **Breach of Other Obligations**

the Issuer does not perform or comply with any one or more of its other obligations in the Notes or the Agency Agreement, which default is incapable of remedy or is not remedied within 45 days following the service by any Noteholder on the Issuer of notice requiring the same to be remedied; or

(c) **Cross-acceleration**

- (i) any other External Indebtedness of the Issuer becomes due and payable prior to stated maturity thereof by reason of default, or
- (ii) any such External Indebtedness is not paid at maturity; or
- (iii) any Guarantee of such External Indebtedness is not honoured when due and called upon, and, in the case of (ii) or (iii), that failure continues beyond any applicable grace period,

*provided that* the aggregate amount of the relevant External Indebtedness in respect of which one or more of the events mentioned in this paragraph (c) have occurred equals or exceeds US\$25,000,000 or its equivalent in any other currency or currencies; or

(d) **Moratorium**

a moratorium on the payment of principal of, or interest on, the External Indebtedness of the Issuer shall be declared by the Issuer; or

(e) **International Monetary Fund Membership**

the Issuer shall cease to be a member of the International Monetary Fund or any successor (whether corporate or not) that performs the functions of, or functions similar thereto (the “**IMF**”) or shall cease to be eligible to use the general resources of the IMF; or

(f) **Validity**

- (i) the validity of the Notes shall be contested by the Issuer; or
- (ii) the Issuer shall deny any of its obligations under the Notes (whether by a general suspension of payments or a moratorium on the payment of debt or otherwise); or
- (iii) it shall be or become unlawful for the Issuer to perform or comply with all or any of its obligations set out in the Notes or the Agency Agreement, including, without limitation, the payment of interest on the Notes, as a result of any change in law or regulation in the Republic of Côte d’Ivoire or any ruling of any court in the Republic of Côte d’Ivoire whose decision is final and unappealable or for any reason such obligations cease to be in full force and effect; or

(g) **Consents**

if any authorization, consent of, or filing or registration with, any governmental authority necessary for the performance of any payment obligation of the Issuer under the Notes, when due, ceases to be in full force and effect or remain valid and subsisting,

then the holders of at least 25% in aggregate principal amount of the outstanding Notes (as defined in the Agency Agreement) may, by notice in writing to the Issuer (with a copy to the Fiscal Agent), declare all the Notes to be immediately due and payable, whereupon they shall become immediately due and payable at their

principal amount together with accrued interest without further action or formality. Notice of any such declaration shall promptly be given to all other Noteholders by the Issuer.

If the Issuer receives notice in writing from holders of at least 50% in aggregate principal amount of the outstanding Notes to the effect that the Event of Default or Events of Default giving rise to any above mentioned declaration of acceleration is or are cured following any such declaration and that such holders wish the relevant declaration to be withdrawn, the Issuer shall, give notice thereof to the Noteholders (with a copy to the Fiscal Agent), whereupon the relevant declaration shall be withdrawn and shall have no further effect but without prejudice to any rights or obligations which may have arisen before the Issuer gives such notice (whether pursuant to these Conditions or otherwise). No such withdrawal shall affect any other or any subsequent Event of Default or any right of any Noteholder in relation thereto.

## 10.2 Interpretation

As used herein:

“**External Indebtedness**” means Indebtedness expressed or denominated or payable, or which at the option of the relevant creditor may be payable, in any currency other than the lawful currency from time to time of the Republic of Côte d’Ivoire.

## 11. Replacement of Certificates

If any Certificate is lost, stolen, mutilated, defaced or destroyed it may be replaced at the Specified Office of the Registrar upon payment by the claimant of the expenses incurred in connection with the replacement and on such terms as to evidence, security and indemnity as the Issuer may reasonably require. Mutilated or defaced Certificates must be surrendered before replacements will be issued.

## 12. Notices

All notices to the Noteholders will be valid if mailed to them at their respective addresses in the Register. Any notice shall be deemed to have been given on the fourth business day after being so mailed. Notices concerning the Notes shall also be published (so long as the Notes are listed on Euronext Dublin and the rules of that Exchange so require) on the website of Euronext Dublin ([www.ise.ie](http://www.ise.ie)).

## 13. Meetings of Noteholders, Modifications and Waivers

### 13.1 Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions

- (a) The Issuer may convene a meeting of the Noteholders at any time in respect of the Notes in accordance with the Agency Agreement. The Issuer will determine the time and place of the meeting. The Issuer will notify the Noteholders of the time, place and purpose of the meeting not less than 21 and not more than 45 days before the meeting.
- (b) The Issuer or the Fiscal Agent will convene a meeting of Noteholders if the holders of at least 10 per cent. in principal amount of the outstanding Notes (as defined in the Agency Agreement and described in Condition 13.9 (*Notes controlled by the Issuer*)) have delivered a written request to the Issuer or the Fiscal Agent (with a copy to the Issuer) setting out the purpose of the meeting. The Fiscal Agent will agree the time and place of the meeting with the Issuer promptly. The Issuer or the Fiscal Agent, as the case may be, will notify the Noteholders within 10 days of receipt of such written request of the time and place of the meeting, which shall take place not less than 21 and not more than 45 days after the date on which such notification is given.
- (c) The Issuer (with the agreement of the Fiscal Agent) will set the procedures governing the conduct of any meeting in accordance with the Agency Agreement. If the Agency Agreement does not include such procedures, or additional procedures are required, the Issuer and the Fiscal Agent will agree such

procedures as are customary in the market and in such a manner as to facilitate any multiple series aggregation, if in relation to a Reserved Matter the Issuer proposes any modification to the terms and conditions of, or action with respect to, two or more series of debt securities issued by it.

- (d) The notice convening any meeting will specify, *inter alia*:
  - (i) the date, time and location of the meeting;
  - (ii) the agenda and the text of any Extraordinary Resolution to be proposed for adoption at the meeting;
  - (iii) the record date for the meeting, which shall be no more than five business days before the date of the meeting;
  - (iv) the documentation required to be produced by a Noteholder in order to be entitled to participate at the meeting or to appoint a proxy to act on the Noteholder's behalf at the meeting;
  - (v) any time deadline and procedures required by any relevant international and/or domestic clearing systems or similar through which the Notes are traded and/or held by Noteholders;
  - (vi) whether Condition 13.2 (*Modification of this Series of Notes only*), or Condition 13.3 (*Multiple Series Aggregation – Single limb voting*), or Condition 13.4 (*Multiple Series Aggregation – Two limb voting*) shall apply and, if relevant, in relation to which other series of debt securities it applies;
  - (vii) if the proposed modification or action relates to two or more series of debt securities issued by the Issuer and contemplates such series of debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group of debt securities;
  - (viii) such information that is required to be provided by the Issuer in accordance with Condition 13.6 (*Information*);
  - (ix) the identity of the Aggregation Agent and the Calculation Agent (each as defined in these Conditions), if any, for any proposed modification or action to be voted on at the meeting, and the details of any applicable methodology referred to in Condition 13.7 (*Claims Valuation*); and
  - (x) any additional procedures which may be necessary and, if applicable, the conditions under which a multiple series aggregation will be deemed to have been satisfied if it is approved as to some but not all of the affected series of debt securities.
- (e) In addition, the Agency Agreement contains provisions relating to Written Resolutions. All information to be provided pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*) shall also be provided, *mutatis mutandis*, in respect of Written Resolutions.
- (f) A “**record date**” in relation to any proposed modification or action means the date fixed by the Issuer for determining the Noteholders and, in the case of a multiple series aggregation, the holders of debt securities of each other affected series that are entitled to vote on a Multiple Series Single Limb Extraordinary Resolution or a Multiple Series Two Limb Extraordinary Resolution, or to sign a Multiple Series Single Limb Written Resolution or a Multiple Series Two Limb Written Resolution.
- (g) An “**Extraordinary Resolution**” means any of a Single Series Extraordinary Resolution, a Multiple Series Single Limb Extraordinary Resolution and/or a Multiple Series Two Limb Extraordinary Resolution, as the case may be.

- (h) A “**Written Resolution**” means any of a Single Series Written Resolution, a Multiple Series Single Limb Written Resolution and/or a Multiple Series Two Limb Written Resolution, as the case may be.
- (i) Any reference to “**debt securities**” means any notes (including the Notes), bonds, debentures or other debt securities (which for these purposes shall be deemed to include any sukuk or other trust certificates representing the credit of the Issuer) issued by or on behalf of the Issuer in one or more series with an original stated maturity of more than one year.
- (j) “**Debt Securities Capable of Aggregation**” means those debt securities which include or incorporate by reference this Condition 13 (*Meetings of Noteholders, Modifications and Waivers*) and Condition 14 (*Aggregation Agent; Aggregation Procedures*) or provisions substantially in these terms which provide for the debt securities which include such provisions to be capable of being aggregated for voting purposes with other series of debt securities.

### 13.2 **Modification of this Series of Notes only**

- (a) Any modification of any provision of, or any action in respect of, these Conditions, the Agency Agreement and/or the Deed of Covenant (other than changes which are formal, minor or technical nature, are made to correct a manifest error, or in the sole opinion of the Issuer, are not materially prejudicial to the interests of Noteholders, as provided in the Agency Agreement) may be made or taken if approved by a Single Series Ordinary Resolution, a Single Series Extraordinary Resolution or a Single Series Written Resolution as set out below.
- (b) For the purposes of a meeting of Noteholders convened in respect of the Notes only and for the purposes of passing a Single Series Ordinary Resolution and/or a Single Series Extraordinary Resolution (each as defined below) (a “**Single Series Meeting**”), at any such Single Series Meeting any one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 50 per cent. in principal amount of the Notes for the time being outstanding (or, in the case of an adjourned meeting, one or more persons present in person holding Notes or being proxies or representatives (whatever the principal amount of Notes so held or represented)) shall (except for the purposes of passing a Single Series Extraordinary Resolution) form a quorum for the transaction of business and no business (other than the choosing of a chairman) shall be transacted at any such Single Series Meeting unless the requisite quorum be present at the commencement of business. The quorum at any such Single Series Meeting convened for the purpose of passing a Single Series Extraordinary Resolution shall be one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 66.67 per cent. of the principal amount of the Notes for the time being outstanding, (or, in the case of an adjourned meeting, one or more persons so present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 33.34 per cent. in the principal amount of Notes for the time being outstanding).
- (c) A “**Single Series Ordinary Resolution**” means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Conditions 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*) and 13.2(b) in respect of any matter other than a Reserved Matter, by a majority of at least 66.67 per cent. of the votes cast.
- (d) A “**Single Series Extraordinary Resolution**” means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*) and Condition 13.2(b) in respect of a Reserved Matter by a majority of at least 75 per cent. of the votes cast.
- (e) A “**Single Series Written Resolution**” means a resolution in writing signed or confirmed in writing by or on behalf of the holders of:

- (i) in the case of a Reserved Matter, at least 75 per cent. of the aggregate principal amount of the outstanding Notes; or
- (ii) in the case of a matter other than a Reserved Matter more than 50 per cent. of the aggregate principal amount of the outstanding Notes.

Any Single Series Written Resolution may be contained in one document or several documents in the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders.

- (f) Any Single Series Ordinary Resolution, Single Series Extraordinary Resolution duly passed or Single Series Written Resolution approved shall be binding on all Noteholders, whether or not they attended such Single Series Meeting, whether or not they voted in favour thereof and whether or not they signed or confirmed in writing any such Single Series Written Resolution, as the case may be.

### 13.3 Multiple Series Aggregation – Single limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Single Limb Extraordinary Resolution or by a Multiple Series Single Limb Written Resolution as set out below, provided that the Uniformly Applicable condition is satisfied.
- (b) A “**Multiple Series Single Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*), as supplemented if necessary, which is passed by a majority of at least 75 per cent. of the aggregate principal amount of the outstanding debt securities of all affected series of Debt Securities Capable of Aggregation (taken in aggregate).
- (c) A “**Multiple Series Single Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of at least 75 per cent. of the aggregate principal amount of the outstanding debt securities of all affected series of Debt Securities Capable of Aggregation (taken in aggregate). Any Multiple Series Single Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of debt securities.
- (d) Any Multiple Series Single Limb Extraordinary Resolution duly passed or Multiple Series Single Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Single Limb Written Resolution, as the case may be.
- (e) The “**Uniformly Applicable**” condition will be satisfied if:
  - (i) the holders of all affected series of Debt Securities Capable of Aggregation are invited to exchange, convert, or substitute their debt securities, on the same terms for (i) the same new instrument or other consideration or (ii) a new instrument, new instruments or other consideration from an identical menu of instruments or other consideration; or
  - (ii) the amendments proposed to the terms and conditions of each affected series of Debt Securities Capable of Aggregation would, following implementation of such amendments, result in the

amended instruments having identical provisions (other than provisions which are necessarily different, having regard to different currency of issuance).

- (f) It is understood that a proposal under Condition 13.3(a) above will not be considered to satisfy the Uniformly Applicable condition if each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation (or, where a menu of instruments or other consideration is offered, each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation electing the same option from such menu of instruments).
- (g) Any modification or action proposed under Condition 13.3(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.3 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

#### 13.4 Multiple Series Aggregation – Two limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Two Limb Extraordinary Resolution or by a Multiple Series Two Limb Written Resolution as set out below.
- (b) A “**Multiple Series Two Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1 (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*), as supplemented if necessary, which is passed by a majority of:
  - (i) at least 66.67 per cent. of the aggregate principal amount of the outstanding debt securities of affected series of all Debt Securities Capable of Aggregation (taken in aggregate); and
  - (ii) more than 50 per cent. of the aggregate principal amount of the outstanding debt securities in each affected series of Debt Securities Capable of Aggregation (taken individually).
- (c) A “**Multiple Series Two Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of:
  - (i) at least 66.67 per cent. of the aggregate principal amount of the outstanding debt securities of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and
  - (ii) more than 50 per cent. of the aggregate principal amount of the outstanding debt securities in each affected series of Debt Securities Capable of Aggregation (taken individually).

Any Multiple Series Two Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one

- or more Noteholders or one or more holders of each affected series of Debt Securities Capable of Aggregation.
- (d) Any Multiple Series Two Limb Extraordinary Resolution duly passed or Multiple Series Two Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Two Limb Written Resolution, as the case may be.
  - (e) Any modification or action proposed under Condition 13.4(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.4 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

### 13.5 **Reserved Matters**

In these Conditions, “**Reserved Matter**” means any proposal:

- (a) to change the dates, or the method of determining the dates, for payment of principal, interest or any other amount in respect of the Notes, to reduce or cancel the amount of principal, interest or any other amount payable on any date in respect of the Notes or to change the method of calculating the amount of principal, interest or any other amount payable in respect of the Notes on any date;
- (b) to change the currency in which any amount due in respect of the Notes is payable or the place in which any payment is to be made;
- (c) to change the majority or quorum required to pass a Single Series Ordinary Resolution, an Extraordinary Resolution, a Written Resolution or any other resolution of Noteholders or the number or percentage of votes required to be cast, or the number or percentage of Notes required to be held, in connection with the taking of any decision or action by or on behalf of the Noteholders or any of them;
- (d) to change this definition, or the definition of “Extraordinary Resolution”, “Single Series Ordinary Resolution”, “Single Series Extraordinary Resolution”, Multiple Series Single Limb Extraordinary Resolution, Multiple Series Two Limb Extraordinary Resolution, Written Resolution, Single Series Written Resolution, Multiple Series Single Limb Written Resolution or Multiple Series Two Limb Written Resolution;
- (e) to change the definition of “debt securities” or “Debt Securities Capable of Aggregation”;
- (f) to change the definition of “Uniformly Applicable”;
- (g) to change the definition of “outstanding” or to modify the provisions of Condition 13.9 (*Notes controlled by the Issuer*);
- (h) to change the legal ranking of the Notes or other specified substantive covenants as appropriate, to be determined on a case-by-case basis;
- (i) to change any provision of the Notes describing circumstances in which Notes may be declared due and payable prior to their scheduled maturity date, set out in Condition 10 (*Events of Default*);
- (j) to change the law governing the Notes, the courts to the jurisdiction of which the Issuer has submitted in the Notes, any of the arrangements specified in the Notes to enable proceedings to be taken or the Issuer's waiver of immunity, in respect of actions or proceedings brought by any Noteholder, set out in Condition 16 (*Governing Law and Submission to Jurisdiction*);

- (k) to impose any condition on or otherwise change the Issuer's obligation to make payments of principal, interest or any other amount in respect of the Notes, including by way of the addition of a call option;
- (l) to modify the provisions of this Condition 13.5;
- (m) except as permitted by any related guarantee or security agreement, to release any agreement guaranteeing or securing payments under the Notes or to change the terms of any such guarantee or security; or
- (n) to exchange or substitute all the Notes for, or convert all the Notes into, other obligations or securities of the Issuer or any other person, or to modify any provision of these Conditions in connection with any exchange or substitution of the Notes for, or the conversion of the Notes into, any other obligations or securities of the Issuer or any other person, which would result in the Conditions as so modified being less favourable to the Noteholders which are subject to the Conditions as so modified than:
  - (i) the provisions of the other obligations or debt securities of the Issuer or any other person resulting from the relevant exchange or substitution or conversion; or
  - (ii) if more than one series of other obligations or debt securities results from the relevant exchange or substitution or conversion, the provisions of the resulting series of debt securities having the largest aggregate principal amount.

### 13.6 Information

Prior to or on the date that the Issuer proposes any Extraordinary Resolution or Written Resolution pursuant to Condition 13.2 (*Modification of this Series of Notes only*), Condition 13.3 (*Multiple Series Aggregation – Single limb voting*) or Condition 13.4 (*Multiple Series Aggregation – Two limb voting*), the Issuer shall publish in accordance with Condition 14 (*Aggregation Agent; Aggregation Procedures*), and provide the Fiscal Agent with the following information:

- (a) a description of the Issuer's economic and financial circumstances which are, in the Issuer's opinion, relevant to the request for any potential modification or action, a description of the Issuer's existing debts and a description of its broad policy reform programme and provisional macroeconomic outlook;
- (b) if the Issuer shall at the time have entered into an arrangement for financial assistance with multilateral and/or other major creditors or creditor groups and/or an agreement with any such creditors regarding debt relief, a description of any such arrangement or agreement. Where permitted under the information disclosure policies of the multilateral or such other creditors, as applicable, copies of the arrangement or agreement shall be provided;
- (c) a description of the Issuer's proposed treatment of external debt securities that fall outside the scope of any multiple series aggregation and its intentions with respect to any other debt securities and its other major creditor groups; and
- (d) if any proposed modification or action contemplates debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group, as required for a notice convening a meeting of the Noteholders in Condition 13.1(d)(vii) (*Convening Meetings of Noteholders; Conduct of Meetings; Written Resolutions*)

### 13.7 Claims Valuation

For the purpose of calculating the par value of the Notes and any affected series of debt securities which are to be aggregated with the Notes in accordance with Condition 13.3 (*Multiple Series Aggregation – Single limb voting*) and Condition 13.4 (*Multiple Series Aggregation – Two limb voting*), the Issuer may appoint a calculation

agent (the “Calculation Agent”). The Issuer shall, with the approval of the Aggregation Agent and any appointed Calculation Agent, promulgate the methodology in accordance with which the Calculation Agent will calculate the par value of the Notes and such affected series of debt securities. In any such case where a Calculation Agent is appointed, the same person will be appointed as the Calculation Agent for the Notes and each other affected series of debt securities for these purposes, and the same methodology will be promulgated for each affected series of debt securities.

### 13.8 **Manifest error, etc.**

The Notes, these Conditions and the provisions of Agency Agreement may be amended without the consent of the Noteholders to correct a manifest error. In addition, the parties to the Agency Agreement may agree to modify any provision thereof, but the Issuer shall not agree, without the consent of the Noteholders, to any such modification unless it is of a formal, minor or technical nature or it is not materially prejudicial to the interests of the Noteholders.

### 13.9 **Notes controlled by the Issuer**

For the purposes of (i) determining the right to attend and vote at any meeting of Noteholders, or the right to sign or confirm in writing, or authorise the signature of, any Written Resolution and (ii) this Condition 13 (*Meetings of Noteholders; Modifications and Waivers*) and (iii) Condition 10 (*Events of Default*), any Notes which are for the time being held by or on behalf of the Issuer or by or on behalf of any person which is owned or controlled directly or indirectly by the Issuer or by any public sector instrumentality of the Issuer shall be disregarded and be deemed not to remain outstanding, where:

- (a) **“public sector instrumentality”** means the Central Bank of West African States (BCEAO), any department, ministry or agency of the government of the Republic or any corporation, trust, financial institution or other entity owned or controlled by the Republic or any of the foregoing; and
- (b) **“control”** means the power, directly or indirectly, through the ownership of voting securities or other ownership interests or through contractual control or otherwise, to direct the management of or elect or appoint a majority of the board of directors or other persons performing similar functions in lieu of, or in addition to, the board of directors of a corporation, trust, financial institution or other entity.

A Note will also be deemed to be not outstanding if the Note has previously been cancelled or delivered for cancellation or held for reissuance but not reissued or previously become due and payable at maturity or otherwise and the Issuer has previously satisfied its obligations to make all payments due in respect of the Note in accordance with its terms.

In advance of any meeting of Noteholders, or in connection with any Written Resolution, the Issuer shall provide to the Fiscal Agent a copy of the certificate prepared pursuant to Condition 14.4 (*Certificate*), which includes information on the total number of Notes which are for the time being held by or on behalf of the Issuer or by or on behalf of any person which is owned or controlled directly or indirectly by the Issuer or by any public sector instrumentality of the Issuer and, as such, such Notes shall be disregarded and deemed not to remain outstanding for the purposes of ascertaining the right to attend and vote at any meeting of Noteholders or the right to sign, or authorise the signature of, any Written Resolution in respect of any such meeting. The Fiscal Agent shall make any such certificate available for inspection during normal business hours at its specified office and, upon reasonable request, will allow copies of such certificate to be taken.

### 13.10 **Publication**

The Issuer shall publish all Extraordinary Resolutions and Written Resolutions which have been determined by the Aggregation Agent to have been duly passed in accordance with Condition 14.7 (*Manner of publication*).

### 13.11 **Exchange and Conversion**

Any Extraordinary Resolutions or Written Resolutions which have been duly passed and which modify any provision of, or action in respect of, the Conditions may be implemented at the Issuer's option by way of a mandatory exchange or conversion of the Notes and each other affected series of debt securities, as the case may be, into new debt securities containing the modified terms and conditions if the proposed mandatory exchange or conversion of the Notes is notified to Noteholders at the time notification is given to the Noteholders as to the proposed modification or action. Any such exchange or conversion shall be binding on all Noteholders.

## 14. **Aggregation Agent; Aggregation Procedures**

### 14.1 **Appointment**

The Issuer will appoint an aggregation agent (the “**Aggregation Agent**”) to calculate whether a proposed modification or action has been approved by the required principal amount outstanding of Notes, and, in the case of a multiple series aggregation, by the required principal amount of outstanding debt securities of each affected series of debt securities. In the case of a multiple series aggregation, the same person will be appointed as the Aggregation Agent for the proposed modification of any provision of, or any action in respect of, these Conditions or the Agency Agreement in respect of the Notes and in respect of the terms and conditions or bond documentation in respect of each other affected series of debt securities. The Aggregation Agent shall be independent of the Issuer.

### 14.2 **Extraordinary Resolutions**

If an Extraordinary Resolution has been proposed at a duly convened meeting of Noteholders to modify any provision of, or action in respect of, these Conditions and other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as practicable after the time the vote is cast, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have voted in favour of the Extraordinary Resolution such that the Extraordinary Resolution is passed. If so, the Aggregation Agent will determine that the Extraordinary Resolution has been duly passed.

### 14.3 **Written Resolutions**

If a Written Resolution has been proposed under the terms of these Conditions to modify any provision of, or action in respect of, these Conditions and the terms and conditions of other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as reasonably practicable after the relevant Written Resolution has been signed or confirmed in writing, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have signed or confirmed in writing in favour of the Written Resolution such that the Written Resolution is passed. If so, the Aggregation Agent will determine that the Written Resolution has been duly passed.

### 14.4 **Certificate**

For the purposes of Condition 14.2 (*Extraordinary Resolutions*) and Condition 14.3 (*Written Resolutions*), the Issuer will provide a certificate to the Aggregation Agent up to three days prior to, and in any case no later than, with respect to an Extraordinary Resolution, the date of the meeting referred to in Condition 13.2 (*Modification of this Series of Notes only*), Condition 13.3 (*Multiple Series Aggregation – Single limb voting*) or Condition 13.4

*(Multiple Series Aggregation – Two limb voting)*, as applicable, and, with respect to a Written Resolution, the date arranged for the signing of the Written Resolution.

The certificate shall:

- (a) list the total principal amount of Notes outstanding and, in the case of a multiple series aggregation, the total principal amount of each other affected series of debt securities outstanding on the record date; and
- (b) clearly indicate the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities which shall be disregarded and deemed not to remain outstanding as a consequence of Condition 13.9 (*Notes controlled by the Issuer*) on the record date identifying the holders of the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities.

The Aggregation Agent may rely upon the terms of any certificate, notice, communication or other document believed by it to be genuine.

#### 14.5 **Notification**

The Aggregation Agent will cause each determination made by it for the purposes of this Condition 14 (*Aggregation Agent; Aggregation Procedures*) to be notified to the Fiscal Agent and the Issuer as soon as practicable after such determination. Notice thereof shall also promptly be given to the Noteholders.

#### 14.6 **Binding nature of determinations; no liability**

All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 14 (*Aggregation Agent; Aggregation Procedures*) by the Aggregation Agent and any appointed Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Fiscal Agent and the Noteholders and (subject as aforesaid) no liability to any such person will attach to the Aggregation Agent or the Calculation Agent in connection with the exercise or non-exercise by it of its powers, duties and discretions for such purposes.

#### 14.7 **Manner of publication**

The Issuer will publish all notices and other matters required to be published pursuant to the Agency Agreement including any matters required to be published pursuant to Condition 13 (*Meetings of Noteholders, Modifications and Waivers*), this Condition 14 (*Aggregation Agent; Aggregation Procedures*) and Condition 10 (*Events of Default*) in accordance with Condition 12 (*Notices*) and:

- (a) through Euroclear and Clearstream and/or any other international or domestic clearing system(s) through which the Notes are for the time being cleared;
- (b) in such other places and in such other manner as may be required by applicable law or regulation; and
- (c) in such other places and in such other manner as may be customary.

#### 15. **Further Issues**

The Issuer may from time to time without the consent of the Noteholders create and issue further notes, having terms and conditions the same as those of the Notes, or the same except for the amount and date of the first payment of interest, which may be consolidated and form a single series with the outstanding Notes; *provided, however, that unless any further Notes are issued pursuant to a “qualified reopening” of the original Notes, are otherwise treated as part of the same “issue” of debt instruments as the original Notes or are issued with no more than a de minimis amount of original issue discount, in each case for U.S. federal income tax purposes,*

*such further Notes will have a separate CUSIP, ISIN or Common Code (as applicable) so that they are distinguishable from such Notes.*

## 16. **Governing Law and Submission to Jurisdiction**

### 16.1 **Governing Law**

The Notes and the arbitration agreement contained in Condition 16.2 (*Arbitration*) including any non-contractual obligations arising from or connected therewith are governed by, and shall be construed in accordance with, English law.

### 16.2 **Arbitration**

Subject to Condition 16.3 (*Noteholders' Option*) and 16.4 (*English Courts*), the Issuer agrees that any claim, dispute or difference of whatever nature arising under, out of or in connection with the Notes (including a claim, dispute or difference regarding its existence, termination or validity or any non-contractual obligations arising out of or in connection with the Notes) (a “**Dispute**”), shall be referred to and finally settled under the Rules of Arbitration of the International Chamber of Commerce by three arbitrators appointed in accordance with the said Rules. The seat or legal place of the arbitration shall be London, England. The language of the arbitration shall be English. Sections 45 and 69 of the Arbitration Act 1996 shall not apply.

### 16.3 **Noteholders' Option**

At any time before any Noteholder has nominated an arbitrator to resolve any Dispute or Disputes pursuant to Condition 16.2 (*Arbitration*), the Noteholders, at their sole option, may elect by notice in writing (an “**Election Notice**”) to the Issuer that such Dispute(s) shall instead be resolved in the manner set out in Condition 16.4 (*English Courts*), 16.5 (*Appropriate Forum*) and 16.6 (*Rights of the Noteholders to take proceedings outside England*).

Following any such election, no arbitral tribunal shall have jurisdiction in respect of such Dispute(s).

### 16.4 **English Courts**

In the event that any of the Noteholders serves an Election Notice in respect of any Dispute(s) pursuant to Condition 16.3 (*Noteholders' Option*), the Issuer agrees for the benefit of the Noteholders that Condition 16.2 (*Arbitration*) shall not apply to any such Dispute and that the courts of England shall have exclusive jurisdiction to hear and determine any such Dispute(s) and that the Issuer may not commence proceedings (“**Proceedings**”) for the determination of any such Dispute(s) in any other jurisdiction.

### 16.5 **Appropriate forum**

For the purposes of Condition 16.4 (*English Courts*), the Issuer irrevocably submits to the jurisdiction of the courts of England and waives any objection which it might now or hereafter have to the courts of England being nominated as the forum to hear and determine any Proceedings and agrees not to claim that any such court is not a convenient or appropriate forum.

### 16.6 **Rights of the Noteholders to take proceedings outside England**

Condition 16.4 (*English Courts*) and 16.5 (*Appropriate Forum*) are for the benefit of the Noteholders only. As a result, following the service of an Election Notice by any of the Noteholders, nothing in this Condition 16 (*Governing Law and Submission to Jurisdiction*) shall (or shall be construed so as to) limit the right of any of the Noteholders to bring Proceedings for the determination of any such Dispute(s) in the courts of England or in any other court of competent jurisdiction, nor shall the bringing of such Proceedings in any one or more jurisdictions preclude the bringing of Proceedings by any other Noteholders in any other jurisdiction (whether concurrently or not) if and to the extent permitted by law.

## 16.7 **Process Agent**

The Issuer confirms and agrees that the documents which start any Proceedings and any other documents required to be served in relation to those Proceedings may be served on it by being delivered to His Excellency Mr. Ambassador of the Republic of Côte d'Ivoire located at 2 Upper Belgrave Street, London SW1X 8BJ, United Kingdom. If such agent ceases to be able to act as a process agent or to have an address in England, the Issuer irrevocably agrees to appoint a new process agent in England as soon as practicable thereafter. Nothing in this paragraph shall affect the right of any party to serve process in any other manner permitted by law.

## 16.8 **Consent to Enforcement and Waiver of Immunity**

The Issuer consents generally in respect of any Proceedings to the giving of any relief or the issue of any process in connection with such Proceedings including (without limitation but subject as provided in the following paragraph) the making, enforcement or execution against any property whatsoever of any order or judgment which is made or given in such Proceedings.

To the extent that the Issuer may in any jurisdiction claim for itself or its assets or revenues immunity from suit, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process, including in relation to the enforcement of any arbitration award, and to the extent that such immunity (whether or not claimed) may be attributed in any such jurisdiction to the Issuer or its assets or revenues, the Issuer agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction (and consents generally for the purposes of the State Immunity Act 1978 to the giving of any relief or the issue of any process in connection with any Proceedings). The Issuer does not hereby waive such immunity from execution or attachment in respect of (a) property, including any bank account, used by a diplomatic or consular mission of the Issuer or its special missions or delegations to international organizations, (b) property of a military character and under the control of a military authority or defence agency of the Issuer, or (c) property located in the Republic of Côte d'Ivoire and dedicated to a public or governmental use by the Issuer (as distinct from property which is for the time being in use or intended for use for commercial purposes within the meaning of the State Immunity Act 1978). The Issuer reserves the right to plead sovereign immunity under the US Foreign Sovereign Immunities Act of 1976 with respect to any actions brought against it in any court of or in the United States of America under any United States federal or state securities law.

## 17. **Rights of Third Parties**

No rights are conferred on any person under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of the Notes, but this does not affect any right or remedy of any person which exists or is available apart from that Act.

## 18. **Currency Indemnity**

If any sum due from the Issuer in respect of the Notes or any order or judgment given or made in relation thereto has to be converted from the currency (the “**first currency**”) in which the same is payable under these Conditions or such order or judgment into another currency (the “**second currency**”) for the purpose of (a) making or filing a claim or proof against the Issuer, (b) obtaining an order or judgment in any court or other tribunal or (c) enforcing any order or judgment given or made in relation to the Notes, the Issuer shall indemnify each Noteholder, on the written demand of such Noteholder addressed to the Issuer and delivered to the Issuer or to the Specified Office of the Fiscal Agent, against any loss suffered as a result of any discrepancy between (i) the rate of exchange used for such purpose to convert the sum in question from the first currency into the second currency and (ii) the rate or rates of exchange at which such Noteholder may in the ordinary course of business purchase the first currency with the second currency upon receipt of a sum paid to it in satisfaction, in whole or in part, of any such order, judgment, claim or proof.

This indemnity constitutes a separate and independent obligation of the Issuer and shall give rise to a separate and independent cause of action.

## FORM OF NOTES

### Form of Notes

The Notes of each Series will be in registered form, without coupons attached. The Notes of each Series sold in offshore transactions in reliance on Regulation S will be represented on issue by the Unrestricted Global Note Certificates, which will be deposited with a common depository and registered in the name of a nominee of Euroclear or Clearstream. Until 40 days after the issue date of each Series of Notes, beneficial interests in the Unrestricted Global Note Certificates may be held only through Euroclear or Clearstream, unless delivery is made through the related Restricted Global Note Certificate in accordance with the certification requirements described below. The Notes of each Series sold to qualified institutional buyers in reliance on Rule 144A will be represented on issue by the Restricted Global Note Certificates, which will be deposited with a common depository, and registered in the name of a nominee of Euroclear or Clearstream.

The Notes of each Series (including beneficial interests in the Global Note Certificates) will be subject to certain restrictions on transfers, set forth in the relevant Notes and in the relevant Agency Agreement and will bear a legend regarding such restrictions as provided in the “*United States Transfer Restrictions*”. Under certain circumstances, transfer may be made only upon receipt by the Registrar of a written certification in the form of Schedule 8 (*Form of Transfer Certificate*) to the relevant Agency Agreement.

### Book Entry Ownership of the Global Note Certificates

The Issuer has applied to Euroclear and Clearstream for acceptance in their respective book entry settlement systems of the relevant Unrestricted Global Note Certificate and Restricted Global Note Certificate for each Series.

Principal and interest payments on each Series the Notes will be made by the Issuer through the Paying Agents to a nominee of Euroclear and Clearstream as the holder of the respective Unrestricted Global Note Certificates and of the respective Restricted Global Note Certificates. All payments duly made by the Issuer as aforesaid shall discharge the liability of the Issuer under the relevant Series of the Notes to the extent of the sum or sums so paid. Therefore, after such payments have been duly made, none of the Issuer or any of the Paying Agents will have any direct responsibility or liability for the payment of principal or interest on each Series of the Notes to owners of beneficial interests in the respective Global Note Certificates.

### Exchange of Interests in Notes

On or prior to the fortieth day after the issue date of each Series of the Notes, a beneficial interest in the relevant Unrestricted Global Note Certificate may be held only through Euroclear or Clearstream, unless delivery is made through the respective Restricted Global Note Certificate in accordance with the certification requirements described in this paragraph.

A holder of a beneficial interest in each Unrestricted Global Note Certificate may transfer such interest within the United States to a person who takes delivery in the form of an interest in the respective Restricted Global Note Certificate in accordance with the rules and operating procedures of Euroclear and Clearstream and only upon receipt by the Registrar of a written certification in the form of Schedule 8 (*Form of Transfer Certificate*) to the relevant Agency Agreement from the transferors. Where such transfer or exchange is to occur prior to the fortieth day of the issue date of the relevant Unrestricted Global Note Certificate, the certificate shall include a statement that the transfer is being made to a person whom the transferor, and any person acting on its behalf, reasonably believes is a qualified institutional buyer and that the transaction is being made in reliance on Rule 144A. After the fortieth day of the issue date of the Notes (but not earlier), investors may also hold interests in each relevant Unrestricted Global Note Certificate through organizations other than Euroclear or Clearstream that are either Euroclear participants or Clearstream participants.

Beneficial interests in the relevant Restricted Global Note Certificate may be transferred to a person who takes delivery in the form of an interest in the respective Restricted Global Note Certificate without any written certification from the transferor or the transferee.

Beneficial interests in each relevant Restricted Global Note Certificate may be transferred to a person who takes delivery in the form of an interest in the respective Unrestricted Global Note Certificate only upon receipt by the Registrar of a written certification in the form of Schedule 8 (*Form of Transfer Certificate*) to the Agency Agreement of each Series of Notes from the transferor to the effect that such transfer is in accordance with the transfer restrictions applicable to the Notes and Rule 903 or 904 of Regulation S or Rule 144A under the Securities Act (if applicable). If such transfer occurs on or prior to the fortieth day after the issue date of the Notes, the interest transferred will be held immediately thereafter through Euroclear or Clearstream.

Any beneficial interest in one of the Global Note Certificates that is transferred to an entity who takes delivery in the form of an interest in the other respective Global Note Certificate will, upon transfer, cease to be an interest in such Global Note Certificate and become an interest in the other respective Global Note Certificate and, accordingly, will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to beneficial interests in such other respective Global Note Certificate for as long as it remains such an interest.

Transfer of interests in the Global Note Certificates within Euroclear and Clearstream will be in accordance with the usual rules and operating procedures of the relevant clearing system. The laws of some States of the United States require that certain persons receive Individual Note Certificates in respect of their holdings of the Notes. Consequently, the ability to transfer interests in a Global Note Certificate to such persons will be limited. Because Euroclear and Clearstream only act on behalf of participants, who in turn act on behalf of indirect participants, the ability of a person having an interest in a Global Note Certificate to pledge such interest to persons or entities which do not participate in the relevant clearing system or otherwise take actions in respect of such interest, may be affected by the lack of an Individual Note Certificate representing such interest.

Although Clearstream and Euroclear have agreed to the foregoing procedures in order to facilitate transfers of interests in Global Note Certificates among participants and account holders of Euroclear and Clearstream, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. Neither the Issuer, the Registrar nor any Paying Agent will have any responsibility for the performance of Euroclear and Clearstream or their respective direct or indirect participants or account holders of their respective obligations under the rules and procedures governing their respective operations.

### **Individual Note Certificates**

The Issuer will issue the Notes in individual form only if:

- (i) Euroclear or Clearstream is closed for a continuous period of 14 days (other than by reason of legal holidays) or announces an intention to permanently cease business; or
- (ii) the Issuer, at its option, elects to terminate the book entry system through Euroclear or Clearstream; or
- (iii) an Event of Default (as defined in Condition 10 (*Events of Default*) of each of the Terms and Conditions of the 2031 Notes and the Terms and Conditions of the 2040 Notes, as applicable, has occurred and is continuing, upon request of a Noteholder.

### **Global Depositaries**

The information set out below in connection with Euroclear and Clearstream (together the “**clearing systems**”) is subject to change in or reinterpretation of the rules, regulations and procedures of the clearing systems currently in effect. The information in this section concerning the clearing systems has been obtained from sources that the Issuer believes to be reliable, but neither the Issuer nor any Joint Lead Manager takes any responsibility for the accuracy of such information. Investors wishing to use the facilities of any of the clearing systems are advised to confirm the applicability of the rules, regulations and procedures of the relevant clearing system. Neither the Issuer nor any other party to the relevant Agency Agreement will have any responsibility or liability for any aspect of the records relating to, or payments made on account of interest in the Notes held through the facilities of, any clearing system or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

### ***Euroclear and Clearstream***

Euroclear and Clearstream have advised the Issuer as follows:

Euroclear and Clearstream hold securities and book entry interests in securities for participating organizations and facilitate the clearance and settlement of securities transactions between their respective participants through electronic book entry changes in accounts of such participants. Euroclear and Clearstream provide to their participants, among other things, services for safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream interface with domestic securities markets. Euroclear and Clearstream participants are financial institutions such as underwriters, securities brokers and dealers, banks, trust companies and certain other organizations. Indirect access to Euroclear and Clearstream is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a Euroclear or Clearstream participant, either directly or indirectly.

## TAXATION

*The following discussion summarizes certain U.S. federal income and Côte d'Ivoire tax considerations that may be relevant to a holder of Notes that is not a resident of Côte d'Ivoire. This overview does not describe all of the tax considerations that may be relevant to the holder or such holder's situation, particularly if the holder is subject to special tax rules. The holder should consult its tax adviser about the tax consequences of holding debt securities, including the relevance to such holder's particular situation of the considerations discussed below, as well as of state, local and other tax laws.*

### **The Republic of Côte d'Ivoire Taxation**

This section, which has been approved by the *Direction générale des impôts* of the Republic, describes the material Ivorian tax consequences of owning and disposing of the Notes with respect to Ivorian taxes, including in particular under the tax on income from movable capital (*Impôts sur le revenu des capitaux mobiliers*), for investors that are not considered to be residents of the Côte d'Ivoire for tax purposes (“**Non-residents**”).

#### ***Tax treatment applicable to the Notes***

The following section does not purport to address the treatment of Notes with respect to any Ivorian taxes other than tax on income from movable capital.

Ivorian tax on income from movable capital encompasses two schedular taxes, namely (a) the tax on income from transferable securities such as bonds (*Impôt sur le revenu des valeurs mobilières*), and (b) the tax on income from debt claims (*Impôt sur le revenu des créances*).

#### ***Tax on income from transferable securities***

Under Article 180 of the Côte d'Ivoire general tax code (*Code Général des Impôts de Côte d'Ivoire*), the tax on income from transferable securities is imposed on interest, arrearages and other amounts payable on bonds (*obligations*) issued by public entities and certain other issuers.

Under Article 218 of the Côte d'Ivoire general tax code, interest, arrearages and other amounts payable by or on behalf of the Republic as well as capital gains with respect to borrowings issued by the Republic outside the Republic are exempt from the tax on income from movable capital.

Under Article 236 of the Côte d'Ivoire general tax code, payments and redemption premiums on bonds made or paid to holders of bonds that are not established in a member state of the WAEMU are exempt from the tax on income from movable capital.

#### ***Tax on income from debt claims***

The tax on income from debt claims applies to interest, arrearages and other amounts payable on debt claims of a kind described in Article 192 of the Côte d'Ivoire general tax code. Article 192 does not refer to amounts payable on bonds.

As described above, Article 218 of the Côte d'Ivoire general tax code provides for an exemption of tax on income from movable capital, which includes tax on income from debt claims, on sovereign loans raised outside the Republic.

#### ***Taxes withheld at source***

Based on the provisions described above, and in particular on Article 218 of the Côte d'Ivoire general tax code, the Ivorian tax administration has confirmed that all payments and income (including capital gains) that could be generated by the Notes will be exempt from all and any Ivorian withholding tax applicable to Non-resident bondholders.

## U.S. Federal Income Taxation

The following discussion summarizes certain U.S. federal income tax considerations that may be material to a beneficial owner of Notes that is a citizen or resident of the United States, or a domestic corporation or otherwise subject to U.S. federal income tax on a net income basis in respect of the Notes (a “**U.S. Holder**”) that purchases Notes in the initial offering at the initial offering price and holds the Notes as capital assets. This overview does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a decision to invest in the Notes, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of taxpayers or that are generally assumed to be known by investors. This overview also does not address the tax considerations that may be applicable to persons that may be subject to special tax rules, such as banks, financial institutions, insurance companies, thrift institutions, regulated investment companies, real estate investment trusts, tax-exempt organizations, entities or arrangements classified as partnerships and partners therein, traders in securities that elect to mark-to-market and dealers in securities or currencies, persons that hold or will hold Notes as part of a position in a “straddle” or as part of a “hedging,” “conversion” or other integrated investment transaction for U.S. federal income tax purposes, non-resident alien individuals present in the United States for 183 days or more during the taxable year or persons whose functional currency is not the U.S. dollar.

U.S. Holders that use an accrual method of accounting for tax purposes (“accrual method holders”) generally are required to include certain amounts in income no later than the time such amounts are reflected on certain financial statements (the “book/tax conformity rule”). The application of the book/tax conformity rule thus may require the accrual of income earlier than would be the case under the general tax rules described below. It is not entirely clear to what types of income the book/tax conformity rule applies, or, in some cases, how the rule is to be applied if it is applicable. However, recently released proposed regulations generally would exclude, among other items, original issue discount and market discount (in either case, whether or not *de minimis*) from the applicability of the book/tax conformity rule. Although the proposed regulations generally will not be effective until taxable years beginning after the date on which they are issued in final form, taxpayers generally are permitted to elect to rely on their provisions currently. U.S. Holders that use an accrual method of accounting should consult with their tax advisers regarding the potential applicability of this legislation to their particular situation.

This overview is based on the Internal Revenue Code of 1986, as amended (the “**Code**”), Treasury regulations promulgated thereunder, and administrative and judicial interpretations thereof, as of the date hereof, all of which are subject to change, possibly on a retroactive basis. The discussion does not describe any tax consequences of the alternative minimum tax or Medicare tax on net investment income, or tax consequences arising out of the laws of any state, local or foreign jurisdiction.

### *Interest Income*

Payments of stated interest on a Note (including any Additional Amounts, but excluding any pre-issuance accrued interest) will generally be taxable to a U.S. Holder as ordinary interest income when such interest is accrued or received, in accordance with the U.S. Holder’s regular method of tax accounting. Interest income on the Notes will be treated as foreign-source income for U.S. foreign tax credit purposes.

It is expected, and this discussion assumes, that the Notes will be issued with no more than a *de minimis* amount of original issue discount (“**OID**”) for U.S. federal income tax purposes. In general, OID is the difference between the issue price and the stated redemption price at maturity of such Notes. In general, however, if the Notes are issued with OID that is equal to or more than a *de minimis* amount, a U.S. Holder will be required to include OID in gross income, as ordinary gross income, under a “constant yield method” before the receipt of cash attributable to such income, regardless of the U.S. Holders’ regular method of accounting for U.S. federal income tax purposes. In that event, among other things, cash-method U.S. Holders will be required to accrue stated interest on the Note under the rules for OID described above, and all U.S. Holders will be required to accrue discount that would otherwise fall under the *de minimis* threshold.

The amount of interest income realized by a U.S. Holder that uses the cash method of tax accounting will be the U.S. dollar value of the Euro-denominated stated interest payment based on the exchange rate in effect on the date of receipt regardless of whether the payment is in fact converted into U.S. dollars. A U.S. Holder that uses the accrual method of accounting for tax purposes will accrue interest income on the Note in Euros and translate the amount accrued into U.S. dollars based on the average exchange rate in effect during the interest accrual period (or portion thereof within the U.S. Holder's taxable year), or at the accrual-method U.S. Holder's election, at the spot rate of exchange on the last day of the accrual period (or the last day of the taxable year within such accrual period if the accrual period spans more than one taxable year), or at the spot rate of exchange on the date of receipt, if this date is within five business days of the last day of the accrual period. A U.S. Holder that makes this election must apply it consistently to all debt instruments from year to year and cannot change the election without the consent of the U.S. Internal Revenue Service (the "IRS"). A U.S. Holder that uses the accrual method of accounting for tax purposes will recognize foreign currency gain or loss, as the case may be, on the receipt of an interest payment made with respect to a Note if the exchange rate in effect on the date the payment is received differs from the rate applicable to a previous accrual of that interest income. Amounts attributable to pre-issuance accrued interest will generally not be includable in income, except to the extent of foreign currency gain or loss attributable to any changes in exchange rates during the period between the date the U.S. Holder acquired the Note and the first interest payment date. This foreign currency gain or loss will generally be treated as ordinary income or loss and will not be treated as an adjustment to interest income received on the Note.

#### *Sale, Exchange or Disposition of Notes*

A U.S. Holder will generally recognize gain or loss on the sale, exchange or other disposition of the Notes in an amount equal to the difference between the amount the U.S. Holder realizes on such sale, exchange or other disposition (less any accrued and unpaid interest, which will be taxable as such) and the U.S. Holder's adjusted tax basis in the Notes. A U.S. Holder's adjusted tax basis in a Note will, in general, equal the U.S. Holder's cost for the Note and reduced (but not below zero) by any payments received by a U.S. Holder other than payments of qualified interest. Subject to the discussion below of foreign currency gain or loss in respect of the Notes, the gain or loss that the U.S. Holder recognizes on the sale, exchange or retirement of a Note generally will be capital gain or loss and will be long-term capital gain or loss if the U.S. Holder has held the Note for more than one year on the date of disposition. Certain non-corporate U.S. Holders (including individuals) may be eligible for preferential rates of taxation on long-term capital gain. The deductibility of capital losses is subject to limitations.

If a U.S. Holder receives Euros on a sale, exchange, retirement, or as an Amortization Amount, its amount realized will be the U.S. dollar value of the Euros received calculated at the exchange rate in effect on the date the instrument is disposed of or the date such Amortization Amount is received. The cost of a Note to a U.S. Holder will be the U.S. dollar value of the Euro-denominated purchase price on the date of purchase (or, in the case of an Amortization Amount, the relevant portion of the purchase price). If the Notes are treated as traded on an established securities market, a cash-method U.S. Holder (and, if it so elects, an accrual-method U.S. Holder) will determine the U.S. dollar value of the cost of, or amount realized on, the Note by translating the amount paid at the spot rate of exchange on the settlement date of the purchase or sale. This election must be applied consistently to all debt instruments from year to year and cannot be changed without the consent of the IRS. U.S. Holders should consult their own tax advisers about the availability of this treatment, and in the case of accrual-method U.S. Holders, the advisability of making this election in their particular circumstances.

Gain or loss recognized by a U.S. Holder on the sale, exchange or retirement of a Note generally will be treated as ordinary income or loss to the extent that the gain or loss is attributable to changes in exchange rates during the period in which the U.S. Holder held the Note. This foreign currency gain or loss will not be treated as an adjustment to interest income received on the Notes. In addition, upon the sale, exchange or retirement of a Note, a U.S. Holder that uses the accrual method may realize foreign currency gain or loss attributable to amounts received in respect of accrued and unpaid interest. The amount of foreign currency gain or loss realized with respect to principal and accrued interest will,

however, be limited to the amount of overall gain or loss realized on the disposition. For an accrual-method U.S. Holder that cannot or does not make the election described above, the foreign currency gain or loss may include amounts attributable to changes in exchange rates between the trade date and the settlement date. The conversion of U.S. dollars to Euros and the immediate use of Euros to purchase a Note generally will not result in taxable gain or loss for a U.S. Holder.

#### *Backup Withholding and Information Reporting*

In general, information reporting requirements will apply to payments on the Notes made to, and the proceeds of dispositions of Notes effected by, certain U.S. Holders unless the U.S. Holder establishes it is an exempt recipient, and backup withholding will apply to such amounts if the U.S. Holder fails to establish it is an exempt recipient and fails to provide an accurate taxpayer identification number or is notified by the IRS that it has failed to report all interest and dividends required to be shown on its U.S. federal income tax return. Backup withholding is not an additional tax. The amount of any backup withholding will be allowed as a credit against the U.S. Holder's federal income tax liability and may entitle the U.S. Holder to a refund, provided that the required information is timely furnished to the IRS.

#### *Specified Foreign Financial Assets*

Individual U.S. Holders that own "specified foreign financial assets" with an aggregate value in excess of US\$50,000 on the last day of the taxable year or US\$75,000 at any time during the taxable year are generally required to file an information statement along with their tax returns, currently on IRS Form 8938, with respect to such assets. "Specified foreign financial assets" include any financial accounts held at a non-U.S. financial institution, as well as securities issued by a non-U.S. issuer (which may include any Notes issued in individual form) that are not held in accounts maintained by financial institutions. Higher reporting thresholds apply to certain individuals living abroad and to certain married individuals. Regulations extend this reporting requirement to certain entities that are treated as formed or availed of to hold direct or indirect interests in specified foreign financial assets based on certain objective criteria. U.S. Holders that fail to report the required information could be subject to substantial penalties. In addition, the statute of limitations for assessment of tax would be suspended, in whole or part. Prospective investors should consult their own tax advisers concerning the application of these rules to their investment in the Notes, including the application of the rules to their particular circumstances.

#### *Reportable Transactions*

A U.S. Holder that participates in a "reportable transaction" will be required to disclose its participation to the IRS. The scope and application of these rules is not entirely clear. A U.S. Holder may be required to treat a foreign currency exchange loss relating to a Note as a reportable transaction if the loss exceeds US\$50,000 in a single taxable year if the U.S. Holder is an individual or trust, or higher amounts for other U.S. Holders. In the event the acquisition, ownership or disposition of a Note constitutes participation in a "reportable transaction" for purposes of these rules, a U.S. Holder will be required to disclose its investment to the IRS, currently on IRS Form 8886. Prospective purchasers should consult their tax advisers regarding the application of these rules to the acquisition, ownership or disposition of Notes.

### **The Proposed Financial Transaction Tax**

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transaction tax (the "**FTT**") in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**"). However, Estonia has since stated that it will not participate.

The Commission's Proposal has very broad scope and could, if introduced in its current form, impose a tax at generally not less than 0.1%, generally determined by reference to the amount of consideration paid, on certain dealings in Notes (including secondary market transactions) in certain circumstances. The mechanism by which the tax would be applied and collected is not yet known, but if the proposed directive or any similar tax is adopted, secondary market transactions in the Notes would be subject to higher costs, and the liquidity of the market for the Notes may be diminished.

Under the Commission's Proposal, the FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a Participating Member State. A financial institution may be, or be deemed to be "established" in a Participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a Participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a Participating Member State.

However, the FTT proposal remains subject to negotiation between Participating Member States and the scope of such tax is uncertain. Based on recent public statements, the Participating Member States (excluding Estonia) have agreed to continue negotiations on the basis of a proposal that would reduce the scope of the FTT and would only concern listed shares of European companies. Such proposal remains subject to change until a final approval and it may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate and/or certain of the Participating Member States (in addition to Estonia which already withdrew) may decide to withdraw.

Prospective holders of the Notes are advised to seek their own professional advice in relation to the consequences of the FTT that could be associated with subscribing for, purchasing, holding and disposing of the Notes.

## SUBSCRIPTION AND SALE

Each of the Joint Lead Managers has, pursuant to a Subscription Agreement entered into with Côte d'Ivoire (the "**Subscription Agreement**") to be dated on or about 15 October 2019 severally and not jointly agreed to subscribe or procure subscribers for the principal amount of the Notes at the issue price of 99.015% of the principal amount of the 2031 Notes and 100.00% of the principal amount of the 2040 Notes.

The Issuer will reimburse the Joint Lead Managers in respect of certain of their expenses, and has agreed to indemnify the Joint Lead Managers against certain liabilities (including liabilities under the Securities Act) incurred in connection with the issue of the Notes. The Subscription Agreement may be terminated in certain circumstances prior to payment of the net subscription money in respect of the Notes of any or either Series to the Issuer. The Subscription Agreement provides that the obligations of the Joint Lead Managers to subscribe for, or procure subscriptions for, the Notes are subject to certain customary conditions.

Each of the Joint Lead Managers and its affiliates have, from time to time, engaged in, and may in the future engage in, various investment banking and/or commercial banking transactions with, and may perform services for, the Issuer in the ordinary course of business. In addition, in the ordinary course of their business activities, each of the Joint Lead Managers and its affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer. Certain of the Joint Lead Managers or their respective affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Joint Lead Managers and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Joint Lead Managers and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

### **Allocation of the Notes**

Allocations of the Notes to potential investors in the offering will be made in accordance with customary allocation processes and procedures following the completion of the bookbuilding process for the offering of Notes and will be made at the sole discretion of Côte d'Ivoire. Côte d'Ivoire intends, in connection with the allocation of the Notes in the offering, to consider among other factors whether or not the relevant investor seeking an allocation of the Notes has also tendered notes pursuant to the Tender Offers, and if so, the aggregate principal amount of such notes tendered by such Investor and accepted for purchase by the Issuer. When determining allocations of the Notes, Côte d'Ivoire intends to look favourably upon those investors whose outstanding notes have been validly tendered and accepted for purchase pursuant to the Tender Offers. However, no assurance can be given that any investor that tenders outstanding notes in the Tender Offers will receive an allocation of the Notes at the levels it may wish to subscribe for, or at all.

### **United States**

The Notes have not been and will not be registered under the Securities Act and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, the Joint Lead Managers have severally and not jointly agreed to offer the Notes for resale in the United States initially only to persons they reasonably believe to be qualified institutional buyers in reliance on Rule 144A and outside the United States in offshore transactions in reliance on Regulation S. Terms used in this paragraph have the respective meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering, an offer or sale of Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with Rule 144A under the Securities Act.

Each Joint Lead Manager has severally and not jointly represented and agreed that neither such Joint Lead Manager nor its affiliates, nor any persons acting on its or their behalf, have engaged or will engage in any directed selling efforts (as defined in Regulation S) with respect to the Notes.

To the extent that any Joint Lead Managers that are not U.S. registered broker dealers intend to effect any sales of Notes in the United States, they will only do so through one or more U.S. registered broker dealer affiliates as permitted by Financial Industry Regulatory Authority guidelines.

### **United Kingdom**

Each Joint Lead Manager has severally and not jointly represented and agreed that:

- (a) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the Financial Services and Markets Act 2000, as amended from time to time, (the “**FSMA**”) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer; and
- (b) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

### **The Republic of Côte d’Ivoire**

Each Joint Lead Manager has severally and not jointly represented, warranted and agreed that it has not offered or sold, and will not offer or sell, any Notes in Côte d’Ivoire and the WAEMU except in compliance with all applicable rules and regulations.

### **The Republic of Italy**

The offering of the Notes has not been cleared with the *Commissione Nazionale per le Società e la Borsa* (“**CONSOB**”) pursuant to Italian securities legislation and, accordingly, each Joint Lead Manager has severally but not jointly represented and agreed that it has not offered, sold or delivered, and will not offer, sell or deliver, directly or indirectly, any Notes in the Republic of Italy (“**Italy**”) and that copies of this Prospectus or any other document relating to the Notes have not and will not be distributed in Italy by it, except (i) to qualified investors, as defined in Article 2, letter e) of the Prospectus Regulation, pursuant to Article 1, fourth paragraph, letter a) of the Prospectus Regulation as implemented by Article 35, paragraph 1, letter d) of CONSOB Regulations No. 20307 of 15 February 2018 (the “**Intermediaries Regulation**”); or (ii) in any other circumstances which are exempted from the rules on public offerings pursuant to Article 1 of the Prospectus Regulation.

For the purposes of this provision, the expression “offer of Notes to the public in Italy” means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe the Notes, include the placement thereof through authorised intermediaries.

Each Joint Lead Manager has severally but not jointly represented and agreed that any such offer, sale or delivery of the Notes, or distribution of copies of this Prospectus, or any other document relating to the Notes, by it in Italy under (i) or (ii) above must be effected in accordance with all Italian securities, tax, exchange control and other applicable laws and regulations and, in particular, must be made:

- (a) by investment firms, banks or financial intermediaries permitted to conduct such activities in Italy in accordance with the relevant provisions of the Intermediaries Regulation, Legislative Decree No. 58 of 24 February 1998, CONSOB Regulation No. 20307 of 15 February 2018 and Legislative Decree No. 385 of 1 September 1993 (the “**Banking Act**”) (in each case, as amended from time to time) and any other applicable laws or regulations;

- (b) in compliance with Article 129 of the Banking Act and the implementing guidelines of the Bank of Italy, as amended from time to time, pursuant to which the Bank of Italy may request information on the offering or issue of securities in Italy; and
- (c) in compliance with any other applicable laws and regulations or requirements that may be imposed from time to time by the Bank of Italy, CONSOB or any other Italian authority.

Any investor purchasing the Notes is solely responsible for ensuring that any offer, sale, delivery or resale of the Notes it purchased in this offering occurs in compliance with applicable Italian laws and regulations.

**General**

No action has been taken by the Issuer or any of the Joint Lead Managers that would, or is intended to, permit a public offer of the Notes in any country or jurisdiction where any such action for that purpose is required. Accordingly, each Joint Lead Manager has severally and not jointly undertaken that it will not, directly or indirectly, offer or sell any Notes or distribute or publish the Prospectus or any other document or information relating to the Notes in any country or jurisdiction except under circumstances that will, to the best of its knowledge and belief, result in compliance, in all material respects, with any applicable laws and regulations and all offers and sales of Notes by it will be made on the same terms.

## UNITED STATES TRANSFER RESTRICTIONS

*Because of the following restrictions, purchasers are advised to consult legal counsel prior to making any offer, sale, resale, pledge or other transfer of the Notes.*

Each purchaser of the Notes will be deemed to have represented and agreed as follows (terms used in this paragraph that are defined in Rule 144A or in Regulation S under the Securities Act are used herein as defined therein):

1. it is not an “**affiliate**” (as defined in Rule 144 under the Securities Act) of the Republic or acting on behalf of the Republic and (A) (i) is a qualified institutional buyer, (ii) is aware that the sale of the Notes to it is being made in reliance on Rule 144A, and (iii) is acquiring such Notes for its own account or the account of a qualified institutional buyer or (B) it is, or at the time the Notes are purchased will be, the beneficial owner of such Notes and is outside the United States (within the meaning of Regulation S);
2. it acknowledges that the Notes have not been and will not be registered under the Securities Act or with any securities regulatory authority of any jurisdiction and may not be offered or sold within the US except as set forth below;
3. it understands and agrees that if in the future it decides to resell, pledge or otherwise transfer any Notes or any beneficial interests in any Notes other than an Unrestricted Global Note Certificate, such Notes may be resold, pledged or transferred only (A) by an initial investor (i) to the Republic, (ii) to a person whom the seller reasonably believes is a qualified institutional buyer that purchases for its own account or for the account of a qualified institutional buyer in a transaction meeting the requirements of Rule 144A under the Securities Act, (iii) in an offshore transaction meeting the requirements of Rule 903 or 904 of Regulation S under the Securities Act or (iv) pursuant to an exemption from registration under the Securities Act provided by Rule 144 under the Securities Act (which may or may not be available) (resales described in sub clauses (i) through (iv) of this clause (A), “**Safe Harbor Resales**”), or (B) by a subsequent investor, in a Safe Harbor Resale or pursuant to any other available exemption from the registration requirements under the Securities Act (*provided that*, as a condition to the registration of transfer of any Notes otherwise than in a Safe Harbor Resale, the Republic or the Fiscal Agent may require delivery of any documents or other evidence (including but not limited to an opinion of counsel) that it, in its sole discretion, may deem necessary or appropriate to evidence compliance with such exemption), and in each of such cases, in accordance with any applicable securities laws of any state of the US and any other jurisdiction;
4. it agrees to, and each subsequent holder is required to, notify any purchaser of the Notes from it of the resale restrictions referred to in clause 3 above, if then applicable;
5. it understands and agrees that (A) Notes initially offered in the US to qualified institutional buyers will be represented on issue by a Restricted Global Note Certificate and (B) that Notes offered outside the US in reliance on Regulation S will be represented on issue by an Unrestricted Global Note Certificate;
6. it understands that the Notes, other than the Unrestricted Global Note Certificate, will bear a legend to the following effect unless otherwise agreed to by the Republic:

THIS NOTE HAS NOT BEEN REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933 AS AMENDED (THE “**SECURITIES ACT**”). THE HOLDER HEREOF, BY PURCHASING THIS NOTE, AGREES FOR THE BENEFIT OF THE REPUBLIC OF CÔTE D’IVOIRE (THE “**REPUBLIC**”) THAT THIS NOTE MAY BE OFFERED, RESOLD, PLEDGED OR OTHERWISE TRANSFERRED ONLY (A) BY AN INITIAL INVESTOR (AS DEFINED BELOW)(1) TO THE REPUBLIC, (2) SO LONG AS THIS NOTE IS ELIGIBLE FOR RESALE PURSUANT TO RULE 144A UNDER THE SECURITIES ACT (“**RULE 144A**”), TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A) IN ACCORDANCE WITH RULE 144A, (3) IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 903 OR 904 OF REGULATION S UNDER THE SECURITIES ACT OR (4) PURSUANT TO AN EXEMPTION FROM REGISTRATION IN ACCORDANCE WITH RULE 144 UNDER THE SECURITIES ACT (WHICH MAY OR MAY NOT BE AVAILABLE)

(RESALES DESCRIBED IN SUBCLAUSES(1) THROUGH (4) OF THIS CLAUSE (A), “**SAFE HARBOR RESALES**”), OR (B) BY A SUBSEQUENT INVESTOR, IN A SAFE HARBOR RESALE OR PURSUANT TO ANY OTHER AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT (*PROVIDED THAT*, AS A CONDITION TO THE REGISTRATION OF TRANSFER OF ANY NOTES OTHERWISE THAN IN A SAFE HARBOR RESALE, THE REPUBLIC OR THE TRANSFER AGENT MAY REQUIRE DELIVERY OF ANY DOCUMENTS OR OTHER EVIDENCE (INCLUDING BUT NOT LIMITED TO AN OPINION OF COUNSEL) THAT IT, IN ITS SOLE DISCRETION, MAY DEEM NECESSARY OR APPROPRIATE TO EVIDENCE COMPLIANCE WITH SUCH EXEMPTION), AND IN EACH OF SUCH CASES, IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES AND ANY OTHER JURISDICTION, AS PROVIDED IN THE AGENCY AGREEMENT. THE HOLDER HEREOF, BY PURCHASING THIS NOTE, REPRESENTS AND AGREES FOR THE BENEFIT OF THE REPUBLIC THAT IT WILL NOTIFY ANY PURCHASER OF THIS NOTE FROM IT OF THE RESALE RESTRICTIONS REFERRED TO ABOVE;

FOR ALL PURPOSES OF THIS NOTE, THE TERM “**INITIAL INVESTOR**” MEANS ANY PERSON WHO, IN CONNECTION WITH THE INITIAL DISTRIBUTION OF THIS NOTE, ACQUIRES SUCH NOTE FROM THE REPUBLIC OR ANY JOINT LEAD MANAGER (AS SUCH TERM IS DEFINED IN THE AGENCY AGREEMENT) PARTICIPATING IN SUCH DISTRIBUTION OR ANY AFFILIATE OF ANY OF THE FOREGOING;

7. it acknowledges that, prior to any transfer of Notes or of beneficial interests in a Global Note Certificate, the holder of Notes or the holder of beneficial interests in a Global Note Certificate, as the case may be, may be required to provide certifications and other documentation relating to the manner of such transfer and submit such certifications and other documentation as provided in the relevant Agency Agreement; and
8. it acknowledges that the Republic and the Joint Lead Managers and others will rely upon the truth and accuracy of the foregoing acknowledgments, representations and agreements and agrees that, if any of such acknowledgments, representations and agreements deemed to have been made by virtue of its purchase of Notes are no longer accurate, it shall promptly notify the Republic, and if it is acquiring any Notes as a fiduciary or agent for one or more accounts, it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgments, representations and agreements on behalf of each such account.

## GENERAL INFORMATION

### Authorization

The Republic has obtained all necessary consents, approvals and authorizations in Côte d'Ivoire in connection with the issue and performance of the Notes. The issue of the Notes was authorized pursuant to (i) the Finance Law No. 2018-984 dated 28 December 2018 (as published in the Official Journal on 28 December 2018), (ii) the Presidential Decree No. 2018-614 dated 4 July 2018, appointing the Prime Minister, (iii) the Presidential Decree No. 2018-617 dated 10 July 2018 appointing the Prime Minister, Minister of Budget and State Portfolio, (iv) the Presidential Decree No. 2019-726 dated 4 September 2019 on the appointment of the Members of the Government of the Republic of Côte d'Ivoire, appointing amongst other things, (a) the Minister of Economy and Finance, and (b) the Minister to the Prime Minister, in charge of Budget and State Portfolio and (v) the Presidential Decree No. 2019-755 dated 18 September 2019 on the attribution of the Members of the Government of the Republic of Côte d'Ivoire, delegating certain powers, notably, to the Prime Minister, Minister of Budget and State Portfolio and the Minister of Economy and Finance.

### Listing and Admission to Trading

Application has been made to Euronext Dublin for the Notes to be admitted to its Official List and trading on the Regulated Market; however, no assurance can be given that such admission will be maintained. The Regulated Market is a regulated market for the purposes of MiFID II. It is expected that admission of the Notes to the Official List and to trading on the Regulated Market will be granted on or about 17 October 2019, subject only to the issue of the Notes. The expenses in connection with admission to trading of the Notes are expected to amount to €8,500.

### Clearing Systems

The Notes have been accepted for clearance through the facilities of Euroclear (1 Blvd du Roi Albert II Brussels, 1210, Belgium) and Clearstream (42 Avenue JF Kennedy, Luxembourg, 1855 Luxembourg). The relevant trading information is set out below:

2031 Notes sold pursuant to Regulation S:	Common Code.....	206478675
	ISIN .....	XS2064786754
2031 Notes sold pursuant to Rule 144A:	Common Code.....	206478683
	ISIN .....	XS2064786838
2040 Notes sold pursuant to Regulation S:	Common Code.....	206478691
	ISIN .....	XS2064786911
2040 Notes sold pursuant to Rule 144A:	Common Code.....	206478748
	ISIN .....	XS2064787489

### No significant change

Since 31 December 2018, there has been no significant change in the Issuer's gross public debt, foreign trade and balance of payments, foreign exchange reserves, tax and budgetary systems figures, financial position and resources and income and expenditure.

### Litigation

The Republic is not presently involved, nor has it in a period covering at least the previous 12 months been involved in any governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which the Republic is aware) which may have or have had in the recent past a significant effect on the financial position of the Republic.

## **Documents**

For the period of 12 months following the date of this Prospectus, copies of the following documents will be available for inspection during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted) at the specified office of the Paying Agent for the time being in London and on the website of the Ministry of Economy and Finance of the Issuer at [www.finances.gouv.ci](http://www.finances.gouv.ci):

- (a) the Agency Agreement which includes the forms of the Global Note Certificates and the Deed of Covenant in respect of the 2031 Notes;
- (b) the Agency Agreement which includes the forms of the Global Note Certificates and the Deed of Covenant in respect of the 2040 Notes; and
- (c) the budget of the Republic for the last two fiscal years.

In addition, copies of this Prospectus are available on Euronext's website at [www.ise.ie](http://www.ise.ie).

## **Joint Lead Managers transacting with the Republic**

Certain of the Joint Lead Managers and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services to, the Republic and its affiliates in the ordinary course of business.

## **Yield**

On the basis of the issue price of 99.015% of their principal amount, the yield on the 2031 Notes is 6.000% on an annual basis. On the basis of the issue price of 100.00% of their principal amount, the yield on the 2040 Notes is 6.875% on an annual basis.

## **Interested Persons**

No person involved in the offering of the Notes has any interest in such offering which is material to such offering.

## **Contact**

The Issuer's contact numbers are +225 20 25 09 80 and +225 20 20 08 70.

## **Legal Entity Identifier**

The Legal Entity Identifier (LEI) of the Issuer is 254900ICW11T82O6H590.
